It will startle many to hear of the death, on Wednesday last, at the early age of fifty-nine, of Mr. Robert Henry Bethune, general manager of the Dominion Bank. Few were better known in financial circles of Toronto, and few were more esteemed as possessing in large degree the peculiar qualities that constitute the successful banker. His probity was unquestioned; his judgment of transactions offered him and of the men who presented them was shrewd, and his resolution, when once he had determined upon a course of action, was unwavering. After he had looked upon the financial situation at home and abroad, he made his arrangements for it with a methodical coolness that never seemed to be disturbed. He had great pluck as a banker; let him be convinced that a customer's business was legitimate and the security adequate, and he would go great lengths in advances. While strong in his adherence to the rule of collateral for large advances, instead of relying upon names on paper, Mr. Bethune often showed great faith in those whose integrity he had tested, and has been known to give generous support to business men when they had little but their honor to commend them. A sedate and taciturn man in business hours and surroundings, he was much misconceived, many people believing that he was cold, not to say morose in disposition. This was because they did not know him when he had left off his bank manner. Undemonstrative he was, and indeed naturally shy, with probably far more sensitiveness than he got credit for, but true as steel, kindly always where kindness was deserved, beloved by his friends and intimates, who were permitted to discover that in his heart which the public did not.

Mr. Bethune had a good training as a banker. He was for a number of years in the employ of the Bank of Montreal. While in the service of that bank he occupied positions in a number of important branches, including New York, Toronto and Hamilton. He had the advantage, too, of personal instruction in the then new ideas of banking by Mr. Edwin H. King, the general manager.

It is about thirty years since Mr. Bethune left the Bank of Montreal to take the position of inspector of the Quebec Bank, and while in that institution received through Mr. Stevenson, the general manager, a knowledge of the timber trade of Canada that proved of great service. While local manager in Toronto for the Quebec Bank, about 1872, the quiet, shrewd young man attracted the attention of the gentlemen who were then organizing the Dominion Bank, notably Mr James Austin and Mr Frank Smith, and his services were secured as its cashier. The splendid success which has attended the career of that bank during the intervening years, largely through the capacity and the steady assiduity of its manager, is the best evidence that they chose wisely.

After an illness of some weeks, which was not generally supposed to be serious, Mr Bethune finally succumbed to paralysis. Doubtless the strain of so many years anxious responsibility had told upon his system. His burial takes place to-day

THE SITUATION.

As was foreseen, a call has been made by the Governor-in-Council of the Dominion to apply a remedial measure to the assumed grievance of the Roman Catholic minority in Manitoba on the school question. The order gives notice of what Manitoba is expected to do. Mr. Greenway, premier of the province, is reported to have stated in conversation, that all Manitoba has to do is to give an answer either affirmative or negative; that the proposal, as formulated, does not bring into discussion an alternative plan. It is known, in advance, from what the Legislature has done, that the answer will be in the negative. A curious question has arisen: does the order-in-council bind the Dominion Government to carry it into effect? It has been strangely contended that the Government which issues the order is not bound by it. As there is to be a session before dissolution, a good deal of powder has been wasted. When the question of remedial legislation comes before Parliament, there will be some fugitives from the Government ranks. So far, the leader of the Opposition remains at liberty to choose his line of action. If the Government proposes legislation on the question, in the present House, it will be likely to carry its measure. What is most to be apprehended is the spirit in which Manitoba may meet Federal interference. In so far as the schools have the semblance of a denominational tinge, there is something wanting to the complete justification of Manitoba, and many who do not favor separate schools think that Mr. Greenway ought to find means of offering an alternative plan, which will give to the schools an assured character of absolute neutrality.

For the second time a resolution has passed the British House of Commons in favor of the payment of members. The resolution has the support of the Chancellor of the Exchequer, and though it will not become law this Parliament, its final success may, in spite of the reduced majority on the present division, now be regarded as assured. Payment of members was one of the six points of the charter put forward by the English Chartists when O'Connell was still on the stage. The Chartist agitation ended without gaining a single point; but since the organization died, four out of the six became law. Payment of members will be the fifth. To this, a few years ago, McCarthy, leader of the Irish Nationalists, was strongly opposed; now its strongest supporters are to be found in the ranks of his followers. There are many Irish members in our day who have to be paid by somebody, and it is better that they should be paid by the nation than by subscriptions from a foreign country. With payment of members another step ought to be taken: to bring payment out of foreign subscriptions to an end; the receipt of such money, striking as it does at the independence of the receiver, ought to be made a ground of disqualification to sit in the House of Commons. If the word of the critics of Washington who tell us that Congress put the income tax exemption at $4,000 because members receive $5,000 a year pay each, must be accepted, the plan of payment is clearly not without its defects; but in England it is coming in the march of democracy.

Four delegates have set out from Newfoundland for Ottawa to propose terms of union for the island with Canada. They are said to represent all parties, but with, it would seem, a restriction to the parties represented in the legislature; for public meetings held at St. Johns, in opposition to federation, show that the population of the province is not unanimous in backing up the delegates. From the delegates a consistent plan may be expected, though it must have been the result of a compromise if it embodies the views of both parties in the local legislature. We must now await the development of the plan. The reception it will meet will depend upon its character. While there is not in Canada a burning desire to see Newfoundland brought into the Confederation, there is a willingness to give fair consideration to any reasonable plan looking to that end.

The New York Central Railway is discarding steam for the trolley system and motor cars between Buffalo and the Falls of Niagara, and the change promises to be accompanied by a reduction of freights. As a more powerful trolley system, capable of drawing at the pace of locomotives the latest passenger coaches, this may be taken as a step in advance. Electricity as a motor power is full of promise: the only question is whether it will ever be able to take the place of steam on the great railroads where the heaviest hauls have to be made.

"Boodle ordinance" is the ominous name by which is known the instrument issued by the corporation of Chicago granting certain franchises for gas and electric lighting. The Civic Federation, consisting of certain citizens of Chicago, brought an action to restrain the Cosmopolitan Electric and the Ogden Gas Companies from doing business under their franchises, and to declare the ordinances granting them void, on the ground that they were secured by bribery and corruption. Judge Payne held that he had no jurisdiction, because the complainants being private citizens, and unable to prove specific damage, had no standing in court. "But," the telegram reporting the case, proceeds, "the decision explicitly holds that the ordinances passed by the common council granting the franchises to the corporations were illegally passed, and therefore invalid and inoperative." The right to proceed rests with the Attorney-General upon a proper showing of the facts. These cases run on all fours with that of the Toronto Street Railway Company, which is charged with obtaining its franchise from the city council by bribery and corruption. The consequence of using corrupt means to obtain the franchise being forfeiture of all rights under it, accounts for the extraordinary measures taken by the railway company to baffle the recent enquiry and defeat its object. Though the chief offenders fled the country, it is a question how far that fact ties the hands of the Attorney-General.

FINANCIAL REVIEW.

This has been one of the dullest winters for business that Canada has experienced for many years, and the effect is seen in a striking manner in prominent quarters. Diminished railway receipts have necessitated the passing of its dividend by the Canadian Pacific, a circumstance which has created a good deal of surprise amongst those who were not well informed as to the real bearing of things on this side of the Atlantic. The practical question for consideration is whether this passing of the dividend on the ordinary stock is to continue, and if so, for what length of time.

With regard to this, it is obvious that nothing definite can be said; prophesying is not business. There can be no doubt that if a dividend can be secured by any exercise of skill or foresight, it *will* be earned. That the management of the concern is thoroughly wideawake and modern does not need to be told here. The close and interwoven relations which must necessarily exist between our railroad system and those of our neighbors to the south invariably lead to our being more or less governed by some of the conditions which affect them.

The long depression which commenced several years ago in the United States, culminated in the foreclosure of twenty-one railroad companies, with stock and bonds amounting to nearly one hundred millions of dollars! It is of course some consolation that we are no worse off than our neighbors, though this does not give stockholders a dividend.

With regard to the Grand Trunk it is so far satisfactory that the exhaustive enquiry just concluded shows no trace of corruption in the accounts; the system of bookkeeping is cumbersome, however, and the working operations of the system might be overhau'ed with advantage. We have repeatedly said that Canada was not to blame for the original extravagant style in which this railway was both planned and constructed. All this was the work of the engineers sent out by British promoters and stockholders. And some of the branch undertakings that have been a heavy drag upon the enterprise have n t been for the benefit of Canada at all. Yet Canada has had a large part of the blame of many of these unfortunate developments of this great project. Of course the Canadian management of the Grand Trunk was not to blame for the absurd abuse and criticism against Canada so long current in Britain, and the result of the enquiry vindicates them.

The cloud that is resting upon railway earnings is affecting banks as well. All the banks are speaking of diminished profits. It is possible, however, that most of them will keep up their dividends at any rate; and that diminished profits will only tell upon the amount added to the Rest, or to Surplus Profits. In the case, however, of two of our large institutions the depression has had more serious results than that. The Bank of British North America has reported total earnings for the year of less than 4½ per cent., giving as a reason therefor, mainly, the large amount of reserve money which they were compelled to carry at very low rates of interest. The bank has always had a deserved reputation for solidity and carefulness and for the large amount of its available reserves. It is, however, interesting to note from the statement of the chairman that this reserve is composed not only of cash in hand, but of bank balances, government securities and bills which can be discounted at a day's notice. This statement bears out what was insisted upon in our columns some time ago, viz., that in the immediately available reserves of a bank are invariably to be counted, not only the actual *cash* in its possession, but balances and securities which can be turned into cash at very short notice. Some of our contemporaries, at a time when the matter was in controversy, held up the British Bank as an example of the whole available reserves of a bank being in actual cash. The published statements of the bank were clearly against this theory, and the statement of the chairman at the annual meeting ought to set the matter effectually at rest.

The Bank of British Columbia, too, has been affected by the very adverse conditions prevailing, not only in British Columbia, but in a more marked degree on the Pacific slope of the United States. They have met the matter boldly and faithfully by writing off the sum of £50,000 stg. from the Rest. This important fund, however, will still be of a very respectable amount, viz., £235,000, or about forty per cent. of the capital.

Circulation, as usual, is low at this period, and its condition again demonstrates the elasticity we have such reason to appreciate in this country. If need were, the bank issues could be stretched by about $30,000,000; there is little danger, therefore, of our having to suffer at any time what overtook our brethren in the United States in the fall of 1893. Not only were the currency reserves drained, but the people there found themselves forbidden by stringent and carefully drawn statutes from utilizing the most practical means of aiding themselves and tiding over the difficulty. The make-shift machinery that was used to bridge over the critical period, fortunately seems to have worked well, principally due to the stability of the local institutions which came to the rescue where necessary. The spectacle of a number of scattered individual firms or institutions eking out the currency of a people is obviously not one to create much confidence at a time when it is generally most required. The time will surely never come in Canada when owing to sho t-sighted measures, or rather the lack of measures, the issues of bank notes will be partly supplanted by certificates, scrips and "*bons*" of city councils, manufacturing concerns, railroads and other associations.

The Australian banks, which carried through such enterprising measures of reconstruction at the time of the great crisis in that country, are already finding difficulty in working them out. It was foreseen at the time that the addition of enormous sums of deposit money to the permanent capital of the banks, and the creation of a sort of preference shares thereby, would render it most difficult in future to earn reasonable dividends on the ordinary stock. This was felt to be an absolute certainty, in case there was a general revulsion and diminution of business, and the throwing upon the hands of banks of great masses of property yielding little or no return. This is precisely what has taken place. The most prominent of these reconstructed institutions—the Commercial Bank of Australia—which formerly made an easy profit of 12 to 16 per cent. on its capital, has fallen into such a position under reconstruction, that it has not earned even one per cent. in the whole year. An experience somewhat similar, though not so unfortunate, is befalling other banks in Melbourne, and, as a consequence, a movement has been begun to amalgamate four or five banks into one, and to organize another company for the realization of deferred assets.

The carrying out of such a scheme will require a very large amount of arrangement and of parliamentary action. Meanwhile, all experience shows that the solid rules of banking experience cannot be violated with impunity, either in Australia or anywhere else, that bank advances ought not to rest upon landed property, that a period of "boom" and excitement is one in which bankers should be cautious and not expansive; that money brought from abroad in great quantities is dangerous for banks, and finally, that a

good, well considered banking law is the best protection a country can have against bad and inconsiderate banking.

TRADE WITH AUSTRALASIA.

It is evident from the instances given in the concluding paragraph of our Sydney correspondent's letter in last week's issue, that there is a market in New South Wales and Victoria for Canadian products, if they are properly handled. While general business is still depressed, there are signs of the cloud lifting, and although it may not be so easy to do business now as it was three years ago, there is less risk of bad debts than there was during the "boom." A courteous and earnest interest is shown by the business men of those colonies in anything or any person Canadian, and the Canadian Commissioner, Mr. J. S. Larke, has been well received.

A word of warning is uttered by our correspondent about the methods to be pursued in cultivating trade. He says that no great result can be achieved by merely sending circulars and price lists to Australia. There are millions of these from Britain, from Germany, from Belgium, from the States. And the mere sending of samples does little good, unless their qualities and uses can be verbally explained. "Time," says our correspondent, "is as precious to the Australian as to the Canadian business man, and he is but little inclined to listen to anyone who is not intimately acquainted with the article he offers and with competing goods."

In other words, the writer means to say if the thing is worth doing, it is worth doing well—certainly any timid, petty, "picayune" measures will not have the desired result. The manufacturers who have thus far secured orders are those who themselves went or sent competent representatives to the spot. And this is the way to build up a trade with Australasia.

BANKRUPT STOCKS.

There is nothing more demoralizing in its effects upon the trade of a town than the slaughter sale of a bankrupt stock. Honest and cautious merchants are almost driven to desperation as they watch the crowds buying dry goods at prices below the wholesale cost. One cannot decry the quality of these goods; for in the majority of cases they are new. It is unfortunate that so few jobbers have sound views on the question of credit, and do not recognize that in looking carefully after the interests of their customers they are also doing a good turn for Number One. But probably until the end of time there will always be found jobbers foolish enough to encourage men destitute of capital to enter trade. A cure is seemingly impossible; there is nothing left but to seek a remedy. We have often referred to the bureau for the disposal of bankrupt stocks conducted by the Winnipeg Jobbers' Union. During the past season thirteen stocks of merchandise were disposed of through this means, and both the wholesale and retail trade are loud in their favorable remarks as to the work of the system.

CAUSES OF BUSINESS FAILURES.

An interesting compilation of business failures in Canada and Newfoundland has been made by the Bradstreet Company for the year 1894, which has for its object the tracing of causes of the failure of traders. Before going any further we must remark upon the oddity of the error made by both this mercantile agency and Dun's in persistently classifying Newfoundland as a part of Canada. The head offices of the agencies in New York may be forgiven for this mistake, but Canadian compilers should know better.

The causes of failure are supposed by this list to be eleven in number, enumerated thus: Incompetence, inexperience, lack of capital, unwise credits, failure of others, extravagance, neglect, competition, disaster, speculation, fraud. The two causes first mentioned might almost be bracketed together, for a trader's incompetence must often be the result of his inexperience, and it needs, besides, a certain length of time to demonstrate his incompetence. It is conceivable that a man of decided natural cleverness may at first prove incompetent as a merchant, through sheer ignorance of merchandise though if he were allowed to acquire experience he would prove very competent.

Extravagance is, according to this list, a rare cause of failure among Canadian traders. The term is a relative one, for while we as a people are not so extravagant as our United States neighbors, there is among our traders a great deal of the "excess," the "prodigal expense," the "profusion," or "irregularity" which lexicographers give as definitions of the term. That is to say, many traders spend more in living, in equipages or amusements than the profits of their business will permit. They do not proportion outgo to income because probably they deceive themselves as to what their income is.

Lack of capital is put down, and with reason, as a very prominent cause of failure among merchants. It used to be thought that a man might reasonably be allowed to buy thrice or four times as much goods as he had money. But our wholesale dealers have become so reckless in crediting that numbers of retailers are found to have bought six

times, aye, ten times as much merchandise as they ever had capital at the risk of business. Let us see, however, what proportion of the 1,842 failures in this list is attributed to the different causes :

Lack of capital	1,270
Incompetence	191
Disaster	138
Fraud	69
Neglect	47
Inexperience	43
Failure of others	41
Speculation	17
Unwise credits	14
Competition	9
Extravagance	3
Total	1,842

Represented by percentages these figures mean that more than two-thirds (68.95 per cent.) of the total failures were caused by lack of capital ; 12.69 per cent. were attributable to incompetence and inexperience ; 7.49 per cent. to disaster ; 3.74 per cent. to fraud ; and 2.55 per cent. to negligence of business, the remainder of 4.58 per cent. embracing the other minor causes.

We perceive, of course, the difficulty of preparing such a list of causes as this, and are disposed to allow for a good deal of generalizing, not to say arbitrariness in its classification. But we cannot help remarking that, in view of the well-known conditions of business, the crowding of villages and towns with stores, the slaughter sales everywhere to be heard of, "competition" must have caused more failures among Canadian merchants than the nine which *Bradstreet's* puts down to that cause. It is difficult to believe, also, that due weight is given in this list to "unwise credits" as a cause of failure, when we recall the extent to which retail merchants give credit in town and country. Excessive outstandings appear to be the bane of three retailers out of four, in our observation, but this list says only 14 traders out of 1,842 have failed from this cause. One looks with interest to find what part "fraud" plays among these causes, and finds that while scarcely any through fraud are reported from the Maritime Provinces, there are 10 from Manitoba and 15 from British Columbia. Can this be because of the greater "cussedness" of the average man in the free and boundless West ? In Ontario, this list says, only 14 traders made fraudulent failures, while Quebec furnished 27 who did so. Other instances of curious disparity in the comparative figures of the two provinces last mentioned are, that while Quebec had only 9 " incompetent " traders fail, Ontario had 91 ; and that while only 7 failed in Quebec through "neglect," the number was in Ontario 31. Again, how comes it that 50 Nova Scotian traders, out of 114, failed through "incompetence," while in Quebec only 9 out of 704 failed from that cause ? These are discrepancies that tend to shake faith in the correctness of any such list, but *Bradstreet's* are nevertheless entitled to the credit of having made a laborious effort to solve a difficult problem. They give the total liabilities of the 1,842 failed traders in Canada at $17,802,000, and the assets at $7,953,181. Newfoundland shows 22 failures, liabilities $6,260,000. Principal causes, disaster and failure of others.

MUNICIPAL FIRE INSURANCE.

The idea that it is a safe and desirable thing for a village, town or city to undertake the insurance against fire of all property within its borders, appears to obtain approval here and there. At any rate it is seriously proposed, by a draft bill bearing the name of Thomas Caswell, city solicitor, Toronto, to get through the Ontario Legislature a measure which shall enable municipalities to become their own insurers against fire. This being the case, let us look seriously into the merits of the scheme.

The mayor and council of several places have declared in favor of the principle of mutual insurance. They argue in this way : our town has paid out for fire insurance premiums in ten years probably $50,000, and in that time only $20,000 worth of property in the town has burned up, therefore we can afford to do our own insurance and save three-fifths the money we pay the insurance companies. This looks well on paper and sounds plausibly. But suppose a big fire sweeps the business part of a town and $60,000 or $100,000 goes up in smoke, as in the case of Coaticooke, of Bracebridge, of Gravenhurst and other places, and the people have no insurance in British or Canadian companies, but the loss has to come out of the taxes, what becomes of the "cheapness" argument ? The bearing of one another's burdens is a beautiful doctrine, is a beautiful thing in the realm of religion. But when you tell a teetotal farm gardener in a town that he has got to pay the fire losses of a tavern keeper, he will be likely to object. If the business buildings in the heart of a town burn down, and you assess the people on the outskirts, who are not in business, one-half per cent. or one per cent. to pay the $20,000 or $40,000 that these losses cost, the result will be a cry of unjust oppression. It is useless to say to these people : " Your turn may come next to be burned out ; you must bear this assessment for the sake of the civic insurance system." The average man who has not suffered from the fire-fiend will not look beyond his own door.

Take the case of a person owning vacant land in a town. Make a demand on him for $20 towards making good the fire loss of a rich neighbor who lives in a $2,000 house. Will he not object ? Ask Mr. Evan ap Evans, who has a fine dwelling and grounds and is out of business, to pay, through his tax bill, towards insuring the lumber yard of Dugald MacDugald in the adjoining block. He will reply by a blast of rhetorical fireworks, no doubt. Then, as to the value of municipal fire policies for commercial purposes ; would loan companies accept them as security ? would banks take them as collateral ? We trow not.

A practical way of estimating the result of the adoption of compulsory fire insurance by municipalities is to consider its effect upon the creditors of a town or city. There are many millions of dollars in debentures of Canadian municipalities held by parties in England and Scotland, or by corporations in the Dominion itself. These securities were invested in upon the strength of statements of the assets and liabilities of such municipalities. Add to the obligations of these towns or cities the liability for fire loss to two-thirds the value of the buildings and merchandise they contain, and you alter the bases of such securities and violate the contract through which such contract money was obtained. Instead of getting money on debenture at 3½ or 4½ per cent., the rate would instantly go up to 8 or 10, if indeed it were lent at all. The holder of any such security, besides, would have immediate recourse at law to prevent the municipality from jeopardising its power to meet its engagements by so wild a project. Some fourteen millions of Toronto city bonds are in the hands of British holders, who will look keenly after their interests should any progress be made with this threatened plan.

The idea of confining fire insurance to a certain locality or class of property is not new. It has been tried in Europe, in the United States, and within our own borders, and it has not succeeded. Some fifteen or twenty years ago the experiment was tried in Ontario, in a very likely direction, by the Isolated Risk Fire Insurance Company.

This organization essayed the underwriting of detached buildings and their contents, farm buildings, for instance, and country residences. This was deemed to be not only a safe, but a profitable line of underwriting, and one of Canada's grand old men was at the head of the company. But it was not successful and the company went down.

A few years ago there was formed in Los Angeles the Southern California Insurance Company, with a capital of $200,000 paid up. It was founded upon the idea of "keeping the insurance premiums at home," exactly as the advocates of Canadian municipal insurance desire to keep the premiums in the strong box of town or city instead of paying them to insurance companies. It was found, however, that while the money paid for premiums was kept in circulation at home, the money for fire losses soon swallowed up all the premium income, and the funds to recoup for fires had to be forthcoming from home sources. The result was the loss of the $200,000 capital and the turning over of the whole business to an English company, who received a handsome bonus for taking it off the proprietors' hands. Not only this, but the eight directors had to pay some $3,000 each towards the deficiency.

Experience is a stern teacher, and it cannot be too often repeated that the only secure method of fire insurance is based upon the principle of diffusion of risks over a great area, so that the small contributions of tens of thousands of individuals in hundreds of places may be available to pay the losses which are sure to come. Sometimes these losses occur in isolated buildings or stocks, sometimes in destroying villages or laying waste whole blocks in cities. Attractive though the scheme may look, civic insurance is a dangerous fallacy.

WATER IN THE STREET RAILWAY WINE.

When the shares of a company, like that of the Toronto Street Railway Co., obtain an abnormal activity, all at once, on the stock market, it is desirable that the public should have means of getting a rough idea of how much water has been put into the wine. This is not so easy as it should be, though to tell the truth it is not difficult. The company takes care not to make any regular return, as ordinary joint stock companies do, to the Government. But it lets the world know, in a sly sort of a way, by the circulars it issues, that its share capital counts for $6,000,000. It has borrowed on bonds $2,200,000 and assumed pre-existing bonds to the amount of $600,000; in all nearly nine millions of dollars.

What is there to show for all this? The amount paid to the city was $1,453,788. This included $600,000 of outstanding debentures. What has been expended on the road since it came into possession of the company? Even if an amount equal to the purchase money had been expended in improvements and extensions, the whole cost would still be within three millions. It would be difficult, with our present knowledge, by any process, to figure the total up to $4,000,000, even making the most liberal allowance for bribes, admitted and proved, to aldermen, and "payments to the press." But call it $4,000,000; there is still a larger amount than this to be accounted for. Where has it gone?

The capital of the company named in the act of incorporation is $1,000,000; but at the same time the company was authorized to "issue its shares as paid-up shares in payment or on account of the price to be paid" for rights acquired in the road and its belongings. The "purchasers," as they were called, of a property in the road for a period strictly limited to thirty years, were George W. Kiely, Wm. Mackenzie, Henry A. Everett and Chauncey C. Woodworth, and from them were taken over by the present company the rights acquired from the city of Toronto. It was for the purpose of paying for these rights that the company was authorized to issue paid-up stock or to receive credit on stock they might have subscribed for. The sale was, so far as the individuals were concerned, little more than a nominal transaction. The "purchasers" from the city formed in fact a syndicate, which was afterwards transferred into the present company by the act of incorporation. Substantially the present company purchased from themselves, buyers and sellers being, so far as appears, the same persons.

It was this financial transaction which enabled the company, by a stroke of the pen, to swell the amount of its nominal share of capital to the enormous sum of $6,000,000. It was as easy to write $6,000,000 as three millions or two millions. The difference in the cost was only the cost of printing the additional shares. But a nominal capital of $6,000,000 would have a more imposing look; and though the water that went in to swell the bulk could not be changed into wine by anything less than a miracle, the paper shares might be transmuted into gold if the fates were propitious and the Stock Exchange could be convinced. The stock was listed in the middle of January, 1895, and the usual devices were used to quicken its movement.

In considering the value of the shares, it is necessary to take into account the fact that if a dividend is earned it must be earned on a large amount of fictitious capital. But the real measure of the value is the earning power for thirty years, at the end of which time the city may elect, under the conditions of the agreement with the "purchasers," to resume the property; and in that case it will pay only for actual property, not water. Then the shares will be worth whatever the city may have to pay for the property of the road, over and above the amount of bonds then to be paid off. The city treasurer may require the company to satisfy him that means are provided for paying the bonds at maturity. This part of the agreement, to be complied with literally, may require provision for a sinking fund. At the end of thirty years the shares will have lost their earning power. The company, with its thirty years' right to run the road, is in fact in the position of lessee, and its shares over and above the substantial property which it would have to transfer, would have no value, since the earning power on which the shares depended for dividend would cease.

When the legislature named $1,000,000 as the capital stock of the company, it must have intended to restrict the amount to that figure. The shares permitted to be treated as paid-up for the purpose of putting them in the place of purchase money, must be presumed to be the shares comprised within the limits of the capital stock. It is true that this might not have been sufficient to cover the amount of the purchase money; but it could be used for this purpose as far as it would go, and the balance could be paid from the proceeds of bonds, the right to issue which, extending to $35,000 a mile, has been liberally used. The right to issue shares to the amount of $6,000,000 is not so clear that it may not some day be called in question. To prevent a repetition of the scandal of issuing $6,000,000 of shares by a company whose capital stock is stated at $1,000,000, the Legislature of Ontario has found it necessary to interfere. The bill, a Government measure, introduced by Mr. Bronson, proposes to enact for the governance of these trolley railways, that the original issue of stock must be sold for cash, and subsequent issues by tender, to the highest bidder. In the same way, plant and material must be purchased for cash, not for paid-up stock or bonds. Thus, once more, we find the gross abuse of a power likely to lead to the total abrogation of the power. There is still time to consider

whether it is absolutely necessary to go so far. If $6,000,000 of shares could be issued by the company, under color of the power conferred upon it, twice that amount, or indeed any other sum, might have been.

It is important that the share capital of the company should not be confused with a perpetual stock such as that of a proprietary road with a perpetual charter. It is more nearly in the same situation as bonds—at least that part of it which is in excess of the value of the company's property—and unless provision is made to pay it off, on the expiration of thirty years the excess must be a dead loss to the holders. In this respect it bears a not distant analogy to a land company, whose last dollar of capital disappears with the last acre, unless the capital has meanwhile been recouped, or a fund to recoup it provided. For example, the Canada Company long since repaid all its capital except 2s. 6d. in the £. The amount of bonds that has been or can be issued is not likely to exceed the value of the property the company will have available to hand over at the end of the thirty years' holding; though if there were any ground for anxiety on this score, the city has the power to protect itself. But the stockholders have no such resource; for them and the bondholders there will ultimately be nothing but the value of the railway property, and the bondholders must be paid first. Stockholders may calculate their chances, which may be expected to include some interim dividends. This stock is more likely to be a speculator's stake than the deliberate choice of clear-headed investors. The total amount of the shares and bonds of the company ought never to have exceeded what the city would have to pay for the property in the event of taking it over.

THE JOBBER'S PLACE IN TRADE.

With consumers organized in various ways, seeking to do away with the middleman, and different manufacturerers making efforts to reach the retail trade, and in some cases the public, it would appear that the jobber's bed is not a downy one. But as this journal has repeated over and over again, the jobber has distinctive functions to perform and his place cannot be usurped by either the manufacturer or the consumer. This holds true not only of the dry goods trade, which perhaps receives most discussion, but applies to commerce generally. The New York *Shipping and Commercial List* says: "For two years the National Linseed Oil Company ignored jobbers in this vicinity and sought the retail trade exclusively. That short experience was sufficient to last the company for all time, and the new system was abolished in disgust after an accumulation of bad debts. It was only last month that the pottery manufacturers and jobbers had a love feast in New York after a separation of two years, during which time the makers were made to realize the power of the middlemen; they are now fast friends and trying to recover lost ground. At the opening of the year white lead jobbers were placed on an equality with buyers of twelve tons, and the dissatisfaction is resulting in bringing to the front obscure brands not in the agreement, with probability of increased importations. Some years ago the Standard Oil Company fought the jobber, but subsequently found out its mistake, and has appreciated his usefulness ever since." As trade improves, and there is reason to believe the dawn is almost at hand, this spirit of "economy" will weaken and the jobber's position remain.

CANADIAN TRADE WITH AUSTRALASIA.

(MONETARY TIMES *Special Correspondence.*)

SYDNEY, New South Wales, Feb. 16.

So far a market has been found here for agricultural implements, carriage material, rubber goods, cottons, saws, tobacco, labor saving office devices, suspenders, oiled clothing, patent medicines and some minor articles. If the means which sold these goods are used to push other lines of Canadian merchandise, there ought to be no reason why the trade from Canada should not be rapidly enlarged. Though Australia has a very mild climate in winter, yet it is admitted that the houses are not adequately heated, particularly in the southern section. The stoves most commonly used here are of the most antiquated pattern. Heavy two-wheeled carts and gigs are used, instead of wagons and buggies, except in the larger cities, where heavy trucking is done on four wheels. Canadian energy well applied should affect a change in these respects. Handles and other wooden ware, axes and some edge tools ought also to find an opening. Canned fruit would perhaps have too strong a competitor in California, whose nearness and low-priced fruit give it an advantage, though some Canadian fruit should command a better price, as it has a better flavor; but Canadian canned vegetables, dried and evaporated apples may be able to get a market. Articles such as canned corn and tomatoes bring in the shops of Sydney about $2.50 per dozen, but jobbers' prices are only half that figure. When the duty of a penny a pound, freight and other charges are deducted, it leaves a narrow margin to the producer; still, if the Eastern States can sell these goods to advantage, Canada may be able to find a way also. A considerable portion of the paper used in this country is brought from Oregon in the United States. Machinery is being placed in a mill in British Columbia largely for the purpose of making paper for Australia.

The reports from the Stock Exchange this morning show a steady advance in the price of many Australian bank and industrial stocks during the past two weeks. The following quotations will indicate these advances:

	Buyers, Jan. 31. £ s. d.	Buyers, Feb. £ s. d.	Rise. £ s. d.
A.J.S.	0 12 6	1 8 6	0 16 0
do deposits	0 14 1	0 15 0	11d. in £
City Bank	2 14 0	3 15 0	1 1 0
do (new shares)	2 9 0	3 12 6	1 3 6
Com of Sydney A	14 10 0	15 15 0	1 5 0
do B	9 5 0	10 15 0	1 10 0
do deposits	0 19 9	1 0 0	3d. in £
Bank N.S.W.	25 2 6	27 2 6	2 0 0
do (new)	25 0 0	27 0 0	2 0 0
Union of Australia	28 5 0	28 15 0	0 10 0
North Coast Steam	0 9 3	0 9 6	0 0 3
Newcastle Steam	0 8 6	0 9 9	0 1 3
Tooth's Brewery	0 14 9	0 15 3	0 0 6

They will not show a rapidly increasing business, but do show the restoration of confidence alluded to above. General business has not been reported as particularly active during the past month, but stocks in these colonies are not large, and transactions are confined to actual wants. Collections are said to be satisfactory, and, while prices have not advanced, the outlook is on the whole favorable.

These incidents serve to prove that a market exists here for Canadian goods properly handled. From politicians and business men the Canadian commissioner has received assurances of good will towards Canada, and any visitor from Canada who comes to create business will be cordially received. It is to be feared that little benefit will be received by the mere sending over of catalogues and price lists. These are showered in from all over the world. Nor is it much better to send samples of goods to people who are ignorant of their special qualities. Time is as precious to the Australian as to the Canadian business man, and he is little inclined to listen to anyone who is not intimately acquainted, not only with the article he offers, but with competing goods.

It is well for the Canadian business man to know that he will be met here with the complaint that at present no business is being done. The depression, which was felt as much in Australia as in any part of the world, has not entirely passed away. Recovery depends to some extent on the ability of the banks who received an extension of time to meet their obligations when they fall due. Apprehension is felt respecting some of these institutions, and while late reports of the suspected ones do not show that they make much progress, the financial situation as a whole is improving. Capitalists are showiug more confidence in the future. That there is considerable capital seeking investment is shown by the fact that even in the discouraged city of Melbourne the securities of the colony bring higher prices at home than in London. There is less danger of contracting bad debts under present circumstances than was the case even four or five years ago, and manufacturers entering the market now are likely to find an increasing demand as general trade improves. The Canadian manufacturer who proposes testing this market should get as specific information as possible from the Canadian commissioner here; then if this warrants the undertaking, he should make up his mind to exploit the market thoroughly. Any half-hearted attempt is certain to produce poor results.

* * *

THE TANNERS' MEETING.

Last Monday the Ontario tanners assembled in the Toronto Board of Trade building to discuss matters of interest to their industry. The most important question to be discussed was that of the terms of credit to be allowed by the trade. At present the terms are arranged upon a six months' basis, although there is no uniform system. When the tanner buys his hides, his bark, or pays his wages, he is allowed no favorable terms of discount, and it is but reason on his part to seek to reduce the time limit which custom has made him grant the buyers of

leather. A motion was passed giving four months' credit from date o shipment, or cash in ten days less 5 per cent., cash in 30 days less 4 per cent., cash in 60 days less 3 per cent. This agreement will become operative on May 1. While this, of course, strictly interpreted, applies to only the members of the Tanners' Section of the Toronto Board of Trade, it is hoped that the influence of this body will be sufficient to make the terms of uniform adoption throughout the province. Some of the tanners present whose interests lie more especially in the Province of Quebec, expressed the opinion that it would be difficult, if not impossible, to enforce these terms in this province, where laxity in this matter had become almost proverbial throughont the leather trade

That fruitful field of discussion, the inspection of hides, received the attention of the section. Here, too, the object was to secure uniformity. The inspection in different Ontario towns and cities varies much, and means were discussed to bring all inspections to a uniform standard. The executive committee was instructed to report upon the advisability of asking the Dominion Government to take action in the matter. The third question considered was that of the measurement of bark. Previous to the formation of the section many of the tanners were members of the Manufacturers' Association, and by this body a uniform system of inspection and measurement had been established. The meeting decided that it was advisable to adopt this system without alteration. Mr. J. L. Breithaupt, of Berlin, occupied the chair

GASPE BOARD OF TRADE.

The first annual meeting of the Gaspe Board of Trade was held at Percé on March 13th. This body makes a number of requests of the Government at Ottawa for the advancement of the works projected at Fox River harbor; for the removal of the wharf at Percé and its rebnilding at a more suitable point; for a survey at Malbaie looking towards improvements for shipping. Then they make complaint of pedlars using one another's licenses, and propose that the photograph of each pedlar be attached to his license. The officers of the board for 1895 are:

President, James Baker.
Vice-president, Fred. Veit.
Treasurer, G. P. Fauvel.
Secretary, I. X. Lavoie.

Committee—J. E. Hyman, W. E. Fauvel, George Romeril, Elias Le Marquand, R. Lindsay, A. T. Carter, T. C. Savage.

GUARANTEE COMPANY OF NORTH AMERICA.

Canadian business men and bankers. and indeed people or companies all over this continent, are pretty well acquainted with the name and functions of the Guarantee Company of North America. This company has issued its twenty-second annual report. It shows that 12,859 new bonds were issued last year, making a total of $43,666,587 of risks in force, on which the premium annually was $225,294. The company's total income last year was $313,679, and its total expenditure was $266,035. The reserves are $212,928, and the surplus to policyholders is $619,354. Its total resources are $1,196,282. The Guarantee Company has a creditable record of over 22 years to be judged by, and the above figures shown, added to a reputation for honest dealing and prompt paying, are good grounds for public confidence. As a matter of fact this society is the pioneer of the various companies which have in the last ten years sprung up in the United States to enter the business of guaranteeing by a policy for so many hundreds or thousands of dollars, firms or companies against loss by the dishonesty of their employes. Many a defaulter it has chased and run to earth on this and other continents, and many a claim it has promptly paid where individual guarantors would likely have delayed or contested payment. We are told that since 1872 the company has paid and settled claims to the amount of $1,200,000 and over.

GORE MUTUAL FIRE INSURANCE COMPANY.

"Established Anno Domini 1836" is what appears on the literature of the Gore Mutual Fire Insurance Company, surmounting the picture of the new and handsome building the company erected last year in Galt. The company has thus age as well as success to recommend it. And indeed the career of this institution, which shows a growth in eighteen years from income of $40,000 to income of $126,000; from total assets of $98,000 to total assets of $350,000; from $4,000,000 at risk to $11,886,000 at risk, is an illustration of what can be done in the fire insurance field by mutual companies properly managed. By no means least among the advantages shared by the members of the Gore Mutual is the return to them yearly, for the past five years, of 17½ per cent of the assessments they had paid. The company stands well in respect of strength of assets to amount at risk. There is in the shape of security to policy-holders a reserve fund of over $100,0 0, a feature voluntarily added a few years ago A sensible resolve on the part of the management is mentioned in the report. It is that when a proposal was made to celebrate the opening of the new head office building by some kind of a spread, it was resolved to devote the money that such a formal opening would cost to measures which should best promote the company's business. Doubtless some would miss the spread and the appropriate rejoicings, but probably most will agree that the wisest thing has been done

MUNICIPAL MEMORANDA, ETC.

The following private bills have been introduced into the Ontario Legislature: One to incorporate the Lake Superior Navigation Company for the purpose of erecting elevators, warehouses, dry docks, piers, wharves, and constructing and navigating boats and vessels of every description; another to incorporate the Sault Ste. Marie Pulp and Paper Company, who may construct, build and operate pulp and paper mills and engage in the manufacture and sale of pulp and paper at Sault Ste. Marie

The town of Toronto Junction asks leave to consolidate its debt. Power is asked to issue debentures bearing interest at 4½ per cent., payable in 40 years, for a sum not exceeding $850,000, to redeem outstanding debentures other than local improvement debentures. A sinking fund is to be created commencing in January, 1905, on a scale sufficient to pay off half the amount of each debenture at the period at which the debenture falls due. They ask power also to pass by-laws authorizing the issue of debentures not exceeding the sum of $50,000 for the purpose of redeeming outstanding local improvement debentures; interest at 4½ per cent., payable partly in 1807 and partly in 1915 Although the rate of paying here is slow, it is perhaps the best way, under the circumstances, of relieving Toronto Junction from its present difficulties.

The village of Wallaceburg seeks to consolidate its debt incurred by the erection of school buildings and granting of a railway bonus and other public improvements to the extent of $68,000, and to be allowed to issue debentures to pay off same. The town of Carleton Place wishes power to issue debentures to the extent of $44,000 to pay off its debt, $25,000 of which has been incurred by the purchase of fire appliances and the erecting of a town and fire hall. The township of Springer granted $7,000 by way of bonus for the establishment of a pulp mill on the Sturgeon River, and now asks legislation confirming the by-law; while an Act is asked to incorporate the town of Sturgeon Falls in the District of Nipissing

An Act respecting the city of St. Catharines calls our attention to the fact that where power is given to issue debentures to consolidate a debt and pay off debentures maturing due, the necessity to provide a sinking fund to meet the new debentures commences as to *the whole* amount of these debentures when they are permitted to be issued, not as to such of the new debentures as they are issued; and from this rather harsh construction of the Act, St. Catharines asks relief.

The town of North Toronto asks power to buy the rights and franchises of the Metropolitan Street Railway Company, or to build a railway for themselves, power to carry freight, permission to bond the line for $20,000 a mile

The township of Shunia wishes to be permitted to issue debentures to the extent of $7,500 to consolidate its debt. The town of Prescott having passed a by-law to grant $6,000 by way of bonus to the Prescott Elevator Co., seeks confirmation of the by-law. Port Arthur desires power to sell lands for arrears of taxes at any season of the year without advertising in the Ontario *Gazette*. The town asks that commissioners may be appointed to operate the corporation's electric railway and lighting system, and that the town shall have power to produce, manufacture and use, and supply to others to be used, electricity for motive power, and other purposes. Chatham seeks to be incorporated as a city, representing that the town now contains over 9,000 inhabitants.

The township of York, by three by-laws, provided for the issue of debentures to the extent of $60,000 to assist the Toronto and Richmond Hill Railway Co., but as that enterprise has fallen through, the township wishes to refund the money, so far as collected from the ratepayers, to those entitled. Power is asked to appoint an assessment commissioner and board of assessors. Where damages or compensation are claimed for land injuriously affected to the extent of not more than $1,000, it is asked that the judge of the county of York, sitting as sole arbitrator, shall settle the same. Power is asked to borrow $40,000 for the payment of floating debts, on debentures to be issued for the purpose, payable in ten equal annual instalments of principal and interest.

It is sought to divide the township of York into two distinct municipalities for the reason "that such division will greatly promote the welfare and convenience of the inhabitants": the new divisions to

be called the townships of North and South York. The Monastery of Mt. Carmel, near Niagara Falls, asks its certificate of incorporation granted under the Act respecting benevolent, provident and other societies, confirmed.

Among the private bills respecting railways are the Oshawa Railway Company's bill, confirming an agreement between the railway company and the town of Oshawa, by which the town is to advance $5,000 by way of bonus to assist in the undertaking. The Hamilton, Valley City & Waterloo Railway Company seeks to be incorporated to construct and operate electric railways from Hamilton to Waterloo, and with power to construct and operate a branch line from Guelph. The Windsor, Amherstburg & Lake Erie Railway Company asks incorporation to build a railway from the city of Windsor to the town of Sandwich, thence to Amherstburg, thence to Bar Point on the south shore of Lake Erie. This road is to be operated by steam or any other motive power. The Hamilton Radial Electric Railway Company asks an increase of bonding power up to the sum of $30,000 a mile. The Metropolitan Street Railway Company asks that bonuses or gifts may be granted in aid of their undertaking, and that they may have power to operate their road on all days of the week.

RETAILING DRY GOODS.

Belts in silk with silver buckles are features for the coming season. The demand for these goods is indicative of a good blouse trade.

A special line of Alsace and Lorraine checks, resembling a delicate tartan, have met with good favor at the hands of dress goods buyers.

A line of ladies' vests at 48c. the dozen is being offered, which, when quality is considered, is enough to make the manufacturer weep.

The woolen mills along the Cornwall canal have been compelled to shut down, as the water has been let out of the canal with a view to improvements in its structure.

For summer dresses Swiss spot muslins and Scotch ones too are largely in request, together with check muslins and a variety of ribbed Scotch zephyrs, checked and striped, of dainty colors.

Shoddy cloth pedlars have been duping innocent people in the County of Oxford. Experience comes high, but some people are bound to have it, and are not satisfied with one dose, but must needs have several.

The Dominion Blanket and Fibre Company, Ltd., Montreal, are about to transfer the balance of their machinery to Beauharnois, Que. They will then make Beauharnois their headquarters, but will keep a sample room in Montreal.

The present season has witnessed a satisfactory resurrection in the interest in domestic tweeds. As we have previously noted, some very pretty patterns are being shown, but prices are low, too low to afford any apparent profit to manufacturers.

The Hudson Bay Company's sales in London last week were from cabled accounts a success, and sellers realized more than in 1894. In several grades decided advances are reported. Marten doubled in value and fox brought 150 percentage more than at the last series. Nearly 105,300 marten skins were sold; the company must have netted some £10,000 by their sale.

"Yes," remarked a prominent retailer, the other day, "I am an importer and a sincere believer in the system of direct importation for retail merchants. The wholesale jobbers are compelled to handle domestic made goods upon inadequate profits and often at a loss. They naturally try to make it upon the goods bought abroad, and unless successful in securing large profits upon imported stuffs their trade is a loss. In consequence the retail trade have themselves undertaken the task of importation."

FOR GROCERS AND PROVISION DEALERS.

"Government butter" is being offered for sale in Montreal.

About thirty new cheese factories are in the course of erection throughout the Maritime Provinces.

The Collingwood Meat Packing Co. are fitting up premises to carry on an extensive retail trade in Collingwood.

A new cheese company has been incorporated in Tweed, under the name of the Murphy Cheese and Butter Manufacturing Company

Pressed hay is being shipped from Sackville, N.B., to all parts of the Maritime Provinces and to the island of St. Pierre. The demand has been very good the season through, but the price rather below the average.

Recently the Boston police seized a large shipment of lobsters under the legal length limit of 10½ inches. The lobsters were in transit from Yarmouth, N.S., to New York, and it is the general opinion that in the same way dealers have long been evading the laws.

Messrs. H. Clark, De Silva & Co., March 8th, estimate the cane crops of the world at 2,899,000 tons, against 3,043,000 tons last year, which, with Mr. Licht's estimate of the beet crops, makes total crops 7,810,000 tons, against 6,933,000 tons last year, an increase of 877,000 tons, against our latest estimate of 925,000 tons increase.—*Willett & Gray.*

The position of sugar, says the St. John *Sun*, is a little peculiar. The Acadia refinery offered standard granulated two days ago a little lower than the rate of the last six weeks, but only for prompt delivery. For futures they were firmer. The St. John market for granulated remains unchanged, as it is not anticipated that the refineries will stay below the rate at which the large stocks now held here were purchased.

Hon. John Costigan, Minister of Marine and Fisheries, has received from the Board of Trade of Vancouver a lengthy address urging a thorough investigation of the British Columbia river fisheries, with a view to changes in the regulations. A bonus is asked for a factory to utilize fish offal by extracting the oil and converting the residue into fertilizer. The object is to help the canners to comply with the regulations forbidding the dumping of fish refuse in the rivers

The Department of Trade and Commerce has been officially advised by the High Commissioner that dried codfish from Canada, heretofore admitted into Cuba and Porto Rico free of customs duty, has been placed on the tariff of these islands at the minimum rate, or say at the rate of $1.80 in Cuba and 90 cents in Porto Rico per 100 kilograms gross, and that those rates will apply to all such fish leaving ports of origin after February 28th, 1895.

Three years ago an English expert, Mr. Kemp, undertook to restock the almost depleted oyster beds of Shediac, N.B. This work was performed successfully, and the Department of Marine and Fisheriess i now petitioned to allow the beds to be fished, as the oysters are reported of good size, plentiful and of excellent quality. Hon. Mr. Costigan is at present considering plans whereby this fishery may be continued under regulations that will prevent a relapse into its previous depleted condition.

The Hon. Clark Wallace, Controller of Customs, was once in the grocery business, and says that he knows the tea trade thoroughly. He has decided that the analytical test that was first applied is not a satisfactory one. The teas which were seized he will allow to be exported instead of confiscated, the law giving him discretionary power to do this. If, however, importers persist in bringing these inferior grades in after this warning, they must bear the consequences. For the future the ordinary trade methods of testing the purity and quality of importations by drawing the samples will be in use.

Samples of British Columbia hops have been sent to Australia and were there considered of "good quality, sound, free from mould and full of condition. A few flowers are slightly browned, possibly through weather, which somewhat detracts from the otherwise bright appearance of the sample." Of course, writes the Canadian Trade Commissioner, "there should be a brewing from them before the quality can be fully established These hops are estimated to be worth 3½d. per pound more than the California hop, which is now being sold here in considerable quantities to 8½d. per pound. The market is just now rather dull."

The excellent condition of the rice market is noteworthy. Business shows no flurry or tendency to excitement, but works right along smoothly at a good liberal average, and the position of holders seems to be gradually strengthening. At the South holders of rough are standing for such stiff rates that millers refuse to meet them, and the supply of cleaned is in consequence very limited, especially at New Orleans. As advised in our market columns long ago, the recently received cargo of Japan was largely sold before arrival and the balance has since been disposed of, with custom so anxious for more that it is engaging ahead away into the summer months. Altogether confidence in desirable stock, either domestic or foreign, is full and unshaken.—*N. Y. Journal and Bulletin of Commerce.*

Professor Robertson says that the shipments of Canadian butter under Government auspices are meeting with good success, and submits the following extracts from his first report: "The high color of Australian is against even the best qualities. The paler the color the better the demand in this market. We are much pleased with the quality. These will sell in preference to Australian in this market, being paler in color, and at least equal in flavor. For these we made 86s. to 90s., which is more than Australian brought. Most of our customers were surprised at the quality of this parcel, as they expected Canadian to be something inferior. If you can ship quality equal to 'Chesterville' (one of the Government dairy stations), we can handle all you send."

SHOES AND LEATHER

The Amherst, N S , Boot and Shoe Company were threatened with labor troubles a short time ago, but everything is, we believe, now happily settled.

Montreal manufacturers report that most of the spring orders are now in, and they will have all they can do between now and May 1st in working off orders on hand. No sorting orders have been received yet, as the spring goods so far delivered have not been broken into to any extent.

Shoe manufacturers have during the last several years suffered a great deal by strikes. This is undoubtedly due to the great improvements made in the machinery of this trade. Recently the lasters of James McCready & Co., Montreal, went out on the strike, but through the influence of arbitration are now again at work. May all labor difficulties be thus happily ended

Some large sales of Chrome and Dongola skins have been made since our last report, and other large lots are in course of negotiation. One firm has sold about 24,000 skins during the past few days, and several large outside buyers have intimated their intention of visiting the city to make extensive purchases. The demand is good, and values are very steady.—*Montreal Trade Bulletin, March 22nd*

Upward the course of the markets take their way. Hides and leather are rising like thermometers in July, and the best judges are unable to forecast the future. The Milwaukee and Chicago tanners have advanced the prices of calfskins and grain leathers, and the eastern sole tanners are revising their rate cards. The upward movement is logical and practical, and the most skeptical men in the trade are becoming convinced that for a time at least low values cannot rule. Hides continue to increase in cost. All the markets show great strength. Light packer cows sold this week at 7¼c., which is 3¼c. higher than they were at this date in 1894. This is an advance of more than 50 per cent. Buff hides in the Chicago country market at 7c. indicate a proportionate rise in value.—*Chicago Review, March 21st.*

The industrial revolution which began at the close of the last century is not yet accomplished. Two hundred thousand operatives have left the boot and shoe factories of England rather than suffer the introduction of improved machinery. This extended strike, reaching as it does all over the country, has been expected for some time, and English leather merchants in Toronto foretold its advent several months ago. The first power looms introduced into Lancashire and Yorkshire were broken by rioters, but with little avail. The progress of improvement cannot be stayed by the narrow prejudices of men. It is unfortunately true that much misery is caused in the transitory stages from the old to the new order of things, and employers, mindful of this, should do all in their power to alleviate the wretchedness around them.

BOOKS RECEIVED

American Bank Reporter.—The present issue is revised and corrected up to 1st March, 1895. All new banks are reported to date, all suspended and liquidated banks removed, and all changes in officers made to date. The volume is published by Stumpf & Steurer, 49 Church street, New York, at $2 in paper and $2.50 in cloth.

Great Britain and Greater Britain.—This is the title of a fifty-page quarto illustrated pamphlet issued for distribution in Australasia. It bears the name of Murdoch, Barber & Co., colonial agents, Toronto, and is compiled by Mr. A. W. Murdoch, of that firm. Its purpose appears to be the promotion of preferential trade between the colonies, and it contains extracts from the Earl of Jersey's report, a reference to the Canadian Pacific cable, excerpts from the Canadian Census and Trade Returns, as well as statistics relating to Canadian banks and loan companies.

Street Railway Statistics.—Many of our readers are familiar, doubtless, with the Investors' Supplement, published by the *Commercial and Financial Chronicle*, of New York, of which W. B. Dana & Co. are the publishers (P.O. box 958). We have now received from Messrs. Dana a copy of their Street Railway Supplement, issued on 9th instant Here is furnished in convenient tabular form particulars about street railway properties in the United States, their organization, earnings and securities. The Supplement consists of about 100 pages, is handsomely printed and remarkably complete.

New York Bank Currency.—This pamphlet, whose author is L. Carroll Root, constitutes the fifth number of the Reform Club's Sound Currency series. The first chapter deals with events prior to 1829; the second with the "History of the Safety Fund System," then the "National Banks." On the one hand the bond-deposit-secured currency of the "Free Banking" system was that upon which Secretary Chase planned the National Bank acts; and on the other, we are told, 'The 'Safety Fund' system—which had not merely preceded it, but ran concurrently with it until both were pushed aside by the National Bank system—was the model upon which Canada has developed her bank note currency system, and from which the now famous Baltimore plan for an elastic currency was sketched." Copies may be obtained by enclosing 5 cents to the Reform Club, 52 William street, New York City.

The Currency Famine of 1893.—It is probably correct to say that the experience of the United States in the year 1893, with respect to their financial affairs and their currency, was unique. The storm burst while most people were unprepared for it. The currency famine, and other concurrent conditions, produced disaster upon a scale so great as to be appalling. In this pamphlet Mr. John Dewitt Warner summarizes the conditions, and uses them as a background for a detailed sketch of the currency famine. He adds a mass of detail as to emergency currency – accompanied by some fifty fac-similes of paper substitutes for money—that to him appears most significant. This and other literature on the subject of sound currency is issued by the sound currency committee of the Reform Club, New York

Annual Report Hamilton Public Library.—This report, for the year 1894, gives the following particulars: Library opened Feb. 19, 1890; total number of volumes in the library on December 31, 1894—21,639, divided as follows: 16,931 in Circulating Department, 4,708 in Reference Department. Volumes issued during the year, 213,628, an average daily use of 698 volumes (home use, 130,029) Borrowers' cards in force, 10,762. Number of visitors to the library during the year (estimated), 345,000. Number of papers and periodicals for use in reading rooms, 214. The classification of books shows that almost as many relate to history, travel and biography (4,460) as to prose fiction (4,776). General literature embraces 2,751 volumes; sociology, 2,277; natural science, 1,187; useful and fine arts, 1,840; religion and philosophy, 1,167. The president for 1894 was Mr. George Lynch-Staunton; the new president is Mr. Fred. Walter, and the librarian is Mr. Richard Lancefield.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, March 28th, compared with those of the previous week:

Clearings.	March 28.	March 21.
Montreal	$8,528,008	$11,031,140
Toronto	4,781,836	4,996,259
Halifax	875,532	871,448
Winnipeg	601,910	695,454
Hamilton	473,990	524,657
Total	$15,261,276	$18,118,958

Aggregate balances this week, $1,983,053; last week, $2,734,131

PATENT RECORD

The following list of United States patents granted to Canadian inventors, March 12th and 19th, 1895, is reported for this paper by James Sangster, patent attorney, Buffalo:—

Robert S. Anderson, Toronto, pneumatic tire for bicylces

Alexander Barhite, Toronto, assignor to J. N. Barhite, Buckeye, Iowa, road-grading machine.

Edmond H. Casgrain, Quebec, apparatus for casting metals.

Edmond H. Casgrain, Quebec, vulcanizer

Thomas C. Edwards, Chatham, sad-iron.

George W. Green, Kingsville, assignor of one-half to J. N. Menden hall, Lexington, N.C., bed-brace

William B. Hamilton, Toronto, printing form.

Newman H. Holland, Montreal, automatic telephone switch

Stephen S. Kimball, Montreal, street car fender

Samuel Knighton, assignor of one-half to C. E. Kavanagh, Winnipeg, band tie.

William Kyle, Brockville, torsion spring gear for vehicles.

John R. Meadowcroft, Montreal, valve

Andrew Schrag, assignor of one-third to D Dempster, Brantford, grate

John Velie, Winnipeg, cooking utensil

Oscar Beaudry, assignor of one-half to C. Leblanc, Ottawa, device for operating switches

Frank P. Birley, Toronto, paper box

Frank P. Birley, Toronto, paper box

Ferdinand P. Brunneau, Lyster Station, nut and screw tightening machine

Joseph Carter, Blyth, overdraw check bit.

William A. Clark, Toronto, apparatus for purifying milk.

Ethelbert M. Fraser, assignor of one-half to W. Georgeson, Winnipeg, mechanism for operating elevators

Charles J. Lewis, Grimsby, mold-oiling device

Edward Seybold, assignor to Eclipse Office Furniture Co., Ltd, Ottawa, letter and bill file

Meetings.

GORE FIRE INSURANCE COMPANY OF GALT.

The 56th annual meeting of this company was held at Galt on the 28th January, 1895. The secretary, Mr. R. S. Strong, read the following report of the directors:

REPORT.

The directors for the year 1894 beg to lay before you the following report of the business transacted during it:

The number of policies issued was 4,350, and the number in force at the end of the year 9,941, insuring $11,886,801, being an increase of $983,-986.33 in amount at risk and of 688 in the number of policies in force.

The total assets (including unassessed premium notes) amount to $349,938.82, of which $176,495.77 are cash or cash assets. The liabilities are $3,375 for losses which were not adjusted at the close of the year and $37,505.34 calculated on the Government basis of 50 per cent., as a reserve for unearned premiums on our cash business; and $1,500, being part of the purchase money of our new office site, held in trust at the desire of the vendors, which show our net assets to be $307,558.48.

The total income from all sources was $126,-512.50 and the expenditure $113,647 01, leaving a balance of $14,865.49 as profit on the year's business

We call your attention to an alteration which, at the request of the management, the auditors have made in the statement of receipts and expenditure, namely: not to include in that account the sum formerly shown as an appropriation to meet the members' refund payment, but instead thereof, to open a separate account for it; our object in this, is to make the receipts and expenditure account a simple statement of the actual earnings of the company for the year and its expenditure for the same time; as you will see by the subjoined financial statement a separate account has been made of this item.

We hope you will give the auditors' report and certified statements of accounts your usual careful examination.

It affords us pleasure to inform you that our new head office has been completed, with the exception of a portion of the tower, which will be finished in the spring. The expectations formed of it from the architect's plans have been fully realized, and it is universally regarded as a substantial and handsome structure, well adapted for insurance purposes. It is fitted up with hot water heating, gas and electric light, and with the most modern insurance appliances, which will facilitate the transaction of the company's large and increasing business.

It was suggested that there should be a formal opening of the new building when the company took possession, as being a memorable event in its history. After due consideration, however, the board deemed it more in accordance with the business methods under which the Gore has attained its present fortunate position, to devote the money which such a gathering would cost, to get out a properly framed and tastefully designed illustration of the head office to be shown in the offices of our agents and such other places as will promote the company's business.

We have pleasure in informing you that for the fifth time in succession your directors have been enabled to make a refund out of the profits of the year, and have passed a by-law declaring a refund to you of 10 per cent. of all assessment premiums (except those paid out by us for re-insurance) paid by you during the year.

The office staff and the agents generally have attended to your business with much care and have earned your thanks.

The retiring directors are the Hon. James Young and Messrs. Adam Warnock and R. S. Strong, all of whom are eligible for re-election.

All of which is respectfully submitted.

JAMES YOUNG, President.

R. S. STRONG, Secretary.

Galt, January 28th, 1895.

STATEMENT OF BUSINESS, 1894.

The president, in moving the adoption of the report, gave a history of the company since 1839—a period of 56 years. Its progress and success had been marked of late years. Since 1877 its cash assets had increased from $9,877

Continued on page 1268.

FOR SALE

103 bonds of the town of Minnedosa, $100 each, issued under By-law No. 71, dated 16th July, 1890, and authorized by Manitoba Statute Chapter 52 Victoria, payable 20 years from date, with interest at the rate of 3% per annum, said interest guaranteed by the Province of Manitoba, payable half-yearly on 1st February and 1st August in each year.

Minnedosa is a prosperous town of 760 population, located at the junction of the Manitoba and North-Western Railway and the Saskatchewan and Western Railway, being on the Little Saskatchewan River. The total debt of the town is $70,000. The assessment is $265,000; the current rate of taxes 2%. There is no floating debt. The town has promptly met the interest on these bonds, which were issued in extinguishment of their old debt.

Apply to **P. O. Box 1225, Winnipeg, Man.**

Canadian Pacific Railway Co'y.

NOTICE TO SHAREHOLDERS

The Fourteenth Annual Meeting of the Shareholders of this Company for the election of directors and the transaction of business generally, will be held on WEDNESDAY, the THIRD DAY OF APRIL, next, at the principal office of the company, at Montreal, at 12 o'clock noon. The Common Stock Transfer Books of the company will close in Montreal and New York on March 23, and in London on March 12. The Preference Stock Books will close on March 7th. All books will be re-opened on Thursday, April 4th.

By order of the Board.

CHARLES DRINKWATER,
Secretary.

Montreal, Feb'y 23rd, 1895.

Total Paid Policy-holders since organization, - - - - - $90,537,687.45

Deposit at Ottawa for the special security of Canadian Policy-holders, nearly - $4,000,000.00

CHIEF OFFICE FOR CANADA, 9 TORONTO ST., TORONTO

General Agents wanted in several Excellent Districts in Ontario, on Salary and Commission.

W. H. ORR & SONS, Managers.

up to $176,495, and its total assets from $98,908 up to $349,938. The members had not only enjoyed cheap insurance, but the management had been enabled, after providing for every liability, to accumulate a reserve fund of over $100,000, and during the past four years to return to members nearly $40,000, or 17½ per cent. annually of all assessments paid by them. (A full report of this address will shortly be published in pamphlet form and sent to members.)

Mr. Hugh McCulloch seconded the adoption of the report, which was carried unanimously.

The scrutineers reported Messrs. James Young, Adam Warnock and R. S. Strong as having received the highest number of votes.

At a meeting of directors, held subsequently, Hon. Jas. Young was elected president, and Adam Warnock, Esq., vice-president.

—There was an annual banquet given the other night by the Wiarton Board of Trade, when Mayor Kennedy, Mayor McLauchlan, President Lloyd and Vice-President J. W. Maitland, of Owen Sound, visited Wiarton and attended. The event was held in the Arlington Hotel, and is described by the Owen Sound delegation as delightful. There were nearly 100 guests. Walkerton, Port Elgin and Southampton were also represented at the banquet. Better railway connection, better mail service and increased business facilities between each of the towns was the basis of all the remarks. As Judge Cline, of Walkerton, put it, "The hatchet is not buried, but each place has quit swinging it around their heads."

—The special committee of the Brantford Board of Trade, appointed to enquire into the question of municipal fire insurance, will submit a report expressing the opinion that the responsibility of whole cities insuring themselves is too great, but suggesting that municipalities be given the power to go into insurance on a limited scale, and as a check on the present exorbitant charges of the old line companies.

—A week or so ago Mr. R. S. Bowness, of this town, advertised that he would take the photographs of babies, under two years of age, free. Already he has taken the photos of fifty-two babies and a doll, which were brought in response to the advertisement. Talk about people not reading advertisements!

The Portage correspondent of the Manitoba *Free Press* declares that the fire brigade of Portage la Prairie is in an inefficient and demoralized condition. "The recently elected officers do not command the confidence of those who know most of fire brigade matters, more especially the chief and his third officer; the second one is best qualified of the three. They were elected under a pernicious system of wire pulling. None of them sleep in the fire hall." The retiring chief, Beattie, it is added, was greatly superior to his successor, but "was forced to make way for an inferior man."

—Alice French, whose pen name is "Octave Thanet," the story-writer, said recently that she took great comfort in the fact that she could, if necessary, earn her living either as a typewriter and stenographer, or as a photographer, or, best of all, as a cook

—The pitmen have resumed work at the Spring Hill, N.S., mines under the former agreement of a six hours' shift, with six hours' pay They stopped work for eight hours' pay for the six hours' shift.

—Hawkesbury is applying to the Ontario Government for incorporation as a town.

Standard Life
Assurance Co.

ANNUAL STATEMENT

At the 69th annual general meeting of the Standard Life Assurance Company, held in Edinburgh, on Tuesday, the 5th March, 1895, the following results for the year ended 15th November, 1894, were reported:

4029 Policies of Life Assurance were issued, assuring	$ 8,723,836
The total existing assurances in force at 15th November, 1894, amounted to	113,274,360
The claims by death or matured endowments which arose during the year amounted, including bonus additions, to	2,947,073
The annual revenue amounted at 15th Nov., 1894, to	5,139,161
The accumulated funds at same date amounted to	39,353,822

Being an increase during the year of $842,065

Investments in Canada:

Government and Municipal Bonds,	$6,820,000
Mortgages over real estate, 1st lien,	3,500,000
Real estate	355,000
Sundries	490,500
	$11,165,500

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments - no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

MONTREAL MARKETS.

MONTREAL, March 27th, 1895

ASHES.—There has been a slight improvement in receipts, but the month is expected to be some 40 brls. short of last year. There have been shipments to Britain of 60 barrels since last report. We quote first quality pots $4 to 4.05, seconds $3.70; pearls nominally about $6.10 per cental.

CEMENTS AND FIREBRICKS.—Some fair jobbing orders are reported from Ontario, but the season here is hardly sufficiently advanced to create much demand for local consumption. We quote English at $2 to 2.15; Belgian has sold at $1.85 to 1.95. This being the repair season, stocks of firebricks are being steadily depleted, and quotations range from $16 to 22, as to brand.

DRY GOODS.—The weather has been bright and sunny for some days past, and in the city shoppers have been out in considerable force. In the country, too, spring goods are in more demand, and most houses report quite an improvement in sorting business. Money is coming in a little better from some quarters, but there is no general improvement in remittances

Buckwheat	8,403	12,649

GROCERIES.—The distribution of goods, which has been light for several weeks past, shows a little improvement this week, and a freer movement is looked for next week, when spring freight rates come into operation. In prices there is little in the way of change Some moderate sales of new Barbadoes molasses, to arrive, are reported at 30c the jobbing price from stock is still 32½c. Latest advices give the quotation at 16c, f.o.b., which means about 29c. laid down. The situation as regards sugars is rather firmer, refiners declining to make concessions, and 3⅞c., which was shaded a sixteenth for round lots is now a solid quotation for standard granulated It is said that a very large order, at the shaded figure, was declined early in the week. There are several features in the situation which favor this stiffness. Raws are dearer, the demand of late has been quite free, and the Redpath factory will shortly shut down for several weeks. Yellows continue to quote at from 2½ to 3c German granulated is never heard of now. The local movement in teas is quite a light one at the moment, but it is said an offer has been made from Chicago for all the low

grade Japans held here by the branch of a Yokohama house. Reports from Japan regarding the prospects for the season of 1895 are rather conflicting. One circular just to hand speaks of a probable heavy advance on last season's prices, another speaks of the prospects of a full crop, and apparently anticipates no material advance. In raisins and currants the demand is confined to a few odd boxes and brls., and there is nothing new in prices. Some large sales of gallon apples are reported to jobbers at about $2.10. Canned peas are scarce and firm at 92½ to 95c. There is a fair demand for evaporated fruit; dried apples 5½ to 6¼c., evaporated ditto 6½ to 7½c., evaporated peaches 12 to 15c., apricots 14 to 18c., pears 11 to 12c.

HIDES.—The firmness is well maintained. Slaughter hides are reported to be selling at 7c. in the United States, and some local dealers are said to be asking 6½ to 7c. for No. 1 light hides There has been some American enquiry in this market, but supplies here are hardly sufficient for home wants. Dealers' prices are for No. 1 light hides 5c., heavies 5½c., calfskins 5c., lambskins 10c.

LEATHER.—The increasing firmness in the hide market is causing some shoe men to be a little more anxious about buying stock, and more enquiry is to be noted. The American sole leather trust has advanced prices half a cent. In the local market glove grain has been advanced a cent to 11c., and for best western splits 18c. is being asked. We quote:—Spanish sole B.A. No. 1, 18 to 20c.; do. No. 2 to B.A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c.; No 2 do., 17 to 18c.; common, 15 to 16c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; western splits, 16 to 18c.; Quebec do., 13c.; juniors, 11 to 13c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 10 to 11c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Trade shows no signs of picking up as yet, and values show depression in many lines. Stocks are larger than usual at the season, and consequently few orders are being placed for spring import. No transactions of any consequence are reported in pig iron, and prices remain about as before. Summerlee is quoted at $21.00 in car lots; there is a moderate lot of No. 2 Langloan in store here for which $17.00 is quoted. Canadian bar iron is easy at $1.55 in car lots. There is demoralization again in the cut nail trade, and sales are being freely made at $1.90. Canada plates are dull at $2 00. There has been no material advance in ingot tin locally, despite the higher quotations by cable. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19 50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to 17.00; Ferrona, No. 1, $16.50 to 17 00; machinery scrap, $14.00 to 15.00; common do., $12 00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5 00; Canada plates—Blaina, or Garth, $2.00; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2 20 to 2.30; No. 26, $2 15 to 2.20; No. 24, $2 10; tin plates—Bradley charcoal, $5.00; charcoal I.C., $2.90 to 3.00; P. D. Crown, $3.25; do. I. X., $3.85 to $4.00; Coke I. C., $2.60 to 2.75; coke wasters, none offering; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.90; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65; tank steel, $1.70; heads $2; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25: American do., $4 to 4.25. Antimony 10¼ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¾c; ¾ in., 3¼c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Orders for goods in these lines come in fairly well, and there will be quite a lively shipment of goods next week when summer freight rates come into force. Cod oil is reported scarce and dearer in the United States, and a couple of local operators have been buying up some considerable lots, presumably for shipment. Local jobbing prices have not yet been affected. Turpentine is now up to 55c. for single brls. We quote:—Turpentine 55c. per gallon for single barrels; two to four barrels, 53 to 54c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6¾c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4¾ to 4¾c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 12½ to 13c. in bulk, 14 to 14½c. in small packages; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

TORONTO MARKETS.

TORONTO, March 28th, 1895.

GROCERIES.—Trade is only fairly active. Prunes are firm. Currants hold unchanged, with the outlook for higher prices. Sugars are firmer, the local market having advanced 1-16th in feeling during the week. This is due entirely to the position of raws, and upon this subject that well-known authority, the *N.Y. Journal and Bulletin of Commerce*, says: "The market for raw sugars retains all the appearance of having good natural strength, and sellers generally are in a cheerful mood. Stocks are small enough both on spot and afloat to be controlled without difficulty, and it looks as though refiners were in a humor to continue negotiations for desirable parcels so long as they come out in no greater force than of late shown. Europe without much change to-day, but private advices from Cuba estimate a reduction of 200,000 tons in the crop yield." There is a fair movement in Young Hyson teas, but at the moment apparently a lull in India and Ceylon teas. Japans of all grades are of good value Purchases are being made only for immediate wants, and there is little tendency to speculate on the future course of the market.

GRAIN.—The wheat market is firm and Ontario millers are making active demands for stock. There is undoubtedly a scarcity in supply. Along the Northern and Midland railways there are good supplies. In the vicinity of Chatham a quantity of red winter has been stored until recently, but is now pretty well cleaned up. In nearly every other district of the province short supplies are the rule and not the exception. The barley season is now, of course, pretty well over. The market is easier

These prices are wholesale by the car-load.

in consequence of orders being well filled without exhausting stocks. There yet remains a limited movement to the United States Oats are weaker in feeling, but without change in price. This easiness in feeling is a new feature for this market, as for weeks we have chronicled in almost every issue a small advance in quotations. It is the outcome of a "Manitoba scare." A few carloads have been recently imported from this province, and dealers are uncertain as to whether this is all that we may expect from this quarter, or only a forerunner of larger shipments. Peas are firm at unchanged quotations; the movement is principally of an export character, shipments being sent to Montreal, there to await the opening of navigation.

THE VISIBLE SUPPLY.

Wheat	75,773,000	72,164,000
Corn	13,396,000	19,165,000
Oats	6,353,000	2,713,000
Rye	272,000	441,000
Barley	962,000	686,000

The stocks of grain in store at Port Arthur on March 15th were 680,042 bushels. During the week there were received 1,894 bushels, and shipped 3,227 bushels, leaving in store on March 23rd, 678,709.

HIDES AND SKINS.—The last advance in hides was rather surprising when the market was viewed from the tanner's standpoint, but a further advance this week was almost startling. Merchants' views here are, of course, dictated largely from Chicago. Of this market *Hides and Leather*, March 23rd, says: "The upward tendency of light and heavy cows remains unchecked, with still higher quotations to record. The only sales of special note were in this line and spready steers. The packers are not offering freely, preferring to part with only a car or two at a time, and thus gradually advance prices. Whereas the tanners who are disposed to buy hold off, waiting for a larger block to be offered them. Others again are taking their chances by waiting for a few weeks until an improved quality is to be had, and if they have then to pay a little more money they regard them fully as cheap as present kill. The demand for heavy steer hides is not active, although there are very few to be had. No improvement in cattle receipts." During the week American buyers were here with the view of making purchases. Quotations, after the advance on Monday, stand as follows: green cows, 5c.; steers, 5½c.; cured and inspected, 6c Sheepskins are steady, the market remaining quiet, with 90c. still paid for the best skins.

LEATHER.—Tanners and merchants were all interested in Monday's meeting, and talk little else but of terms of credit, hide inspections, and bark measurements. The advance in hides last Monday was not entirely unexpected, as everyone is now ready to admit the statistical position is such as to warrant higher prices. With leather on its present basis, however, tanners do not see their way clear to invest in raw material at present figures, although conscious of the fact that further advances may possibly occur. But, if we mistake not, a new era is beginning to dawn for the tanner. Hitherto he has talked advance and curtailment of output, but the high price of hides has forced him to in a measure carry out his pretensions. Several buyers now canvassing the small tanners of Ontario for stock write that leather is scarce, and one says that he has been able to pick up only a few hundred sides where he expected to purchase several thousand. Some splits are going forward to England. What effect the great strike of the English operatives will have upon this market it is impossible yet to foretell.

PAINTS AND OILS.—Trade in prepared paints is active. Some large shipments are going forward now, but the bulk of the orders are being held over for April delivery. For dry colors there is fairly good demand. White lead is unchanged in price, while the demand continues good. The principal feature of the market continues to be the turpentine situation Due to the severe weather in the Southern States, turpentine has advanced to 52c.; during the year the quotation has been as low as 39c. Window glass is firmer, the result of advances in Belgium. Many import orders for spring delivery are being placed. Attention is now being directed to the spring freight tariff, which will probably take effect the first week of April.

PROVISIONS.—The problem of how to dispose of the large quantities of inferior butter on the market is becoming serious. Offerings are made here at 7 cents, and find no buyers. It is difficult to estimate just how much dairy butter there is in Toronto, but it is certainly no small amount. This week "June' butter was offered, and of course was in anything but choice condition. Cheese is quiet and easy at 10 to 10½c. on the local market. Hog products are firm in feeling at the following quotations: long clear 7¼ to 7½c, hams 10 to 10½c., breakfast bacon 10½ to 11c., rolls 8 to 8½c.; lard, 8¼ to 8½c. Eggs are much firmer. This may be attributed partially to bad roads, which have prevented anything like free deliveries. Merchants are now anxiously enquiring, what of Easter? Dried apples at 6c. are in fair demand. There are apparently no large stocks of dried apples in the country, and the market is well cleaned up. Evaporated are dull and easy, and stocks are large; a year ago in March stocks were small

WOOL.—So far as Toronto is concerned, the movement in fleece wool for the season is over. For pulled wools there is moderate demand, both locally and from the United States. Foreign wools in the local market are steady, but the business doing is not large. Some of the mills report a satisfactory trade, while others say everything is dull, but from all our available sources of information, we would judge the woolen goods trade in fairly prosperous condition.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

AMERICAN FINANCIAL AFFAIRS.

The New York circular of Henry Clews & Co., dated 23rd inst., says: "The improvement of business on the Stock Exchange, which has been foreshadowed in my late weekly advices, has appeared within the past week with a distinctness and force which show that it is real and destined to be permanent. It is needless to here recapitulate the grounds of my forecast; it is sufficient that the change is already here, and with all the evidences of its being the beginning of a true revival

"The change has been simultaneous in New York and London. The latter market has been a free buyer here for the last few days, and its operations indicate fresh confidence and something more than a mere temporary spurt with quick realizings. The bond syndicate and its operations have evidently had an assuring effect upon foreign investors, and are creating a revival of interest in our securities. Not a few of those who were unable to get from the London subscriptions all the new fours for which they bid, have been indnced to take other American issues, which is evidence that the restoration of the treasury finances has had a distinctly favorable effect abroad upon our credit at large.

"In estimating the future, it is not to be overlooked that, in some very important respects, this country is now in a materially better position than it was before the late depression set in. So far as concerns the currency question, upon which so much has depended, that is certainly the case. Two years ago, we were in the midst of alarm and apprehension that the nation might be precipitated upon the silver basis. The danger was all the greater because the position and the question were not understood, but greatly misunderstood, and much education of public opinion on the subject was needed. As a nation, our ignorance equalled our alarm. Legislation on the question was undertaken with utter lack of qualification to deal with it intelligently, and Congress accomplished virtually nothing towards a settlement. But all this fear and agitation has been attended with a profound examination into the principles at issue; already public opinion has become intelligent if not fully matured; false principles have been discredited and steps are being taken for bringing public sentiment to a point at which a broad and sound policy may be formulated for the future guidance of political leaders and of the new Congress. In this way the people are being trained to a standard at which a large majority of them may be trnsted to stand firm for a sound system of currency. On this large national question, therefore, we may feel assured that we have passed from a condition of positive danger to one of prospective security.

"The tariff question, which two years ago was having a paralyzing effect upon industry, has had its day. It has been settled in a way less calculated to disturb business than was at first feared. . . Two years ago, we were at the climax of a world-wide over-production of manufactures. It was the result of the growth of modern improved plant and capacities of production far in excess of any possibilities of consumption, and was at the same time a consequence of an overdoing of trade in the rawer and semi-civilized populations of the world. Our own country directly sympathized with this inflation of trade in other countries, and had, at the same time, its own forms of over-supply. Two radical changes must be made before the beginnings of recovery could appear. First, there must be a reduction in prices, in order to admit of an enlarged consumption; and next there must be some curtailment of production; while, at some later stage, when these reliefs had been realized, there would be a chance for the development of new consumptive wants. The first of these necessities has been met by a general and large decline in the prices not only of goods, but also of raw materials, most of the latter being now selling at prices unprecedented within the present generation. The reduction of production has been brought about by a painful but natural and inevitable process. The older plant, being unadapted to cheapness of production, has had to be retired from use, and must be regarded as in a large measure extinguished, as under the reduced scale of prices it can now be worked only at a loss. In this way, bankrupt competition has been eliminated, and the remaining active machinery is of the most approved and economical style, and is qualified to run at a profit upon the lower scale of prices that has been established."

ECONOMY IN THE MANITOBA LEGISLATURE.

About a week ago a debate arose in the Manitoba Legislature on the general subject of economy. Mr. Armstrong brought forward a measure in which he was seconded by Mr O'Malley, proposing to reduce the number of legislators by reason of limited resources and sparsity of population in the province. He contended that Manitoba was the most expensively governed province of Canada. Twenty-five was the number he proposed for the Legislature, and he would allow them to be paid, as before, $600 per session.

Proceeding to comparisons, he said that by last census the population of Prince Edward Island was 109,078; that of Manitoba was 152,-000; but he took for comparison the present population estimated at 190,000. The revenue of Prince Edward Island in 1892 was $245,652; its legislature had thirty members and there were three salaried ministers. The cost for members' indemnity (outside of mileage) and salaries of ministers was $8,910. It cost there to administer the affairs of 109,000 people, a little more than half our population, with a revenue of $245,000, about one-fourth of the cost in this province, which is $24,000 for mem bers' indemnity and $16,000 for ministers' salaries.

New Brunswick, with a population of 331,000 and a revenue of $652,669, had 41 members and five salaried ministers; and the entire cost for members' indemnity and salaries of ministers was $21,100, as against $40,000 in Manitoba. The premier and attorney-general there received $2,100 as against $3,000 here. The provincial secretary there received $2,100, the surveyor-general $1,700, the chief commissioner of public works $1,700, the solicitor-general $2,100, total $8,800; as against $16,000 in Manitoba for five ministers.

The difference was still more striking in Nova Scotia. With a population of 450,000 and a revenue of $769,000, there were 38 members—one member for every 12,000 inhabitants, while we have one member for less than 5,000. The entire cost of legislation is $29,500; there are only three paid ministers, receiving salaries of $4,000, $3,200 and $3,200. In addition to the three salaried ministers there are four ministers without portfolio. The total cost for ministers' salaries is $10,400, as against $16,000 in Manitoba.

Mr. Fisher proposed to economize in a different way, by shorter sessions, and by paying correspondingly smaller salaries. He would pay the ministers of the province $2,000 each. Hon. Mr. Cameron rallied Mr. Armstrong on bringing the subject up for the first time at so late a period in the session. The proper time to object to the amount of the indemnity was when the estimates were going through the house. In each of the maritime provinces, Mr. Cameron reminded his hearers, there is an upper and a lower house. Prince Edward Island has an upper house of 13 members, and a lower house of 30; Nova Scotia, an upper house of 21 members, and a lower of 38; New Brunswick, an upper house of 18, and a lower of 41; Quebec, an upper house of 24, and a lower of 73.

A FRENCHMAN'S LETTER.

The curious dialect of the French-Canadian, who twists the personal pronoun and refers to a female as "he" and a male as "she," is as familiar to men on the lakes as the towns along the Detroit and St. Clair rivers, where the odd characters of lumber woods fame are to be found in great numbers. Capt. Frank Welcome, of Buffalo, who was first officer on the big passenger steamer "North-West" last season, recently received a letter from Peter La Champaign, who lives in Algonac, Mich., and who, writing as he talks, brings out the distinguishing traits of the French-Canadian character. The letter, just as it was written, says the *Marine Review*, is printed herewith.—

Algonac Feb 21 1895

Capt. Welcome Dear Sur I hope you go axuse me fe i go write on you cos i hant got much quant on you. but de rasen what i rite on you for is dis you no i got won wimens and i go ax you if you can give him a job to go cook on your bote I mete Paul Socia de odder day and she tole me you was gone to sale big bote dis sumer and she say to me like dat you rite to Capt. PETER LA CHAMPAIGN,
Alganac, Michigan Stat.

VICTIMS OF ALCOHOLIC INEBRIETY.

It is often a puzzle to know what to do with victims of the drink craze. In every large city there are great numbers of minor delinquents, who are a greater puzzle to those who study public punishment than even the major criminal. Last year, says Mr. H. S. Williams, there were more than 23,000 commitments of this class of misdemeanants to the workhouse of New York city. Many individuals were committed more than once for short terms, so that fewer than 23,000 persons are represented in this list; but, even so, it is a great flood of human flotsam floating in and out of the city jail, a drain upon the taxpayers while confined, and a worse pest to society when at large. These people cannot control their disposition to drink intoxicants. They may be gentlemen or ladies in their conduct when sober, but they are often fiends when drunk.

By far the greater number are habitual or periodical inebriates, and the misdemeanors they commit are almost always induced by alcoholic indulgence. They are victims of the disease, inebriety, and can no more help drinking when the impulse is on them than a boat without anchor can help floating down stream. Once the alcohol is in their system, propensities are aroused which lead to criminal acts—wife-beating, indecent assaults, and the like. During these paroxysms the offender is quite irresponsible, often absolutely unconscious. To assume that the pillory, the whipping post, the guillotine, the electric chair would haveany terrors for him, is to disregard the simplest psychological conditions. There is no conceivable punishment that would be deterrent of crimes due to alcohol or passion. Persons who are addicted to drink or to the opium habit must, for their own safety and that of the public, be placed in asylums, private or public, and treated for their malady.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co.
of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

DIRECTORS

J. AUSTIN (Founder Dominion Bank), **President.**
Hon. Justice Maclennan. James Scott, Merchant.

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses** and **contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

HUGH SCOTT, Managing Director. **THOS. WALMSLEY,** Treasurer.

DECISIONS IN COMMERCIAL LAW.

OLIVER v. LOCKIE.—The rule is, according to Street, J., that when an owner creates an artificial water course, discharging surplus water upon a neighbor's land, he obtains at the expiration of ten years a right to continue to discharge it, but the neighbor acquires no right to insist upon the continuance of the flow. The easement arises for the benefit of the dominant tenement.

HOGABOOM v. GRAYDON.—The Court of Chancery has decided that if a transaction of sale takes place between a married woman and her husband as to furniture, etc., if she and her husband continue to live together as before, her right must be manifested and protected by a registered instrument if she wishes to hold as against his creditors, for there cannot be said to be in that case such an actual and continued change of possession as is required by the Bills of Sale Act.

MOLSONS BANK v. HELIG.—The plaintiffs sued the defendants as indorser of a promissory note made by a customer, a number of whose notes, indorsed by various persons, they held, and also a mortgage from the customer on certain lands to secure his general indebtedness. Before this action the plaintiffs had released and discharged certain of the lands comprised in the mortgage, without the consent of the defendant. Under the circumstances the Court of Chancery decided that the plaintiffs were entitled to judgment against the defendant for the amount of the note, but without prejudice to the right of the latter to make the plaintiffs account for their dealings with the mortgaged property held for the benefit of the indorsers, when that security had answered its purpose, or the debt had been paid by the sureties, or when, in any other event, the application of the moneys from the security could be properly ascertained.

MCDERMOTT v. TRACHSELL.—The mere delivery to a ratepayer of a statement of taxes due is not sufficient evidence of the demand required to be made for the payment of such taxes, before the collector can proceed by way of distress, unless a by-law has been passed, providing that such delivery shall be sufficient for the purpose, according to the Court of Common Pleas.

JOHNSON v. JONES AND TOBICOE.—A judgment of Rose, J., is to the effect that an Indian, male or female, may make a will, and may by such will dispose of any lands or goods or chattels, except as far as such rights may be interfered with by the Indian Act or any other statute. And further, that in the case of the will of an Indian widow, where the property bequeathed was personal property, there being nothing in the Indian Act to restrict or interfere with her right to dispose of the same either by act *inter vivos* or by will, the will was valid and sufficient to pass the property named in it.

In re CONFEDERATION LIFE ASSOCIATION AND CITY OF TORONTO.—An appeal from the assessment as income of the sum received by the Confederation Life Association from their investments. The question that arises upon this appeal is whether an amendment made in the Dominion Insurance Act in 1894, in the following words, is such as to induce a change in the basis of assessment: "In computing or estimating the reserve necessary to be held in order to cover its liability to the policyholders in Canada, each company may employ any of the standard tables of mortality, as used by it in the construction of its tables, but there shall be set apart and credited to such reserve in each year, out of the interest earned in the year, a sum equal to four and one-half per cent. per annum on the amount of the reserve up to the standard provided by this Act. Provided, that in no case shall a company be required to maintain a reserve in excess of that provided for by this Act." Macdougall, J., disposes of this point in manner following: "It is contended that the words in the new section impose a liability upon the company different from or more exacting than that imposed by the words in the original section. To put this expression into plain language, it is, in effect, that so much of the premiums as are actually retained by the company, and invested by it for the purposes of the company, become in effect the capital or principal fund of the company; and interest earned by such investment of such fund is income and is liable to an income tax. If I was right in 1893 in holding that interest earned upon the investments of this company is income and is taxable as such in Ontario, I fail to see how the language of the Dominion statute of 1894 alters the liability of the company."

THE Stanley Grange Stove Company, of Stanley, N.B., have suspended payment, and a meeting of creditors was held in St. John last week. Liabilities are put at $14,000, with assets nominally $15,000. The business was begun in 1889 by a society of 160 members, but the whole control of affairs has been in the hands of Mr. Humble, the manager, and it is said the members know no more of the business affairs than he chooses to tell them. The creditors have proposed that he take the business over, and pay them 75 cents on the dollar.

Mercantile Summary.

THE Institute of Chartered Accountants of Ontario intend holding examinations for the certificate and for the diploma of fellowship in May.

MESSRS. GORDON DOUGLAS and A. J. Jardine have entered into partnership for the purpose of carrying on a general merchandise business at Mount Stewart, P.E.I.

AMONG the bills passed in the New York State Senate last week was Senator Rick's, extending the time for the completion of the New York branch of the Canadian Pacific Railway.

THE plaster business will be actively carried on at Windsor, N.S., this year. The Wentworth company will ship about 100,000 tons to New York, and the Windsor company expect to ship as much more.

ABOUT a week ago, James McMurray, an Essex tinsmith, gave a chattel mortgage. Now he assigns.——Vanzant & Co., who had a good hardware trade in Markham, are in trouble. They have had a number of changes since the business was established by G. R. Vanzant in 1871. Now his wife owns the business. She was burnt out a month ago, claiming a loss of $7,000. This was insured for $3,500. Now she assigns.——F. Diyoune, dealer in men's furnishings, Tweed, has assigned. Heavy expenses seem to have hindered his progress.

Mercantile Summary.

A MONTREAL letter informs us of the receipt of a cable message on Tuesday announcing the death in Bermuda of Mr. John C. Watson long and well known as a merchant and manufacturer in Montreal.

THE general agent of the Northwestern Transportation Company, of Sarnia, has leased Odette & Wherry's dock at Windsor. It is now settled that the "United Empire" and "Monarch" will this season run from Windsor to Duluth, instead of from Sarnia to Duluth.

CABLE rates from Canada to South Africa have been reduced. The price per word from Halifax to Cape Colony, Griqualand West and Cape Town is now $1.48; the tariff to Orange Free State, South African Republic (Transvaal), British Bechuanaland, Bagamoyo, is $1.52; to Mozambique or Delagoa Bay, $2.41: to Mombassa and Zanzibar, $1.48.

IN the city of St. John, a new arrangement which will place the electric and gas lighting, as well as the street car service in the city proper, under one control, will take effect on 1st May. The stockholders of the St. John Gas Company decided on the 28th March, by a vote of 1,930 to 530, to amalgamate with the Street Railway Company. The basis of amalgamation as to capital stock stands: Street Railway Company, $600,000; Gas Company, $400,000. Of the nine directors of the new company four must be shareholders of the present gas company.

IT is agreeable to hear of the continued success, in the United States, of Canadians of brains and energy. The marine issue of the Cleveland *Plain Dealer*, consisting of 36 pages, with colored sheet, contains, among much other matter relating to that and other harbors on the lakes, a notice of a new departure taken by the Cuddy-Mullen Coal Co. The Pennsylvania Railway Co. is now under contract to build for this company a dock in the outer harbor of Cleveland, about 100 yards east of the entrance to the river, which will be in the shape of a slip running from the shore line 600 feet out, where good water will be reached. Hitherto the fueling wharves have been in the main river and old river bed, which was often inconvenient. The *Plain Dealer* says that with the car-dumping machine in operation here vessels carrying 3,000 tons of coal can be loaded in a day. It is added that these are the largest and most convenient fueling wharves on the chain of lakes. Mr. Cuddy was originally of Strathroy, and spent ten years in private banking at Amherstburg, on Detroit river, which place he left three years ago for Cleveland.

Mercantile Summary.

This Cut represents the "Birley" Patent Folding Container with lid closed and side flaps ready to put into position. The lids can either be supplied loose or attached to the box as shown in this cut.

This style makes a far neater box than hand-made ones, besides being cheaper and requiring no room for storage. It can be made in all sizes and shapes, and is suitable for almost all purposes. Full particulars furnished on application to the manufacturers.

Mercantile Summary.

THE annual meeting of the Montreal Elevating Company was held last week The directors elected for the ensuing year were Andrew Allan, president; Hugh McLennan, Alexander McDougall, A T Patterson and T A Crane

AN elevator is being built at Prescott. The directors are Ottawa and Prescott people. Officers are as under: President, J. P. Wiser, Prescott; vice-president, William Scott, Ottawa; secretary-treasurer, F. J. French, Prescott.

THE corporation of Brockville sold recently to the North British and Mercantile Insurance Company, Montreal, $16,000 debentures, 4½ per cents., having thirty years to run, at 104 27, and $8,000 debentures, 4½ per cents., running twenty year's at 106 84.

H T PRYOR & SONS, dealers in shoes, etc., Petrolia, are in difficulty and have assigned.—— James Crocker succeeded M. J. Hennesy as a dealer in musical instruments in St. Thomas some three years ago, paying a few hundreds of dollars cash, and giving a mortgage for the balance. Owing to some charges of irregularity being brought against him, he has taken his departure across the border.—— John Young, tinsmith, Thornbury, has assigned.——An extension of time for three years is asked from the creditors of T. O. Callaghan, butcher, Alliston

A MONTREAL merchant received on Friday last the following despatch from a St. John's, Nfld., house: The "Aurora" has arrived loaded with seals and reports that the "Neptune" has 35,000, the "Wolfe", 26,000, the "Ranger" 16,000, the "Hope" 12,000, the "Newfoundland" 6,000, with the remainder of the fleet clean. Mr. Rendell explained to the *Gazette* that this did not include the three or four steamers in the Gulf engaged in sealing

AN offer of compromise at 30 per cent is made by Donald McGregor, dealer in hardware at Caledonia, who wants ten months time to pay this. He owes $8,000, and has nominal assets of half this sum. A year ago he claimed to have a surplus of $6,000, and creditors would like to know where it is gone——Two weeks ago we noted the assignment of Adam Falk, grocer, Shakespeare Since then he has induced his creditors to accept 65 per cent. of their claims. W. T. Willis succeeded H M Rees, in 1892, as a grocer in Brantford. He had a small capital, and finding that he cannot pay his creditors makes an assignment

An Ottawa firm of tailors, Chabot & Co., are reported to be compromising at 50c., secured, payable in three and six months, liabilities being $5,476. Mr. Chabot was unsuccessful a few years ago, and has since been doing business under cover of his wife's name.

An assignment has been made by M. Paupst, tailor, Hamilton.——In November, 1892, W. J. McGill bought the hardware stock of Staples & Noble, at Bethany, the money being advanced by C. Chittick. In August last a judgment was obtained against him, after which he sold out, and now assigns.

We note a couple of small failures in Nova Scotia. F. A. McPherson, tailor, Middleton, who began business in the summer of 1893, is reported to have assigned, making preferences in favor of his mother and some others.—— Horton & Scott, for the last two and a-half years in the grocery and confectionery business at Springhill, have also assigned, owing about $2,000.

A meeting of the creditors of J. W. Mackedie & Co., wholesale clothing, Montreal, was held on Thursday of last week, when the creditors present were unanimous in granting a settlement at the rate of 65 cents on the dollar, in quarterly payments, spread over sixteen months from the 1st April, last payment to be secured. The direct liabilities are $87,000, and indirect $70,000.

Messrs. Sloan & Crowther, wholesale grocers in this city, have dissolved partnership, and the old business will be wound up by Mr. W. C. Crowther, who has taken an office at 48 Front street east. In the meantime Mr. John Sloan has purchased the firm's stock of groceries and will continue the business on the opposite side of the street from the above address.

The Horse Show to be held in this city on the 18th inst. and following days, promises to excel anything heretofore attempted in Canada. Many of our prominent business men have subscribed liberal amounts toward the expenses of the occasion, and no less a sum than $5,000 will be awarded in prizes. The new Armory is a central place and well adapted for the purpose; the lovers of our noblest animals will there be able to see them in the large ring with the best possible advantage. Many of our American neighbors have taken quite an interest in the matter and will probably attend the exhibition.

A. Raymond, who carries on a farm at St. Stanislas de Kotska, Que., and also conducts a general store, is reported as having assigned with liabilities of some $16,000. He has dabbled a good deal in property, and the most of this is a mortgage indebtedness.——D. Z. Guay, general merchant at Napierville, Que., reported failed a week or two ago, is offering 10 cents in the dollar.——Joseph Barsalou, blacksmith at St. Johns, also dealing in agricultural implements, has abandoned his estate.

In the spring of 1890 Crawford and Fulton succeeded James Crawford as general storekeepers at Neepawa, Man., assuming the liabilities of the latter. This proves to have been a heavy load, as payments from the country have been slow and unsatisfactory. The firm has assigned.——Wm. Thompson, formerly an hotel-keeper at Oak Lake, opened a general store two years ago. In the early part of February his wife was successful in obtaining judgment against him for $5,500. After this he endeavored to compromise with creditors; not being successful, he assigns.

—At the recent annual meeting of the Toronto Radiator Manufacturing Co., the reports presented by the secretary and manager were of a most satisfactory character. The company have agencies established as follows. Canada—Montreal, Que.; Quebec, Que.; St. John, N.B.; Hamilton, Ont.; Winnipeg, Man.; Victoria, B.C. London, Eng.; Edinburgh, Scotland; Glasgow, Scotland; Belfast, Ireland; Antwerp, Belgium: Hamburg and Berlin, Germany; Auckland, N.Z. The directors and officers of the company were re-elected and are as follows: Joseph Wright, president; David Carlisle, vice-president; F. W. Doty; John M. Taylor, secretary-treasurer and general manager.

The following late Montreal failures are to be recorded: Joseph Domphouse, bottler, has abandoned his estate.——George Yon, plumber, made an offer of 30 cents, which was not acceptable to creditors, and he has since amended his proposition to one of 40 cents cash, or 45 cents at three and six months.——S. H. Martel, maker of signs and show cards, is reported away, and a meeting of his creditors has been ordered by the court. Liabilities are stated at about $5,000.——Vibert & Flynn, small grocers in the east end, have assigned, with liabilities under $1,000.——Joseph Meunier, hotel keeper, has filed consent to assign, a demand having been made upon him: he owes $3,644.——J. Ross & Son, engaged in the manufacture of insulated wire for the last five years, have become embarrassed, and have been asked to assign.

A bill to license and regulate bicycles, introduced into the Ontario Legislature by Mr. Stratton, of Peterboro, was before the Municipal Committee of the House at Toronto, on Tuesday. The bill was withdrawn, after discussion.

A committee has been appointed by the Montreal Board of Trade to make representations to the Dominion Government urging that the post of Collector of Customs at that port, so long vacant, may be filled forthwith. In response to an expression by the shipping interest of a fear that the Welland Canal would not be open till 1st May, in which case the arrival of grain at Montreal would be seriously delayed, it was ordered that the Government be addressed in regard to the matter if necessary.

The following business casualties among country traders in Quebec province are to be noted this week: R. H. Sayer, for some thirty years in the baking and grocery business at Aylmer, and prosperous in a moderate way, has got into trouble through lending his name, and an examination into his affairs results in an offer of 75 per cent. on liabilities of $7,187.—— J. B. Poirier, sewing machines and furniture, at Ste. Scholastique, reported in trouble last week, has assigned, and owes about $7,000.—— E. Berard, of Three Rivers, for some years in the grocery business, has assigned on demand, with an indebtedness of $5,437.——L. W. Brissette, general dealer, St. Eustache, has settled the claim on which the demand of assignment mentioned last week was made, and said action has been withdrawn.——An assignment has been made by R. Urquhart, tailor, Cookshire. The business was formerly carried on by F. Urquhart, who came from England a few years ago, and failed last September. The stock was then bought in for him, and he resumed under the above style.——N. Latraverse, the Sorel hotelman, whose failure has been already noted, offers his creditors 10 cents on liabilities of about $3,000.——Jeremie Pitre, of St. Alexis, Chicoutimi, storekeeper in a small way, Crown Lands agent, secretary to the municipality, and an important man generally in his little sphere at that remote point, is in financial distress, and offers his creditors 25 cents on the dollar, liabilities being $1,840.

57 Bay Street
Toronto

THE general stock of O. C. Lee & Co., Lisle, Ont., sold at 49½ per cent. R. D. Gardner's general stock, Mount Pleasant, realized 60 per cent. The hardware stock of O. & F. Shoemaker, Chatham, brought 51½ per cent. James Allan & Co.'s general stock, Beamsville, was put up at auction, but only 50 per cent. being offered, it was withdrawn.

AN application has been made to the court for a winding-up order for the Electric Despatch Company in Toronto.——A. W. Godson, a somewhat noted city contractor, had good success in his business for a number of years. But unfortunately he invested most of his surplus in real estate, where it is now locked up. Under these circumstances he assigns to E. R. C. Clarkson. It is thought that the estate will show a good surplus.

AN offer of compromise at 40 per cent. is made to the creditors of W. E. and C. Stanley, dealers in grain, general storekeepers, etc., Lucan. This offer has been declined until the inspectors appointed look into the matter. They owe about $25,000. It will be remembered that five years ago this firm succeeded B. Stanley, who retired with a big surplus.——Forty per cent. is also offered to the creditors of D. Allen, Malton, whose assignment we noted a week ago.——J. Snowball & Sons, brickmakers, Markham township, assign.——In May last R. J. Thompson went from Toronto to Uxbridge and opened a hardware store with but small capital. Being somewhat inattentive to his mercantile duties, he already finds an assignment necessary.

THE NEWFOUNDLAND DELEGATES.

From reported interviews with some of the Newfoundland delegates, at Ottawa, it would seem that they have not come with any cut and dry plan for uniting the island with Canada, but that they want to see what terms of admission can be obtained. Still, it is reasonable to expect some proposal should come from them. They have not at their back, it is admitted, the authority of both branches of the Legislature of the colony from which they come. Before confederation can be consummated, there must be a reference of the question to the constituencies by a direct question to which an answer, either yes or no, would be made. It now turns out that the Imperial Government proposed a royal commission to enquire into the affairs of the island, the reason being, according to one of the delegates, Mr. McGrath, that the enquiry would have exposed more corruption than would have been pleasant to expose to the public gaze. When the present railway across the island is completed, the public debt will be $14,000,000, which, for a population of 200,000, is enormous. The fishery, the principal industry, has of late years not been profitable; the means of the merchants to furnish supplies for the fishermen has been lost, and the capital of the banks has largely gone the same way. The difficulty of getting supplies this spring is causing anxiety. The want of a municipal system and the debauching of a large part of the population by a system of poor relief, make the outlook anything but pleasant. And the difficulty is that no certain means of improvement are within sight. A vicious economic system has had much to do with producing the disaster. The revenue is derived almost wholly from import duties, and under our tariff, with tea free and sugar nearly so, the revenue of the island would be reduced much below what it is at present. This fact will need to be borne in mind during the negotiations

TORONTO, FRIDAY, APRIL 5, 1895.

THE SITUATION.

In explaining why the dividend had been passed by the Canadian Pacific Railway Co., Sir Wm. Van Horne said no one could have foreseen, two years ago, what has since happened in the business world of the United States, which he likened to an earthquake. No end of expectations have been disappointed. Yet some things have happened which ought to have been foreseen. It ought to have been regarded as possible, from the first, that interest on the land bonds, in years when sales were slow, would have to come out of earnings. And it ought to have been foreseen that after a number of subsidiary lines had been taken over, they would occasionally press with a heavy burthen on the resources of the parent line. The company may have done the best possible in the straits in which it found itself, when it had to face the question of dividend or no dividend, but there is behind this the question whether it ought ever to have got into this strait? The company has suffered from the fact, common enough in every business, that it is impossible to reduce expenses in proportion to receipts. The $4,000,000 set apart, in 1892, to ensure dividends in case of a decline in traffic, had to be drawn upon for other purposes. This is a contingency which, if it had been foreseen, would have robbed the special deposit of most of its charms. But if money in hand ready to pay future dividends is liable to disappear and leave only disappointment in its place, it is difficult to see what there is, in the shape of an extraordinary provision, for paying a dividend that can be relied upon.

France and England appear to be getting in one another's way, in the Upper Nile valley. The Royal Niger Company recently complained to the English Government that two French expeditions, under pretext of exploring, had in fact invaded the Upper Nile valley, which is under British protection. The alleged invasion is denied, on the part of France, by the official press. The fact that an expedition had been sent there was admitted, but it was added that the object was inoffensive, such as to ascertain a boundary. The British Government was uncertain as to the real facts, and it was anxious that the worst construction should not meanwhile and without absolute warrant be put upon them. Sir Edward Grey, Parliamentary Secretary of the Foreign Office, was put forward in the House of Commons to ask the House not to give credence to rumors, but to wait for an official explanation from France. But the chief significance of the statement was in what followed. It was to the effect that if it should prove true that France had done what the Royal Niger Company alleged, it would be an unfriendly act, and that France had been given to understand that Great Britain would so regard it. Sir Edward Grey's statement was read from a paper understood to have been prepared by the chief of the Foreign Office, after a cabinet council had specially considered the matter. Such an emphatic statement, made with such deliberation and decisiveness of tone, is naturally regarded in the light of an ultimatum, and expectation is on tiptoe to see what the outcome will be. Before the official statement came, that part of the French press which does not wait on Government prompting refused to recognize the protectorate of England over the Upper Nile region. It would be useless to deny that the case is one of great gravity.

Just at the time when the movements of the French in the valley of the Upper Nile are causing uneasiness in England, a contest between the British and the Swatis, a fierce mountain tribe in Northern India, is inevitable. India is a long way off, and though no arrangement for a common defence of the Empire has been come to, Canada cannot be indifferent to whatever tends to disturb the peace and affect the trade of Greater Britain. For some years the hill tribesmen in the neighborhood of Peshawur have been making raids, pilfering and otherwise giving trouble. Several of their villages have, from time to time, been taken and destroyed, in retaliation, by the British. At the latest accounts 14,000 men of the British command were ready to move into the Pathon hills and go across country to the relief of Robertson and his besieged escort. The hill region of the Chitral has never been penetrated by a white man, but its formidable defiles and dangerous passes have been traced by native geographers. In this way a tolerably accurate idea of the geographical difficulties to be encountered, in the short route to the Chitral, has been obtained. An army of 14,000 men, who might encounter on the line of march through dangerous passes well known to the enemy, 70,000 or 100,000 fierce mountaineers, may count on having a perilous time. The number is not greater than the army which, in the fatal Cabul expedition, was, on the return to India, reduced literally to one man, and the difficulties to be encountered in the present expedition are spoken of as being probably as great. This expedition, if successful, will open a road from Peshawur to Russian Turkestan; and the nature of the mountain country is such that once in possession of the British the defiles could be held against any opposing force. In this way British India would obtain one more security against invasion.

Additional complications are always managing to crop up in the Behring Sea sealing business. Under the award of the Paris tribunal fire arms cannot be used to kill seals in Behring Sea. The British Government thinks that if British sealers have guns on board when in that sea the guns should be regularly sealed up, so as to show they have not been and cannot be used without proof of the fact being left behind in the breaking of the seal. Sir Hibbert Tupper, it appears, objected to this regulation as not required by the Paris tribunal; and that the Americans, when they induced the British Government to put forward this regulation, wished to make the possession by British sealers of firearms in Behring Sea proof of intent to use them illegally. There is more in the fact than the argument. The possession of forbidden weapons is always a presumption against the possessor. The sealers argue

against sealing on the ground of necessity and impossibility. It is necessary for them to use firearms where they may be used, outside Behring Sea, and they cannot go back hundreds of miles to get them sealed before entering the water in which they cannot be used. But why not empower British or American cruisers to seal them on entrance into Behring Sea, first under proper restrictions, authorizing some one on board each sealer to do so? Then the possession of unsealed firearms might fairly be taken as *prima facie* intention of intent to do a forbidden act.

The directors of the Canadian Pacific Railway are reported to have passed a resolution intended as a protest against the Government of Canada giving a bonus to the Hudson Bay railway project. They object, it seems, that for nearly 200 miles, this road would parallel theirs, west of Winnipeg, and their contention is that the road is not required. These objections, it would seem, are intended to lay the foundation of a claim for an additional allowance for the carrying of the mails. Would not this, in fact, be, under another name, a demand for an additional subsidy? If this railway company is insatiable, the Government is obliged to bear in mind that the resources of Canada are not illimitable, and that many other things have prior claims on its bounty. Even great corporations, whatever their ambition, so far as they depend on the Government, must be confined within limits which the Government cannot in prudence overstep.

If the members of the Toronto city council would look at the water tunnel matter in the light of the evidence furnished by Chicago, in the precisely similar case, they might change their views as to the urgency of the improvement. In 1892, Chicago extended its intake water-pipe into Lake Michigan four miles, twice the previous distance. And the result on the health of the city was that the death rate has since been reduced at a rate which has, in two years, saved the lives of 2,153 persons. Up to 1892, Chicago's death rate from typhoid fever was higher than that of any other of seventeen cities having a population of more than 20,000; since that date it has risen to the position of the sixth on the list. Typhoid fever in Toronto has been conveyed in the sewage-contaminated water. The remedy is the tunnel suggested, and a matter of such paramount importance ought not to be put off to a more convenient season.

THE TORONTO RAILWAY COMPANY'S ACCOUNTING.

In their last report, the directors of the Toronto Street Railway Company give as a reason for not paying a dividend that they have been "expending their surplus earnings in the improvement of property." The company which, in the same paper, puts its capital stock at $6,000,000, and its bonded debt at $2,800,000 ought to have had twice as much capital as would have sufficed to produce a completed railway and all its belongings, without trenching upon earnings for objects which the capital account ought to cover. If the company find themselves in such a strait, in the first years of their lease, what will happen as time goes on, when the cost of maintenance will be greatly increased? On this point it may be interesting to quote the *Engineering Record*, which speaks with authority on such questions. "Investors in electric securities," it says, "are beginning to learn now that it is hazardous to judge of the cost of running any plant as complicated as that of a trolley road by the returns of the first few years of operation. Repairs to track are naturally light during the first few years succeeding laying, and the cost of keeping electric cars in a condition for service is generally much greater than originally estimated." The *Financial Chronicle* of New York quotes the president of a trolley road as saying that "for the first three years the average number of his motor cars in the repair shop was 8 per cent. of the whole number, but it had now risen to 14 per cent." In like manner, "repairs to track cost three cents a foot during the first three years, but they now come to 7.25 cents." And of cars the same was true. They were estimated at first "to be good for a service of twenty, but if they last ten years the company will be satisfied." These facts suggest the enquiry that if the Toronto company, which has had an experience of only three years, has had to draw on earnings for providing, in the words of its report, "electrical and steam power, cars, car houses, machine shops, tools and machinery," what will happen when the cost of maintenance becomes greatly increased?

What has the company set apart for a fund for renewals, which will certainly have to be made? There is nothing in the last annual statement, which is about as bald as it could be made, to show. There is, on this point, in fact, nothing but the general statement that the income over all expenses, including interest, is $250,695. The prudent investor would require to know how this figure is arrived at, whether the mileage payable to the city, aggregating $60,000 for the year, has been deducted. The point is one which on the face of the report ought to be clear beyond doubt. Has a proper proportion been set down for renewals, and the amount payable to the city in mileage and percentage, and after this is allowed for is there left $250,000? Investors would naturally be grateful for an answer to this question, and it must be admitted they are entitled to receive it. The company says that under its power of borrowing, $35,000 a mile, it can find the means of making extensions. This is true; but the $35,000 a mile can only be borrowed once. When the roadway built with the borrowed money is worn out, it must be renewed from some other source. Is any provision being made for this, and if so, what?

The Board of Railway Commissioners of Massachusetts, whose position and duties give them full knowledge of the facts, tell us that "there is but an ordinary profit in electric railways." If this is true, when the capital is all put into the roads, what are the chances of continuously earning dividends on watered stock, of which only a fractional part is real?

MUNICIPAL FIRE INSURANCE.

It was stated in last issue that the idea of economizing by limiting fire insurance to one certain description of property or to one particular locality, was not a new one. And instances were given of attempts to demonstrate this in practice. Another example, and a still more recent one, occurs to us. Many years ago, the Agricultural Insurance Company, of Watertown, N.Y., did business in Canada in farm risks. When it withdrew from the Dominion twenty years ago, its risks in this country were assumed by the Agricultural, of Canada. This company struggled for some years on the same line of risks, but finally went down. The old Agricultural of Watertown, a sound and well-conducted concern, returned to do farm business in the Dominion in 1880 or 1882, and built up an aggregate of, say, $20,000,000 in force, mainly in isolated risks on farm buildings, which was regarded as a reasonably safe and staple description of underwriting. But so unprofitable did it find the business that some eighteen months ago it relinquished farm risks in Canada *for the second time in its history*, and re-insured them all in the London Mutual.

It continues, however, to do a general fire insurance business. Here, then, is another example of the uselessness of expecting to make money by confining fire insurance to a limited locality or to a specific kind of risk.

A correspondent in to-day's issue suggests that we give a list of fires in Canada during recent years, as a reminder that no town or city can presume upon immunity from great fires at some period in their careers. We might, by going back over our early files, make up quite a formidable list. It will be sufficient for the present to mention the following among the more recent:

The village of Huntsville was swept by fire in 1894, and a loss of $125,000 in property resulted.

The town of Alliston suffered a property loss of $250,000, or thereabout, in 1891.

In the year 1890 the business part of Beeton, Ontario, was burned.

Chesley, in the county of Bruce, sustained a loss of $60,000 within a few years.

The great fire in Hull, opposite Ottawa, in 1886, and the dreadful destitution and suffering it caused, are remembered with a shudder by those who saw the ruins and helped to relieve the people.

Saint Sauveur, a suburb of Quebec city, which suffered so severely in 1866, has several times since been swept by fire.

Winnipeg was considered "a gold mine" for insurance companies for years, because of its immunity from fires. But in one November night last year three fires took place in that city, which resulted in the loss of tens of thousands of dollars. Thus no community is safe in regarding itself as safe from the conflagration hazard.

If we chose to go back to the fifties or sixties, we might instance Brantford, whose fires were so numerous that it might almost be said to have been built up by insurance companies. Kingston—Lindsay—Orangeville—Bradford. Then there was Fredericton, New Brunswick, which lost 300 buildings; Montreal, a thousand houses and $5,000,000; Quebec, 1,500 buildings in May, 1845, and 1,300 buildings in June of the same year, and in a still later year $2,500,000 worth of property swept away.

BUILDING CONSTRUCTION AND FIRE PROTECTION.

A matter which merits the attention of business men in cities is the new methods adopted of late years in constructing large buildings, such as warehouses, departmental stores, office buildings. The changing conditions of trade, the demand on the part of the merchant for space, convenience of access and display in his premises, have led to modes of erecting buildings which present elements of danger that need more attention from merchants than they appear to have received. By the disastrous fires of January last in Toronto the subject of the new methods of building construction was forcibly brought to public attention, and the third great fire in this city will perhaps cause business men to reflect still further thereon. At any rate, the Ontario Association of Architects has taken up the matter.

This body appointed a committee of ten to recommend to the council of Toronto needed amendments to the city building by-law, and the committee declares its opinion that what we summarize below should be incorporated therein. The full provisions are to be found in an interesting article in the *Canadian Architect and Builder*, March issue:

Any new hotel or public building, whose highest floor is more than 50 feet from the ground, and any other building which is over 70 feet from the ground, should be built fire-proof.

The meaning of fire-proof is thus defined The walls to be brick, stone, or terra cotta—no wooden beams, lintels, or wood strips to be built in walls. Floors and roof should be of terra cotta arches; the supporting beams steel or iron, cased with non-combustible material No wood work to be used except the floor boards, doors, and window frames. All exposed parts of constructional steel and iron work to be protected with at least two inches of terra cotta, or with wire lath and plaster.

With respect to floor area the recommendation is important, as being the views of practical men: No building hereafter erected, they say in effect, except public audience rooms, should have more than 4,000 square feet of floor area [which means a room say 50 feet by 80 in extent], undivided by division walls, such walls to be of stone, brick or terra cotta.

Further restrictions are named as to openings in division walls, as to fire resisting doors, etc., and iron doors, or doors covered with asbestos or sheet metal, are prescribed. All metal columns and beams supporting walls ought to be efficiently protected by non-combustible materials. The committee makes an exception from such protection, thus: "except first floor and basement columns on street front." Inasmuch as such columns have to bear the weight of the whole exterior walls, why, we suggest, should they too not be protected?

Another most important recommendation is made with respect to elevators, namely, that in buildings of the factory class they should be enclosed in shafts built of brick or terra cotta, the guide posts or corner posts of iron, no woodwork of any kind to be carried from floor to floor.

It appears that there is already a city by-law restricting the floor area of buildings and regulating the openings from one building into another, &c., but this by-law has been for years a dead letter. The article referred to goes on to say, what we would to Heaven the city council could be got to believe, viz., that the rapid destruction of Mr. Robt. Simpson's new departmental store building, which was among the first of the buildings erected on the modern iron construction principle, demonstrated the insufficiency of the city's fire equipment. Not only this, but "what is more important, the fact that so long as the prevailing methods of building are allowed to continue, the most effective fire extinguishing appliances will be of little avail in preventing the spread of fire, when once it shall have obtained hold upon a building." This is startlingly plain talk. May it take lodgment in the minds of citizens. If, the writer goes on to say, "a merchant wants a building put up with the greatest amount of floor space and with street fronts almost entirely of plate glass, his architect may advise him of the danger to which it will be exposed from fire, and that it will also be a menace to the safety of surrounding buildings, but if the proprietor refuse to go to the expense of making the building fire-proof and be willing to assume the risk of having it destroyed, the architect can do no other than carry out his instructions."

Surely, then, it is time for the law to step in and prevent such a man from erecting such structures that will imperil the safety of other property. Neither the Simpson nor the McKinnon building, it appears, was intended to be fireproof. It was perfectly well understood, we quote from the *Canadian Architect and Builder*, "by the architects of these buildings, that the safety of these structures was in no way enhanced, but rather endangered, by the use of an unprotected iron frame work. The advantage sought to be gained by the use of this method of construction was rather in the direction of securing larger floor and light areas. . . . Iron should not be used for the support of a building unless covered with fireproof material, such as porous terra-cotta, and it is hoped that the proposed new building ordinance of the city will render this imperative."

Further points of danger mentioned are windows and elevator shafts, and moreover it is insisted on that attention should be given to the construction of floors in a manner that would offer greater resistance to fire. "The plastering of ceiling is quite a protection to the under side of the floor, and if floors were lined with asbestos or laid in

mortar, a much longer time would be required for them to burn out."

ALDERMANIC OBTUSENESS.

Toronto people are proud of their city, and have many reasons for their pride. The city is physically handsome, intellectually progressive and stands well morally besides, so that the civic motto, "Industry, Integrity, Intelligence," is fairly well deserved by the mass of the citizens. But to say that the city is well governed, that the council is broad-minded, and awake to its responsibilities, would be far from the truth. An example of the aldermen's lack of grasp is easily to be found. Quite recently the city engineer recommended a tunnel across the bay to the lake, for the securing of pure water, and stated that the present wooden pipe was leaky in the bay and unsafe. Then the mayor, in a special message, urged upon the council the vital importance of this measure to overcome what is a menace to the health of the city. It should be clear to any reflecting mind that an impure water supply, tainted by sewage, is a murderous thing in any city, and that no duty is more pressing than that of removing such an infection. The tunnel therefore is a crying want.

But the city council decided that this project of the engineer must be deferred, that there were other matters more pressing, that the city could not afford the tunnel at the moment. Strange stupidity this on the part of a body charged with the administration of matters affecting the health and welfare of the citizens. They cannot take hold of a crying matter such as this tunnel, but they can dally with an illusion like municipal fire insurance, that may land them in a slough of debt. There is no civic time nor civic money for so needful a thing as a supply of pure water, but the aldermanic mind is ready to spend half a day or half a million on a plan for civic electric lighting. Such folly is hard to understand.

Even if civic electric lighting were urgently needed—and we cannot see the present necessity for it—even if the ridiculous proposal of civic fire insurance were a feasible thing, which it is not, the placing of the management of either in the hands of the present city council of Toronto would be a mistake. There is no reason, based on our experience of the administrative power of the aldermen, to expect prompt and businesslike action from our civic body. If they had acted when they should, we might have been saved much of the loss of property in these recent great fires and Chief Ardagh might still have been alive.

THE LAW COURTS ACT.

This bill now before the Ontario Legislature at the instance of the Attorney-General, is aptly named, for while it is a law reform bill, its effect is the reform of the law, largely by reconstitution of the jurisdiction of the courts. Its object avowedly is to minimise the number of appeals. Where now an action is tried before a judge of the High Court, either with or without a jury, an appeal will lie to a Divisional Court, that is to a court of three judges sitting *en banc*, and in nearly every instance from there to the Court of Appeal. It is well to point out that appeals to the Supreme Court are governed by federal machinery, and that the bill under discussion will not in any way prevent the carrying of appeals from any Ontario court before the Supreme Court of Canada. The limitations now proposed to be placed upon appeals are in effect that when an unsuccessful suitor at trial has appealed to a Divisional Court, he has no further right to appeal to the Court of Appeal. If the appellant be successful before the Divisional Court, any other party to the action may appeal from that judgment to the Court of Appeal. Any suitor unsuccessful at the trial may appeal directly to the Court of Appeal, and unsuccessful suitors in the County Courts may appeal either to a Divisional Court of the High Court or to the Court of Appeal. Some provision is made for permitting judges to allow an appeal, even after an unsuccessful decision of the Divisional Court, by the party aggrieved, where the matter in controversy exceeds the value of $1,000, or where the title to real estate or some interest therein, or the validity of a patent is affected, or where the matter in question relates to an annual rent, and in some other cases, but there must be sufficient special reasons for inducing the court to treat the case as exceptional and allow of a further appeal.

There will be no longer any Courts of Queen's Bench, Chancery or Common Pleas, sitting as such. To expedite appeals to either the Divisional Court or the Court of Appeal, the latter court, now consisting of four judges, can at any time be augmented by the assistance of any judges of the High Court selected for the purpose, so that two divisions of the Court of Appeal may, if necessary, sit at once. The judges of the three divisions of the High Court are to form a Divisional Court, any three of whom shall sit as such on the first Monday of every month. In this way a monthly Divisional Court is established, the various judges taking turns, according to seniority, in constituting the court, and they are to sit until they have finished all the business brought before them.

One of the loudest complaints against the expense of litigation arises from the cost of evidence, and the cost of printing appeal books for use before the Court of Appeal. The evidence taken at the trial has, of course, to be extended by stenographers, and the charge is reduced from twenty cents per folio down to five cents, the copies for the use of the courts or judges to be furnished without any additional charge. In no case now is it necessary to print the pleadings or the evidence on an appeal to the Court of Appeal, the judges being required to be satisfied with the stenographer's copies. Security both for the costs and for the verdict (if the verdict be for damages) is no longer required to be given before an appellent can launch his case before the Court of Appeal.

Judges of concurrent jurisdiction have been in the habit sometimes of disagreeing in their judgments upon the same point of law. The decision of a Divisional Court of the Court of Appeal on a question of law or practice, unless over-ruled by a higher court, is to be binding upon the Court of Appeal, unless with the concurrence of the judges who gave the decision; and the judgment or decision of any court or judge is to be binding upon any court or judge of co-ordinate authority on any question of law or practice, unless with the concurrence of the judge or judges who gave the decision.

All jury and non-jury actions are to be entered for trial at any sittings of the High Court in any county, and in addition to the general docket, all motions, petitions, proceedings and other matters which may be heard by a jndge in court or in chambers may, with the solicitor's consent, or if the matter in controversy arose in the country, be set down to be disposed of after the trial of cases by the rota judge. This will remove the complaint so often made by country practitioners, that they are obliged to come to Toronto to dispose of such matters as are here enabled to be disposed of before the circuit judge. A very frequent cause of complaint by country practitioners is the long and uninterrupted sittings of the judges. Now no sitting is to begin before nine o'clock in the morning, nor extend after seven in the evening, and there is to be an intermission of at least half an hour at or near noon.

In case of a compulsory reference by a judge at trial of any action to a county judge or other officer qualified to hear the same, the referee is not to be entitled to any fees. County courts are to have jurisdiction to try actions for slander and questions arising under the Overholding Tenant's Act. An equity of redemption in shares or dividend of a stockholder in an incorporated bank or other incorporated company in this province, having transferable joint stock, is to be liable to seizure and sale under execution. Solicitors are to be at liberty to make any bargain with their clients with respect to the payment of costs in civil actions they may see fit, the agreement to be in writing, and signed by the persons to be bound or by their agents, and counsel fees are in no case to be allowed on taxation at more than $40 a day as between party and party. The Act when passed is to take effect from the first day of September next, and will very much simplify and cheapen such appeals as are permissible, while it will place a damper on the ardour of polemic litigants. One result will be to lengthen the list of appeals from Ontario to the Supreme Court at Ottawa.

GOLD ACCUMULATING IN THE BANK OF FRANCE.

It was contended, some weeks ago, by a correspondent of the London *Economist*, that the transfer of gold accumulated at European centres [drawn in a large measure from the United States Treasury] has operated to reduce the supplies available for currency purposes, because while so long as it was in the United States Treasury it was accessible, it has now been rendered inaccessible. The conclusion of the *Economist*, however, is that instead of having diminished the monetary supply the transfer has increased it. The following figures go to prove this. The stock of bullion and the note circulation of the Bank of France were as under :

Beginning of January—	Stock of Gold. £	Note Circulation. £
1895	82,769,000	147,169,000
1890	50,464,000	126,209,000
Increase	32,305,000	20,960,000

Against an increase of £32,305,000 in the stock of gold there is an increase of £20,906,000 in the note circulation in the last five years. So with the Bank of Russia : of the larger stock of gold held by it about £11,000,000 is being used as the basis of an enlarged note circulation. A passage in the last annual report of the Bank of France says : "The cause of the increase in our gold reserve is the same as was pointed out in the report of 1893. The exchanges have been consistently in our favor. The very considerable sums due by foreign creditors to France necessitate frequent payments in gold in the form of ingots or foreign coin, which not being current in France, is brought to the bank and exchanged for our notes. The issue of notes against gold is a service rendered gratuitously ; the bank not only derives no benefit from it, but bears the cost of printing the notes and the stamp duty. We do not, however, regret the unproductive outlay to which we are put in creating the precious national resource resulting from the large amount of our cash reserve."

The meaning of this last sentence is, in the opinion of the *Economist*, that it is the aim of the Bank of France to accumulate a great war treasury in concert with the Government, which facilitates the task by increasing the limit of the note issue as required. In illustration of this it is recalled that within the past ten years the limit has been raised from £128,000,000 to £160,000,000. And it is shown that the extension has not been called for by an increase of business, since when the limit of issue was £128,000,000, the bank's discounts amounted to from £32,000,000 to £40,000,000, and its advances to from £12,000,000 to £16,000,000, whereas at the present time, with the limit of note issue raised to £160,000,000, the discounts range from £16,000,000 to £20,000,000, and the advances from £8,000,000 to £12,000,000. The increased issue of notes, it is clear, has been made solely to add to the store of gold, which rose from £89,160,000 at the end of 1882 to £82,400,000 at the end of 1894.

During the same period of twelve years—1882 to 1894—the Bank of France reserve of silver increased only from £48,480,000 to £49,520,000. This reserve of silver, however, is of great use to the bank in maintaining its stock of gold, as both metals are legal tender for the redemption of its notes.

ONTARIO MINERALS.

A subscriber in Montreal, writing on Tuesday last, asks the following question : "Are not the figures descriptive of Ontario's mineral output which I find in to-day's Montreal papers the same which were published in THE MONETARY TIMES some time in February? They have very much the same appearance." We reply that the figures we published on February 8th were those of 1893, which did not reach us until 1895. We are able to-day to give the figures for last year.

Comparing them with the previous year, it is found that while a decrease is shown in the products of the stone quarry and in the make of common brick yet there is a considerable increase in the output of pressed brick and terra cotta. Pottery shows an enlarged product and so does gypsum, but there is a decline in salt production, as indeed there is also in petroleum, two industries which are of no small moment to considerable areas in Western Ontario. Nickel and copper mining exhibit improvement ; the number of hands employed is increased from 495 to 655, and the quantity and value of the output are both much larger. Natural gas shows a lessened production.

QUANTITY AND VALUE OF MINERAL PRODUCTION IN 1894, WITH NUMBER OF WORKMEN EMPLOYED AND AMOUNT OF WAGES PAID FOR LABOR.

Product.	Quantity	Value	Employes	Wages
		$		$
Dimension stone, cub. ft	1,340,000	360,470		
Heads and sills, "	47,070	15,900	854	336,700
Coursing stone, sq. yards	22,000	36,000		
Rubble, etc. cubic yards	223,000	142,000

TREND OF TRADE.

The last few weeks have witnessed the beginning of spring, and in a few days more trade will have launched out into all the uncertainties of a new season. It is characteristic of humanity to make comparisons and judge the present by the past. And our spirits rise or fall in accord with the results of our retrospect. In times of depression the situation is made all the more severe by recalling bygone prosperity, while the present conditions appear the more satisfactory from a review of dangers past. A comparison of the trade situation in April, 1895, with that of the corresponding month a year ago, is favorable to the present and should inspire us with confidence in the future.

The wheat record of 1894 was eventful. The trend was down, down, always down, and no wonder that all business men, whatever the industry in which they were immediately interested, looked gloomily into the future of this country, whose interests are so closely bound up with those of the farm. But a turning point was reached in November, and since that time prices have slowly but steadily improved. A comparison of the following quotations on the Toronto market, taken one in September and the other in April, will be found interesting :—

	Sept. 21, 1894.	April 4, 1895.
Winter wheat, per bushel	48 to 54c.	62 to 68c.
Spring " "	51 to 56c.	64 to 71c.
Man. Hard "	58 to 66c.	76 to 83c.

The improvement of Manitoba wheat is especially noticeable, and the only feature of regret is that the advance for the most part was effected after the farmers had disposed of their stocks, and they, in consequence, failed to secure the full benefit of the improved conditions. When wheat, the staple product of Canada, is depressed, trade throughout the provinces is slow, but any improvement in wheat sets the whole business community alive with renewed activity.

Millers have not obtained prices in harmony with the course of the wheat market, as will be seen from the following quotations for flour taken on similar dates to those offered above :

Flour.	Sept. 21, 1894.	April 4, 1895.
Manitoba patent	$3 40 to $3 50 per brl.	$3 90 to $4 00
Patent	3 00 " 0 00 "	3 00 " 3 20
Straight roller	2 60 " 2 70 "	3 00 " 3 10

In every grade there has been an advance, but the percentage of increase is small as compared with that of wheat. At present most millers are confident that the immediate future has good things in store for them, but there have been so many disappointments in the trade during the last year that many dealers are doubting any material increase in profits for some time yet. A glance at the price course of dairy products during the winter is sufficient to show that the farmer has not received any great assistance from this quarter. Compare these quotations:

	April 5, 1894.	April 4, 1895.
Butter (lb.)	18 to 20c.	12 to 13c.
Dried apples (lb.)	6 " 6½c.	5½c.
Hops (lb.)	18 " 20c.	10 " 15c.
Eggs (doz.)	10 " 10½c.	12½c.

With but a single exception, dairy products were lower in price last spring than now. The difference in the prices of butter is very marked and by no means satisfactory. Doubtless the increased attention paid to creamery butter had much to do with the neglect with which buyers have certainly treated the dairy market during the winter.

April is an important month for seed tradesmen and farmers, and comparative quotations may not be amiss:

	April 4, 1894.	April 4, 1895.
Clover, red	$6 15 to $6 50	$6 15 to $6 50
Clover, alsike	5 70 " 7 80	4 80 " 6 30
Timothy	2 20 " 2 75	3 00 " 3 50

Prices of red clover are rather strangely identical on the two dates, and, with a decrease in the price of alsike and increase in timothy, the farmer begins the season in much the same position as in last April.

ONTARIO FRUIT REGULATION ACT.

The Minister of Agriculture has introduced into the Ontario Legislature an Act for the prevention of fraud in the sale of fruit, that is, apples and pears. According to this proposed measure the packer is to mark the article in which the fruit is packed with proper figures to designate either its grade or that it is ungraded, as well as the name of the variety. Grade No. 1 shall consist of well grown specimens of one variety, as nearly as possible uniform in size, and throughout of good form and color, sound and whole, and free from worms, bruises or disease. Grade No. 2 shall consist of well-grown specimens of one variety, sound and whole, and throughout reasonably free from the defects just mentioned, but which, on account of an inequality of size, lack of color, or other defects, could not be included in Grade No. 1. All other fruits are to be marked "Ungraded." Penalties are attached for omitting to mark, altering or defacing marks, or counterfeiting marks, or for using the marked articles improperly. Persons who knowingly pack any kind of fruit in such a way as to conceal defects in size or quality, in any portion of the fruit, by covering the same with fruit of a larger size or better quality, are liable on summary conviction to a penalty. The consignee receiving fruit packed so as to conceal defects, for sale in bulk or commission, shall within one week after any sale by him of the fruit, mail to the address of the consignor a written notice of the price received therefor and the name and address of the purchaser. This bill is in the direction of such legislation as, we stated some time ago, various dealers in fruit here and elsewhere had proposed.

OLD COUNTRY MARKETS.

BIRMINGHAM IRON MARKET.—According to the report of the Glasgow *Herald* there has been for two or three weeks a more hopeful feeling among the iron trade. In the issue of 22nd March it says that there was only a small attendance on 'Change, but makers were more cheerful than they have been of late owing to a slight improvement of agricultural demand. Business is still very dull in the export department, though there is a fair trade doing in galvanised sheets with Australia and South Africa. Prices are not quotably altered, but in some departments there is a little more firmness. Inquiries for pig iron in satisfaction of next year's consumptive wants are more numerous, and rates in this department are consequently steady.

SOUTH WALES IRON AND STEEL.—The slight improvement noticeable last week in the iron and steel trades still continues. Exports of tinplate are exceptionally heavy just now, nearly 70,000 boxes having been shipped during the week, but though stocks are gradually being reduced business cannot be done except on the basis of 8s. 10½d. to 9s. for Bessemer, and 9s. 3d. to 9s. 4½d. for Siemens cokes. There is a slightly better demand for steel bars, prices for which remain unchanged. Iron ore continues to come forward in large qauntities, 12,000 tons having been received from Bilbac since last week. Very little fresh buying, however, is going on, and rubio ore is rather weaker, being quoted at from 11s. to 11s. 3d. per ton. Other sorts are unaltered. A firmer tone characterises the pig-iron market, warrants during the week having advanced 1½d. Welsh hematite is firmly quoted at 42s. 9d. f.o.t. The ship-repairing yards are fairly busy.

MANCHESTER DRY GOODS.—The heavy departments of the local trade have been rather quiet during the week, as far as operations between manufacturers and merchants are concerned. Retailers are preparing for their special purchases which are made about this time in the fancy branches, and the warehouses are now laid out with varied collections of new goods. Laces are strongly to the fore, and there are good selections of Plauen embroidery makes, as well as of Lever's goods. The silk lace branches are quiet, especially in the shipping departments, where French competition is severely felt. The lace curtain departments are fairly well employed, good orders for the finer makes having been received on American account. In the carpet departments the attention of the trade both in Scotland and England was until recently chiefly directed towards the great sale of manufacturers stock which took place a week ago, and at which there was a large attendance of buyers. There is a brisk demand for Axminsters, producers of low-grade goods having been very busy, especially in Glasgow, which has been selling these makes very extensively in the face of the competition of American goods, which up to a date comparatively recent were arriving in this country at the rate of 500 pieces per week. Amongst some authorities the opinion now prevails that American competition has been scotched if not killed by the efforts of British firms to meet it. The silk plush trade still remains depressed, and other branches of the business are quiet, although foreign looms

are said to be busily engaged Linens are meeting with a steady demand, and some good foreign orders are being placed. Woolens departments are busier.—*Glasgow Herald, 15th March.*

BRADFORD.—The general tendency of markets away from here is unquestionably to harden somewhat, but although in this wool market prices are firm and business is easier to do at late rates, there is no actual improvement in values whatever. The lower classes of cross-breds are perhaps firmer in tone, and there is a very good inquiry for strong skin wools in the English trade. Mohair is very firm, and alpaca has changed hands at a price which is supposed to be 15½d Orders in the export yarn trade are still of a retail character, and the amount of new business offering is disappointingly small. Spinners, however, are in a better position, having more particulars to go on with, and as the market for raw material is tending against them they are very firm in their demands. There is, however, no change whatever in prices. Mohairs are still inquired for, and spinners can get better prices for anything which they can deliver promptly. Stocks of 32's are about cleaned out. In the home trade houses there is much more business doing.

NOTTINGHAM LACE AND HOSIERY.—Trade remains much the same as last week, showing no marked signs of increase, but not falling off on the whole. Cotton millinery laces sell pretty well in Valenciennes and guipures. The Oriental laces also are in fair demand. In all tints seem favorites. Torchon and Maltese laces are dull. Silk goods are selling very slowly, so far as laces go, but there is a fair call for nets and tulle. Cotton nets are rather brisk, and bobbins sell in good quantities. There is no change in the hosiery market, and yarns are quiet at old rates.

BRADFORD.—This market continues thoroughly cheerful in tone, and the maintenance of values for most classes of the raw material and a further advance in others continue to inspire confidence as to the future. English wools are very firm, with rates unchanged, except for lustres, which have hardened. In cross-breds there is no change in price, but holders are not at all anxious to sell, and though consumers will not make any advance, they pay full present quotations without much ado. The course of the London sales as to merino has been reflected here, and since Monday tops have been the turn dearer. Mohair is still steady, with rather more business passing. In yarns the export trade lags, merchants' prices being below what spinners will accept, though in some cases merchants give way. Some spinners decline all business except at an advance. . . . In the piece trade the home demand maintains its improvement, and linings and coatings, amongst other things, are going in large quantities to the United States. —*Glasgow Herald, 22nd March.*

A BUSINESS MAN'S ASSOCIATION.

The business men of Vancouver purpose to form an association to carry out, as the draft of their constitution suggests, the following objects: It shall be the objects of the association to unite with the merchants, the manufacturers, professional men, mechanics, laborers and citizens, to foster the interests of the City of Vancouver in every avenue of trade and commerce; to promote the development of the Vancouver and New Westminster districts in obtaining desirable settlers; to co-operate with the railroads, sea and river interests to secure and maintain favorable rates; to obtain an outlet for all products or manufactures which may be profitably raised or made within our territory; to answer inquiries from corporations or individuals contemplating a change of location; to correspond with emigration agents and to invite and answer communications from intending settlers: to particularly encourage the establishment of such industries or enterprises as shall be to the interest and profit of the community at large; to keep the City of Vancouver and the Province of British Columbia constantly before the attention of the people of this and other countries

These western people exhibit the sort of civic pride and spirit that tends to build up a place. They first believe in their city and country and then they try to get other people to believe in them too.

FOR GROCERS AND PROVISION DEALERS.

No new canneries are being built on the Naas or Skeena rivers this season.

Hop growers in the vicinity of Bloomfield, Ont., have recently made several shipments of hops to England.

The trade unions and labor councils of Quebec city and Levis have decided to fall in with the co-operative movement.

Messrs. Costello & McMoran have almost finished a new cannery at Steveston, B.C. It will have a capacity of 40,000 cases

A new creamery company has been started at Little River, Que., under the title of "Société de Fabrication de Beurre de la Petite Rivière."

Hamilton millers have advanced flour 50 to 60c. per barrel. It is not improbable that the bakers will seek to pass the additional price on by way of higher prices for bread

An early closing by-law has gone into force at Vankleek Hill, and for the next twelve months all stores will be closed at 7 p.m on Monday, Wednesday and Friday evenings, and on all legal holidays.

On the North Arm, says a Maritime Province paper, two new canneries of small capacity are being erected, one of which is for Messrs. Sexsmith, Harris & Co They will be ready for this season's pack.

A Pembroke grocer, says the *Observer*, who had adopted the cash system, has closed his ledger, and in this position spiked it to the counter. When credit is asked for, he simply points to the closed book.

The bonus which the Canadian Government offers butter exporters does not meet with entire approval in England, and a member of the British House of Commons has urged an equivalent import duty for the protection of English farmers

The Ottawa Board of Works have decided to recommend the city council to instruct the police commissioners to see that all hanging and projecting signs all over the city are taken down The decision was unanimous, although the chairman said he doubted if the by-law could be enforced.

The Association of Provision Traders of Bristol have forwarded a memorial to the Parliament of Canada strongly urging, that in the interests of both producers and distributors of Canadian cheese, the date and make should be legibly and indelibly marked upon each cheese before it leaves the factory. The memorial prays the Parliament to pass a law making such marks compulsory.

It seems that the intended trial of tobacco growing in the Kelowna district of the Okanagan will be made by Messrs. Collins & Holman, the inaugurators of the effort, on a rather extensive scale. Upwards of 40 acres will this spring be planted at Kelowna and Benvoulin, a warehouse being also built at Kelowna, wherein to cure, assort and grade the tobacco after drying.—*Vancouver Statistical News Advertiser.*

A new cannery being erected for the Anglo-British Columbian Packing Co. on Rivers Inlet is nearing completion, and will be ready for the salmon run in July. Its capacity will be in the neighborhood of 15,000 cases. The canneries of this company are being overhauled and some new plant introduced. Their pack on Rivers Inlet was 27,000 cases last year, and they expect to put up fully as many cases this year.

Hamilton cigar manufacturers have written to the Canadian Cigar Makers' Union asking that an effort be made to have the scale of wages in the different cities made uniform. In Toronto and Brantford the scale is lower than in Hamilton, and this of course places Hamilton manufacturers at a disadvantage. It was decided to act in conjunction with the manufacturers of Ontario in requesting the Dominion Government to allow less than 8,000 cigars to be bonded at once and also to allow them to clear less than 4,000 at one time.

Everything points to a small pack of lobsters in the Maritime Provinces this coming season. Such has been the demand for live lobsters from American markets during the winter that the winter fishing has been unusually exhaustive, and the factories will undoubtedly experience some difficulty in getting supplies. Licenses will have to be taken out by packers to enable them to carry on business during the season of 1895. A fee of ten dollars is payable on application for license, and severe penalties will be exacted for evasion of the law.

R. D. Hume & Co. have withdrawn from the salmon fishing and packing in Alaskan waters, their cannery at Karluk having been purchased by the Alaska Packers' Association. Hume & Co. are the pioneer packers on the Pacific coast, and until two years ago confined their operations to Oregon. They started in Alaska in opposition to the combine. The enterprise was not altogether satisfactory, and at end of the first season some one burned down the cannery and the surrounding town. The withdrawal of Hume & Co. leaves the entire salmon packing business of Alaska in the hands of the trust.—*Columbian*

The maple sugar season is now at hand, and presumably grocers will find a good request for refined sugars. A country merchant told us the other day that a farmer proposed a suspicious deal in his store recently. He wanted a barrel of granulated, and proposed to pay for it in maple sugar at the close of the season. The proposed transaction may have been honest, but the coincidence was, to be charitable, decidedly suspicious. There should be a profitable market for all the maple sugar that farmers of this country can make, and this is no small amount But unfortunately dishonest practices and stupid conservatism in adhering to most primitive methods have ruined the industry. No one prates more of honesty than the farmer, and few are more ready to yield to temptation than he.

BOOKS AND STATIONERY.

The Japanese silk copying letter-book is still "on deck."

The second volume of The Standard Dictionary is announced.

"The Ralstons," by Marion Crawford, is a continuation, and a weak dilution, of Katharine Lauderdale.

Bad ink is a bad thing, as the Hielan'man said about bad whiskey. Stephens' ink is a good thing. Then buy it.

George Augustus Sala's "Life and Adventures" is a delightful book. It is also an expensive one: 2 vols., $5.

Gillott's pens, like the lad in the fairy story, have the gift of satisfying every one who gives them reasonable usage.

Sara Jeannette Duncan has published another book, entitled "Vernon's Aunt"; being the Oriental experiences of Miss Lavinia Moffat.

"Chimmie Fadden," the adventures in society of a New York newsboy, is published by Lovell, Coryell & Co. at 50c., paper, or boards, $1.

The Eagle Pencil Company has put upon the market the Eagle compass and divider, the cheapness of which will rejoice the heart of school boys and girls as well as of mechanics and artists.

The latest novelty in handy things for a desk is the "Best Pape Fastener," a simple little contrivance to fasten papers together. It sells at 25 cents for a box of 100, and Brown Brothers, limited; are the agents.

A young lawyer in Chicago, name not avowed, has written "The Rights of Labor." He explains the present status of employer and employee before the law, and advocates a specific reform in the law that would secure to the workmen a share in the product

In a series of 12 mo. books entitled Economic Classics, edited by Professor Ashley, formerly of Toronto University, and published by Macmillan at 75c., one volume contains the first six chapters of Political Economy, by Ricardo; another, select passages from Adam Smith's Wealth of Nations.

To save time is to benefit the business community. This is what Grand & Toy profess to do by means of the Waterman Ideal Fountain Pen, which is new in Canada. Its strong points are that the pen is gold, the best that can be made; that the feed is reliable, and that the whole is trustworthy every day and all day.

Something that is constantly needed by those who are type-writers is a ribbon which does not fill up the type of the machine, and which will guarantee perfect copies, not smudged or dirtied. The Rochester Ribbon and Carbon Company provide such a ribbon, and the sole agents for Toronto are corner Jordan and Wellington.

Rev. Prof. Grant, of Queen's University, Kingston, has written a little book, published by A. D. F. Randolph & Co., at 30 cents. The author believes "that Jesus is 'the way, the truth, and the life,' and that His religion is the absolute religion." Therefore he believes it to be right and wise to call attention to the excellent features of Confucianism, Hindooism, Buddhism, and Mohammedanism, rather than to their defects.

One of the reasons why municipal reform proceeds so haltingly with us [in the United States] is that many citizens who desire sincerely to aid in the regeneration of their town life, have formed no definite municipal ideas. This is said by *Public Opinion* of Dr. Albert Shaw's book on "Municipal Government in Great Britain," a book which shows that improved methods of municipal management have obtained in the old country to a greater extent than in the new.

Among the ingenious novelties of the day is the Victoria computing postal scale. This contrivance enables a man who wishes to know the postage on a certain letter, book or parcel to any part of the world, to tell, in an instaut, by putting the letter or package on the scale, the sum to be paid in postage up to three pounds to any Postal Union country. Concurrently with the weight shown by the indicator is the price that weight costs. Grand & Toy are sole agents for it.

Another portion of that convenient and valuable publication, *Current History*, edited by Alfred S. Johnson, Ph.D., and published by Garretson, Cox & Co., Buffalo, is issued, being the fourth quarter of 1894. It contains, as President Schurman, of Cornell, says, a marvellous deal of solid information condensed into small compass. Any one who wants for his shelves the contents of the daily newspaper condensed into small compass should send to the publishers or to his bookseller for back nnmbers, bound, at $2. The subscription price is $1.50 per annum.

Among the concerns which have been established in the United States for more than 100 years is the Methodist Book Concern, New York, publishers, established by John Dickens in 1798, and always managed under its present name. Another is the Presbyterian Ministers' Fund, Philadelphia, life insurance confined to ministers, and Presbyterially governed; established in 1759, as a purely benevolent institution, and later placed on a semi-business basis. The *Shipping List* says that the total number of centenary houses in that country now on record is eighty-three. That journal will issue a Centennial nnmber next December, when a special feature will be devoted to the history and the interests of these old firms

HARDWARE AND METAL TRADES.

The Dominion Coal Co. are seeking accommodation for the handling of their coal business at St. John.

There is apparently an increased demand for Ontario mica mining properties, and this industry may have bright things in store for it.

The consumption of coal by locomotives in the United States in 1893 amounted to 50,000,000 tons, or about one-third of the whole production of this country.

The combination price of cut nails is $2.10 per keg, but the board price to the trade is $2. To actual buyers, however, says the Montreal *Trade Bulletin*, the price is $1.90, and to close buyers the price is lower still. Take your choice, gentlemen.

Letters patent have been granted incorporating Samuel Hayward, of Hampton, Geo. B. Weldon, H. N. Nelson, G. H. Burnett and Ward C. Pitfield, of St. John, N.B., as the Hayward Company, to carry on a general wholesale and retail hardware business. The capital stock is $200,000

Application is being made to incorporate Messrs. Hyacinthe Beauchemin, Philippe Beauchemin, A. E. Pontbriand, Alfred Monarque and J. B. O. Pontbriand, all of Sorel, under the name of Pontbriand & Frere (Ltd.), with a capital stock of $50,000. The object of the new company is to manufacture engines, boilers, etc., at Sorel.

James Watson & Co., Glasgow, March 22nd, report: "The fluctuations in the price of Scotch iron warrants have been about 2d. per ton, and these have been brought about by operations confined to members of the trade. The outlook generally has not improved, and there is a great absence of animation."

Metal chromium has been successfully combined with aluminum, producing a compound as hard as steel. The two metals cannot be combined as such, but the ores are mixed and then submitted to the action of the electric current in the furnace, when the compound metal is produced.

Pure titanium has been obtained by M. Moissan by means of the electric furnace. It is an extremely hard metal, capable of scratching the diamond, but is soluble in lead, copper and iron. It is the most refractory metal with which M. Moissan has yet dealt, being less fusible than pure chromium, tungsten, uranium, molybdenum, or zirconium.—*Boston Journal of Commerce.*

The heart of the producer of oil grows jubilant as he watches the upward march of the price of his commodity. The upward tendency we referred to last week has been very much in evidence lately, and Petrolia crude is now worth $1.30 and Oil Springs $1.32, with a very firm feeling on the market; some enthusiasts are already prophesying $1.50 oil.—*Petrolia Topic, March 21.*

The total production of all kinds of Bessemer steel rails, including light and heavy and street and mine rails, in the United States in 1894, was 1,014,034 gross tons, against 1,129,400 gross tons in 1893, a decrease in 1894 of 115,366 gross tons, or 10.2 per cent. The production of Bessemer steel rails in 1894 was composed of 899,120 gross tons rolled by the producers of domestic ingots and 114,914 tons rolled from purchased blooms

SIXTY-SEVEN THOUSAND DOLLARS A DAY.

A little sum in simple division enables one better to grasp the meaning of some of the enormous figures representing the business of the Mutual Life of New York. For instance, that company paid out to policyholders during 1894 the sum of $21,089,257, which is equal to more than $67,000 every working day. The business done by the Mutual in 1894, when the depressed condition of affairs in the United States is considered, is very remarkable. There was an increase of almost fifty-two millions in total insurance in force, of six millions in income, of four and a half millions in surplus The sum of $11,929,000 was paid in death claims, and a further sum of $9,159,000 for endowments, annuities and dividends. If any such distribution as this has been made in any one year by any life assurance company we have not heard of it. A vast fund of beneficence is represented by these payments, and they illustrate in a vivid way the advantages and benefits of life assurance. An addition was made to reserve fund sufficient to bring it up to more than $180,000,000, by way of enabling the management to maintain such liberal payments. This wealthy company has now passed its fifty-second year.

SUN LIFE ASSURANCE COMPANY

The annual meeting of this company has been held, and the main features of the report for last year are, we are told, that "substantial progress" is shown in "new business, profit earnings and general prosperity." While the summary furnished does not admit of our making a close comparison of items, the volume of business done and income received are shown to have increased over the previous year, and the Sun's record is well kept up as one of the large and progressive companies of Canada. This company has prudently determined to calculate its liabilities on a 4 per cent., instead of a 4½ per cent. basis.

MANUFACTURERS LIFE INSURANCE COMPANY.

Earlier in the year we took occasion to say that, according to the small folder issued by the company, the business of the Manufacturers Life for 1894 contrasted very favorably, in a number of respects, with that for 1889. Since that time the eighth annual meeting of the company has been held, at which the president made an interesting address, and the full report has been submitted, which enables us to make interesting comparisons with 1893. Last year's business showed a decided gain in new business, in cash income, and in total assets, over 1893, and $135,000 has been added to the reserve fund for the protection of policyholders. The advance made to the company by some of the prominent directors in earlier years, showing their resolution and confidence in a very practical way, has been repaid, and attentive, prudent management has placed the Manufacturers in its present improved and strengthened position. Furthermore, a dividend has been declared of four per cent for the half year, payable on 1st July next.

INSURANCE ITEMS.

Peter Clinch, secretary of the New Brunswick Board of Fire Underwriters, has been in St. Stephen making an inspection of all property insured and under the direction of the board

The report of the chief of the Perth fire brigade and of the fire committee of the couucil of that town has been made. There are nine water tanks, each containing from 9 feet to 12 feet depth of water. The steam and hand fire engines are in good condition, the former being able to get up 40 pounds steam in 5½ minutes. And each of the fire companies is fully manned, and has efficient officers.

The first life insurance policy on record is the one issued at Florence, Italy, in the year 1610, in favor of Giovanni Ballesta, on the life of Ser Brother Ferdinand, for the sum of 3,000 scudi, the terms extending from the August festival of Piacenza, of that year, to the Feast of Epiphany in 1611, the premium being three and three-fourths per cent of the amount underwritten. The policy was written in mediæval Latin. The old Florentine policy marks the limit of historical life insurance as a transaction. The policy is incontestable and indisputable It is agreed that in the event of the death of Ser Ferdinand the assurers shall make full payment. It covers natural or accidental death. It gives free residence and travel anywhere in the world, by land or water; it is good at issue, and the claim is to be payable three days after the notice of death.

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, April 4th, compared with those of the previous week:

Clearings.	April 4.	March 28.
Montreal	$9,481,008	$8,528,008

—We observe that the adoption for Ontario of the Torrens system of land transfer has been recommended by the Ottawa Board of Trade The adoption of this measure has been approved by the Toronto Board of Trade, and we believe also by the Montreal Board of Trade. The system has besides been adopted in our North-West. The Torrens system makes it as easy to transfer land titles as it is to transfer bank stock; and this may be one reason why it is so slowly accepted. There are many professional men, such as notaries and solicitors, who object to seeing the system of land transfer simplified, for the same reason which Demetrius gave to the silversmiths of Ephesus for doing away with the worship of Diana.

—A fortnight ago, to the surprise of the money market, a reduction of ½ per cent in the official rate of discount of the Bank of France was announced, viz., from 2½ to 2 per cent This minimum rate of 2 per cent., says the *Glasgow Herald*, is the lowest rate since October, 1879. Only twice before in the last 40 years has the rate of discount of the Bank of France been at the present low figure of 2 per cent. It was reduced from 3 to 2 per cent. on the 5th April, 1877, and a similar reduction from 3 to 2 was made on May 23rd, 1879. To-day's decline can scarcely be attributed to the abnormally low rate of discount in the open market, which though no better than 1⅛ per cent., is higher than it has been on several occasions of late. Nor is money particularly a drug in Paris, for a good deal is required in connection with the gigantic speculation now carried on in mining securities.

A Pittsburg despatch of last week gives some information of interest to coal oil consumers, as indicating a declension in the yield of petroleum in the Pennsylvania fields. Crude Pennsylvania oil at the agencies of the Standard Oil Company is now $1.10 a barrel. The visible supply of that State now above ground is less than 5,000,000 barrels. At the present rate of consumption and the supply that is being produced, the visible supply of Pennsylvania oil will be exhausted in five or six months. Unless new producing oil territory is developed it looks as though oil would, in the future, sell at a large advance over the present price. Wells that had been abandoned are being re-drilled

—At the last monthly meeting of the London Board of Trade it was pointed out by Mr. Ingram that the gatherings of the body were too formal as a rule, and the valuable suggestion was made that greater interest might be awakened if matters of current public concern were discussed. Several members approved the notion and the outcome is likely to be that papers will be prepared by different gentlemen on subjects for discussion. A bill now before the Ontario Legislature to give municipalities an option in local taxation was endorsed by the board. The council reported nominations for officers for the ensuing year, which will be voted upon at the next monthly meeting

-What is the difference between avowed imprisonment for debt and that unavowed thing which causes a man's arrest, brings him before a judge, who remands him to prison till he pays a debt which he cannot pay, and whom another judge remands a second and a third time till he pay what he has no means of paying. All this has happened in the case of Joseph A. Donovan of this city. Leaving Mr. Donovan's personality out of the question, how does the thing stand? Where there is crime it should be punished as such; but an immeasurable and indefinite punishment for not doing an impossible thing is contrary to the ordinary rules of justice. When law reform is on the carpet, there is a fiction of contempt of court that ought to be looked into.

—A deputation from the Board of Trade, Rat Portage, has left that place for Toronto and Ottawa to lay before the two Governments certain matters considered of import to that district. The extension of fishing privileges on the Lake of the Woods will be discussed with the head of the fisheries department. A mariner's chart of the Lake of the Woods will be sought in order to make navigation safer. Immediate prosecution of the proposed improvements in the navigation of Rainy River will be urged upon the Government. The deputation is instructed, we understand, to lay before the Ontario Government at Toronto the importance of assisting to develop the mineral resources of the Rat Portage district. It will suggest the erection of a custom mill for sampling and reducing gold ores.

—The Ottawa Board of Trade held a meeting last week, when two new members were elected and six more proposed. Despite what the meeting regarded as a merely sentimental objection, namely, the marring of a fine landscape by the proposed interprovincial bridge across the river Ottawa, a motion was carried to urge the representatives of the city in the Ontario House, Hon Mr. Bronson and Mr. O'Keefe, to procure assistance from the Ontario Government for the project. The Torrens system of land transfer was commended by Messrs. J. Bishop, C. Ross and G. F. Henderson, in respect of its simplicity and economy. A report of the council was submitted and adopted recommending the appointment of permanent committees on railways, insurance, manufactures and municipal affairs.

—At a meeting of the directors of the Dominion Bank held on Thursday, 4th instant, Mr. R. D. Gamble, hitherto in charge of the Toronto branch of the bank, was appointed to succeed the late R. H. Bethune as general manager.

—Arrangements are being made, we understand, to close the branch at Iroquois of the Union Bank of Canada. A new branch of that bank will shortly be opened at Shelburne, in the County of Grey

Correspondence.

FIRE LOSSES IN CANADA.

Editor MONETARY TIMES:

SIR,—Your article on "Municipal Fire Insurance," on page 1260 of your last number, ought to do good. There is good argument in it, and there are sound facts in it that should compel attention from any business man. I have been particularly interested by the references you make to the fate of the Isolated Risk Insurance Company in Canada and the Southern California Company, which proposed to do almost the same thing as your Alderman Lamb hankers after in Toronto.

I think you will find—if you will excuse my giving a hint about a matter that you probably know more about than I do—that the best thing you can do, after all, to attract attention to the subject of the danger of loss from fire is to keep on giving instances of how Canadian towns and villages have been swept by flame. You have given some memorable instances in Bracebridge and Gravenhurst, in this province; Coaticooke, in the adjoining province. I dare say you have kept a list of other sweeping Canadian fires. Now, why can't you give a dozen more? There must be dozens if not scores of places that have lost from $50,000 to say $100,000. Keep jogging the memories of people with these as a warning.

BUSINESS.

London, 2nd April, 1895.

Meetings.

MANUFACTURERS' LIFE INSURANCE COMPANY.

The eighth annual meeting of the Manufacturers' Life Insurance Company was held at the company's head office, Toronto, on Thursday last, 28th March.

Among those present were: Messrs. George Gooderham, president; Wm. Bell, president of the Traders' Bank; Robert Archer, Montreal; Ald. J. D. Rolland, Montreal; A. E. Gooderham, T. G. Blackstock, C. D. Warren, Robt. Crean, R. L. Patterson, Dr. Strathy, E. J. Lennox, H. Lowndes, Toronto; R. Torrance, Guelph; Prof. Mills, Guelph; W. H. Storey, Acton; Geo. J. Horkins, Peterboro; H. A. B. Calvert, Guelph; W. J. Milliken, barrister, Galt; Ph. de Gruchy, J. K. McCutcheon, Sherman E. Townsend, Toronto, and others.

The president, Mr. George Gooderham, was elected chairman, and the managing director, Mr. John F. Ellis, acted as secretary. The following report was submitted:

REPORT.

The directors have much pleasure in meeting the stockholders and policy-holders of the company, and submitting to them a statement of its affairs for the year ending 31st Dec., 1894.

The applications for new business for the year amounted to $2,925,507, of which $2,695,755 were accepted and policies issued, showing a handsome increase over 1893.

The cash income for premiums and interest amounted to $306,713.63, being an increase over the previous year of $19,375.44.

The total assets of the company now amount to $821,320.88, showing an increase for the year of $147,582 26. Of this increase $135,339 has been added to the reserve fund for the protection of policyholders, which now amounts to $628,429.

These large increases in every branch of the company's business during a year of financial depression is most gratifying.

The company's surplus over all liabilities is equal to 40 per cent. of the paid-up capital. This guarantees to both policyholders and stockholders a handsome dividend on their investment.

The statement submitted herewith shows plainly the position of the company, the nature of its assets and its financial standing.

The auditors have made a careful monthly audit of the company's affairs, and at the close of the year examined each security held by the company, the same being further verified by the audit committee of the board.

The directors have much pleasure in acknowledging the energy displayed by the company's agents throughout the country, and the success that has attended their efforts as shown by the large amount of new business secured in the face of keen competition and stagnation in every line of business.

The directors desire also to recognize the valuable assistance the company has received from the advice and counsel of their consulting actuary, D. Parks Fackler, Esq., of New York.

All the directors retire, but are eligible for re-election.

Summary of the financial statement and balance sheet for the year ending December 31, 1894:—

Cash income, $306,715.63; expenditure (including death claims and all payments to policyholders), $169,066.25: assets, $821,320.88; reserve fund, $628,429; surplus for policyholders, $177,789.72.

Mr. George Gooderham, in moving the adoption of the report, called attention to some very interesting facts in connection with the progress of the company. He reviewed the history of the company for the preceding five years under its present management, and showed what had been accomplished. The sum of $100,000, put up by certain of the directors in the early years of the company to place it in that strong financial position which was necessary to enable it to compete with its rivals in the insurance field, had now been repaid by 98 per cent. of the stockholders in proportion to the amount of stock held by them. Five years ago the income of the company, including premiums and interest, amounted to about $150,000 for the year. Last year it amounted to over $300,000. The company's assets then did not amount to $300,000; now they are over $800,000. The reserve on account of policy-holders then amounted to $160,000; now it amounts to over $640,000. At that time there was no surplus out of which to pay dividends to either stockholders or policy-holders; now there is over $50,000 of a surplus over all liabilities, which guarantees to the stockholders and policy-holders good dividends on their investments. And what was more satisfactory, said the president, these large increases in every branch had not been followed by a corresponding increase in expenditure. On account of the very careful and conservative selection of risks, and although the amount of business in force had very largely increased and the policies had increased in age, yet, with the exception of one year, the death rate had diminished rather than increased; the total death loss for 1889 was for $61,000, while for 1894 it amounted to only $44,000. These facts argued able management, and this conservative policy the company intended to pursue in future.

The question of a dividend has received the very careful consideration of the directors, and they had declared a dividend of 4 per cent. for the half year, payable on 1st July next, which was at the rate of 8 per cent. per annum, and which the company could well afford to pay.

The motion was seconded by the vice-president, Mr. Wm. Bell, who testified to the satisfactory condition of all the company's investments for the security of policy-holders, and to the fact that the rates of interest earned on the same compared favorably with that earned by any of the company's competitors.

Prof. Mills, of the Agricultural College, Guelph, in support of the motion, spoke at some length, and congratulated the directors upon the fact that the shareholders had nearly all now united in assuming their share of the liability for $100,000 referred to by the president, which a few of the directors were good enough to place at the disposal of the company to put it in a proper financial position. Under the present careful management, he felt that the company had a brilliant future, and that its prospects are brighter at this time than they have ever been in the past. He congratulated the company on the report which had been submitted; it was an excellent showing.

Mr. W. H. Storey, of Acton, and others spoke in the same complimentary strain. The motion was then carried unanimously.

A vote of thanks to the medical directors was proposed by Mr. T. G. Blackstock and seconded by Mr. E. J. Lennox, to which Dr. Strathy suitably replied.

Ald. J. D. Rolland, in moving a vote of thanks to the agents, expressed his pleasure at the result of their efforts in furthering the interests of the company, and remarked that in such a year of general stagnation in business it was greatly to their credit that they were enabled to secure more business than in 1893. This was seconded by Mr. E. J. Lennox and unanimously carried.

Messrs. Sherman E. Townsend and H. S. Stephens were appointed auditors for the ensuing year, and the following gentlemen were appointed directors: Geo. Gooderham, Wm. Bell, S. F. McKinnon, T. G. Blackstock, E. J. Lennox; R. R. McLennan, M.P. for Glengarry; A. F. Gault, R. L. Patterson, Fred. Nicholls, Robt. Archer, D. D. Mann, John F. Ellis, W. H. Storey, Jas. Mills, Robt. Crean, A. E. Gooderham, C. D. Warren; Hon. Theo Davie, Chief Justice of British Columbia; Hon. J. A. Ouimet, Samuel May, Henry Lowndes and Ald J. D. Rolland, Montreal.

At the close of the shareholders' meeting the directors reassembled, when Mr. Geo. Gooderham was elected president, and Messrs. Wm. Bell and S. F. McKinnon, vice-presidents, for the year. Messrs. Robt. Archer, A. F Gault, Hon. J. A. Ouimet, R. R. McLennan, M.P., Ald. J. D. Rolland and W. Strachan were appointed a local board for the Province of Quebec.

NORTHWEST LAND COMPANY.

The annual meeting of the Canada Northwest Land Company was held in Toronto on Wednesday, 27th March, Sir W. C. Van Horne presiding. The report showed that in consequence of the depreciation in the prices of produce the result of the land sales had been unsatisfactory, only about 3,000 acres of land having been sold by the company during the year, at an average price of $5 per acre, part payable in shares and part payable in cash. The amount to the credit of the profit and loss account for the year showed $2,900 as the expenses of the liquidation of the English company, and the obtaining of the Canadian company amounted to some $6,800. Otherwise the profit and loss account would have been over $9,000 to the good. Under a resolution passed by the board, the company was instructed to purchase preferred shares of the company to the amount of $790, to be cancelled.

The chairman stated, in his remarks, that nearly $147,000 of the preferred stock had been cancelled during the year, and that, although in ordinary companies the investors would have to look to the dividends paid, yet in this company they should also look to the cancellation of the preferred shares as a factor tending to the appreciation of their shares as the land was purchased and the shares cancelled. The former board was re-elected, with the exception of the substitution of Mr. Thomas Skinner, of London, for Mr. Gaspard Farrer, of London, and Mr. W. B. Scarth, of Winnipeg, for the late Mr. James Burnett. After the annual meeting the board assembled and re-elected Sir W. C. Van Horne president, and Mr. E. B. Osler vice-president.

THE TELEPHONE IN CANADA.

An interesting *resumé* of the progress of the telephone system in Canada is given in the March number of the *Canadian Electrical News*. It occurs in the course of a character sketch of Mr. K. J. Dunstan, manager of the Bell Telephone Company's exchange in Toronto. As is the case with many a new invention, people fought shy of the telephone at first, and in Ottawa and St. John, N.B., where the telephone to-day is as great a necessity as anywhere else, it was almost impossible in the early years of the business to get the people of these cities to evidence any practical appreciation of Mr. Bell's invention. The first canvass in Ottawa was a complete failure, and no subscribers could be secured. A two weeks' canvass in St. John resulted in the enrolling of one subscriber. These cities to-day have well equipped exchanges, and nearly everybody in business and domestic circles uses the 'phone.

"The growth of the Toronto exchange is naturally a matter of satisfaction to Mr. Dunstan. There are to-day in this city 4,500 telephones, distributed among houses and private residences. Some of the defects that were worrisome to subscribers a few years ago, have been almost entirely abolished, owing to the degree of perfection attained in the construction departments of the work. The Toronto system is nearly altogether worked by metallic circuits, and to a greater extent than is the case in any other city in Canada. A larger proportion of underground work exists in Toronto than in any city of the same size in America."

The Bell Company's new switch board, to be ready in May, will be, Mr. Dunstan claims, the largest installation board in the world, and will

possess many new and valuable features. Three hundred persons are employed in the Toronto exchange. On 31st December, 1894, there were 350 telephone exchanges in Canada using Bell instruments. These were represented by 32,485 subscribers, distributed as follows: Business places, 21,733; residences, 10,621; public pay stations, 131; and in addition 528 private line subscribers. For this service 34,595 miles of wire is in use on over 300,000 poles, besides underground conduits and house-top fixtures.

"An interesting development in the use of the telephone, and this has been largely within the past few years, is the long distance line. In 1877 it was quite a novelty when a line was placed between the residences of Messrs. Baker and Cory, of Hamilton. Then, hardly Professor Bell himself looked forward to the time when conversation would be carried on daily between points up to 700 miles apart. Yet within the past decade long distance telephoning has developed to this extent, and is growing most rapidly, rendering it somewhat difficult to say what successes may yet be scored in this department of the work. Mr. Neilson, of the Toronto exchange, thinks there is no doubt as to the possibility of building lines that would work, say, from Quebec to Sarnia; the only question is whether wires of that length in Canada would pay. There is good reason to believe that time will solve satisfactorily that question. A great difficulty in the early days of long distance telephoning was the continual presence of induction, making conversations difficult. This trouble, however, has been quite successfully overcome by the almost general use to-day of metallic circuits and copper wire. The long distance telephone of the Bell Telephone Company of Canada alone comprises 13,091 miles of wire on 5,361 miles of poles, and gives the means of verbal communication between the subscribers to their 300 different exchanges, and also to 262 other places, where they have no exchanges but only toll offices."

SECRETARIES OF THE S. E. TARIFF ASSOCIATION.

We all remember when Tom Peters was secretary of the Southeastern Tariff Association In some respects his place has never been filled. Peters was the man of the time, the day and the hour. He ran the entire business. The officers of the executive committee were merely ornamental. Monthly meetings were held regularly in order to confirm the acts of the secretary, and also to bring together a sufficient number of field men and managers to constitute a quorum for general abuse of the self-same secretary. But no one ever interfered with him. Knowles was president, and was kept busy following the secretary's various changes in rates and rules. Peters make a fine secretary. He did not care a snap for any one. Held opinions of his own, and enforced them at all risks. There was no doubt or indecision in the office. It was always one way or he other p. d. q.

The next secretary was Fleming—the very antithesis of T. P. in all respects. Of poetic appearance and disposition, he shrank from the bitter personal encounters in which the former secretary so much delighted. The change was as marked as from Homeric hexameters to turgid dithyrambs. Mr. Fleming decided in the very beginning that the responsibility for the conduct of the association did not and should not rest on the secretary. Many stories are told as illustrating Fleming's fidelity in ascertaining the proper method to be adopted before acting. One will suffice. Knowles was president. To his disgust he was now a working president. Peters was gone. Fleming was newly in office. Day after day Knowles was called upon to decide all sorts of questions. Wherever he turned he would find Fleming with a letter in one hand and a memorandum pad in the other, ready to take down the answer to the inevitable question. At last, one day Fleming rushed in with a letter from the lone and only agent at Social Circle, who asked for a rating on a new detached dwelling unoccupied.

"Mr. Knowles," said the secretary, "what shall I do with this?"

Knowles read the letter, and then turning to the secretary, with solemn gravity, said:

"You had better frame this. It is too important to trust to the files."

After Fleming came Mr. Tupper. Tupper was from the beginning considered the model secretary. No one ever had to analyze his qualities. Some one said the day he was elected: "He is a model secretary," and this stuck to him the whole time he was in office. He never assumed responsibility—bless you, no. Yet he always had his way, but so diplomatically that the president and executive committee thought they had *their* way. Sometimes he would act in a matter, then, at the next meeting of the executive committee, Mr. Tupper would say, with great modesty and "Little Billee-ishness," "Gentlemen, I acted in this matter and ask your approval. I can read these two letters from Mr. Low, five pages each." "No! No!" shouts everybody, "we approve and grant leave to print." Mr. Tupper was the most popular secretary by long odds. His appearance was greatly in his favor. He always wore an old frayed-out office coat, the lapel stuck with a million pins. This gave him a splendid business look. Field men coming in and seeing Sam arrayed for work would depart deeply impressed and say, "I tell you what, Tupper is a worker from the knobs." He never went out of the office without first carefully sticking a pen behind his ear, which is the last test of an active business worker. Tupper was greatly beloved by everybody in the insurance business. There was an air of home-like confidence about him that at once put you at your ease. While gazing into his innocent and unsuspecting eyes you felt that you could safely abuse any man in the business, and count on the secretary's sympathy —*Insurance Herald*

IT WAS A LITTLE "ROUGH."

"Here is a poem which you may publish in your paper," said a young man, with eyes in a fine frenzy rolling as he entered the editorial door. "I dashed it off rapidly, in an idle moment, and you will find it in its rough state, as it were. You can make such corrections as you think necessary."

"Ah, much obliged," said the editor, "I will give you a cheque for it at once."

"You are very kind," said the contributor, "I shall be delighted."

"There you are," said the editor, handing him the cheque.

"Many thanks," exclaimed the young man, "I will bring you some other poems."

When he got near the door he suddenly paused, then he came back.

"Excuse me," he said, "but you forgot to fill up the cheque. You have not written the date, nor the amount, nor have you signed your name."

"Oh," said the editor, "that is all right. You see I have given you a cheque in its rough state, as it were. You can make such corrections as you think necessary."—*St. Louis Humorist*.

THE Board of Health of Quebec threatens to sue the corporation of Montreal for its failure to remedy the unsanitary condition of the city hall. A local engineer declares it will cost $15,000 to put the building in a healthy state.

THE ice in Lake Memphremagog is as firm as in January and bids fair to last through the month of April

OFFICIAL REPORT

ANOTHER YEAR OF PROSPERITY

Sun Life

Assurance Company

Of Canada.

THE Annual Meeting of this Company was held in the head office building, Montreal, on March 15th, 1895. There was a large attendance of those interested. The main features of the report were as follows:—

The operations of 1894 show most substantial and satisfactory progress, not only in volume of new business, but also in profit earnings, and general prosperity.

The applications received were 5,920 for assurances amounting to $10,290,204.16. Of these, 5,667 for $9,624,773.79 were accepted, the balance being declined or withdrawn.

The new assurances actually put in force were 4,222 for $7,307,553.22. These figures are larger than those ever before reached in the company's history.

There are now in force 19,378 policies, covering $31,528,569.74, being an advance of 2,241 policies for $3,728,813.23 beyond the previous year.

The net premium income has increased by $101,591.61; the income from interest and rents by $34,171.29, and the total income by $133,113.48. The assets have increased by $614,642.73.

On the other hand, the death claims paid show a decrease of $29,476.05, and the outstanding claims a decrease of $7,479.69, making a total saving in mortality as compared with last year of $36,955.74

In view of the strong position of the company it has been deemed expedient to anticipate the probable lowering of interest by calculating the liabilities at four per cent., instead of at four and a half per cent., the Dominion Government standard. For this purpose a special reserve of $226,592 86 has been set aside from the surplus, leaving a balance of $174,781 08, over all liabilities and capital stock.

The Sun is the FIRST CANADIAN COMPANY to make this change. According to the government standard, the surplus would have been $401,373.94. This is an increase of $112,778 29 beyond 1893. The assets are well and safely invested, and yield an average of 5.7 per cent. interest. A proof of their high quality is the fact that the real estate held as the result of foreclosure amounts to only $77,159.14, as against mortgages of $2 605 339 11

Another important step taken is the adoption of a non forfeiture proviso whereby policies may be automatically protected against the risk of lapsing through neglect or temporary financial embarrassment

SUMMARY OF MAIN FEATURES

New Life Applications	$10 290 204 16
Increase over 1893	$751,048 33
Cash Income for year	$1,373,596 60
Increase over 1893	$133,113 48
Assets	$4,616,419 63
Increase over 1893	$614,642 73
Reserve for security of policy-holders, Dom Gov standard	$4 063 935 62
Increase over 1893	$530,671 05
Surplus over all Liabilities and Capital Stock, according to Dom Gov Standard	$401 373 94
Life Assurance in force, 1-1-95	$31,528,569 74
Increase over 1894	$3,728,813 23

CANALS OUT OF DATE

The directors of the Pennsylvania Railroad Company have recommended the abandonment of the Pennsylvania canal now owned by that company, for the reason that it has outlived its usefulness, and its expenses for some years have exceeded its receipts, the deficit now amounting to over $160,0 0. Recently the Susquehanna & Tidewater canal, which formed the Pennsylvania canal's only outlet, has been abandoned as a financial failure, leaving the former "an isolated waterway in the central part of the State, earning little revenue, and scarcely able to maintain itself." A good many old canals in other parts of the country are in similar condition, and yet there are those who urge their maintenance, at heavy cost to the public, on the theory that they are needed "to keep the railways in check," and even advocate the enlargement of the canals, at enormous expense, which would have to be borne by the public, whether served by them or not. But canal transportation is behind the times and must go. The railways have removed the reason for its existence by providing a means of transportation which is cheap as well as rapid and convenient, and which is growing cheaper and more complete every year.—*Railway Age.*

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Hydraulic Presses For all purposes

TORONTO, ONT.

CEMENTS AND FIRE BRICKS.—A good many Western enquiries are reported for cements for spring importation, but thus far not much real business from that quarter has materialized yet. Contracts for spring import, amounting to about 10,000 barrels, are reported so far for this market. Manufacturers' cost is about the same as last spring, but freights are expected to be rather higher. Stocks in store here are just moderate, and there is a fair outgo at $2 to 2 10 for English, Belgian, $1 85 to 1 95. There is a steady demand for firebricks at from $16 to 22 00.

DAIRY PRODUCTS.—The butter market presents little change. Some few parcels of new Townships dairy are coming, and bring 20c. readily; late made creamery is quoted at 21 to 22c.; old stock hard to move. In cheese the local demand is quiet, but stocks are well reduced; finest quotes at 10 to 10½c.; under grades, 9½ to 9¾c. There is steady demand for fresh boiling eggs at 15 to 16c.

DRY GOODS.—There is still a lingering of winter in the atmosphere, and the season is not so favorable a one for the retail trade as this time a year ago, so that business in the wholesale line is not very active. Letters from buyers now in England report some stiffening in woolen dress stuffs, worsteds, etc. Some lines of silks are also advanced, notably blouse silks, in some cases an advance of two pence a yard being asked. A slight drop in some lines of domestic sheetings is reported.

FURS.—We are favored by Mr. Hiram Johnson, general dealer in raw furs, with the following full details of the late London sales: Lynx sold same as March, '94; marten, 60 per cent. higher; fisher, 5 per cent. lower; red fox, 7½ per cent. lower; cross fox, 10 per cent. lower; silver fox, same; white fox, 115 per cent. higher; northern otter, 7½ per cent. lower; pale do., 25 per cent. lower; mink, 5 per cent. higher; northern wolf, 35 per cent. lower; black bear, about the same; brown and grizzly 20 per cent. lower; skunk, 15 per cent. lower; muskrat 10 per cent. lower than last January, and beaver same as last January. Australian wombat sold 20 per cent. higher, and large quantities of this fur are imported into Canada, and made up into driving coats, which sold this winter as low as $10 to 12. Receipts are at present light. We quote for strictly prime skins: Beaver, $3.25 to 4; black bear, $15 to 25; cub do., $5 to 10; red fox, $1.25 to 1.50; muskrat, 7 to 10c.; lynx, $1.50 to 2.50; marten, $1.25 to 1.75; mink, $1 to 1.50; skunk, 50c. to $1; otter, $8 to 10; fisher, $5 to 7.

MONTREAL GRAIN STOCKS IN STORE.

Flour	17,372	19 043
Buckwheat.....	12,649	14,686

GROCERIES.—Refiners report a good business in sugars, and are very steady in their quotations, no concessions being made on 3⅜c for standard granulated. In yellows 2½c is the bottom figure. Molasses steady at 32½c. for choice Barbadoes in puncheons, 36c. in barrels. Shipments of 1,200 pkgs of low and medium grade Japans have been made from this market since last writing, half to Chicago and half to Hamilton. Several small lines have also been cleared out to city houses. Currants are cabled a little easier in Patras, the Russian demand having dropped off. A direct steamer is now taking in cargo there, but is reported to have very few on board for Montreal, though some moderate lots are being taken in for the West. Local quotations range from 3¾c for brls., up to 6 to 6½c. for Vostizzas in cases. Valencia raisins are quiet at 3¾c. for off stalk, selected 4½ to 5c., layers 5½c., California 4-crown muscatels 6 to 6½c., 3-crown 5 to 5½c. Stocks of dried apples are about cleared out, and 6c is asked; evaporated ditto are firmer at 7½ to 8½c. Tapioca and sago are reported a little advanced in London. The trade in canned goods is still rather disappointing, but the market is about clear of low-priced goods. We quote corn 90 to 92½c., tomatoes 87½ to 90c., peas 90 to 95c., salmon, standard brands, $1 35, cohoes $1 10, mackerel scarce at $1. New pack lobsters likely to be dearer, as packers are seek

ing a market in the U.S., the duty now being removed.

HIDES AND LEATHER.—Further advance is to be noted in hides, with a decided scarcity in this market of light hides. Local dealers in all frontier towns are finding active American demand for all they can ship, and some report they are getting 6c. for them all round, take them as they come. Local dealers are now buying at 6c. for No. 1 light hides, and one buyer is said to be paying 6½c. Sales to tanners have been made at 6½c., though now some dealers are not particularly anxious to sell at 7c. No. 1 light hides are reported at 7½c. in Chicago, which is equal to nearly 7⅞c. here. Heavies are comparatively neglected, and are bought at 6c., with last sales to tanners at 6½c. Calfskins are advanced to 6c.; lambskins, 10c. Tallow continues very dull at 5 to 5½c.

LEATHER —Leather men say it is now easier to make sales, because shoe manufacturers recognize the fact that the advance is a stable one, but there is no general buying of any large lots. Some dealers are asking 22c. for best No. 1 slaughter in small lots, and it is said a St. Hyacinthe tanner has refused 18c. for a five-ton lot of best splits A slight advance is reported in raw stock for dongolas, and some fair sales of the finished article are reported at firm prices We quote:—Spanish sole B.A. No. 1, 18 to 20c.; do. No. 2 to B.A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 22c.; No. 2 do., 17 to 18c.; common, 15 to 16c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; western splits, 16 to 18c.; Quebec do., 13c.; juniors, 11 to 13c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 10 to 11c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

OILS, PAINTS AND GLASS.—Goods are moving out briskly this week on back orders, and travellers are still reported doing a fair business in the country. Turpentine is a trifle easier in the South, and recent advanced quotations are being shaded a little. Advices from the Newfoundland sealing fleet, so far as received, report a catch of about 50,000; whereas about 350,000 is generally called about an average. There is a good demand for Paris green. We quote:—Turpentine 54 to 55c. per gallon for single brls; two to four barrels, 53 to 54c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4¾c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.20 per 50 feet for first break; $1.80 for second break; third break, $2.80.

METALS AND HARDWARE.—The lowered freight rates have not induced any increase of activity, and matters will not likely improve much until the opening of navigation. Scotch warrants are cabled at 41s. 10d.; they were 42s. 6d. a week or so ago. Ingot tin is again cabled higher in Britain at £64 10s. Coke tin plates are very weak, and it is probable an offer of $2.50 might be accepted for a round lot. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19 50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to 17.00; Ferrona, No. 1, $16.50 to 17 00; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.00; charcoal I.C., $2.90 to 3.25, according to finish; P. D. Crown, $3.75; do. I.X., $4.50; Coke I. C., $2.60 to 2.75; coke wasters, none offering; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5½ to 5¾c.; tinned sheets, coke, No. 24, 5¾c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.90; ditto, three-sixteenths inch, $2.60; common tank iron, 1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 10 to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25: American do., $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c; ¾ in., 3¼c., ⅞ in., and upwards.

TORONTO MARKETS.

TORONTO, April 4th, 1895.

BOOTS AND SHOES.—Trade in boots and shoes at the present moment is naturally just a little slow, consisting as it does of a sorting-up business. But prospects for the fall are bright. Tanners have insisted upon an advance in the price of leather, and are holding stock until they get it. Manufacturers of footwear, in consequence, have concluded that they must obtain an advance on their fall orders for boots and shoes as compared with last year. A Quebec maker writes to his representative here: "Leather is undoubtedly in scarce supply, and higher prices are a foregone conclusion. Withdraw all fall samples until you hear from us again, and in the meantime confine yourselves exclusively to a sorting-up trade."

FLOUR.—A fair degree of activity prevails, and the demands from the merchants of this province are making enquiries for stock. The demand from the Maritime Provinces has also shown material improvement. Quotations on patent and straight roller have been advanced, the former to $3 to 3.25, and the latter to $3 to $3.10. Hamilton millers held a meeting last week, and decided upon a general advance of 50 to 60c. a barrel, which certainly means great sectional strength.

GRAIN.—A material advance has taken place in the price of wheat, and the market is several points higher than last week. There is from present appearances a genuine scarcity of Manitoba wheat. Some 150,000 bushels has been brought back from Montreal to Ottawa, and this double payment of freight was considered a satisfactory investment. Little that is accurate can be gleaned of the stocks which Ontario farmers hold; but it is not probable they have any excessive supplies on hand. Millers are buying freely and the trade movement

These prices are wholesale by the car-load.

is good. The 1894 barley season is now pretty well concluded. There is not much stock left in this country, and what is here will be required for feed purposes. Some small lots are still going forward to the United States. The oat market is a shade easier. It will be remembered that last week we announced the arrival of some Manitoba oats in this market. No further shipments have arrived, but the knowledge that if this market should develop any considerable demand it would be profitable to send these oats here, has, of course, a depressing effect. Oats are selling in Toronto at 39c., a price fully equal to an average basis. Peas are dull, with outside quotations 58c. per bush. Rye and corn remain purely nominal.

The stocks of grain in store at Port Arthur on March 23rd were 678,709 bushels. During the week there were received 10,344 bushels, and shipped *nil* bushels, leaving in store on March 30th, 689,053.

HARWARE AND METALS.—There has been on the whole a satisfactory improvement in the trade situation during the last fortnight. Jobbers are kept busy filling orders comprising a wide range, extending, as it does, over general lines of hardware, tinware and spring specialties, such as draining tools, harvest tools, spades and shovels. There is a good demand for wire nails, with no change in price lists. Trade in cut nails shows improvement. The association at a recent meeting decided to follow the Wire Nail Association and prepay freight rates on 10-keg lots that do not exceed 25c. per 100 lbs. to any point. In addition to this they have made car lots subject to a reduction of 10c. per keg, instead of 5c. as formerly. Rope has again declined, sisal to a basis of 5¾ to 5⅞c., and manilla to 8¾c. basis. Metals are moving quite freely, with but few exceptions, both by way of import and shipments from stock. Barb wire is slow. Galvanized and oiled, and annealed, however, find good demand, and during the last ten days shipments have been entirely satisfactory. The churn business is good, and large orders are being handed to the manufacturers for direct shipment. Spring rates came into effect April 1st.

HIDES AND SKINS.—The recent advances continue to hold good. Trading at the moment is slow, but not from lack of demand so much as on account of limited supplies. This is, however, to be expected during the Lenten season. The future of the market rests wholly with Chicago, where everything is at the moment very firm. Offerings of hides just now are dirty and grubby, fully 70 per cent. running 2's and 3's. Sheepskins have undergone no change, and the price, 90c., is probably settled for the balance of the season.

LEATHER.—The situation is much brighter this week than for some time past. Stocks of sole are not large. Slaughter is being held for an advance of ten per cent. And this is fully warranted by the price of hides. Trade in Spanish is more active. Buff, grain, pebble and splits are all selling at an advance or are not selling at all. It seems a pity that when the domestic market is brightening up a gloom should have fallen over the export trade. But such is the case, and the strike of English shoe operatives has curtailed already our export trade in leather. It is to be hoped that this labor difficulty will find a speedy settlement.

PROVISIONS.—The receipts of large fresh rolls of butter, until the present week, have not been great in comparison with other descriptions. But since our last report excessive offerings have come to hand, and the market is easy at 12 to 13c. per lb; common tubs are entirely neglected, with offerings at 7c. finding no takers. Fine dairy tubs are slow of sale, at 12 to 13c per lb. The local cheese market is quiet and easy. A sale of 1895 fodder cheese was made recently at Brockville, bringing 9½c. This early sale is believed to be a record-breaker. In hog products values are firmer, long clear bacon selling at 7¾ to 8c., and lard at 8½ to 9c. per lb. Dressed hogs are bringing $6 to 6.15 per 100 lbs., and at this advanced figure, as is usual on a rising market, are not offering freely. Eggs are weaker, with fresh stock worth 12½c. per doz. Receipts for the week have made a large total, and the prospects at the time of writing are for a low Easter market. However, "there is many a slip 'twixt cup and lip," and in the few intermediate days many changes may take place. Dried apples are holding their value; evaporated are easy and a shade lower. There is no maple syrup offering yet, although it may be expected at any day.

SEEDS.—The export season has practically closed, although within the week several shipments of alsike clover have been made by way of export This continuation of the demand from abroad has done much to steady the home market and keep prices at a normal basis. Red clover is somewhat easier than it was three weeks ago, and the future of the market cannot be easily discerned. Timothy, in sympathy with American markets, is a little cheaper.

WOOL.—Dealers are well satisfied with the course of the Canadian fleece wool market this year, and some of them have undoubtedly had a very profitable season. It was the general impression two weeks ago that there was little or no fleece in the vicinity of Toronto But an increase of 1c. per pound brought out a considerable quantity. Merchants are now paying 20c. for domestic fleece. Receipts are not coming in large lots. Many of the small factory owners, however, are sending from 1,500 to 3,000 pounds to this market. In some instances this was brought about by importunity for cash and in others through a spirit of speculation on the new clip. How the new market will open is, of course, one of the questions of the hour. Merchants are afraid that farmers' ideas are very large, and offerings will be very tardy unless high prices are offered at the beginning. Pulled wools remain without change and are moving in a quiet way at former quotations.

" " " **1894, $4,239,050 00**

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

AN ADJUNCT TO TRADE

Under the heading of "Old Commercial Houses" the New York *Shipping List* has been publishing, for a series of months, sketches of business firms identified with the commercial progress of the United States for half a century or more. Among the latest of these is a paper upon the Mercantile Agency of R. G. Dun & Co., a concern which is so familiar to the business men of this continent.

In the first paragraph the statement is made that the Mercantile Agency, for the verification of credits and the collection of debts, is an institution typically and thoroughly American. "Its need was a lesson taught in the bitter school of experience. Though the remembered cause of the panic of 1837 was the crisis born in the fight of President Andrew Jackson with the United States Bank, yet the remote and real cause of this, as of all other panics, lay in lax and excessive credits. Narrow as were the limits of commercial America in area then as compared with now, much vaster were they in point of time and accessibility; and in business minutes and hours, not yards or miles, measure distance. Time is not only money, but knowledge. The merchants of different American cities were as distant in business relationship in the 30's as those of different hemispheres are in the 90's. When, after the panic of '37, tradesmen began to rub their eyes and to peer out of the darkness into the future, they saw more clearly the wisdom of closer acquaintanceship among themselves, of more accurate knowledge of the commercial standing and financial ability one of the other throughout the country."

To attain this end a medium was needed which should be disinterested and unhampered by business alliances. This medium offered in the person of Lewis Tappan, who was encouraged by business men who knew and confided in him. Mr. Tappan had been a prominent dry goods merchant in New York. He began in 1841, in one small room in Cedar street From this small beginning the business grew until the house he established, now known as R G. Dun & Co., has over 150 offices in the leading American and foreign cities.

"When one considers the delicacy and the importance of the work devolving upon the Mercantile Agency, the fact that it is sought and accepted as an authority contains praise enough for the intelligence and conscience in its management. Of course, the experience, the capital and the prestige incident to its more than half a century of life are invaluable in its work. Reports of the character and capacity of over 1,300,000 traders in the United States and Canada are upon its records, and these are under revision constantly by means of an office system creditable in its ingenuity and contributed to by information daily coming from correspondents everywhere in America. Of recent years, in addition to resident correspondents, there is a trained staff of regular reporters, who visit and canvass at least once a year, and in many localities twice a year, their respective districts. These men are necessarily experts among experts. It is also customary to obtain statements from traders themselves, to consult their references and others, and to reflect what they say on their records."

At no time in its history, says the *Shipping List*, has the mercantile agency of R. G Dun & Co. been higher in success or in usefulness than at the present time. The men who now compose the house and control its destiny are Messrs. R. G. Dun, A. J. King and Robert Dun Douglass. Of these three, Mr. Dun has been a proprietor since 1859, when the present style of firm name was adopted, supplanting the older title of B. Douglass & Co., which in 1854 had superseded the name Tappan & Douglass, the adoption of which takes one back to 1849, and to the original name, Lewis Tappan & Co. Mr. Benjamin Douglass, whose name was so early identified with the mercantile agency, had also been a New York business man prior to the crisis of 1837. To Mr. Douglass is due credit for evolving the arrangement of the details of the business which was the nucleus of the present nearly perfect system.

"It is an interesting fact that Mr. Douglass married Mr. Dun's sister, and the latter afterward married Mr. Douglass' sister, the present junior partner of the firm, Mr. Robert Dun Douglass, being the son of Mr. Benjamin Douglass and a nephew of Mr. R. G. Dun. The present Mr. Douglass has been associated with the firm since 1872. The connection of Mr. King with the firm is practically contemporaneous with that of Mr. Dun, he being able to count up nearly forty-five years of association with the house. It will be recalled by older New Yorkers that for many years the firm had quarters in that interesting old block, the Trinity Building, at 111 Broadway, over the store of Claflin, Mellen & Co., a firm name that is historic in the New York dry goods trade. The offices now occupied by the firm are 314-316 Broadway, where three entire floors are necessary to their accommodation.

"As a practical and applied illustration of the old saw that 'knowledge is power,' the Mercantile Agency has rendered service to the business interests of America that cannot readily be appreciated, because so thoroughly has the work been engrafted upon the business system of the time that its existence seems an ordinary, always-known part of the nature of things commercial. Only by contemplating the possibilities of the absence of the work it performs can the worth of that work be appreciated. And yet the credit and collection business as a separate commercial entity was unknown less than sixty years ago. R. G. Dun & Co. were the pioneers, and are at present the leaders in this important branch of business effort."

THE NASHWAAK AND ITS KING.

The story is told by Mr. Edward Jack, in the St. John *Sun*, of how Alexander Gibson, the resolute and enterprising "lumber king," of New Brunswick, was attracted from the County of Charlotte to the County of York.

The first that we hear prominently of the Nashwaak in history is when late in the 17th century the decree was signed by Colbert, Louis XIV.'s great minister, for a change of name from Naxoat to that of Soulanges, in honor of the then owner, who was Lord of Soulanges and Marsom, in France. When the writer first knew this property it was owned by Robert Rankin & Co., who were anxious to get rid of it at the price of $28,000, their representative in this country informing me that it had cost them $130,000. Nearly thirty years ago S. T. King, then a leading merchant of Calais, in the State of Maine, asked me if I knew of a good place for the manufacture of spruce deals on the St John River. I replied that Isaac Bradbury, then one of the principal lumbermen of New Brunswick, had said to me that the Nashwaak River was the best. I was accordingly instructed by Mr. King to investigate the matter, and Thomas Robinson and myself were sent on the mission. When we came to Fredericton we each engaged an Indian with his canoe, and with these we ascended the river to the mills.

Here we found a large mill in a bad state of repair, a store and a few dirty looking houses. The place was unhealthy, typhoid fever being epidemic, owing to the use of water from a filthy well which stood behind the store, and into which drained all the bacteria from the neighboring cesspools. . . . Mr. Robinson, my companion, was an excellent mill and woodsman, and I had had much experience in the matter of spruce lands. A very little time convinced us of the value of the property as well as the incapacity shown in its management On our return to Calais we recommended Mr. King, who had formerly been a partner of Mr. Gibson, to buy. He hesitated, and not seeing his way clear to accept the offer of $28,000, declined. I may here mention that, beside the land around the mill and dirty buildings, there were 7,000 acres of as good spruce land as I ever saw, which were to pass into the hands of him who purchased the mill. This was regarded as a small matter, however, by the then owners. Mr. Gibson, hearing of the property, came up the St. John River, saw and purchased the property.

A glance at the situation showed him what was to be done in order to convert a losing property into one which was to give employment to tens of thousands of people, and to yield millions of dollars. When he took possession, the old houses were burnt down or removed, the poisonous well filled up, skilled millmen and millwrights were introduced, and the old mill thoroughly renovated. While Mr. Gibson was directing matters at what is now Marysville, I was sent by him into the forest on the stream to select such portions of the same as I could recommend him to purchase. . . . .

The first thing that Mr. Gibson did on taking possession of the property was to build about a couple of miles of piers in order to be able to hold a sufficient stock of logs therein for a season's sawing. The former owners had not seen the necessity of this, and instead of doing their river driving entirely in the spring, when the water was high and the flow constant, they could only drive a very few logs at a time into the very small boom at their mills, and thus they were river driving all summer

Then expert lumbermen were sent up to the Nashwaak to clear out the streams and build dams, and the whole river and its branches were put in complete order. Thus, by pier building and river improvements alone, to say nothing of anything else, the cost of log production was cheapened about $1 per M feet B. M. This cheapening spread over the period of Mr. Gibson's operations there, would show a saving during that time of upwards of $600,000.

A WARNING TO DIRECTORS.

Colonel Newcome in the hands of speculators and company promoters is a standing warning to military gentlemen not to meddle with matters of which they have no knowledge; but Colonel Newcome's fate is constantly repeating itself. A few days ago General Collingwood appeared in the London bankruptcy court in connection with the winding up of "The Mont de Pieté of England (Limited)." The prospectus stated that the company intended "to help the poor in their time of need without directly pauperizing them or leading them to depend on charity," and General Collingwood was induced to become a director by the hope of doing a good turn to humanity and making a little money for himself at the same time But experience convinced him that he did not like the pawnbroking business, and he did not like the people he had to associate with. As a matter of fact, the operations of the promoters of the company were confined to lending to each other, on doubtful securities, the money subscribed by a confiding public. Now the company is in the bankruptcy court, the promoters have fled beyond the reach of the law, and the addresses of several other directors cannot be found. General Collingwood is left alone to face the public odium connected with this precious company. From first to last he has been a victim of the duplicity of people who were clever and unscrupulous enough to take advantage of his simplicity and ignorance of the ways of the financial world—*Gazette*.

COTTON MANUFACTURE IN INDIA

In the course of a debate on the question of East Indian duties in the British House of Commons last month, Mr. Fowler, the Indian Secretary, made the following statements. On the authority of Sir James Westland, the Indian mills did not spin yarns of a higher class than 30's. There were 141 mills in India, and 140 of these furnished their statistics to the Finance Minister. Those mills spun last year 345 million lbs. of yarn, of which 215 million lbs were spun at Bombay, which was the great centre of the trade. Of these 19·714 per cent. were 10's or under; 59·634 per cent. were above 10's and under 20's. Therefore they had 79 per cent. of the whole spinning of the Indian mills under 20's. Above 20's and under 30's there was 19 per cent., leaving only about 1½ per cent. for the finer qualities

The yarns imported into India from Lancashire were all of the finer qualities, so that there was practically no competition. The imported yarns were used for hand-loom weaving; the factories did not take them. These hand-looms were to be found chiefly in cottages, and the idea of imposing an excise duty upon cottage industries was practically and utterly impossible. As to the disposal of the yarns, 170,000,000 lbs. were sent away, and there could be no question of duty in that case. For hand-loom-weaving 129,000,000 lbs. were sold, this being used for weaving the coarser cloths worn by the native population of the poorest character; about 74,000,000 lbs. were used by the mills which had looms for weaving.

—The Farwell corporation intends to erect this summer a 14-story steel building in Detroit, at a cost of about $800,000. The building will have a frontage on Woodward avenue and the Campus Martius of 260 feet, and on Michigan avenue of 127 feet. Mabley & Co. will occupy eight floors and the basement, and the upper six floors will be devoted to the use of offices. The building will be 210 feet high, or 25 feet higher than the cupola of the Detroit city hall.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co.
of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

The Investment Annuity Policy
OF THE
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

WM. McCABE,
Managing Director.

J. AUSTIN (Founder Dominion Bank), **President.**
Hon. Justice Maclennan. James Scott, Merchant.

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office—Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses** and **contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

DECISIONS IN COMMERCIAL LAW

RE WELLS & CROFT.—The official receiver, while acting as interim receiver only, and pending his becoming trustee, ought not, according to Vaughan Williams, J., to realize the debtor's property, or deal with it or encumber it, except where it is necessary to do so for the protection or preservation of the property.

SCHOLFIELD V. LONDESBOROUGH.—The only duty which the acceptor of a bill owes to an indorsee is to pay the amount for which he has accepted, and if he accepts a bill in which spaces have been left in front of the words, and figures capable of being afterwards fraudulently filled in, and which bears a stamp larger than the amount for which the bill was drawn requires, he has not been guilty of negligence, and he is not estopped from setting up the fraudulent alteration of the bill after acceptance as a defence to an action brought upon the bill by a *bona fide* holder for value. According to the English Court of Appeal, the conduct of the acceptor who accepts such a bill is not the proximate cause of the injury that is done to the holder by its subsequent alteration.

SHELFER V. CITY OF LONDON ELECTRIC LIGHTING CO.—Where an electric lighting company is formed under a provisional order which is subsequently confirmed by Act of Parliament, such order must be read together with the provisions of the English Electric Lighting Act, and the company are not thereby exempted from liability to an action for a nuisance. The powers given by the Act are applicable only to the construction of the authorized works as distinguished from the users of them when constructed, and the Act only applies to payment of damages caused by the execution of such works, and does not apply to damages caused by their user. An injunction was granted at the suit of a lessee and a revisioner respectively of a public house to restrain an electric light company from carrying on their works so as by noise and vibration to interfere with the enjoyment of the lessee and to cause injury to the structure of the premises. This is a judgment of the English Court of Appeal.

IMPERIAL OTTOMAN BANK V. TRUSTEES, EXECUTORS AND SECURITIES INVESTMENT CORPORATION.—In ascertaining whether the plaintiffs in an action to rescind an executed contract for the purchase of £70,000 debentures on the ground of misrepresentation are barred by *laches*, consideration is to be paid to the magnitude and difficulty of the interests and questions involved, and to the time that must necessarily elapse after an inquiry is commenced, before the truth of the facts can be sufficiently established to justify them in bringing forward serious charges. Pending such an action, the plaintiffs have a lien on the debentures for the purchase money, and are entitled to intervene in an action instituted by other debenture holders for the protection of all the debentures, in order to do all that is reasonable to protect and prevent the purchased debentures from being injured, according to Romer, J., so long as they do not thereby injure them, and they are entitled to oppose the vendors in such proceedings, provided they do so in good faith, and in the interest of the holders of the purchased debentures.

SCOTTISH AMERICAN INVESTMENT CO. V. SEXTON.—On an application to a company for a loan on seven dwelling houses, it was agreed that the houses were to be completed, including furnaces, before the money should be advanced. The houses were completed and the furnaces put in before the money was advanced, and a mortgage taken. After the mortgage was given, the mortgagor removed five of the furnaces and put them in other houses belonging to another person, and proposed to move the other two. The Court of Queen's Bench decided that, as between the mortgagor and the company, the furnaces were a part of the freehold; that the company was the owner, and the wrongful taking by the mortgagor would not enable him to pass title even to an innocent purchaser for value; and injunctions were granted restraining the removal of the two not removed and ordering the delivery up of the five removed.

A LUMBER TRANSACTION

According to a despatch from Sherbrooke, a number of Eastern Townships gentlemen, Hon. W. B. Ives, Messrs. George Van Dyke, R H Pope, M.P., and F P Buck, have bought the St. Francis Lumber Company's property and limits, better known as the C. S. Clarke estate, lately managed by Mr. Milliken. This comprises some 214 square miles of Government lands and 50,000 acres of private lands. At a low estimate, and excluding ties and cedar, there are a thousand million feet of lumber on the property, nine-tenths of which will go into the St. Francis river. The purchase includes the Brompton mills and Windsor property. It is expected that all of this lumber will be put into the Royal Paper Mills Co.'s works at East Angus, where they expect to build large saw mills; they will then be able to saw their lumber there instead of at Brompton Falls. There is some talk about the company erecting a large ground wood mill at Brompton Falls with a sulphite mill, to make pulp for the manufacture of newspaper intended for export for the Australian and European market

Mercantile Summary.

SUGAR from the stalks of Indian corn is now promised us by a Pennsylvania experimenter.

AT Cape Traverse, Prince Edward Island, on April 1st, Capt. Allen said all was open water—there was no ice to contend with.

THE Belleville *Intelligencer* has issued as a supplement a quarto sheet with a good portrait in photogravure of Sir Mackenzie Bowell, the Premier of Canada.

IT now appears that the Dominion has decided not to enforce the law prohibiting the dumping of sawdust into the Ottawa River, which comes into force on May 1st. It is intended to deal with the matter when Parliament opens.

AT an agricultural society's meeting held at Yamachiche, a priest announced that in the three counties of Champlain, St. Maurice and Maskinonge butter and cheese had been sold last year to the value of $445,000.

THE traffic returns of thirty-three of the principal lines of the United Kingdom, for the week ending March 24th, show total receipts amounting to £1,361,348, being £111,284 less than for the same week last year; whilst the mileage was 18,728¾, or 206 more. The aggregate receipts for twelve weeks to date amounted to £15,473,199, a decrease of £839,364 upon those of the corresponding period of 1894.

This will Interest Hardware Manufacturers.

This Cut represents the "Birley" Patent Folding Telescope Hardware Box, suitable for boxing all kinds of hardware—bolts and heavy goods. They are scored and creased ready for folding, and the cost of making them up is more than covered by the saving in freight charges.

These BOXES are really stronger than those at present in use because they are made of tougher and more expensive material, and the board is bent instead of being half cut through, thereby retaining its full strength. The appearance, also, of the box when made up is superior to the hand-made ones. Moreover, the boxes can be printed all over at very trifling expense, thus giving them the best show possible, and at the same time obviating the necessity of using labels. This style is far ahead of any other folding box in the world. Patented in Canada, the United States, and Europe. Manufactured by **DOMINION PAPER BOX CO.**, 36 and 38 Adelaide St. West, Toronto.

Mercantile Summary.

THE publication office of the *Lawyer and Credit Man* has been changed from Kansas City to New York.

THE exports from Westminster during the month of March were, according to the *Columbian*, larger than those of the cities of Victoria and Vancouver combined.

THE total production of pig iron in Germany for the first two months of the year is 924,279 tons, as compared with 829,792 tons in the corresponding period of last year.

AT the commencement of February there was only 143 kilometres of new railway in course of construction in Austria, employment in connection therewith being given to 1,284 men.

IN the last week of March there was a good deal of business doing on the Glasgow Exchange in Scotch pig iron warrants, at slightly improved prices. The market closed on 29th at 41s. 8d.

ON the London market at the close of March copper closed firm at £39 5s. for cash, or £39 10s. for three months, per ton. Tin opened on the 25th at £62 10s. cash, went up to £63 15s. on Wednesday, and subsided to £63 5s. for cash and £63 15s. at three months, dull.

Mercantile Summary.

THE firm of J. W. Smith & Son, merchants, at the village of Merigomish, N.S., has dissolved. Fred. W. Smith is the successor to the firm's business at the old stand.

WE learn from the *Acadian Recorder* that two well-known and successful commercial travellers—T. A. Cossman and F. P. Hayden—have entered into partnership in Halifax as Cossman & Hayden, manufacturers' agents.

THE directors of the Tharsis Sulphur and Copper Company, Limited, have recommended a dividend of 10 per cent. for the past year. They propose to carry forward £14,948, and write off £56,026. Shares are quoted at 92s. 6d. to 93s.

SEVERAL new stores have lately been started in Havelock. Messrs. Fennell & Son, late of Napanee, have started a new boot and shoe store in Dr. Jeff's block. Messrs. Joyce & Hall, late of Grenville, have opened a general store.

THE annual meeting of the shareholders of the Quebec Steamship Company was held last week and these directors re-elected for the current year: Messrs. John C. Thomson, D. C. Thomson, George T. Davie, Arthur F. Hunt, Honorables E. J. Price and P. Garneau, and Mr. W. Simons, of Quebec, Messrs. E. H. Botterell and W. J. Withall, of Montreal.

Mercantile Summary.

G F & J GALT, wholesale grocers, Winnipeg, Man., have issued a circular to the trade stating that they "have decided to discontinue handling butter and eggs." The circular says "In future all consignments of these goods will be handed over to some reliable commission house to be disposed of for the shipper." This decision has been made on account of the changed conditions in the produce trade, which renders it impossible for wholesale grocers to do justice to the business.—*Commercial.*

IT is stated by the Charlottetown *Guardian* that Messrs. George Carter & Co. have purchased the stock of the Bazaar Store, which business is now amalgamated with their own. Messrs. Carter will remove into the Bazaar Store premises as soon as the alterations are made. Mr. Watson, druggist, has secured the premises now occupied by Messrs. Carter as their seed and stationery store, and will move into his new premises as soon as they are vacated by Messrs Carter, and the store has been fitted up suitably for the drug business.

AT the Huntingdon council last week the village fathers wrestled with the fire engine question. The Waterous Works at Brantford offered to furnish a No. 2 engine, 1,000 feet hose, hose reels, hook and ladder truck, and all appliances, for $3,100. After some discussion the opinion of the council was declared that it should purchase a No. 2 Waterous engine, but not at once—there must be no precipitate action, it seems. The engine committee were requested to ascertain what quantity of good hose was on hand, if the present hose reel would do, and report at next session.

THE following table, prepared from reports of the Chicago Board of Trade, shows the stocks of wheat in store and afloat at the principal points of accumulation on the lakes on March 23, 1895

	Wheat, Bushels	
	In Store.	Afloat.
Chicago	24,095,000	2,360,000
Duluth	11,786,000	85,000
Milwaukee	701,000	..
Detroit	1,172,000	444,000
Toledo	2,151,000	299,000
Buffalo	2,464,000	295,000
Total	42,369,000	3,483,000

The stock of corn in store at that date was also ascertained to be 6,086,000 bushels—5,057,000 of it at Chicago, and 2,870,000 afloat at Chicago and Buffalo.

THOMAS STRAIN, a dealer in musical instruments at Thessalon, is offering creditors 35 per cent. in settlement.

THE ice in the Red River has commenced to move, says a Winnipeg despatch of Monday. This is the earliest on record except in 1889, when it went out on April 8th.

THE dry goods stock of H. A. Layton, of Belleville, who assigned ten days ago, will be sold on Saturday.——The general stock of J. T. Showler, Arkona, realized 70 per cent.

A WINDSOR tailor, named J. F. Jordan, went thither from Comber, where he had done a nice little trade. In order to get business at Windsor he granted credit too freely, and now is compelled to assign.

A MONTREAL dry goods jobber, Henri Duverger, is reported as suspended, and a statement of his affairs is being prepared. Liabilities direct are calculated at about $21,000; indirect, $33,000. It is expected an offer of compromise will be made.

HARRIS & STEWART, dry goods dealers, Charlottetown, P.E.I., are in embarrassed circumstances, and their principal creditors, a Montreal firm, have taken possession of the stock under a bill of sale, and will wind up the business. The liabilities are about $27,000.

T. B. HILL, who manages the general store of Hill & Co., Lumsden, Man., has assigned. ——So, too, have J. & W. Dick, general dealers at Findlay, Man. Nearly two years ago they came from Glasgow, Scotland, where they had been associated with their father as bankers.

THE harness business of Wm. Davison, New Westminster, B.C., has been closed by the mortgagee. About a month ago a banker obtained a judgment against Davison for $4,398. ——The Vancouver Drug Co. is in trouble, and the manager, J. F. Rolls, is reported absent. Formerly he became involved in Winnipeg through real estate speculation.

T. B. DE GROSBOIS, a farmer of Boucherville, Que., at one time reported quite well to do, has for several years past been transacting quite an extensive business in lumber, but apparently without much profit, as a demand of assignment has been made upon him.——C. Richard & Co., of Three Rivers, manufacturers in a limited way of moccasins, are reported failed.——Napoleon Pelletier, baker, of St. Louise, is reported to be compromising at 50 cents.

A SHOEMAKER of Renfrew, Ont., Alphonse Landreau, who has been doing a small grocery business for the past eight or ten years, has made an assignment of his estate.

A COMPANY has offered to the corporation of Levis to establish a system of waterworks and drainage for the town, and also to illuminate the streets by electricity. After twenty-five years, the town council will have the right to purchase the property.

THE Granby correspondent of the St. John's *News* says that A. Monty, late of the firm of Messrs. Mitchell Monty & Co., has bought the entire plane works of G. F. Payne, including the Dalpé factory, and the plant of the one at this place, which he will remove to Roxton Pond. A. Monty, of the firm of Messrs. Mitchell Monty & Co., has sold his interest and good-will to N. Mitchell.

IT is stated by the Sherbrooke *Gazette* that M. J. Smith, store keeper, Lake Megantic who is giving up business in favor of G. H. Kerr, auctions the balance of his stock this week.——According to the same paper, D. G. McKenzie has bought out his partner, Mr. Gendreau, at Echo Vale, Lake Megantic, and will carry on a grocery and provision business in his own name.

HENRY COHEN, furniture dealer in Toronto, operated considerably in real estate some years ago. Now he finds himself "loaded to the chin" with land. Lately he has raised all the money he possibly could on mortgages, and sold his dwelling and furniture. Next he assigns.——The stock and book debts of W. H. Bleasdell & Co., wholesale fancy goods here, has been sold to John Riach, Hamilton, at 51 per cent.

TWELVE years ago the Weston Woolen Mills Company, limited, was incorporated with a nominal capital of $250,000; of this $175,000 has been paid. Much dissatisfaction has been expressed of late in regard to the management of the concern, and some changes therein were made. Still the company has become involved, and yesterday a meeting of its creditors was held, when a statement was presented, showing nominal assets of $244,923, being an apparent surplus of $87,241 over liabilities. This is about the amount of its real estate. The direct liabilities are $45,267.

A FIRE at Goderich on April 4th, which began from the furnace in Armstrong & Co.'s general store, destroyed those premises and millinery store next door, the Grand Opera House and the book and stationery store of D. B. Calbick. In addition the dry goods store of James Robinson was completely gutted, the larger portion of the goods having, however, been removed. The total loss is estimated at $30,000.

MR. FRASER has given notice in the Sherbrooke council that at the next session he will introduce a by-law to grant $500 in aid of the Free Library and Reading Room, instead of $200 now given by the city. The books and equipments of this institution have been provided by subscriptions and donations, and the amount proposed in Mr. Fraser's by-law is necessary for its maintenance and continued efficiency.

A PROPOSITION has been made by Jardine & Co., wholesale and retail grocers, St. John, N.B., whose suspension was noted, to pay 20 cents in the dollar, cash, or 25 cents on time. The direct liabilities are $50,063, the larger proportion due to the estate of Alex. Jardine and a brother; indirect obligations are $5,400, and assets figure at $23,142.——J. S. May & Son, one of the oldest established tailoring concerns of the same city, are also reported in difficulties, and to be offering 40 cents in the dollar. Liabilities are estimated at $4,000 to $5,000.

ON Friday last the chief of police raided the premises of Baldwin Bros., St. John N.B., who kept what is called a bucket shop, seizing all the furniture, including the safe, the telegraph outfit, blackboards, etc. He also arrested the manager, the telegraph operator, and a prominent citizen, who happened to be the only customer then present. Bail was furnished, but the police still retain the property they seized. The complaint made to the police that the establishment was a "bucket shop," and therefore immoral, is said to be one of the fruits of the religious revival recently promoted in St. John by Evangelists Crossley and Hunter.

Dun's Review says that commercial failures in the first quarter of 1895 in the United States numbered 3,802, with liabilities of $47,818,683. Of these 651 were of manufacturing concerns, with liabilities of $20,223,991, averaging $30,000 each, while 3,107 were of trading concerns, with liabilities of $25,979,894, averaging about $8,000 each. The decrease in number of commercial failures compared with the first quarter of last year is but 11.7 per cent., while the decrease in

liabilities is $16,300,000, or 25.4 per cent., about 30 per cent. in manufacturing and 20 per cent in trading. There were also 35 bank failures during the quarter, with liabilities of $12,682,587, or $360,000 each, against only $3,428,000 in three months of 1894.

THE finished iron trade in France, says the *Iron and Steel Trades Journal*, shows very little tendency to recover from the depression which has hung over it for so long a time past. In the north some of the more favored rolled iron makers are running their machinery with something like regularity, but the majority of producers are very short of work. Steel makers in the Loire experience difficulty in running their plants regularly, and at nearly all the works the number of hands has been reduced. Orders are invariably confined to very small lots.

A NEW mining corporation, with a capital of $250,000, and entitled the Montreal Hydraulic Gold Mining Company, of Cariboo, Ltd., has been formed to take over the mineral properties, claims and business of the Montreal and British Columbia Prospecting and Promoting Company, Ltd., Cariboo being the chief field of operations. The head offices of the new company are to be at Vancouver, and the provisional trustees are P. A. Paterson and John Kennedy, of Montreal; F. C. Innes, J. M. Browning, and S. O. Richards, of Vancouver.

BEFORE the French Chambre de Commerce in Montreal, last week, M. J. X. Perrault argued strongly in favor of a direct line with France. Messrs. L. E. Morin, jr., Hon. A. Desjardins and Mr. J. D. Rolland opposed the scheme of a direct line, thinking that the steamers should stop at intermediate ports. A motion by M. Perrault, asking the Federal Government to vote a subsidy to a direct line, was referred to a special committee to report on. We trust the Government will hesitate before subsidizing any more lines of steamers to France. They have done little or nothing for our trade.

MONTREAL furnishes the following failures to the weekly list: L. A. Dansereau, a manufacturer of confectionery in a small way, has been asked to assign. He failed before in 1890.——Rose & Frere, grocers, have assigned on demand; they owe $3,097.——Louis Plamondon, cigars and tobacco, is offering 25 per cent. on liabilities of $2,517.——The liabilities of J. Ross, Son & Co., manufacturers of insulated wire, are $12,543 ——P. Seguin, grocer, has assigned, owing $1,400 ——J. R. Labelle & Co., dealers in dry goods, formerly of Montreal city, and recently removed to the suburban municipality of St. Henri, have assigned. They seem to have been closely followed by ill luck for the last several years, having compromised at 60c. in 1892, and in January last were granted an extension

HOLMESVILLE, near Goderich, was where J. L. Courtice & Co. kept a general store, the senior of which has carried on business for many years, and at one time did a very snug trade. Lately the firm have had some reverses and now they make an assignment to F. H. Lamb, of Hamilton, owing $3,536, and having assets of $3,128. If they do not make an offer within a few days the estate will be wound up ——Three years ago, A. A. Roth left Toronto, and opened a tailor shop in Brantford. In February last he gave a chattel mortgage, and this has led to an assignment ——Stinson Bradley, dealer in fuel for a dozen years at Milton, also assigns. ——Alex. Hay, grocer at Wallaceburg, owes $1,100 and his premises have been closed under power of a chattel mortgage. Unsecured creditors need not expect a dividend

TORONTO, FRIDAY, APRIL 12, 1895.

THE SITUATION.

Now that the first session of the new Ontario Legislature is over, some idea of the part which the third party, the Patrons of Industry, are destined to play, may be formed. No great leader is likely to appear in their ranks, though they have themselves shown little of the wild aggressiveness that was feared. The actual leader, Mr. Haycock, showed a good share of shrewdness: he could not be entrapped into voting for catch motions, though the bait was dangled never so deftly. On the question of abolishing Government House the Patrons stuck to their colors, and on no question have they proved untrue to their promises. Except in voting power, their influence is scarcely felt. Their presence in the House has shown that, on certain questions, the two historical parties can unite, and when they do so they roll up majorities that make the Patrons look a small band. If the Conservatives had, in the past, held firmly to their traditions, these accidental unions would have been more frequent; but for some years past they had walked in the ways of radicalism, without finding the unwonted paths lead to success. In the next House of Commons the Patrons will be found; and their presence may give occasion for the two old parties to join hands occasionally. On the tariff question their declared opinions will prevent their uniting. Mr. Laurier, if prudent, will be careful in dealing with the tariff while he is in opposition. When he gets into power his theoretical tariff opinions may stand somewhat in contrast with the policy which, as a practical statesman, he will find it convenient and necessary to pursue; and he may find it awkward if he gets irrevocably committed to an impossible programme on the question while in opposition.

Whether a loan to the Canadian sealers would be made by the British Government, in consequence of the delay in receiving the indemnity for the illegal seizures to which they were subjected by United States cruisers, a matter of conjecture for some time past, is now answered in the negative, by Mr. Sidney Buxton, Under Secretary of State for the Colonies. England was in no way responsible for the delay. If a loan there must be, it would more naturally come from the Canadian Government. Many of the claimants must be greatly inconvenienced by the delay in making the payment.

The answer of France to the enquiry of England regarding an alleged French expedition to the Upper Nile Valley is silent on the point on which the British public desires information. Instead of saying whether such an expedition had in fact been authorized, M. Hanotaux calls upon England to show what her own rights are in that region, by defining the limits of the sphere of her influence there. An answer which ignores the main point of the enquiry strengthens the suspicion that such an expedition was sent, if it does not change it into certainty. An answer in which silence is the chief element is not unnaturally regarded as a refusal of satisfaction; certainly it has not mended matters, and the relations between the two countries are more strained than before or than they have been at any time during the last decade.

Among the Newfoundland delegates and the Canadian negotiators, the opinion that terms of union can be arranged is said to have begun to prevail. At a banquet given to the delegates, Mr. Bond said there were assets to cover the whole debt of the island, which he put at about $10,000,000. There is, however, a question of the productiveness of these assets, and they will certainly involve further liabilities. The railway will be practically useless until it has been extended across the island, and such extension will require some millions more. The *Times* takes the ground that England would lose by the union of Canada and Newfoundland, but in what form the loss would come is left to imagination. There used to be an opinion that Newfoundland ought to be kept out of the union with Canada, on account of its convenience to England as a coaling station; but that objection was based on the notion that Confederation would prove to be the first step to independence. Development on the lines expected is not apparent, and the notion of independence, now in abeyance, is, in most minds, regarded as exploded.

A little reflection might have saved Sir Edward Harlan the trouble of asking whether the British Government had sent a commission to co-operate with the United States commission in connection with the Nicaragua Canal. The United States owes its right to send a commission to the fact that it is a contributory to the funds by which the work is to be achieved. For some time the only work for a commission will be to watch the progress of construction and prevent waste. England can have nothing to say in the matter till the work is achieved. When this stage is reached, she will not shirk the duty named in the words of Sir Edward Gray, of "taking measures to secure as favorable treatment for Great Britain as is accorded to other nations."

A bye-election in Haldimand is made to turn on the Manitoba school question; but as a member of the Government is pitted against a non-resident, the result may not indicate very clearly the direction of opinion. Very little excitement on the subject seems to have been created anywhere; in Manitoba this may rather indicate the depth of feeling than its absence. It is now alleged that the Manitoba Act, on which the decision of the Privy Council is based, had no reference to Separate schools. Of the four "bills of rights" which made their appearance, at different times, the one that formed the basis of the Manitoba Act, the contention is, contained no demand for Separate schools. Unless this is clearly established, the case of advocates of Separate schools is strong. Separate schools formed one of the compromises of the constitution, as slavery did in the United States. If they formed a condition on which Manitoba was admitted to the union, and the right of appeal to Ottawa was made the means of

enforcing a complaint that the minority has suffered some privation, the appeal would be a mockery unless it implied reparation. This conclusion, when this half of the question is considered alone, is inevitable; but when the question is asked, how is this to be reconciled to the fact that the very Act complained of has been declared by the same authority to be constitutional, we find ourselves in the presence of a problem insoluble by the ordinary modes of reasoning. At the same time, we dread to think of the possible consequences. Separate schools in Manitoba represent the disturbing element that slavery did in the Southern States, without, let us hope, a like disastrous result.

THE INCOME TAX IN THE STATES.

In the case brought to test the constitutionality of the Income Tax, the decision of the Supreme Court of the United States decides partly for and partly against. The net result is thought to be that about half the amount which the law ought to levy will be collectable, and the other half will have to be foregone. In other words, where it was expected to furnish $30,000,000, the Government will get about $15,000,000. Incomes derived from State and municipal bonds, the court was unanimous in deciding, are not taxable. That rents are not taxable, was decided by six against four judges. The grounds of the decision are that a tax on rents is a tax on land, and, being a direct tax, is, for Congress, unconstitutional. On other points the court divided equally, and, as there was no decision, the conclusion would seem to be that the law must take effect. There are no means of annulling it outside of Congress. A tax which one-half of the highest court in the land has declared unconstitutional, will not be borne without endless repining, and the division will infuse new vigor into the attempts to evade what the people who have to pay will have no difficulty in persuading themselves is unconstitutional. In some emergencies the decision of the court, so far as it has carried disallowance, might be attended with considerable inconvenience. In England, the income tax is an unfailing resource, as an emergency tax, to meet extraordinary demands. On one ground or another it has been resorted to the greater part of the time since the passing of the Reform Bill. If it has become an ordinary resource, it possesses in addition a latent extraordinary power that may be called forth on emergency. The United States, it is now shown, does not possess this extraordinary resource to the same extent, and it cannot be got without an alteration of the constitution.

THE TORONTO RAILWAY COMPANY MEETS A DECISIVE CHECK.

Public opinion, acting upon the Legislature, has, during the week, given a decisive check to the operations of the Toronto Railway gang. They had applied for a trolley charter for the London and Western Ontario line. The Railway Committee decided against them. To grant a new charter to men like Everett, who, as the Boodle investigation showed, count bribery and corruption among the means of their success, would have been giving opportunity to repeat the discreditable proceedings to which they resorted in Toronto. By this refusal these men's dream of controlling, by their peculiar methods, a scheme of Ontario trolley railways, outside of Toronto, has come to naught. We are sorry to be unable to congratulate the morning press of Toronto for contributing to this result, or for checking or exposing any of the doubtful proceedings of these people. Credit must be given to Mr. Bronson, Minister of Public Works, for the courage which he showed first in opposing their game, the throwing out of their bills being due to the stand he took, and next in speaking his mind about the inflation of the Toronto Railway stock, which has been exposed in THE MONETARY TIMES. Its promoters, he said, speaking of the railway, "put sufficient money into it to pay off the $600,000 which formed the bonded indebtedness of the old company, and then they sold to themselves as a company stock to the extent of $6,000,000; so that they acquired $6,000,000 of property for which they paid [or rather assumed the payment of] $600,000." "Such things," the emphatic conclusion of the Minister of the Crown is, "ought not to be permitted." The law under which this was done, if the act shall be found to have authority of law, imperatively requires amendment, so as to prevent a repetition of the wrong.

The question to which an answer is required is this: Is there no means by which the water can be squeezed out of the stock? Mr. Bronson apparently fears that there is not. The Attorney-General will answer that question with the authority of his office when he replies to the application of Mr. Edward Trout for liberty to use the name of that functionary as a means of getting a judicial decision of the point. Mr. Gibson has stated in the House that the company had power to increase the stock, but the question remains: Can a *bona fide* increase of capital be made by taking a pen and changing $1,000,000 into $6,000,000? The statement has been made by a morning journal, on behalf of the company, that all necessary formalities have been complied with. The formality without the actual capital would be nothing but a sham. Mr. Trout might have sought to set aside the charter on grounds disclosed at the "Boodle" investigation, lame and halting though it was, but he did not, and does not, desire to go beyond the separating of the false capital from the real; that being sufficient for the protection of the public. Mr. Bronson fears that "the people of Toronto would be taxed to pay dividends on this immense capitalization." The people who will be taxed most heavily will be the holders of any stock in excess of the value of the road when the company's lease expires. By no possible process can the company continuously pay dividends equal to the ordinary interest on money on all the false capital which the stock represents, or anything approaching to it.

In swelling the amount of stock of the Toronto Railway Company to $6,000,000, it is perhaps not impossible that the letter of the law might be quoted as a cover. If this can be done, so much the worse. Wrongs done under color of law are sometimes more dangerous than they would have been if perpetrated in open breach of it. The wrong, in this case, takes the form of an excessive issue of stock; the excess may possibly not constitute what would legally pass for an over-issue or issue for which no authority or color of law could be found. The company went to the legislature asking authority to issue $1,000,000 stock, and that the shares might be treated as paid up for the purpose of serving for "payment for or an account of" certain rights which they were acquiring. These privileges were granted. It is fair to assume that the legislature would understand that this was the sum of the capital required for the purpose named. Under a general statute relating to railway companies, provision is made for increasing the capital of a trolley company. But a company would not be expected to increase its capital immediately after the amount had been fixed at a specified sum. If it did increase the capital, as soon as it had got an act of incorporation, the legislature would have ground to complain that deception had been practised. The increase, to be justified, should be made only to meet additional engagements. An increase from $1,000,000 to

$6,000,000 reminds us of Jack Tar's five-water grog. The dilution was in Jack's favor, but not in that of the purchasers of stock. What had happened, we will not say to justify, but to serve as a pretext for this enormous inflation? The company puts down the "cost of road and equipment, including real estate and buildings, at $8,774,070.39." How much of this was paid for the "rights" in question? It is obvious that, to reach this figure, the shares were put at a few cents in the dollar, possibly somewhere from 20 to 30 cents. If the property was overvalued, as it plainly was, in terms, it comes to the same thing. The water is there, whether it come in by one channel or another. When the company acquired the rights in payment or on account of which it might issue paid-up shares, did it increase the stock to $6,000,000? It is important to know the date. When did this transaction take place? Was it not almost immediately after the company got the act of incorporation, in which the capital is stated at $1,000,000? Was it secretly intended that the one act should follow close upon the heels of the other? If so, the legislature has a right to complain that deception was practised upon it.

When the normal amount of the shares was increased to $6,000,000, what steps were taken to make the fac known to the public? Were possible purchasers duly advised of the fact, so that they might not be of the impression that they were getting a given part of one million, instead of only a part of six millions? Last year's report has been furtively made known to brokers to whom it was sent; but brokers are sellers of the stock; the public was looked to to buy. Had the public this means of information within reach? The facts emphasise the necessity of effective publicity in such cases.

Happily, in this country, there is no precedent for this flagrant abuse in the form of stock-watering. In the neighboring Republic the evil has reached such enormous dimensions as to threaten the safety of the whole fabric of commercial corporations. We do not desire any such unwholesome proceedings introduced here, whether it be done by adroit American operators or by our own people. If the danger be permitted to make its insidious way in this country unchecked, results the most calamitous may follow; but if the evil be met with firmness and courage, at the outset, it may be stamped out, once for all.

GOLD MINNIG IN CANADA.

There has been of late a marked disposition on the part of investors, both in London and Paris, to put money into gold mines. The shares of gold mining companies in West Australia and in South Africa have had extraordinary vogue in both the English and French markets thus far this year. And the business of gold mining has on the whole received a decided impulse. It is by no means unlikely that Canadian gold fields will benefit from the general attraction of capital towards this industry. We know that British Columbia gold properties have deservedly drawn attention of late, and that some of them are very promising. And the Canadian *Mining Review* is informed, on good authority, that British capital is now investigating Nova Scotia's resources in the line of low grade gold ores. Quebec, however, is receiving no attention in this direction just at present. As the *Review* points out, "Much fruitless (because ignorant and incompetent and misdirected) work was done in the valley of the Chaudiere and tributaries some twenty to thirty years ago; yet hardly fruitless either, as the report of Mr. Obalski, Government Inspector of Mines, shows that over $2,000,000 has been obtained from a very small area in the district mentioned." What is needed, it is urged, for the development of Quebec's gold industry, is the examination of her gold fields, from an economic point of view, by a thoroughly practical as well as scientific mining engineer.

There remain to be mentioned the gold fields of Ontario, and while our contemporary admits that this province is not so much in need of good advice in this industry as Quebec, it pronounces our gold fields young, as regards Rainy River and Lake of the Woods, and refractory with respect to Marmora and Madoc.

Writing in April, 1894, Mr. Archibald Blue, director of the Bureau of Mines for Ontario, stated that the prospect of gold mining in the province had greatly improved and that there was promise of increased activity. The report itself declares, page 11, that men among us believe that modern equipment and new modes of treating may result in profit on properties not hitherto successful. The Rainy Lake discoveries of 1893 are mentioned, and around Lake Wahnapitae ores of much promise will (page 19), if the samples indicate the general character of the ore, "merit and reward the attention of the gold seekers."

But not to go so far afield as either of these places, a dozen pages of the report are devoted to the gold mines of the Madoc and Marmora region, back of Belleville. From these pages we have elsewhere condensed a description of two or three properties in this region, showing the quantity of gold taken out. Respecting the quartz veins that characterize part of Marmora and Belmont townships different reports, says Mr. Blue, concur in the opinion that the veins are true lodes, that the cost of mining and milling the ore should not exceed $4 per ton, and that an average yield of $10 per ton should realize a good profit.

Now if, as stated in their 1894 reports, a gold mine in Mexico, the "Alaska," could pay a dividend out of ore yielding $3.21 per ton; if the Harqua Hala mine in Arizona paid ten per cent. out of ore worth $6.84 per ton; if the Treadwell mine in Alaska [which up to November, 1893, had produced $3,888,000 in gold] declares annual dividends of nine per cent., while its average yield in gold is only $3 per ton and 2 per cent. sulphurets, surely these central Ontario properties, with a larger yield, so much more convenient to work, and with cheaper labor and cheaper transportation than those remote mines, ought by the use of modern methods of extraction to yield a handsome return.

MISREPRESENTATION IN LIFE ASSURANCE.

A case of no little importance has just been decided at the Hamilton assizes by Judge Ferguson and a jury. It is that of David Blackley, official assignee, etc., Hamilton, against the Great West Life Assurance Company for $10,000 assurance upon the life of the late John Alexander Taylor, of Toronto, the company having cancelled the policy by reason of misrepresentation of habits of deceased in the application. The verdict, after a four days trial, is entirely in favor of the company, whose course appears to have been fully justified.

In August, 1892, Taylor made application for a policy of assurance in the defendant company for ten thousand dollars, with loss payable to Blackley (who it appears was a brother-in-law) as a creditor. This application stated, in reply to a question as to drinking habits, that Taylor had been "for several years a total abstainer and never drank to excess." This was proved to have been untrue. In the family record, as disclosed in the application, it was stated that the applicant had "one brother living in good health, two sisters died under two years of age of infantile diseases."

About six months after the issue of the policy the

company notified both Taylor and Blackley that on account of their discovery of material misstatements in the application, the policy was void. Taylor died some three months after this notice was given, and a claim for the amount of his policy was made by Blackley.

The trial came on at Hamilton, and lasted four days, Mr. Aylesworth being counsel for plaintiff, and Mr. B. B. Osler for defendant company. About twenty witnesses were examined as to the habits of deceased and as to the family record. It was decided to submit questions to be answered by the jury. These, with the replies made by the jury, were as follows:

QUESTIONS FOR THE JURY.

1.—The 10th question in the application is: "To what extent do you use wines, spirits or malt liquor?" The answer is, "None." Was this answer true or false? Answer—True. Was the answer material to the contract or not? Answer—Material.

2.—The 11th question is: "Former habits of drinking wine, spirits or malt liquor?" The answer is: "For several years past a total abstainer and never to excess." Was this answer true or false? Answer—Untrue. Was this answer material to the contract or not? Answer—Material.

3.—In "Family record" a statement is made respecting deceased sister—which is "Two sisters died of some form of croup under two years; one sister died under two from some infantile disease." Was this true or false? Answer—Untrue. Did the statement set forth the whole truth on the subject? Answer—No. Was there any concealment in making this statement? Answer—Yes. What was the concealment, if any? Answer—Death of two sisters. Was the concealment, if any, material to the risk? Answer—Yes. Was this statement material to the contract or not? Answer—Yes.

4.—Did the sister Susan die of consumption. Answer—We cannot agree. Was the non-disclosure of the death material to the risk? Answer—Yes.

5.—Of which disease did the sister, Mrs. Jones, die? Answer—Not proven. Was the non-disclosure of her death material to the risk? Answer—Yes.

6—Were the contents of the letters from Cromar to Murdoch of 18th and 21st November, 1893, communicated to the plaintiff? Answer—Yes.

The judge's charge appeared to indicate the opinion that the company had been misled and that they were justified in resisting the claim. The answers of the jury to the questions submitted are in all respects favorable to the company, and their unanimous verdict in favor of the defendant clearly upheld the refusal to pay the claim. Indeed, it is difficult to understand what grounds Blackley had in justice on which to base an expectation of getting his claim. He not only does not get it, but will have to pay the costs of the trial.

The Great West Life Company has won a signal victory for the guild of life assurance in this case, and deserves congratulation for the firmness of its course. It is well that people should be taught that policy-holders cannot depend upon procuring life indemnity by false pretences, as has, we fear, been only too often done already. We trust it may have an effect in favor of truth-telling in life applications. The verdict of this Ontario jury upholds the right of an insurance company to cancel a policy where there has been misrepresentation by the holder regarding habits or hereditary disease, and that says it may keep the money paid for premium.

MUNICIPAL FIRE INSURANCE.

Since our last article on this subject was written, the bill which was intended for the perusal of the Ontario Legislature has been withdrawn. The fact is satisfactory; and we are not sorry to think that the arguments of this journal have had something to do with the withdrawal. While, however, the immediate danger of the passage of such a measure is past, the pernicious idea that civic indemnity for fires is a proper and safe system has, we fear, found lodgment in the minds of not a few, and it is well to persist in the attempt to eradicate it. The force of an instance given in our last, viz., the Agricultural of Watertown, is rendered greater by a fact of which we are reminded by a communication under date of 8th inst. Our informant says:

"You might have gone further in your illustration of last week. The Agricultural of Watertown, which entered Canada in 1870, sold out to the Canada Agricultural in 1876. It came back two years after the latter date and reinsured the risks of both the Canada and the Ottawa Agricultural, which had devoted themselves unsuccessfully to insuring farm risks alone. Both these concerns paid the Watertown large sums for reinsuring their risks, *in one case between* $60,000 and $70,000, and both of them failed, so that the proprietors of these companies paid sweetly for their experience in isolated risk insurance. After sixteen years further effort to make a profit out of that department of its business, the carefully and economically conducted Watertown company gives it up. What better proof can be adduced that they have attempted the impossible?"

Among the letters sent to this office on the subject one contains the following reminders of the havoc wrought by fire in Canadian villages and towns. It is written by a gentleman who has made a record of serious fires: "The following places have suffered severely enough to be crushing if they were under civic insurance, namely, Lindsay, Orangeville, Gravenhurst, Bradford, Collingwood, Meaford, Huntsville, Port Perry (twice), Trenton (never thoroughly swept), but had so many and large fires as to entitle it to a place." Within a few days Summerside, P.E. Island, and Goderich, Ontario, have experienced fires of $40,000 and $25,000 loss, respectively. Quite enough to sicken these places of civic insurance if such sums had to be made good out of their taxes.

IMPROVEMENT IN TRADE.

After so long a period of dullness and depression in nearly every description of business, it is gratifying to find signs of improvement in the conditions of trade in many directions. Sir Albert Rollit, president of the Associated Chambers of Commerce of the United Kingdom, in his address to that body in London last month, laid before his audience proofs, gathered from many financiers, manufacturers and merchants, of the substantial amendment in the commerce of Great Britain. And the official statistics for the first quarter of the year reflect the improvement, faintly, it is true, but perceptibly. Leading American trade journals testify to the gradual betterment of trade in the United States. Cotton and woolen goods are finding an increased demand at advancing prices; leather and leather manufactures show marked activity, the lumber trade is looking up, iron production is enormously enlarged, and employers of labor in various trades are beginning to advance wages and to stiffen their back-bones as to prices of their product.

In Canada, while the delayed opening of navigation by reason of the prolonged winter hinders spring trade, there are here and there signs of improvement. The returns of telegraphic traffic are not a bad index of the commercial movement, and we find from the statements of the Great North Western Company that its business for January showed a slight improvement over the very dull January of 1894, that of February a still greater increase, while in March, though the returns are incomplete, the figures at a number of points, especially in Ontario, are encouraging. A comparison of bank clearings for thirteen weeks up to the end of March shows an aggregate of $235,097,000 in 1895, as against $224,874,000 in same period of 1894. A turn for the better in prices has come in a number of articles, as was shown last week; the movement in dry goods is fairly active; the feeling in both wool and leather is strong, and altogether there is a good deal in the situation to warrant hopefulness.

TORONTO TRADE FIGURES.

According to the bulletin of the Board of Trade the imports at Toronto for March, 1895, were of the value of $1,708,606, namely, dutiable goods, $1,288,585 ; free goods, $397,845 ; coin and bullion, $17,226, and the total exports, $373,657. In the same month of the previous year the figures were: Dutiable goods, $1,105,784 ; free goods, $393,175 ; coin and bullion, $16,571 ; total, $1,515,530, and the exports, $249,241. There is thus a difference of $312,592 in favor of March, 1895, in the aggregate outward and inward trade. We append our customary comparison of the chief items of imports :—

DUTIABLE IMPORTS.

	March, 1895.	March, 1894.
Cotton, and manufactures	$160,857	$111,037
Fancy goods	60,697	21,149
Hats, caps and bonnets	50,861	48,636
Silk, and manufactures of	75,726	62,252
Woolen manufactures	226,187	209,119
Total dry goods	$574,328	$452,193
Brass and manufactures of	$27,571	$6,152
Copper, "	552	1,020
Iron and steel "	100,065	83,752
Lead, "	10,740	7,171
Metals and composition	9,392	8,531
Total metal goods	$148,320	$106,626
Books and pamphlets	27,571	31,768
Bicycles	22,261	27,396
Coal, bituminous	16,406	18,344
" anthracite (free)	96,832	84,089
Drugs and medicines	15,067	19,100
Earthen, stone and chinaware	16,905	15,246
Fruits, green and dried	31,970	26,332
Furs and fur skins	18,412	26,745
Glass and glassware	16,395	13,857
Jewellery and watches	23,199	14,939
Leather and m'frs of	9,825	18,970
Musical instruments	12,367	10,289
Paints and colors	6,329	9,181
Paper and manufactures of	29,857	22,214
Spirits and wines	5,502	21,628
Wood and manufactures of	9,678	14,674

The list gives twenty or thirty items of free goods imported. We compare half a dozen of the chief of these.

FREE IMPORTS

	March, 1895.	March, 1894.
Coal, anthracite	$96,832	$84,089
Coffee	12,077	12,424
Dyes, chemicals, &c	18,323	23,694
Hides and skins	56,758	74,595
Metal goods	22,476	44,405
Sisal and Manilla hemp	14,213	1,629
Tea	31,473	19,747
Wool, &c	19,347	19,259

It may perhaps be taken as an indication of confidence in a brisker trade that our importers have bought more largely than they did in March, 1894, of all descriptions of dry goods, of metal wares, jewellery, musical instruments, and that our manufacturers appear to have laid in a larger stock of coal for fuel.

EXPORTS OF CANADIAN PRODUCE.

Produce of	March, 1895.	March, 1894.
The Mine	$ 21	$ .....
" Fisheries	1,093	231
" Forest	5,319	3,605
" Field	115,983	62,247
Animals, and their product	146,372	125,034
Manufactures	104,869	58,124
Total	$373,657	$249,241

The increased exports of last month are mainly in the shape of dairy products, dead meats, wool, beans, peas, green fruits and other articles farmers raise, besides unspecified manufactures.

THE BRITISH TELEGRAPH SYSTEM.

On a recent occasion Mr. Arnold Morley, the British Postmaster General, reviewed the growth of postal and telegraphic communication during the reign of Queen Victoria. In the course of his remarks it was stated that Mr. Greville, who was living in Paris in 1836, wrote in his diary that the speech of the British King had been delivered in Paris within 29 hours from its delivery in London, "a rate of transmission," Greville adds, "almost incredible." The manner in which things have changed is illustrated by the number of minutes, instead of hours, now taken to transmit such intelligence.

In an article celebrating the twenty-fifth anniversary of the taking over by the Government of the various telegraph lines in the United Kingdom, the London *Graphic* presents the portraits of three principal functionaries of the telegraph branch of the British postal service. These are W. H. Preece, F.R.S., engineer-in-chief and electrician ; Mr. H. C. Fischer, director of telegraphs, and Mr. J. C. Lamb, assistant secretary. The article presents a statistical comparison of the business done by wire in 1870 and in 1894 respectively. In 1870, when Mr. H. C. Fischer took the directorship of telegraphs at the central office, London, the number of telegrams, whether press, inland or foreign, which were sent over the wires of all the companies in the United Kingdom, which the Government then took over, was 6,830,000 annually. In the year 1894 the number reached 71,465,000, nearly twelve times as many.

And the extent of the lines has increased in the twenty-five years from 59,430 miles to 246,000 miles of wire ; the instruments from 670 to 8,500 in number. At the earlier period seventy to eighty words per minute was a rapid rate of transmission. But to-day there are, says the *Graphic* article, "Wheatstone multiplex instruments now at the central office in Aldersgate street, which will flash a message at the rate of 600 words a minute, which is more than twice as fast as any human being can speak and four times as fast as the most rapid of our public speakers."

As to the reduction in the cost, which is a matter of very practical interest, in 1870 the average cost to the public of a telegram was 2s. 2d., where now it is reduced to 7¾d. If we take the private messages as averaging 15 words a telegram—which at 7¾d. is about its average—and add to it the average number of words sent as news, we find that over 800,000,000 words pass over wires of the Central Telegraph Office in a year. The cost of wiring to the continent is likewise greatly lessened. It used to be 12 shillings to Italy, 6 shillings to Austria, and the lowest charge to France 4 shillings. Now the charge is 2d. to 8d. per word ; minimum charge 10d.

Over fifty per cent. of the telegraphic business of the country passes through the Central Telegraph Office at St. Martins-le-Grand, in London. And this is claimed to be "the largest and best-conducted establishment of the kind in the world." The number of employees required to handle this business exhibits, naturally, an increase commensurate with its growth. In 1870 the staff numbered less than 500. To-day it is more than 3,000, or, including messengers, &c., nearly 4,000. The extent of premises required to house this enormous staff may be inferred from the figures.

PROPOSED ONTARIO LEGISLATION

The following very desirable provision is suggested : Registrars of deeds to be required annually to transmit to the clerk of the municipality, a statement showing the land transfers during the preceding year, with the name of the grantor and grantee, and the price at which the lands were sold. In this way there can be no question about who is the owner of the land or what its proper value is.

It is proposed to have mortgages and sales of personal property registered where the trader or other person purchasing or mortgaging resides, not as now where the goods are situate, the result of this being that the trader or other person will have his credit affected, if it is to be affected by the records in the place where he resides and where he may for the time being happen to have the goods stored.

The Attorney-General has introduced a bill, providing that in the

case of every man who shall hereafter die without a will, leaving a widow but no children, and an estate the net value of which does not exceed $1,000, his estate shall belong absolutely and exclusively to the widow. If the net value of his estate exceeds $1,000 the widow is to have at least $1,000, and to have a charge or lien upon the estate therefor.

Another bill makes provisions for paying to working men employed by the Government of Ontario, or contractors employed by the said Government, wages according to such scale or schedule as the unions of the various working men shall adopt. This might soon land the province in bankruptcy.

A Bureau of Industries is to be attached to the Department of Agriculture for collecting, tabulating and publishing industrial information for public purposes. The Minister is to institute enquiries and collect useful facts relating to agriculture and other industries of the province, and to adopt measures for disseminating the same in such a way as he will find best adapted to promote improvement within the province. Amongst other things he is to procure and publish early information relating to the supply of grain, breadstuffs and live stock in the other provinces of the Dominion, in Great Britain, and in the United States and other foreign countries, in which the province finds a market for its surplus productions, and as to the demand therefor, and before the first of May in each year publish and distribute for the use of the members of the Legislature a general report and tabular abstract for the preceding year, made up of information gathered from the officers of all societies and associations organized for the purpose of collecting and tabulating facts according to instructions on all questions submitted to them.

The Free Libraries and Mechanics' Institutes Acts are to be consolidated, so are the Acts relating to Agriculture and Arts.

DAWN OF BETTER THINGS IN LEATHER.

Depression has ruled so long in the leather trade, that it appears strange to report advanced prices in the commodity which tanners produce. For months the tanner has been squeezed between the hide merchant and the boot and shoe manufacturer.

While the Canadian market is subject to local influences, in the main, its course is determined by Chicago. The world over the price of hides must be gauged by the number of beeves brought to the market. The following figures of receipts at three great cattle centres of the United States constitute the whole secret of the advancing hide markets. The dates included in the comparison are the first three months of the last four years:

	1895.	1894.	1893.	1892.
Chicago.....	575,000	692,125	768,338	824,861
Kansas City.....	325,000	376,745	307,520	253,197
South Omaha	120,000	181,950	225,081	174,866

As compared with last year, there is, it will be seen, a shortage during three months of 227,000 head, while a greater decrease is shown in a comparison with the two previous years. American dealers have found it profitable to visit this market, and frequent inroads have been made upon our supplies. The dirty, grubby hides of April are selling in Toronto points ahead of September prices, as the following quotations on the Toronto market indicate:

Hides,	Sept. 21, 1894.	April 11, 1895.
Cows, green	3½c.	5¼c.
Steers, 60 to 90 lbs.	4c.	5¾c.
Cured and inspected	4½c.	6½c.

There is food for reflection in these figures. If the tanner had been strong enough to pass the burden on to the manufacturer and from the manufacturer to the jobber, resting finally on the consumer, all would have been well. But, in the opinion of the manufacturer, the public was neither willing nor able to bear the burden of higher prices, and from fear that they might themselves be called upon to take the tanners' thankless place, they refused to consider an advance in leather. There were but two things that could happen, the vats must remain unfilled or tanners must go out of business. Both of these events took place. Many of the weaker members of the craft wer compelled to close their tanneries, while those who remained in business, with scarcely an exception, have curtailed their output.

Remunerative prices for leather were a long time coming, but their arrival is almost, if not quite, at hand. Slaughter sole is being firmly held for a 10 per cent. advance, while Spanish, too, can be purchased only at higher prices. Holders of buff, splits and pebble grain are all asking more money for their stock. A merchant who made a large shipment of splits to England several weeks ago estimates that he lost nearly $1,000 a car by the transaction in a comparison of the 15 cents received with the 20 cents he might have obtained by holding to the present time. The pleasing aspect in the situation is the fact that manufacturers have been converted to the new order of things.

"A Quebec manufacturer of considerable prominence advises his Toronto representative of the following advances in the present price list: women and men's buff, splits, pebble grain, five cents per pair; boys and misses', three cents per pair; children's, two cents per pair." This is not an enormous increase, but it indicates the times. Manufacturers realize that prices must go up, although excessive competition has made everyone afraid to take the first steps in this direction.

CANADA LIFE ASSURANCE COMPANY.

The latest report of the Canada Life Assurance Company makes an exhibit of progress and satisfactory results to policy-holders of which any company might be proud. Not only was the new business of 1894 larger than the previous year—it was in fact the largest the company had ever done—not only was there an increase in total insurance and total income, but the aggregate of death claims and endowments was considerably less than in 1893 or in 1892. When a company has reached the point that its death claims can be paid out of its receipts for interest, the strength of its position is indubitable. And as to return to policy-holders, the distribution at the end of a quinquennial period of so large a sum as $2,168,000 of the surplus to them—95 per cent. of the whole sum available for distribution, in fact—must be received with lively satisfaction, since it means $20 per $1,000 per annum addition to ordinary policies, and at the rate of $22.50 per $1,000 for endowment policies. This portion for distribution would have been $3,011,000 on a 4½ per cent basis, but the company, having a prudent regard for the future, reduces the basis of calculating earnings to 4 per cent., necessitating the laying aside of $872,000 additional reserve. And at this rate the company's surplus is now $13,075,777. The cash profits on ordinary policies are practically as good as at the previous division, notwithstanding the change of basis. To have been able to reduce to 4 per cent. and yet pay 2½ per cent. bonus on endowment policies and 2 per cent. on ordinary, is a tribute to the company's earning power and prudent husbandry.

The close of a five-year period made the meeting of the company last week a somewhat unusual occasion, and the president took advantage of it to review the career of the Canada Life in an interesting way. Since 1885 business in force has doubled, the assets and the annual income of the company have more than doubled. In 1894 the income exceeded $8,000 per day. The table of comparison for forty-five years shows a growth at first steady and of late remarkable; while the comparison of surplus given policy-holders in twenty-four years is, to say the least, instructive. Mr. Ramsay refers to the examination which has been going on for several years into the mortality experience of the Canada Life since 1847. We have been favored with a copy of it, on which we shall make some remark next week. But it may be said at once that this publication gives proof of very favorable mortality in the case of this company, which while it may be evidence of careful selection of lives, is doubtless proof also of the healthiness of our Canadian climate.

THE FAILURE LIST.

We have received from Messrs. R. G. Dun & Co. their quarterly tabulation of Canadian failures. It makes the number of failures for the first three months of the year 557 in number and $4,288,000 in amount. Particulars by provinces are below. We remark that the assets are put at 81 per cent. of the liabilities, rather an unusual percentage:—

1ST QUARTER, 1895.

Provinces.	No.	Liabilities.	Assets.
Ontario	276	$1,999,009	$1,603,832
Quebec	180	1,423,184	1,058,099
British Columbia	23	312,886	313,296
Nova Scotia	31	252,829	125,488
Manitoba	21	214,140	194,536
New Brunswick	23	37,997	85,055
P. E. Island	3	48,200	20,000
Total.....	557	$4,288,245	$3,478,406

ONTARIO GOLD.

The Belmont gold mine is in Belmont township, county of Peterboro, some ten miles distant from the village of Marmora. There is a wide band of diorite, and three gold-bearing veins in the diorite. This is the mine where Mr. H. T. Strickland, of Peterboro', discovered free gold while watering his horse in 1890. It has yielded, on a first test, according to Mr. Carscallen, $9.53 per ton of free gold, and an additional $2.95 per ton from concentrates. A shaft was sunk and a mill erected, and up to October, 1892, 1,000 tons ore had been mined. Since then another thousand or two has been taken out. Prof. Chapman, of University College, in his favorable report upon the property in 1893, says: "The result of the milling operations at the Belmont mine shows an average yield of at least $10 per ton of stuff passed through the mill." Tests of the ore by Ricketts & Banks, of New York, September, 1893, show "an average content of $9.98⅓ per ton," a result that is by no

means to be despised. One proprietor, or lessee, took out $1,000 worth of gold in a single season. Adjoining this mine, upon the south, is the Ledyard Mine, on lot 19, in 1st concession of Belmont. What the report calls "an important outcropping of magnetic iron ore," closely resembling in character the Swedish Dannemora ore, on the north part of this lot, has been leased to New York capitalists, and a railway track has been graded from this to the Central Ontario Railway. In exploring this property an auriferous quartz vein was discovered. At a depth of 45 feet this vein varies in width from four to six feet, and numerous assays of the ore show it to be rich. "Half a shot-bag full of small pieces of ore from all over the ore pile, showing no visible gold, was assayed by the Oxford Copper Company at Staten Island, and gave 4·7 ounces, or $94 per ton. Another assay by Dr. Hoffman showed the quartz to contain gold at the rate of 4.6 oz. per ton. Encouraged by these and other assays a company was formed in 1893 to work this mine, which has erected a mill building and a 8½-foot Huntington mill, with a 24-ton concentrator. There is besides now going up a new 5-foot Huntington mill, giving a joint crushing capacity of twenty tons per day, or more. The character of the ore hereabout being pretty fairly established by these assays, the quantity of it is the next question. This, according to reports of Ricketts & Banks and Professof Chapman as to the Belmont mine, and of F. S. Miller, M/E., as to the Ledyard mine, is abundant. Dr. Chapman says, respecting the Carscallen mine which adjoins the Ledyard mine: "With regard to the question of the permanency of gold throughout these veins, the very numerous tests already made, both by assays and mill treatment, would appear to establish the fact of a permanent supply of pay ore, and even if the yield of gold dropped to $7 or $8 per ton, a good profit should be realized." And the report of Mr. Miller on the other property expresses the opinion that "there is enough ore in sight to keep the present mill going for several years, and it is only a question of men, money, and power to open up and develop these and other rich veins which exist on the property."

ABUSE NOT CRITICISM.

We have received a circular signed by A. C. Camp, secretary of the Mutual Reserve Fund Life Association, deprecating an attack made upon that company, denying the truth of the charges made against it, and quoting in support of the Mutual Reserve the report made some months ago by four State superintendents of insurance Our readers know very well that we are neither supporters of the Mutual Reserve Fund Life nor admirers of its president, Mr. Harper. It does not become us, therefore, to become apologists for either. But if the Mutual Reserve is unjustly assailed—and it would seem to be so in the *N. Y. Herald* of April 2nd—its president may take comfort from the extraordinary and unseemly spectacle of two of the greatest and best-known companies in the United States quarreling after this fashion: A letter signed "B.," said to be written by a general agent of the New York Life Insurance Company, who lives in Boston, brings a charge against the Mutual Life Insurance Company of having falsified their 1894 statement, and adds: "I might say more, but what the hell's the use?" This last phrase is softened by quotation marks, and veiled in slang by being put into the mouth of a recent character in fiction. But the inuendo is plain: the management of the Mutual Life, if we are to believe this man, is dishonest—its statement untrustworthy! Such disgraceful anonymous attacks should be disavowed See to what lengths competition will carry men

AN ISLAND FIRE.

A letter of 2nd April from Charlottetown gives particulars of the fire which caused so serious a loss of property at Summerside, Prince Edward Island, on 30th March. The writer urges the necessity of better fire appliances and a better organized brigade for that place. He tells us that something went wrong with the steam fire engine during the progress of the fire of that Saturday, and that there was for a while great danger that the destruction of property would have been greater than it turned out to be. A hand engine, to which water was hauled, had much to do, it seems, with the staying of the flames. The letter does not state the property loss, but we learn from other sources that it was anywhere from $86,000 to $50,000, and the insurance loss probably $20,000

Early on Saturday morning fire was discovered in the office of the Summerside *Journal*. That building was soon aflame, and next John Sharp's store, owned by the Tryon Woolen Co., and R. C. McLeod's carriage warehouse. Spreading across the street the fire next attacked Capt D. McKinnon's grocery store and the McIntyre Hotel. All these buildings were levelled with the ground. Next came the turn of the neat brick office of the Bank of Nova Scotia, of which only the walls now remain. The ruins of the fire were still smouldering on Monday and even on Tuesday. So great was the heat that the plate glass of the Summerside Bank was cracked, while the front of the Clifton House Hotel was badly scorched.

The insurance losses were not accurately known at time of writing, but the Bank of Nova Scotia is understood to be fully covered by $4,000 in policies. W. A. Brennan, printer and binder, loses probably $16,000, insured for one-half A M Wright & Co have $700 insurance on oats burned; McKinnon, grocer, $600; John A. Gourlie, druggist, $3,000. George Muttart and Gourlie were owners of the McIntyre Hotel and have partial insurance. The Tryon Company have $700 insurance. Frank Perry has none, nor has McLeod any on his building. W. A. Stewart, tailor, suffered a small loss by removal. J. E. Wyatt and J. D. Reid are slight losers. This rude awakening will doubtless cause the people of Summerside to be more alive to the risks of fire and more careful in seeing that their fire appliances are kept *always* in good order.

A GREAT CITY AND A PAPER WORTHY OF IT

Ever since the days of the early fame of Artemus Ward, whose laugh-compelling oddities used to appear in its then weekly pages, we have preserved an interest in the Cleveland *Plain Dealer*. But this interest changed to wondering admiration upon receipt of a 36-page issue of that journal, now a prosperous daily. Of these 36 pages many are illustrated, for the present is termed a "Marine Edition," and is largely devoted to a historical and statistical sketch of the commerce of the great lakes. The theme is large enough to require a roomy newspaper, and important enough to justify the many weeks of preparation which we can well believe must have been expended on this most creditable publication

One hundred and seventeen columns of type and illustration are devoted to this sketch of lake trade, the lake cities, the lake marine, Chicago, Buffalo, Cleveland, Detroit—all these great emporiums are described, and of the later important points, Duluth, Marquette, the Sault, and a dozen other minor points on the chain of lakes, Cleveland is magnified, of course, as *the* lake port, the coming manufacturing point; but here are the facts and figures to back up the claim. Will Chicago or Pittsburg accept the *defi.*? By no means the least interesting portion of the issue is the cover, in two colors, with views of Cleveland harbor and the Detroit, Cleveland & Duluth steamers, as well as a colored map of the great lakes. The contrast presented by the pictures on neighboring pages of the first "*fire boat*" on Lake Erie, the little top-heavy cockleshell, "Walk-in-the-Water," that affrighted the Wyandot Indians of Detroit strait on an August day of 1818 [she was drawn by sturgeons, they declared], and the majestic steamer "North-West," fairly images forth the startling alterations of ninety years, in places, people, volume of traffic and modes of transit.

Such a compilation as this is too valuable not to have a more enduring form than that of a broad sheet. Mr. G. V. Callahan's paper on the Great Lakes, Mr. C. E Wheeler's eloquent paper on The Lake Front, showing much research; and indeed the mass of facts and statistics in this issue of the *Plain Dealer* deserve to be issued in book form. And we hereby bespeak the purchase of one of the first copies.

ANSWERS TO ENQUIRERS

H. L. J., Niagara Falls, Ont., sends the following enquiry

"What are the exact powers of an assignee?" and describes a case as under: "A firm assigned. Its debts amounted to $3,600; its book debts were $4,400. Of these $1,600 were collected, and partner No. 1 giving security, agreed to take all the responsibility of the debts, and secured the poperty. Partner No. 2, not being able to furnish security satisfactory to the creditors, the whole estate is delivered to partner No. 1, and partner No. 2 loses everything. An assignment was not going to be made, but the representative of a particular creditor made a promise, that if the estate were assigned to him it should not be sacrificed, but should be dealt with to secure the best interests of both creditors and estate, the assignment being made wholly in the interests of the creditors, to bar a creditor who wished to stand as a preferred creditor. Can the creditor, in the absence of an assignee, vote away a property at one-half its value, to the injury of the estate?"

[We reply, that in the absence of an assignment creditors have no control over a debtor's estate except by way of judgment and execution. Any disposal of the estate by one partner is invalid unless consented to by both partners, and an injunction would be granted by the court to prevent it. If all the creditors consent to the sale of the estate by one partner on terms satisfactory to both partners, there would be no one left to object. In this case partner 2 should prevent any dealing with the estate not on a fair business basis.—Ed. Mon. Times.]

Enquirer, Trenton, propounds the following enquiry "Would you kindly advise me on the following point Can a married man holding a life policy payable to himself, his executors, administrators and assigns, who assigns the same for benefit of wife and children, subse-

quently revoke such assignment without the consent of the assignees, or is the same irrevocable?"—[It appears to us that this case may be covered by sub-sec. 1, section 6 of chap. 136 Revised Statutes of Ontario, where it is provided that the insured may by an instrument in writing, etc., vary a policy or an apportionment previously made. Look up the law for yourself, however, or let your lawyer decide. Judge Armour's recent decision as to the effect of a will upon a life policy alters one's idea somewhat as to the meaning of this statute.—ED. MON. TIMES.]

FOR GROCERS AND PROVISION DEALERS.

Quebec grocery clerks hold periodical out-door demonstrations by way of encouraging the early-closing movement.

The Whitman fish drying establishment at Annapolis, N.S., has suspended work for a time, owing to the scarcity of fish.

The Canadian Department of Agriculture has received enquiries from C. H. White, of Washington, U.S., who says he purposes to start the cultivation of hops in Manitoba or the Northwest on a large scale.

During the years from 1882 to 1894, the fishermen of Lunenburg county, N.S., were paid fishing bounties to the extent of $235,000. The increase in that period was almost doubled, being $18,274 in 1882, and $35,318 in 1894.

There is either something very radically wrong with the fishery regulations of British Columbia, or some clever agitation is being done for political effect. The former would appear the most likely conclu sion, as the various reputable boards of trade in that province have from time to time asked for commissioners to investigate affairs.

At the annual general meeting of the Association of Wine and Liquor Merchants of Quebec the following gentlemen were elected officers for the current year: President, Elz. Dalaire; vice president, A. Grenier; treasurer, Elz. Paquet; secretary, P. L. Turgeon; assistant-secretary, F. X. Soucy. Committee of Management—Jos. Chateauvert, L. A. Boisvert, J. T. Donnelly, A. Cawford, sr., F. Bouret and Ed. Trudel.

Essex grape growers have not found the last several seasons profitable, and are attempting to organize a fruit exchange for the better disposal of their fruit. The movement is one worthy of encouragement from merchants. The distribution of fruit is very unequal; while some markets are glutted others are bare. With the injury to the native wine industry consequent upon the French Treaty, grape growers must turn increased attention to the local fruit markets.

Robert H. Lauder has been talking to the farmers of Leamington about the establishment of a beet root sugar factory. He proposed an establishment employing 300 hands four months in the year and 50 hands the year round. The factory would cost $350,000, and the farmers were to take $150,000 in shares, to be paid within six years. There would be a daily consumption of 500 tons of beets, requiring 3,500 acres of land to produce them. It was possible that a canning factory might be started in connection with the sugary

HARDWARE AND METAL TRADES.

The dairy station at Hillsboro, P.E.I., has contracted with Bruce Stewart & Co. for an engine and boiler.

We have received from Messrs. Bolling & Lowe, of Laurence, Pountney Hill, London, England, a catalogue descriptive of iron and steel sleepers, locomotives and rolling stock which they manufacture.

The hardware business at Melita, Man., formerly owned by J. Young, has been purchased by C. W. McLennan and Thos. Sturgeon, who have formed a partnership and will trade under the firm name of McLennan & Sturgeon.

The foreign coal shipments from Nanaimo for the month of March were as follows: New Vancouver Coal Co., 24,144 tons; Wellington, 20,377 tons; Union, 25,066 tons, showing an increase of 1,500 tons over the February shipments.

The New Glasgow firm of Fraser Bros. shipped last week an engine and hoisting gear to the New Glasgow Gold Mining Company, at Goldenville, N.S. The engine is on the tandem compound principle, and an air compressor is being built for the company by the Ingersoll Rock Drill Company at Montreal. The Fraser Bros. are at work fitting up the machinery for a crushing mill for the same company.

It is announced that the Kingston civic committee has closed with the Dominion Steel and Blast Furnace Company, of Youngstown, Ohio, for the erection of a blast furnace and steel plant at the city of Kingston. Terms have been agreed upon. The report will be approved by the council, and a by-law submitted to the electors asking for permission to raise by way of loan $250,000, the granting of exemption from taxation for ten years on a site to be given free for the works.

The oil market, says the *Topic*, April 4th, is stronger than ever. Last week Petrolea crude was quoted at $1.31, but it soon advanced 1½ cents and stayed at that figure all the week till yesterday. On Wednesday oil opened on 'Change at $1.33½ and closed at $1.34, with several hundred barrels sold at both figures. All the oil offered is easily sold, and things are looking quite roseate for the "poor, down trodden" producer, but not so nice for the refiners, who claim that they cannot afford to pay such a price with refined at its present price, and, for certain obvious reasons, the price of the latter cannot be advanced much at any rate

TRANSPORTATION NEWS.

Some years ago a company obtained a charter from the Nova Scotia Provincial Legislature to build a street railway in Truro. The time lapsed, and an extension of time lapsed. Yet nothing was done. A few days ago a bill was introduced by Mr. Wickwire, of Kings, for a further extension of time. This a number of the citizens of Truro oppose, and a public meeting passed a resolution in opposition to the grant of a charter in reference to the provisions in which Truro citizens had no voice.

—On Wednesday last, according to a St. John despatch of 5th inst., a meeting was to be held of the Colonial Iron and Coal Company, which proposes to erect a blast furnace at Carleton, N.B. The company, it is stated, has already secured coal areas in Queens county, and also has secured the right to build a railroad from the coal areas to Gibson, opposite Fredericton. The Central Railway is to build a line of railway from Chipman to the coal fields, about fifteen miles. Mr. Robert G. Leckie and some local people are associated in this enterprise with English and American capitalists. The works are to have a capacity of 100 tons pig iron per day.

—On this day week a meeting of the business men, citizens of Elora, was held in the Town-hall for the purpose of forming a board of trade. Much interest was manifested, and the result of the meeting was the organization of the Elora Board of Trade. The following officers were elected:—Honorary President, Mr. Charles Clarke; president, Mr. T. P. Smith; vice-president, Mr. Thomas E. Lipsey; secretary, Mr. E. Burns; treasurer, Mr. John Gibb. Messrs. Jas. Wells, S. Springer and F. Wissler, with the officers, will form the council.

—It is a satisfaction to hear occasionally—we certainly do not hear it too often—that an incendiary has been arrested and punished. Such unfeeling and dangerous scoundrels deserve the lash, for there is no knowing what suffering and loss of life as well as loss of property their fire-raising may cause. We observe that at the Montreal Court of Queen's Bench last week Sir Alexander Lacoste sentenced a barn burner, Camille Landry, whose guilt was well proven, to ten years in the penitentiary.

—The Government of New Brunswick, we learn from a St. John paper, has closed a negotiation with the Imperial Trusts Company for the sale of $150,000 of six per cent. bonds at a premium of 2.26. Of the amount issued $110,000 will be used toward retiring six per cent. bonds about maturing, and probably the remainder will be used in connection with the construction of steel bridges under authority of acts of the legislature.

—We are informed that at a recent meeting of the board of the London and Canadian Loan and Agency Co., Limited, Mr. Thomas Long was unanimously elected a director, in the room and stead of C. E. Hooper, lately deceased. Mr. Long is well known in financial circles, having large business interests both in Toronto and in Collingwood.

—Among the latest places to form a board of trade is Beamsville, in the rich fruit district of Lincoln. The gentlemen chosen officers are: C. E. Riggins, president; J. H. Beatty, vice-president; J. D. Bennett, treasurer; F. W. Barry, secretary. The council consists of William Hearle, sr., W. F. Tallman, A. H. Dodsworth, T. A. Simpson, and W. J. White.

—We learn that the cashier of the Merchants' Bank of Prince Edward Island, Mr. William McLean, who has occupied that position for twenty years at least, has resigned his post in consequence of health. His successor is Mr. J. Milton Davison.

—Having to go to press on Thursday, by reason of the Good Friday holiday, we are without the usual Clearing House returns for this week.

Correspondence.

FIRE LOSSES MONTREAL AND TORONTO.

Editor MONETARY TIMES

SIR,—In reference to a letter signed "Squib," which appeared in your paper of 22nd March, comparing the fire losses of Montreal and Toronto, and in which he is open to correction, I would like to draw the attention of Mr. Squib to the annual report of the chief of the Toronto fire department, which reads as follows:—

	Losses.
1892	$220,509 15
1893	195 403 67
1894	152,281 91

Total, $568,194 73, being nearly $30,000 below the average for the last nine years, which is $219,004.04

I think Mr. Squib should have added that the monthly reports, as published in the *Insurance Chronicle*, of Montreal, are, as I understand them, a summary of the larger losses for the general information of its readers, and are not to be taken as authentic.

And further, Mr. Squib did not inform us that the *Chronicle* does not report losses of under $1,000, which in Toronto are exceedingly numerous.

I quite agree with Mr. Squib that the "Big Village" had a unique record to the end of 1894, but where, oh where, are we now?

Yours, etc., Q. & C.

Meetings.

CANADA LIFE ASSURANCE COMPANY.

The annual meeting of the Canada Life Assurance Company was held in Hamilton on Monday, April 1st, when the following report was submitted to the meeting, which was largely attended:—

REPORT.

The past year, 1894, being the 48th of the company's history, and the termination of a quinquennial period, when the surplus of the five years falls to be ascertained and distributed to the policyholders, the occasion is of more than usual interest, and the directors are highly gratified in being able to present another record of that continued success which has attended the operations of the company.

The applications for assurance during 1894 were 3,678 for $8,259,501, of which 3,438 for $7,708,801 were accepted. The sum of $550,700 upon 240 lives, which the board did not consider it desirable to accept, were declined, and 246 for $495,744 not having been carried out, the new business of the year was $7,213,057 of assurances, under 3,192 policies, with a new premium income of $246,310.59. The year's addition to the business made the total amount of assurances and bonus additions $66,807,397.25, upon 22,696 lives, under 30,868 policies.

The total income of the year was $2,661,985.74.

The year's claims by deaths of assured, and by payments to assurers under endowment policies which matured during the year, amounted to $651,618.58, under 330 policies, upon 247 lives, and after payment of these and of all other outgoings, the assets of the company were increased to $15,607,728.49.

As was pointed out five years ago, the gradual fall in the rate of interest obtainable upon satisfactory investments made it prudent and desirable that a lower rate of interest should be assumed for the future than the 4½ per cent. upon which the legal reserves of life companies had been based, and to add to the safety and security of the policy-holders, the 4½ per cent. basis has been changed by our company to a future assumption of 4 per cent. By that change the company has voluntarily increased the Reserve for its policy obligations at the present time from $12,233,399.45 to $13,075,777, thereby setting aside for the further security of its policy-holders no less than an additional sum of $842,377.55, and the fact that it has been able to do so without materially affecting the surplus cash bonuses to be paid to the policyholders is a striking evidence of the sound and satisfactory position occupied by the company.

The accompanying statements show that the total assets amount to $15,607,723.49, and after deduction of all liabilities therefrom there remained a surplus of $2,282,827 43 available for distribution, and out of which 95 per cent., $2,168,686 06, has been allotted to policyholders, giving bonus additions at the rate of $20 per annum for each $1,000 assured under ordinary policies, and to endowment policies the equivalent value of life bonuses at the rate of $22 50 per annum for each $1 000 assured

To meet the cases of policies becoming claims by death before the next division of surplus in 1900, Prospective or Intermediate allowances will be made at the rate of a bonus addition of 1½ per cent. per annum upon Ordinary Life and Endowment systems. Where the surplus is taken otherwise than as bonus addition, the equivalent value of that rate will be allowed. For Ordinary Endowments maturing by survivance before the next division of surplus in 1900, an allowance therefor will be paid at the rate of the equivalent value of a life bonus addition of 2 per cent. per annum.

To the stockholders an allotment of one-twentieth (5 per cent.) of the surplus has been made, and the amount is $114,141.37, which enables a bonus of $25 per share to be declared.

As required by the company's charter, the following directors retire by rotation at the present time: John Stuart, Adam Brown and William Hendrie, Esquires, of Hamilton; his Honor Lieut.-Governor Kirkpatrick, of Toronto, and A. G. Ramsay, Esq., all of whom are eligible for re-election, as is also the Hon. Senator McInnes, of Burlington, who filled the seat of the late Sir Alexander Campbell, K.C.M.G

(Signed) A. G. RAMSAY,
President
R. HILLS,
Secretary

The Canada Life Assurance Company,
Hamilton, Ont., 25th March, 1895.

The following is a summary of the financial statements:

FINANCIAL ABSTRACT.

To balance on 31st December, 1893		$13,652,142 98
To premiums received		1,933,673 37

	$15,607,723 49	

THE PRESIDENT'S SPEECH

Gentlemen,—The directors' report and full statements of the financial position of the company being now before you, I beg to move its adoption, and to say that while we may esteem ourselves fortunate in that our annual meetings have hitherto afforded us the agreeable duty of continuously reporting the successful progress of the company, the occasion of the present quinquennial division and distribution of the surplus of the past five years is of more than usual interest, and I am very glad to meet with us so many of our district managers and local representatives to whom we are indebted for much of the company's progress and success.

We again meet you under very favourable and encouraging circumstances for we are able to report the past year to have been one of advancement and prosperity

Although the general trade and commerce of this country and of the whole civilized world, in fact, have suffered from an unparalleled shrinkage and depression, the business of the Canada Life has during the year been marked by a liberal and solid increase. The new assurances were larger than ever before, and the total business in force at 31st December, amounted to $66,807,397, or just about double what it was in 1885. The annual income and assets of the company have also each likewise rather more than doubled since then, the past year's income having been $2,661,985, or over $8,000 per day for every business day of the year. In 1885 the assets were $7,044,944 They now amount to $15,607,723, and, throwing the figures of these respective heads into tabular form, for better comparison, during the past 45 years, they stand as follows:

Date.	Assurance in Force	Annual Income	Total Assets
1850	$ 814,903	$ 27,858	$ 41,873
1855	2,349,609	83,908	217,758
1860	3,365,407	133,446	664,627
1865	4,013,268	141,968	717,570
1870	6,404,437	273,728	1,066,45
1875	13,430,037	582,735	2,442,092
1880	21,547,759	835,856	4,297,852
1885	34,890,890	1,336,681	7,044,944
1889	46,848,870	1,839,906	9,284,450
1894	66,807,397	2,661,985	15,607,723

As you will have observed by the report of the directors, the death claims of the year were $651,618, a very moderate amount, largely under what was calculated and provided for, and less, I may say, although our risks were larger than they had been during the previous two years. That result was no doubt to some extent due to the absence of the severe forms of la grippe and its results, which were so general and fatal in 1892 and 1893, but it is also an indication of the care exercised in the selection of the lives offered for assurance

As I mentioned to you at our annual meeting last year, an investigation into the mortality experience, since the commencement of the company's operations in 1847, was in progress, and we are now able to present to you a most interesting detailed publication of its results, and in doing so, I would invite your attention to the evidence which is afforded of the very favorable mortality experience which our company has enjoyed during the lengthened period of its 48 years of existence. The various tables which are included in the publication give proof of the salubrity of the climate of Canada and of the Northern portion of the United States, to which we have confined our operations. They also show that the expectation of life there is found to be more favorable than has been experienced by the life companies of Great Britain, the United States and Germany, whose mortality tables have been made public We can hardly be wrong, I think, in attributing some portion of our favorable experience to the careful attention to which I have already alluded as having been constantly given by the board and the management to the selection of the lives offered for assurance

The gradual fall in the rate of interest obtainable on satisfactory securities, which has been going on for many years back, has had the board's anxious consideration. When the company was established in 1847 the rate of interest was then not unreasonably assumed at 6 per cent. and the calculations were then based upon that rate. In 1870, however, the reduction in the rates obtainable upon investments made it prudent to then alter our standard to 5 per cent Subsequently in 1880 conditions having again changed, care for the safety and stability of the company and the security of its policy-holders, which are at all times the board's first consideration, led to the rate for our future calculations being reduced to 4½ per cent., which has also, I may say, been the rate adopted by the Government as a suitable basis for the calculations of the reserves which must be held for all assurance liabilities, and that rate is still continued as the standard required by the Insurance Department. As mentioned, however, in our report of 1890 action

pating a continuance of difficulty in finding safe investments at as good rates as we had been obtaining, it was deemed prudent to still further add to the company's strength by making a provision towards another reduction to the rate of 4 per cent., upon which the calculations of the company's reserves have been based for the past five years, as will be seen by the published accounts. The additional security and strength which that change gives to our policyholders will be seen by the fact that in place of a 4½ per cent. reserve of $12,233,399, we actually hold on a 4 per cent. basis $13,757,777, an additional amount of $842,378.

Having, as you are aware, upon 31st December last completed five years since the last distribution of surplus, the amount which has arisen during that period has now to be divided, and it is very gratifying to be able to state that notwithstanding that we have, as already explained, set aside the large additional reserve of $842,378, there remains the handsome surplus of $2,282,827, enabling us to give our policyholders a cash return equal to about 25 per cent. of all the premiums they have paid during the past five years, and it will here be interesting that I mention what has been the surplus allowed to policy-holders during the last 24 years:

It was at 1870	$ 157,794
1875	388,311
1880	670,406
1885	1,260,433
1890	1,501,773

for 4½ years, and this year $2,168,686, which latter sum would have been $3,011,063 had we not changed from the 4½ per cent. basis to that of 4 per cent

Allusion being sometimes made by persons who are not well informed on the subject to the proportions of the surplus allotted to the policy-holders, it may be well that I mention the facts as to these:—

In 1870 it was 75	per cent.
1875 it was 75	"
1880 it was 90	"
1885 it was 93⅓	"
1889 it was 93⅓	"
and this year 95	"

In conclusion, I would say that it will afford me much pleasure to supply any information or explanation which may be desired, feeling well assured that critical enquiries and explanations will but add to the confidence you may have in the company.

The president then moved the adoption of the report, which was seconded by vice-president F. W. Gates in a short speech.

Other resolutions were spoken to by Messrs. B. E. Walker, general manager of the Canadian Bank of Commerce; Major McLaren, His Honor Lieutenant-Governor Kirkpatrick, Wm. Gibson, M.P., Adam Brown, Esq., and others, while responses were made by Mr. J. W. Darling, on behalf of the agents; Dr. J. D. Macdonald, for the medical examiners; and Mr. Warren F. Burton, on behalf of the solicitors of the company.

The following gentlemen were re-elected on the directorate: John Stuart, Adam Brown, William Hendrie, A. G. Ramsay, His Honor Lieut.-Gov. Kirkpatrick, and Hon. Senator MacInnes.

The proceedings of the meeting were of a very harmonious character, and passed off very successfully.

U. S. GOVERNMENT PRINTING.

An important reform carried through the house early in the last session of Congress relates to the printing of public documents. Many evils had grown up with the old system. Vast quantities of public documents, very costly to print and bind, were accumulated. The great bulk of these went finally to junk stores, as the supply was far beyond the quantity distributed through the country. Furthermore, the same publication was set up, printed, and bound several times in different forms. For instance, the report of the Postmaster-General was bound as an executive document when submitted to the President. It was also printed as a congressional document when submitted to Congress. The various parts of it were then printed separately as the reports of the bureaus to the head of the department. This duplication extended throughout the public service, causing not only great expense and waste, but much confusion in getting a particular report, owing to its duplicated forms.

In order to reform the evils a joint committee of the Senate and House framed a bill designed to simplify the system. It designates what reports are to be printed, the exact number of each, and provides for their public distribution. A superintendent of documents is created to manage the distribution. The bill also provides for the purchase of paper and supplies, and for the complete organization of the government printing office.

QUEBEC CENTRAL RAILWAY.

The large amount of freight traffic handled by the Quebec Central Railway during the past year, and the generally prosperous condition of affairs throughout the section of the country served by that railway, caused the *Gazette* to interview Mr. J. H. Walsh, the general freight and passenger agent of the road, who gave the following information and figures, showing the condition of the St. Francis and Chaudiere valleys:—

	1894.	1893.
Freight receipts	$185,756 11	$166,740 05
Passenger receipts	115,972 01	121,959 43
Gross earnings	$301,728 12	$288,699 48
Working expenses	204,388 19	198,180 38
Net earnings	$97,339 93	$90,519 10

The gross earnings in 1894 thus show an increase of $13,028.14, and the net earnings of $6,820.83 over the previous year. The freight tonnage was made up as follows:—

	1894. tons.	1893. tons.	Increase in 1894. tons.
Lumber	103,948	90,370	13,578
Asbestos	7,342	5,389	1,953
Chromic ore	915	....	915
Cheese and butter	2,286	1,573	713
All other freight	55,330	53,992	1,338
	169,821	151,324	18,497

It will thus be seen that, in spite of the depression and slack times by which other railway companies suffered in 1894, the Quebec Central had a most successful year's business; in fact their receipts show a very decided increase over those of any previous year. There was a large amount of mineral freight carried, agricultural products were greatly in excess of former years, and the shipments of lumber were the highest yet recorded. The last named is an especially good sign, lumber forming the backbone of trade for the district. The large increase in the carriage of farming products, such as butter, cheese, potatoes, etc., is attributable to a great extent to the attention which the provincial government has given to the several branches of agricultural trade lately

An entirely new class of freight was hauled, in the shape of chromic ore. The discovery of this mineral last year in large quantities, near Black Lake, has created quite a flutter of excitement among the mining men of the district.

Institute of Chartered Accountants

OF ONTARIO.

The examinations for the Certificate and for the Diploma of Fellowship will be held on the 16th, 17th and 18th May next, for which applications will be received until the 1st day of May. Forms of application and full information may be had from

F. S. SHARPE, F.C.A.,
Secretary.

Toronto, 1st April, 1895.

Over 13,000,000 Feet of Land for Sale

Situated in Hochelaga Ward, Beginning at Frontenac Street

This property is well located or factories, the Canadian Pacific runs through its centre, and sidings may be built to any part of it. Easy of access by electric cars.

Terms easy. Apply to

St. Lawrence Hall, Montreal

FOR SALE

The canning factory of the Kingsville Preserving Co. at Kingsville, Ont., will be sold by public auction on **Monday, April 22nd, 1895.**

For particulars apply to

W. A. SMITH, Solicitor,
Kingsville.

Dated April 10, 1895.

Warning

"Herbageum" is the registered trade mark for the widely known preparation for domestic animals, manufactured by the Beaver Mfg. Co., Galt, Ont. The high reputation and rapidly increasing demand therefor has tempted some business men to apply the name and imitations thereof to other preparations. Such application of the name or any imitation thereof, either verbally or otherwise, is a misdemeanor, and "the offender is liable for each offence to a fine of not less than $20, nor more than $100, which shall be paid to the proprietor of the trade mark, together with the costs incurred in enforcing and recovering the same." More than one firm has found it wise to make reparation for infringement of this trade mark, and the following letter from an old established wholesale firm is one of the results of an infringement which was last week traced to a country merchant, thence to a Toronto wholesale firm, and thence to the offending firm, whose witnessed signature the letter bears, but which we, for the present at least, withhold in the hope that it will be equally salutary without:—

TORONTO, April 4th, 1895.

To the Public:

SIRS,—We hereby acknowledge that in our establishment, and on our behalf, though without our personal knowledge, a preparation for horses, cattle and live stock generally, has been offered for sale and sold, at a low price, under the name borne by another preparation of much greater value, viz., "Herbageum," which name has been registered in "The Trade Mark Register, No. 13—Folio 2889," in accordance with the "Trade Mark and Design Act of 1879," by H. M. Griffin, of Toronto, and also of the Beaver Mfg. Co., of Galt, Ont., sole manufacturers of Herbageum. Such infraction on our behalf of the "Trade Mark and Design Act" having made us liable for the penalties attached thereto, and being an injury to the proprietor of the trade mark "Herbageum," and to purchasers of this class of goods, we are desirous of making the fullest reparation, and as a step in that direction consent to the publication of this letter in such places and in such manner as the said H. M. Griffin shall deem to be expedient for the protection of his interests. And we will at once take means to prevent, in connection with our establishment and business, any direct, indirect or misleading statement whereby any purchaser or intending purchaser might be misled in the purchase of the class of goods herein mentioned.

Witness, *Signature,*

Note—We have seen the original letter with the witnessed signature, and it is as above. *Editor of Monetary Times*

HOW WE COMPARE

With the largest companies in the world, as to profits earned and paid to the Insured, is shown by the two following illustrations, upon ages 33 and 48:

Ætna Life and Mutual Life

$20,000—10-Payment 20-Year Endowment. Age 33. (Raised to $20,000 for comparison).

Ætna Life, No.—— Cash Dividend	Ætna Life, No.—— Net Payment	Year	Mutual Life, No. 190,541. Cash Dividend	Mutual Life, No. 190,541. Net Payment
...	$1,400.00	1878	...	$1,540.40
$54.30	1,345.70	1879	$231.00	1,309.40
91.40	1,308.60	1880	233.40	1,307.00
114.68	1,285.32	1881	239.40	1,301.00
139.06	1,260.94	1882	254.00	1,286.40
164.60	1,235.40	1883	272.40	1,268.00
191.36	1,208.64	1884	292.00	1,248.40
219.40	1,180.60	1885	312.20	1,228.20
248.80	1,151.20	1886	299.60	1,240.80
279.66	1,120.34	1887	316.60	1,223.80
	$12,496.74		Cash Dividends	$12,953.40
312.04	...	1888	$279.40	...
276.90	...	1889	140.40	...
286.70	...	1890	109.40	...
296.96	...	1891	113.00	...
307.72	...	1892	117.20	...
318.98	...	1893	121.80	...
330.80	$2,130.10	1894	75.80	$957.00
	$10,366.64			$11,996.40

A difference in the Ætna Life's favor of **$1,629.76.** It will be observed that the Ætna Life's cash dividend for 1894 was more than four times as large as that of the Mutual Life. There are four more cash profits to come from each company.

Ætna Life and Equitable Life

$10,000 15-Year Endowment. Age 48. (Raised to $10,000 for comparison.)

Ætna Life, No. 130,519. Cash Dividend	Ætna Life, No. 130,519. Net Payment	Year	Equitable Life No. 211,405. Cash Dividend	Equitable Life No. 211,405. Net Payment
...	$683.80	1881	...	$745.40
$46.60	639.20	1882	$58.84	686.56
63.30	622.50	1883	71.76	673.64
73.10	612.70	1884	85.44	659.96
83.30	602.50	1885	87.44	659.96
94.00	591.80	1886	86.28	659.12
105.00	580.80	1887	87.16	658.24
116.60	569.20	1888	88.00	657.36
128.70	557.10	1889	89.00	656.4
141.40	544.40	1890	117.48	628.92
154.90	530.90	1891	126.48	618.92
168.90	516.90	1892	[illegible]	609.00
183.80	502.00	1893	147.60	599.80
199.60	486.20	1894	158.00	587.40
	$8,042.00			$9,100.48

A difference in the Ætna's favor of **$1,058.08** and an **annual** saving in the Ætna Life at the present time of **$101.20.** With 6 per cent. on the annual difference, the total saving thus far to the **Ætna's** policyholder is **$1,688.12.**

WHISKY

The position of Kentucky whiskies is stronger than it has been for many years. With the conservative production of '94 and '95, prices are sure to advance, and when the advance comes it will be on a firm and lasting basis.

The trade since our last report has gradually improved, and several large sales of the cheaper grades of tax paid goods have been made. After the estimated 2,000,000 gallons of cheap goods tax paid at 90c., which now clogs the Kentucky market, is out of the way, then we naturally expect a marked advance in the price of standard brands.

As above stated, bonded goods are in a strong position, but it is not presumable that there will be much of an advance in prices of these goods until the tax paid goods are out of the way.

The Eastern rye market shows signs of healthy activity, and owners of tax paid goods consider them a good investment, and consequently will hold on to them and await the advance in prices. The consumption of Eastern ryes is growing, while production is kept on a conservative basis.

In the Eastern markets there has been an advance of two and one-half to three cents in the price of spirits, which will continue to and to the firmness of the cheaper grades of Kentucky bourbons.—*Wine and Spirit Bulletin.*

NEW FREIGHT TARIFF.

The C. P. R. has just issued a special joint through freight tariff from Winnipeg, Portage la Prairie and Brandon, in connection with the Columbia and Kootenay Steam Navigation Co., the Nakusp and Slocan Railway, and the Columbia and Kootenay Railway. Following are the rates per 100 pounds, exclusive of marine insurance, from the points above named :

To Nakusp, Robson, Trail Creek, Slocan, Kootenay Crossing, Forty-Nine Mile Creek, Nelson, Ainsworth, Hendryx, Balfour, Pilot Bay, Kaslo, first class, $1.95 ; second class, $1.74; third class, $1.52; fourth class, $1.25; fifth, $1.18.

To Beaver Creek and Waneta, first class, $2.10 ; second class, $1.89 ; third class, $1.6 7; fourth class, $1.40 ; fifth $1.33.

—Senator McMillan, of Michigan, whose influence in Washington is far-reaching, is quoted as saying that he will endeavor to secure appropriations in the next Congress for three composite gunboats, similar to the six authorized in the last naval bill, to be built on the lakes and maintained exclusively in lake service. Senator McMillan will ask for these war vessels on the claim, it is said, that lake cities would be exposed to grave dangers in event of serious differences with Great Britain, and that Canada has already violated treaty stipulations by building on the lakes formidable war vessels under the pretence that they were simply for the protection of fisheries. If Michigan's distinguished representative in the United States Senate will lay aside the question of building war vessels for defence on the lakes, and simply try to overcome the treaty stipulations that now prevent lake ship builders from bidding on gunboats, torpedo vessels and other small craft, which they can build and deliver on the Atlantic coast in competion with any of the builders of the country, it would seem that he would be undertaking a task that is easier of accomplishment, and which would be more beneficial to the lakes in its results. Mr. McMillan could probably urge a change of this kind in treaty stipulations with more force than any representative of the lakes in Congress, and if he will only give early notice of his intention to do so he will undoubtedly find that the ship builders and other interests on the lakes stand ready to support him in the movement.—*Marine Review.*

—A farmer says : "We let our timber rot and buy fencing. We throw away our ashes and grease and buy soap. We let our manure go to waste and buy fertilizers. We grow weeds and buy vegetables. We catch 5 cent fish with a $4 rod. We build school houses and send our children off to be educated. We send our boys out with a $40 gun and a $10 dog to hunt for 10 cent birds, and yet we expect the Government to make us rich." Facts are stubborn things.

—The Glasgow Shorthand Writers' Association held its annual general meeting last month, Mr. John E. Fitzpatrick, vice-president, in the chair. The certificates and prizes, 47 in number, and ranging in speed from 80 to 140 words per minute, were presented to the successful competitors by Mr. John Laird, who especially congratulated the ladies who had taken such a high place in the examinations.

THE Buffalo custom house report for March shows collections of duties to have been $43,-260, an increase of $13,829 as compared with March last year. These are mostly Canadian goods on which duty is levied.

THE TRAVELLER'S TIME.

Under the heading of "This for the Buyer" Llewen writes the following sensible advice to merchants through the New York *Economist* :—

Don't think because the travelling man has to suit his time and plans to your convenience that he is a slave whose time has no value, for it may be, and often is true, that it has a money value far above yours, and when you neglect your appointments or needlessly change them you often cause a loss to the salesman that were you in his place you would deem serious.

Do as you would be done by. You do not know how soon you may be in need of the good services of those whom to-day you treat in anyway but as you would like to be treated.

This is addressed only to those whom it concerns. I will tell you how you may know if it applies to you. If you do not have time to greet politely those who have merchandise to sell and listen to their propositions, or if you put them off repeatedly without a reason, or if you make an engagement without intending to keep it, or if you make one and find you can't keep it and fail to send word to the salesman, then this fits you and you are not the proper man for an important position and never will be likely to retain one for any length of time, unless you seriously consider your ways and change them.

Standard Life

Assurance Co.

ANNUAL STATEMENT

At the 69th annual general meeting of the Standard Life Assurance Company, held in Edinburgh, on Tuesday, the 5th March, 1895, the following results for the year ended 15th November, 1894, were reported :

4029 Policies of Life Assurance were issued, assuring	$ 8,723,836
The total existing assurances in force at 15th November, 1894, amounted to	113,274,360
The claims by death or matured endowments which arose during the year amounted, including bonus additions, to	2,917,073
The annual revenue amounted at 15th Nov., 1894, to	5,139,161
The accumulated funds at same date amounted to	39,353,822
Being an increase during the year of $842,065	

Investments in Canada :

Government and Municipal Bonds,	$6,820,000	
Mortgages over real estate, 1st lien,	3,500,000	
Real estate	355,000

If, however, you do try and see everyone who has merchandise to sell and if you make an appointment keep it as sacredly as you would expect the other man to do, or if absolutely prevented you send him word—then you may know that so far you are employing the up-to-date methods that win, and if you are as attentive to the proper requirements of your business in all other directions, you are not slow, and will find your level head and shoulders above the other man. "Consider and be wise."

TOBACCO-GROWING IN HAWAII

Can the Hawaiian Islands produce tobacco equal to that of Sumatra? This question is raised in a recent report of the United States Commissioner of Agriculture. A man on the island of Maui raised a patch of tobacco from Sumatra seed furnished him. Another lot was grown at the Government nursery—about fifty pounds. This tobacco has been examined by a tobacco planter from Sumatra, and pronounced by him to be as good as the average Sumatra tobacco before being fermented. There is, it is said, every reason to believe that these islands can produce a fair quality of cigar wrapper, and with a few years of experience perhaps rival Sumatra product. The San Francisco *Grocer* is informed by a Sumatra planter that if Hawaiian tobacco was admitted free into the United States many of the Sumatra planters would come to these islands and engage in the culture of tobacco. The duty on tobacco leaf for wrappers by the Wilson bill is $1.50 per pound, quite an inducement

GROCER COMPANY OF GLASGOW.

The annual dinner of the Grocer Company of Glasgow took place on March 14th, in St Enoch Hotal. Mr. John B. Balloch, preses of the company, occupied the chair, and Mr. John R. M'Lean acted as croupier. Mr. Alex. McFeat, the treasurer, submitted his report, which showed that the capital of the company was £20,230 9s. 3d., which yielded an income of £682 19s. 5d. From that income 31 pensioners had been paid £481, and the precept money paid was £22 5s. In all £503 5s.

In the course of his address, the chairman said that while many large cities where they would expect to find one had none, such as Edinburgh, Liverpool, Manchester, Birmingham, Dublin, and Belfast, the Grocer Company of Paisley came well to the front. It was founded in 1824, and had a capital of £10,400; while the Dundee Grocers' Benevolent Association had been in existence for about forty years, and was doing good work. The Grocer Company of London was much the oldest and wealthiest of all grocer companies. It had unfortunately lost all connection with the grocery trade, but as it really was a grocer company for about 300 years it remained of considerable interest to them. It was founded 400 years before the Glasgow Company, in 1345, and then it rose on the ruins of two still more ancient guilds, the Guild of Pepperers and the Guild of Spicers, which were the equivalent of Italian warehousemen

The name grocer was first applied to the company in 1373. Several explanations of the name were given, one being that they were so called by their opponents in trade because they "engrossed all merchandise," or in other words raised prices. (Laughter and applause.) The company became so rich that in 1640 they were able to send Charles the First £6,000 and £4,500, in return for which he gave them their charter, which conferred on them the power, outside of the city of London, of examining all goods in order to detect adulteration, and to punish the offenders, also to deal with men who unduly or inefficiently carried on the mystery or art of grocer. Two years later they lent Parliament £9,000, he supposed to fight Charles – (laughter)—and £4,500 to the Lord Mayor to defend London during those troublous times. At that time they kept a large stock of corn to sell at moderate prices when it became dear. Then, on the conquest of Ireland by Cromwell, they aided the colonization of Ulster by large purchases of land which they had now sold. The great fire in London in 1666 ruined them, and they were reconstituted through the munificence of some of the members who re affirmed its constitution as a social and religious fraternity in the hope that it might again become "a nursery of charities and a seminary of good citizens." At the present time

its income was £38,000, nearly double the capital of the Glasgow company, £4,000 paid its own proper pensions and charities, and £5,000 went in other annual charities, including £1,000 to the widows of clergymen. Large sums went to education in all its forms, and there were large special grants, such as £20,000 to build a wing of the London Hospital, and £5,000 to furnish it. The social element was not neglected. There were not many published accounts on the subject, but in 1876 their cooks and purveyors cost them £4,055, wines £1,754, and cigars £149.

Commercial.

MONTREAL MARKETS.

MONTREAL, April 10th, 1895.

ASHES.—There were shipments last Saturday of 49 barrels of pots, and the stock stands at 117 of pots and 26 of pearls. Receipts are not any more liberal, and the figures for the month so far are considerably behind last year. Values are, perhaps, inclined to stiffen a little, but quotations are about the same, namely, $4 to 4.10 for first pots; $3.70 to 3.75 for seconds; pearls, $6 to 6.10.

BOOTS AND SHOES.—In this line sorting business has been only moderate, due doubtless very largely to the backward spring. A good many manufacturers are preparing fall samples, and travellers for Pacific coast points will get away with the same about the 1st of May. It is understood that Quebec manufacturers for the jobbing trade have made a 10 per cent. advance in prices, and though no advance has yet been announced by Montreal manufacturers a revision of prices is very probable.

CEMENTS AND FIRE BRICKS.—A good deal of cement is moving out of store, and the business of the next two weeks will well reduce stocks in store. Quotations are for British, $2 to 2.10; Belgian, $1.85 to 1.95. Fire bricks are in steady demand at $16.50 to 22 per thousand.

DAIRY PRODUCTS.—There is a quiet shipping movement in cheese, some 11,500 boxes having gone forward by Canadian steamers last week. Local business is very quiet, and best grades are quoted nominally at 9½ to 10c. In butter there is a steady jobbing demand for fresh made goods, which keeps the market pretty well cleaned up; we quote new creamery 21 to 22c.; Townships dairy, 18 to 20c, and fresh western 14 to 15c. per lb.; old sorts dull and neglected. Eggs fairly steady at 14c. per doz. for new laid.

DRY GOODS.—Retail payments on the fourth of the month were not so well met as they were on the 4th of February and March respectively, and in several cases reported to us were rather below an average. General remittances also continue poor. The heavy rains of the early part of the week have rather interfered with the active business city retailers look for just before Easter, by keeping shoppers at home. There seems to be a firming up in values in Europe. We have already noted an advance in some lines of silks and a tendency to stiffness in woolens, and a letter by last European mail reports an advance of ten to fifteen per cent. in Swiss embroideries.

Barley, "	1,622	1,438
Total grain	810,007	795,497
Flour	19,043	19,380
Buckwheat	14,686	16,679

GROCERIES.—While there is a fair distribution to rail points, travellers' letters show that traffic with interior districts is very difficult, owing to breaking up of the roads. On the whole, therefore, the aggregate of business is just moderate. In prices we have nothing new whatever. There is a steady outgo of sugars at the continued low prices, 3⅞ cents per pound being the regular refinery quotation for granulated, though large lots are shaded one-sixteenth; yellows range from 2½ to 2⅞c. per lb. Ceylon and Indian teas are cabled a little easier in London. On spot Japans rule steady.

HIDES AND TALLOW.—There is continued scarcity of hide stock, and light and heavy are both being bought at 6 to 6½c. per lb., while some dealers are not apparently anxious sellers, even at 7½c. Heavy hides, which were rather dull, are in better demand. Calfskins are steady at 6c., and lambskins at 10c. per lb. Sheepskins 65c. each. Tallow continues dull and weak, and 5c. per lb. is now about the highest figure obtainable.

LEATHER.—Cheap lots of leather are all picked up and an all-round advance may now be said to be fairly established, though said advance is not at all in proportion to the advance in price of hides. Letters from tanners to their agents here are daily being received with instructions to hold stock. For light upper 30 cents per lb. is now being asked, and 28 to 30c. for Scotch grained. Best western splits are held at 18 to 20c.; harness, 20 to 25c.; heavy buff, 14c.; and rough, 18 to 20c. For No. 1 slaughter sole as high as 23 cents is quoted, in small lots.

METALS AND HARDWARE.—A moderate trade is being done in shelf hardware, but in iron and heavy metals generally the demand shows no turn for the better. Prices of Scotch pig iron have been amended owing to the approach of the opening of navigation, though apparently no stocks of any consequence are expected by first boats. Summerlee is now quoted lower at $20.50, Carnbroe $18.50, and Eglinton $18.50 per ton. Domestic pig is quoted at old rate. Bars are selling at $1.55 to 1.60. The nail men have had several recent meetings, and have apparently patched matters up again, quotations now being $2.10 in ten-keg lots; car-lots ten cents less, freight paid up to 25c. a hundred. Tin plates continue easy in price; ingot tin continues to stiffen in England according to the cable, but stocks are large and with little demand; the local price does not advance, 16 to 16½c. being about the quotation. Lead and copper are without change.

OILS, PAINTS AND GLASS.—A material advance in the prices of window glass is not improbable, as advices from Belgium are rather serious in tone. No glass is being made in the Charleroi district, 4,000 men having gone out on strike on the 1st inst., and a cable reply received on Monday to an enquiry for quotations, shows an advance of 20 per cent. Sales are still being made by the trade generally at $1.20 and $1.30 for first and second break, with a concession for moderate lots, but it is said that some hardware dealers have been quoting at $1.10 and $1.20. Turpentine has eased off some 5 or 6 cents per gal. in the South, but all the stock here has been bought at the high prices, and local quotations are still unchanged. Linseed oil is steady, and scarce on spot. Dry lead, both white and red, is reported firmer in Europe. We quote:—Turpentine 54 to 55c. per gallon for single brls; two to four barrels, 53 to 54c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4¾c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

TORONTO MARKETS.

TORONTO, April 11th, 1895.

DRY GOODS.—We have made a careful canvass of the leading dry goods jobbers and conclude that the volume of trade during the spring season has been fully 5 per cent. in advance of the movement in the spring of 1894. When we take into account the fact that prices average probably 10 per cent. less than they did last spring, this is a very satisfactory showing. Orders, however, have it is thought not been filled in excess of requirements, and a good, steady sorting-up trade is expected.

GRAIN.—The wheat market is very firm. Last week we reported an advance of several cents per bushel, and while the same degree of strength has not characterized trade this week, an advance of 2c. has been made in Ontario

These prices are wholesale by the car-load.

winter wheat, other grades remaining at former quotations. The local milling trade constitute the main source of enquiry for stock. Manitoba wheat remains at former quotations, the movement from Montreal to interior points still continuing. Oats are dull. Quotations have eased off a little, the market being weak at 37 to 38c. The demand from the Maritime Provinces has fallen off, while with the advancing season there is less call for stock from northern Ontario. Barley is dull and unchanged, with a movement for feed purposes only. Peas are firm, but the demand is also confined to feeding purposes. There is little doing in rye; the last sale we heard of brought 50c., delivered. Corn remains nominal.

THE VISIBLE SUPPLY.

	April 6, '95. Bush.	April 7, '94. Bush.
Wheat	75,702,000	70,762,000
Corn	12,890,000	17,497,000
Oats	5,858,000	3,034,000
Rye	245,000	397,000
Barley	685,000	582,000

The stocks of grain in store at Port Arthur on March 30th were 689,053 bushels. During the week there were received 9,899 bushels, and shipped 665 bushels, leaving in store on April 6th, 698,287.

GROCERIES.—The grocery market has developed little that is new this week. Bright syrups are not in excessive supply here and are rather difficult to obtain; they are quoted 33 to 36c. at the refineries. Some large lots of New Orleans molasses have recently been brought here, and the market is in consequence rather depressed. There is little doing locally in sugars compared with the movement a month ago. No change has been made in the value of refined. Sales have been made in New York of 5,500 bags centrifugal to arrive and go to Canada at 2 7-32c. for 95 test, cost and freight. Teas are holding steady, but merchants are expecting interesting developments in the Orient soon. Latest advices from this quarter indicate delay in gathering the new crop, the coolies having refused to proceed to the fields in Formosa. Corn beef has advanced 10c. per dozen on 1's and 2's, and 50c. doz. on 6's and 14's. Merchants think it not unlikely that further advances will be made, and regard the market as very strong.

HIDES AND SKINS.—Elsewhere we refer at considerable length to the situation in hides. On Monday dealers resolved, after much deliberation, to advance light cows' 50c. Some merchants were, we are told, opposed to the advance. But, however that may be, it is a reality and one of the features of the present situation. Offerings continue to show poor quality and run 2's and 3's. An advance has also taken place in sheepskins, much to the surprise of some merchants who considered the price as settled for the season. Dealers are paying 95c. for fresh butchers' skins. Tallow is in a little better demand, with sales made at 6c.

LEATHER.—Tanners believe that a new *regime* is almost at hand; that an era of leather values in harmony with the hide market will soon be established. As reported last week, sole leather tanners are holding slaughter for an advance, while Spanish is parted with on more favorable terms to holders. It is a matter of sincere regret that the English market is closed by labor troubles, but unless English buyers had changed in their views, our export trade must have soon ceased. A Toronto tanner, who sold several car loads of splits on English account a month ago at 15c., estimates his loss at nearly $1,000 a car.

PROVISIONS.—There are no important events to chronicle in the provision trade An easy feeling continues to exist in butter in the face of excessive receipts; large rolls are selling at 11 to 13c.; dairy tub is moving slowly at 11 to 12c.; low grade descriptions excite no interest, and fail to find buyers although offered as low as 6c. Cheese is locally quiet and rather easy. In hog products there is firm feeling with long-clear at 7⅞ to 8c.; hams, 10 to 10½c.; rolls, 8¼ to 8¾c., and lard 8½ to 9c. Although the season is now about over, some dressed hogs are offering and transactions were made at $6 to 6.10 per cwt. Eggs are firm and at the moment receipts rather limited, with sales at 12½ to 13c. Beans are firmer and find sale at $1.60 per bush. Dried and evaporated apples remain without change.

WOOL.—The situation is practically unchanged. Receipts of fleece have been smaller this week, the first influence of the recent advance to 20c. having spent itself. American markets are open to our fleece wool, a broker writing that he can dispose of stock at 23½c. A Philadelphia firm, whose circular we have received, quotes; Canada washed, choice selected, 23 to 24c.; quarter blood, 22 to 23c.; coarse, 20 to 21c Sales of pulled combing have been made this week at 20c; dealers are paying 19c. for offerings, although some better qualities bring 19½c. Parties have written desiring to know the probable course of the market upon the advent of the new clip. It is impossible to answer these questions. Everything points to high prices, possibly 20c., but everything depends upon the possibility of an industrial revival both in Canada and the United States.

" " " 1894, $4,239,050 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE RELATION OF THE TRAVELLING SALESMAN TO THE CREDIT DEPARTMENT.

AND HOW HE CAN BEST ASSIST THE CREDIT MAN.

The following prize article on this subject is by Samuel Rosenthal, of Strouse & Brothers, Baltimore:

Travelling salesmen are a desideratum, representing in number quite a formidable army, and their relation to the credit department *must* be very close to insure its manifold benefits. One of the essentials in a successful business is choosing representative men commanding prestige, and in whose integrity and judgment the utmost confidence can be reposed. In many sections of the country large numbers of merchants seldom, if ever, visit the markets, but place their orders regularly with salesmen on the road, making it impossible for the credit man to come in contact with such clients; in these cases the opinion of salesmen is important, and accelerates the decision whether or not to ship goods as ordered. By experience keen salesmen are able to make a safe approximation of the value of carried merchandise, noting condition of same, and ascertaining in which markets customer chiefly deals, and from whom he buys, including such other data that might prove of incalculable value to the credit man, whose arduous duty it is to frequently dispense credits almost exclusively on agency reports. Unfortunately many salesmen hesitate to question their customers in reference to financial matters, considering their duty ended when sale is completed and order transmitted, but this is a great misapprehension. Orders are frequently declined on prejudiced reports; the result is great injustice to customer; salesmen thereby become affected in their commissions on the transaction, and the opportunity is forever denied to house and salesmen of reopening account, as no honorable or honest merchant with any degree of pride and independence could consistently resume business relations with any firm who once declined him credit.

Pending investigations, orders are frequently held in abeyance, and when decision is ultimately reached not to fill them, the season has so far advanced that goods can be disposed of only at a loss which could be avoided if the salesmen would frankly ask for reference, especially when opening new accounts. It would lessen the credit man's labors, for he would then be enabled to communicate with parties referred to, collate his statistics without delay, and reach a decision promptly; but when forced to enquire at random, asking information from firms who perhaps never sold party in question, delay is inevitable.

Trade reports are the most authentic sources for intelligent data, as they bring producer and consumer into contact, which discloses manner of payment, business methods, etc.

Many merchants are addicted to the pernicious habit of returning goods without cause and making claims for rebates and allowances which are often unjust, so that concessions are made rather than have goods reshipped. When these facts are developed (and it is the duty of every house to announce them when enquiries are made), such patronage should be avoided or discontinued.

The sale of merchandise should be conducted on business principles, with no misrepresentation or overcharge. Competition precludes the latter fault, but the former is unfortunately indulged in to some extent by salesmen who are more eager to secure orders than establish a foothold. Discovery, however, is inevitable, and salesmen suffer irretrievable loss from which their employers seldom emerge unscathed.

For this reason I insist that travelling salesmen must be in good repute at home and abroad, and possessed of the highest business principles.

As a rule successful travelling salesmen are versatile, men of education, culture and refinement, and their relations to the trade are often very intimate.

They should likewise enjoy the same relation to the firm they represent, which gives them encouragement and is calculated to create an incentive to sell only the best trade. I would be remiss if I failed to state that life on the road is not very enviable on account of its many hardships. Only those who have been "through the mill" can understand the loneliness, privations, discomforts and sacrifices the great majority endure.

If business men would take all this into consideration they would feel more kindly towards travelling salesmen, who are quick to appreciate courtesies and recognize thoughtfulness in their behalf, but undue familiarity of salesmen is a fatal error and should be discouraged being very obnoxious to most men.

There should be a tacit understanding between credit men and salesmen regarding the standing of each customer to guide them properly. They are entitled to know whether payments are prompt or slow; but salesmen should never intrude their opinions or persist in the delivery of goods when the credit man is opposed to it or unfavorably impressed, inasmuch as he may receive information from other sources of which salesman may be ignorant; frequently the credit man's judgment is swayed and his vacillation rewarded with certain loss. There may be exceptions, but they establish precedents fruitful of no good results.

If a buyer orders freely and is apparently careless in his selections, a line to that effect to the credit man would be a valuable suggestion. Long credits and long dating are pernicious features and it lies in the power of salesmen not to grant both in all cases.

There are occasions when they must discriminate, to which no objection can be made; but to uniformly grant the longest terms and dating reflects unfavorably on all salesmen. Another point that I almost overlooked is the failure of some salesmen to specify their agreements when taking orders. The inevitable result is, when bills mature, customers often claim having arranged for extra time when order was given.

In conclusion, I beg to suggest that travelling salesmen could facilitate the execution of their orders by furnishing the credit man with their impressions and other data at their command, and submit reports free from exaggeration. Be just to your trade, and fair to the house you represent, and the credit man cannot fail to recognize a disposition to enlighten him and spare him time and labor.—*The Lawyer and Credit Man.*

FARM INSURANCE.

Many farmers and others are asking what prospect of success there is for a company conducted on the lines of the Ayrshire Farmers' Mutual Fire Insurance Company, recently formed.

An inspection of the last published accounts of the principal companies doing fire insurance business in Scotland seems clearly to indicate that such a company has every prospect of success, and that with a company economically managed—and especially with a mutual one like the Ayrshire Company, where no dividend has to be paid on shareholders' capital out of premiums—farm risks can still be covered at the old rates. The accounts referred to show that the fire losses for the year to 31st December, 1893, amounted to about 70 per cent. of the premiums received for that year, thus leaving a balance equal to about 30 per cent. of the premiums received to meet expenses of management, etc. Although that was the result of the year 1893, that year was by all the companies found to be an unusually unfavorable year, so far as regards fire losses—these being for the year about 10 per cent. above the normal rate.

In a company like that formed by the Ayrshire farmers there are no shareholders—the company being a mutual one—and there is consequently no dividend to be paid out of the premiums. It is therefore not necessary that the premiums for any one year should be more than enough to cover the losses of that year and the expenses of management. It might probably be advisable to make the premiums sufficient not only to meet the losses and expenses of management, but also to leave a moderate surplus, to be accumulated as a reserve fund. But in that case the reserve fund should only be a moderate one, as there seems little fairness in accumulating, out of premiums, an enormous reserve which will in no case return to those who have provided it.

The liability of the members (*i.e.*, the policyholders) can, under the memorandum of association, be limited to as small a sum as the members themselves consider expedient.

These local mutual insurance companies are quite common for the insurance of marine and plate glass and other risks, and it is difficult to see why they should not be successfully extended to the insurance of fire risks. The Scottish Chamber of Agriculture and various farmers' clubs have resolved to approach the insurance companies with the view of getting the premiums reduced to the old rates. But it is practically certain that they will not succeed, for the whole of the existing companies are acting in concert, and, indeed, with their large dividends to pay, and managed in the expensive way they are—the expenses of management being about 32 per cent. of the premiums received—they cannot afford to reduce the premiums now charged. Failing the reduction being granted, the Chamber of Agriculture proposes to form a farmers' insurance company for Scotland. A mutual company on so wide a basis could only be worked at enormous expense, and if the project is one for another proprietary company (as it is understood it is) little advantage will accrue to the policy-holders, for then again a dividend on the shareholders' capital would require to be provided out of the premiums.

A question which naturally suggests itself, in considering the prospects of a mutual company, is, what would be the result of a big loss during the first year or two of the company's existence? After the first year or two the company ought, of course, to be able to meet a substantial loss with reasonable equanimity, but provision must be made for meeting a heavy loss, even at the outset. There are at least two ways of doing this. First, you can re-insure a portion of your heavier risks. But the better way is this: There should, in addition to the guarantee under the memorandum of association (already mentioned, and which may be fixed at as low a sum as is thought desirable, and which comes into play only in the event of the company being wound up), be a guarantee fund, to which each member would be liable to contribute in proportion to the sum he has insured. Each member's liability to contribute to this fund can also be limited to so much per cent. on the sum for which he is insured. These contributions are not to be looked at as additional premiums. They are really loans by the members to the company, and are treated as ordinary debts due by the company, and are thus in a more favored position than the shareholders' capital in a proprietary company. Each contributor, at his withdrawal from the company, is entitled to repayment of his contribution to this fund, and, in the event of the company being wound up, each contributor has by law a ranking for the amount of his contribution on the assets of the company, just like an ordinary creditor of the company—not a postponed ranking like a shareholder for his capital. The Ayrshire farmers seem to have overlooked the advantages of this fund, for they have not provided for one. Its advantages, however, are too apparent to require further comment.

Against mutual companies it is usually urged that there is difficulty in getting payment from the members when a levy has been made to meet a loss that has occurred and that cannot be paid out of the funds in hand. There is some force in this objection, and it is for that very reason that a mutual company, on so wide a basis as that proposed by the Chamber of Agriculture, cannot be worked except at enormous expense. The difficulty is, of course, very much less in the case of a company, such as the Ayrshire company, working on a more restricted basis where practically all the members are known, and it altogether disappears if the company adopts this guarantee fund, and if under it a moderate levy is made on each member at the time of his entry, to be repaid on his withdrawal from the company, or as soon as a moderate reserve has been got together out of surplus premiums. Indeed, if a moderate contribution is levied from each member at entry, to be paid only when he retires from the company, the necessity for a reserve fund almost entirely disappears, for as one member retires others are coming in. The guarantee fund is thus maintained; the policyholders, for the time being, meet their own losses, and the unfairness of building up a reserve out of the premiums of the earlier policyholders for the benefit of those to come after is avoided.—*North British Agriculturist.*

— Out of sixty replies received by the *Farmers' Advocate* to an enquiry, which branch of farming gave most satisfactory results in 1894, fifty stated that dairying was the most profitable and satisfactory. In most cases hog raising was cited as an adjunct to successful dairying. The farmers of Ontario seem to have given up grain growing as an unprofitable industry. In specialized and intensive farming only can farmers nowadays get back a fair return for their labor.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents or to

DIRECTORS

J. AUSTIN (Founder Dominion Bank), **President.**
Hon. Justice Maclennan. James Scott, Merchant.

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses** and **contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

PROPOSED PROVINCIAL LEGISLATION.

Every year the Municipal Act and the Assessment Act receive a considerable amount of attention. There are now, in addition to what has hitherto been mentioned, five several suggestions to amend the latter Act. One bill is to permit municipalities to determine that the value of any land, after it has been finally fixed in any year by the Court of Revision, shall remain as the assessed value for the four following years. It is suggested that where the value of any piece of land on a street has been fixed on an appeal to the Court of Revision, the court may, in its discretion, consider the assessed value of the other properties in the immediate neighborhood, and thereupon make the assessment uniform, although there may have been no appeal except one. This would remove an objection often urged by Courts of Revision against reducing the assessment of land on a particular street where there is only one appeal against the assessed value, on the ground that the adjoining property owners have not appealed, and even if the court, in such a case, gives no effect to the objection mentioned, they have not hitherto been at liberty to give the benefit of the reduction to neighboring property-owners. This is a highly desirable amendment. The time for taking the assessment and revising the rolls is elastic as regards cities, towns and incorporated villages, and it is proposed to make it the same in townships. It is sought to apply the provisions of the Consolidated Assessment Act relating to the statute labor in townships to incorporated villages of not over 2,000 inhabitants. The most radical change suggested is that municipal corporations may abolish the assessment for taxation of all buildings for improvement of real estate, stocks, of merchandise, machinery, personalty, securities and income, or may assess for taxation any or all such classes of property. The will to do so, however, may be evidenced either by by-law of the council or vote of the municipal electors on submission to them on their petition.

To the Municipal Act several amendments are suggested. Township councils are to have the right to compel all persons, resident or non-resident, liable to statute labor to commute such statute labor, and a penalty of $5 and costs may be imposed upon any person failing to pay such commutation. One bill seeks to take away the power of municipal councils to license, regulate and govern transient traders, another to abolish wards in towns and elect councils by a general vote, a third to so alter the qualifications for mayor, alderman, reeve, deputy reeve or councillor, as to require the property held by the person seeking election to be of the value now required by law, but without reference to the extent of encumbrance thereon. As a result a person might buy a piece of property for $2,000, mortgage it back for $2,000, and be thereby qualified to fill any municipal position in the gift of the electorate. It is asked that councils may appoint treasurers to act as collectors if they see fit.

The long-talked of Patron bill to amend the Medical Act has been before the House and was voted down by the united forces of the Government and Opposition. The changes which it sought to make in the existing law are in the variation of the tariff of professional fees, which is to have the approval of the Lieutenant-Governor, and to be published in the Ontario *Gazette*, and to be on a scale of reasonable charges. The power of the Council of the College of Physicians and Surgeons as to holding examinations, and collecting fees for examinations, is very much abridged; instead of the exclusive power lying with the Council to appoint a Board of Medical Education, that board is now to consist of three members of that Council, one member appointed by the faculty of each medical college in Ontario, two members appointed by the homeopathic licensed practitioners, and two members to be appointed by the Governor on the recommendation of the Minister of Education. They are to sit annually for holding examinations, and to hold office for one year only. All fees payable by candidates for examination are to be paid to the Provincial Treasurer. Out of those fees the Medical Board of Education is to be paid, and the amount of remuneration of members of the board is to be fixed by the Lieutenant-Governor-in-Council.

The Medical Council is no longer to have power to erase any name from the medical roll for unworthy conduct. That is now to be done by the senior judge of the County Court of the county in which the medical practitioner is resident. Unworthy conduct is defined to include conviction for a crime, habitual drunkenness, transmitting contagion or infection through ignorance, knowingly issuing burial certificates containing false statements, conviction for any offence under the Public Health Act, or under the Act respecting registration of births, deaths and marriages, making false statements privately or by advertisement as to the qualifications possessed by the registered practitioner, with the view to inducing persons to submit themselves to him for professional treatment. The time for bringing actions against medical men for negligence is extended to two years, and if in any civil action for damages a verdict is given against the defendant, the judge before whom the action is tried may, upon application of the plaintiff, direct the erasure of the name of the defendant from the register of duly qualified medical practitioners. Any person whose name has been ordered to be erased from the register may appeal from the order within six months from its date to any division of the High Court. No more than one dollar shall be collected by the College of Physicians and Surgeons as anannual fee.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

MR. GEO. RUTHERFORD, of Fenelon Falls, has sold out his grocery business to some parties from Garden Hill.

MRS. S. C. GILLILAND, engaged for some years in the stationery business at Lunenburg, N.S., is asking an extension of time.

THE Algonquin Hotel, at St. Andrews, N.B., is being enlarged, and that pretty spot will thereby be rendered more attractive to travellers than ever.

THE citizens of St. John are to be congratulated on the opening of the Aberdeen Hotel. A most agreeable dinner was given to some forty guests on the eve of the opening.

AT St. Stephen, N.B., the imports for the March quarter were of the value of $168,000 (of which $121,000 was free goods), as compared with $85,000 in the same quarter of 1894.

THE liabilities of Henri Duverger, dry goods jobber, Montreal, are $34,090 direct, and $24,600 indirect; assets apparent, $28,711. Mr. D. has made an offer of 50 cents cash.——J. H. Langlois, a Montreal suburban grocer, who came from the country and opened business some eighteen months ago, is reported in difficulties, and a leading creditor will take over the estate and wind it up for the general benefit.——G. F. Moore, a saloon keeper, is offering 40 cents on liabilities of about $800.

This will Interest Hardware Manufacturers.

This Cut represents the "Birley" Patent Folding Telescope Hardware Box, suitable for boxing all kinds of hardware—bolts and heavy goods. They are scored and creased ready for folding, and the cost of making them up is more than covered by the saving in freight charges.

These BOXES are really stronger than those at present in use because they are made of tougher and more expensive material, and the board is bent instead of being half cut through, thereby retaining its full strength. The appearance, also, of the box when made up is superior to the hand-made ones. Moreover, the boxes can be printed all over at very trifling expense, thus giving them the best show possible, and at the same time obviating the necessity of using labels. This style is far ahead of any other folding box in the world. Patented in Canada, the United States, and Europe. Manufactured by **DOMINION PAPER BOX CO.**, 36 and 38 Adelaide St. West, Toronto.

Mercantile Summary.

THE firm of Messrs. Causey & Maxwell, merchants, St. John, is dissolved by the death of Mr. Causey, but Mr. Maxwell, the surviving partner, will continue the work under the style of Robert Maxwell.

SEVERAL St. John lumber mills are putting in planers so they can cut dimension stuff for the American market. As a result of the new tariff, New Brunswick lumber will, it is said, show up better than ever before in the markets of New England and the Middle States.

IN the St. John city court the other day, the Murphy Gold Cure Company brought suit to recover an amount from John McGonagle, who went surety for a friend under treatment for the liquor habit. The plea of the defendant was that under the New Brunswick Medical Act the Gold Cure doctor had no right to sue for fees. The court sustained the plea, and dismissed the case.

ELDER DEMPTER & Co. will run a fleet of twelve ships from this port this coming season. Four new steamers will be added to the fleet, the "Montezuma," "Assaye," "Loango," and "Monrovia." The tonnage of these steamers runs between three and five thousand five hundred tons. The officers of the company will be located at No. 219 Commissioner street.—*Montreal Star.*

CANADA PAPER CO.

TORONTO and MONTREAL.

Mercantile Summary.

MR. F. P. DRAPER, a well-known citizen of Sutton, is about to move his family to Montreal. According to the St. Johns *News*, Mr. Draper has been appointed manager of the Eastern Division of the firm of Clare Bros., furnace and hardware manufacturers of Preston, Ont.

A SPECIAL meeting of shareholders of the Canada Paper Company was held on Thursday of last week to take action on a by-law of the directors, authorizing the issue of the company's bonds, to build a dam and other works, to utilize water power of the St. Francis river on its property at Windsor Mills. The by-law was approved of by the meeting, and it is understood that the works will be proceeded with at once.

PORT statistics of Quebec were made public last week. The number of vessels entered inwards at that port was 344, with a tonnage of 580,322, as against 391 in the previous year with a tonnage of 629,910. The vessels cleared outward last year, for the port of Quebec and outports alone, were 249 of 327,137 tons. The comparative statement of the export and supply of lumber shows in 1894 an export of 5,307,584 square feet of timber and 4,095,264 feet deals, and in 1893, 6,624,243 square feet of timber and 4,936,743 deals.

Mercantile Summary.

NOT to be behind other live towns of Ontario, Lindsay has now a daily newspaper This is the daily edition of that long-established and staunch weekly, the *Canadian Post*. The paper is full of news, and typographically neat. We hope to see it prosper.

H. G. TROUT, the Buffalo manufacturer of propeller wheels, has received some interesting letters recently, says the *Marine Review*. One is from S. H. Burnham, Port Huron, enclosing a check for a wheel applied to the steamer "Mary," which he says is the fastest and best backing wheel ever put on the boat. Another is from John W. Averill of Cleveland, who says he has Trout wheels on six fishing steamers, and that they are the best he ever used. These wheels can be made of a mixture of steel and iron when wanted.

COUNTRY failures in the Province of Quebec for the week include the following:—Mederic Spenard, general store, Ste. Sophie de Levrard, is in trouble. He made his creditors an offer of 35 cents in the dollar, which was not accepted, and a demand of assignment has been served upon him. He is a young man, not long in business, and formerly a farmer.——J. H. Merrill, storekeeper and miller at Smith's Mills, has arranged a compromise at 50 cents. He owed some $21,000, and showed nominal assets to the amount of about $17,000.——The creditors of E. Donahue & Co., general merchants at Farnham, had a meeting last week, at which the firm made an offer of 40 cents on the dollar. Mr. Donahue has been twice unsuccessful in the past, the last time in 1890. ——J. Dinsmore, for a good many years the village blacksmith at Stonefield, foolishly opened a little store about three years ago, which has led to his failure. He has assigned on demand, owing $1,924 ——D. Grenier, who has been keeping a small store in the concessions back of Beauport for the last six years, has been asked to assign. ——Jules Gendron, a Sherbrooke baker, has assigned on a demand made by the Merchants Bank. Liabilities are stated at $7,500.——F. Paul junr., a young man who began business in the tailoring line at Sorel, several years ago, with the assistance of his father, is reported as failed, owing $2,300. ——Felix Lemieux, a small tailor in St. Henry suburbs, is reported an absentee, and a petition has been made to the court to order a meeting of creditors.

In spite of the fire which destroyed its whole establishment, the Summerside *Journal* appeared the next week in very creditable style.

We reported John Phelan, dry goods dealer, Ottawa, in trouble a week or so ago. He has since assigned and is said to owe about $14,000. ——H. R. Webster, general store, Frankville, Ont., has assigned. He succeeded W. G. Richards only last year, and was previously station agent for the C.P.R. — For some years, Gervais, Hudon & Co., of Quebec, have been actively engaged in the piano and organ business. They have suspended payment.

McDonell & Darragh, who have been doing quite an active general trade for some years at Lancaster, Ont., have got into trouble through too liberal crediting, and their creditors had a meeting last week. The firm made an offer of 50c. in the dollar, which was not acceptable to creditors, who thought they should pay 75c., and the meeting was adjourned to allow them to amend the offer. They owe $16,000, and show a nominal surplus of $6,000 to $7,000, but some $13,000 of assets are in book debts.

What is, we are told, the largest single order for water wheels ever placed at one time in Canada has just been received by Messrs. W. Kenndy & Sons, of Owen Sound, from the Sault Ste. Marie Water, Light and Power Co. These wheels are to be of the latest "New American" type, 18 in number, 57 inches in diameter and aggregate 5,868 h.p. They are to be used in driving the machinery of the large wood-pulp mill being erected by the above company at the Sault Ste. Marie, Ont.

In the fall of 1892 C. G. Armstrong went from London to Goderich and took charge of bankrupt stock of general goods owned by R. C. Struthers & Co., London. Early in Feb., 1893, Mr. A. purchased the balance of the stock, amounting to $4,500. Since then he has continued the business under the style of Armstrong & Co., and apparently made fair progress until a fire took place there a fortnight ago. He carried a large stock, and not being well insured, makes an assignment.——J. W. Frood, dealer in Brantford, opened his men's furnishing goods shop two years ago with a stock, of $1,500; most of the funds used in payment of this was advanced by his kind mother. His success, owing to heavy expenses and strong competition, has always been doubtful, and he now assigns.

Edmund Ogle, dealer in men's furnishings at New Westminster, B.C., bought out the bankrupt stock of Ogle, Campbell & Freeman, amounting to $6,300, a year ago, giving his notes and chattel mortgages in settlement of the same. Owing to depressed trade, he has found it impossible to succeed and therefore makes an assignment.——The sheriff is in possession of the men's furnishings stock of Louis Rubinovetz at Vancouver. His wife is now claiming a separate interest in the business and his affairs are quite complicated.

The Collingwood *Bulletin* announces, apparently as part of a summer programme, that the secretary intends having a meeting of the Northern Choir Association in Collingwood and running excursions to this point some time during the ensuing summer. From the mention of Waterloo, Berlin, Elmira, etc., as probable large contributories to such an assemblage, we infer that the choir of 1,000 persons which Mr. Winter intends to have present at Collingwood next summer is to be largely composed of the musical element from Waterloo county, *plus* the many who will be attracted by the beauties of the Georgian Bay.

Something less than two years ago Edwin Hird, tailor, removed from Nanaimo, B.C., to New Westminster, where he had an unfavorable record. In the early part of the present month a life insurance company obtained judgment against him for $3,900, and he has since assigned.——The saloon furniture and fixtures of George Cavin are advertised for sale by the mortgagee, and the business in Victoria will be closed.——Early last month Louis C. De Carley gave a chattel mortgage on his tobacco store at Victoria, then took his departure for San Francisco. As he has not returned, the mortgagee took possession.

The bailiff is now in possession, for the second time, of the premises of John D. Mills, manufacturer of paper boxes in Hamilton. This is rather a gloomy experience for Mr. M., who had conducted a business for some fifteen years, but of late he has been somewhat neglectful. He could not reasonably expect success when even attentive men of business find it difficult to make progress.——Archd. Macdonald, who for a number of years had a general store in Ripley, died in 1889. His executors continued the business, but made a failure in 1891, with liabilities of $17,000. Creditors then wrote 20 per cent. off their claims, and his widow and son continued, under the style of Mrs. E. Macdonald & Son. They were anxious to do a large trade, and granted credit too freely, which brought about their assignment.

The general stock of J. L. Courtice & Co., Holmesville, will be sold on Wednesday next. On the same date the stock of J. W. Relyea's, Perth, store is likewise to be sold. Another sale on this date is the tinware stock of John Young, Thornbury.

Two months ago a stranger named Hiram Mosser made his advent in Allan Park, Ont., and opened a store. Previous to this he had worked on his father's farm near Drayton. In view of all the circumstances his assignment at this early date need not surprise anyone. His principal creditors are in London.——A tailor named R. J. McEwan, at Bracebridge, in business three years, has been sued and now assigns.——Another assignment is that of D. McWillie, grocer, London.—— For a fortnight past, H. B. Welch, dealer in tobaccos, etc., at Galt, has been missed from the town and quite a number of creditors are mourning over their presumed losses.——The creditors of W. M. Madden, hotelkeeper at Odessa, are in a similar state of mind owing to his absence from the village.——Todd & Co., grocers and liquor dealers, Madoc, have disposed of their stock, the head of the firm being in very delicate health. Creditors need not expect any dividend.

We note several failures among Montrea shoe manufacturers this week. A. Dubois & Co., who started a short while ago with quite a fair capital, have unexpectedly called a meeting of creditors. A fire in their place a few months ago entailed a loss of several thousand dollars, but apart from this there has evidently been some want of management, also of entire harmony between the partners.—— C. O'Brien, who manufactured a few lines for several special jobbing customers, has made a voluntary assignment. He owes about $3,500, and the estate will pan out pretty well.—— The third and most important is that of J. & T. Stephens, a firm that has been in existence just about three years, the senior partner having formerly been connected with the wholesale firm of J. & T. Bell. The liabilities in this case are estimated at about $50,000 to $60,000, and though the firm had enjoyed a very fair credit up to the last moment, it is feared that the estate will turn out poorly, judging from present indications.

THE total assessment for Listowel for 1895 amounts to $754,830, and the population of the town, 2,685. Last year the assessment was $785,185, and the population 2,552.

THE general assets of Thompson Bros., Orangeville, realized 60 per cent., they themselves being the purchasers.——To-day the grocery stock of W. T. Willis, Brantford, is to be sold.

ABOUT two weeks ago George Thompson, who was a hotel keeper at Trout Creek, Ont., suddenly took his departure from that town, but was arrested in Toronto. Then he handed over all his property to his creditors and was released from prison.——Mrs. Phoebe Todd, milliner, Galt, has become involved and assigns her estate.

IN September last Thos. Hamlin purchased the grocery business of Mrs. Boxtall, at Windsor, making a small cash payment and giving a chattel mortgage as security for the balance. A month ago a second mortgage was given to a creditor. Now we hear of Boxtall's assignment.——Twelve years ago J. Watt bought the general stock, at Uxbridge, of A. T. Button, paying $17,000 cash for the same. For some years he prospered, but in Aug., 1893, a meeting of his creditors was called and $40,000 liabilities were compromised at 70 per cent. Since then his custom dropped off considerably, and of late he has been slow in meeting his bills. This caused an investigation into affairs and resulted in an extension of fifteen months, payments monthly.

CONFEDERATION LIFE ASSOCIATION.

It is not a little significant that, in a year when business generally was depressed, when everybody was economizing, when numbers of people were suffering from reduced incomes, and not a few were without situations, the business of life assurance companies in Canada kept up so well in 1894. Not only kept up, but in a number of instances was increased in volume as compared with the previous year. This indicates a thrifty disposition on the part of Canadians, a prudent eye to the fact that a life assurance policy is not only a comfort to a man's heirs when he is gone, but often an anchor to windward during a man's life time. Thus what he has paid into a sound company goes on earning profit for him, while he, through stress of circumstances, may be temporarily unable to earn anything. We have known some cases of late occurrence where the cash dividend from a policy came in very handy when the bread-winner was out of work.

The very large amount of money paid year by year in Canada for life assurance is one of the features which attracted attention at the meeting of the Confederation Life Association last week The vice-president, in noticing the satisfactory character of the business done by the company in Canada and Newfoundland last year, referred to the many millions of dollars annually paid for life insurance in the Dominion as an evidence of the solid financial condition of the country. In the twenty-third annual report the authorities of the Confederation Life make a creditable showing. The total insurance in force is now $25,455,000 under 16,625 policies. New and revived business of the year, 2,248 policies for $3,528,000. The premium receipts of 1894 amounted to $807,735, and the interest earnings to $195,580, making the income of the company more than a million dollars. Handsome figures, these. More interesting still are the further figures as to amount paid policy-holders during the year, $435,251 (of which only $162,000 was for death claims), and paid stockholders $15,238. After paying these sums and the expenses, there was a balance of $353,419. The cash surplus of the company is now $301,678, apart altogether from capital stock The company is evidently resolved to do business safely, and not to pay too much for it. Doubtless they could do more business if they offered bigger commissions or bigger bonuses to agents, but it is easy to be too liberal in that dangerous direction.

TORONTO, FRIDAY, APRIL 19, 1895.

THE SITUATION.

Yesterday Parliament met at Ottawa, on the morrow of four bye-elections, in three different provinces. As between the two political parties, the result was an even division, with one gain to the Liberals, while on the Manitoba school question all four constituencies declared in favor of Federal intervention. Attorney-General Sifton, of Manitoba, was in Haldimand to protest before the electors against Federal interference, with the result that there was a majority adverse to his view of over 600. While the election was going on Archbishop Langevin, of Manitoba, was threatening excommunication as a penalty for Catholics seeking the abolition of Catholic parochial schools. If this means separate schools, such as are now in contention, it is a question whether the ecclesiastic has not exceeded the limits of his authority. On a secular question, all electors have a constitutional right to take their own course. All that the speech at the opening of Parliament vouchsafes on the Newfoundland question is the expression of a hope that the negotiations for union with Canada may have a favorable result.

During the week an extraordinary rise in the price of beef and petroleum has taken place in the United States. The public at once rushes to the conclusion that a secret combination has been formed by the three great packers firms, which are credited with wielding a united capital of $75,000,000. The rise in the price of oil is attributed to the Standard Oil Company. The parties on the defence, in both cases, allege scarcity, one of cattle the other of oil, as the cause of the rise of price. It is probable that both these causes, the influence of monopoly operating on a diminished supply, have been at work. Drought in Texas, in the last two years, has undoubtedly been a factor in lessening the supply of cattle. The rise in the price of beef in the States will not much help Canadian farmers, unless the restrictions on importations of cattle be relaxed, as they may possibly be.

The Sault Ste. Marie Canal, on the Canadian side, which is to be opened in May, may have a distinct effect on the traffic of the upper lakes. It will admit vessels drawing two or three feet more water than any which have been able to pass the American canals. The tendency has late been to increase the size of the vessels on these lakes to the greatest available extent, the economy of the change being proved by a great decrease in the cost of carrying. The depth of the draft of the vessels that can be used does not depend wholly upon the capacity of the canal; the St. Mary's River is not deep in all places, and may not be capable of passing the largest vessels that could go through the canal. It has before been subjected to dredging by the American Government, and is likely to be again. In the meantime, one effect of the new canal is likely to be to help the Erie Canal route. When larger vessels are used on the upper lakes than can pass through the Welland, their cargoes will become tributary to the Erie. The question of increasing the depth of our canals to twenty feet has been raised; we must add prematurely, since enlargement to fourteen feet has not yet been completed. We must dispose of the work in hand before we can seriously begin to think of going a step further, especially as the previous expenditure on the canals has not achieved all the success expected from it.

Among the bills passed by the Ontario Legislature, at the session which closed on Tuesday, was one which affects the assessment of vacant land in towns and cities. Any person owning such land to the extent of two acres will be entitled to have it assessed at the rate of farm or garden property. As a matter of fact, it cannot, as a rule, be utilized so as to be made rent-bearing for either of these uses. Pending the absence of demand for building purposes, there is practically no way of making the land yield any return whatever, and any tax imposed upon it has the effect of the diminution of the capital invested in it, for it was purchased with the proceeds of production just as any other property is. When such property is on the advance, it is not unreasonable to require the holder to advance some share of the probable increase of the selling price to be realized at a future time. To ascertain the real value, in the absence of an active demand from purchasers, is always difficult. When a "boom" comes, prices are highly artificial. In Toronto, the real decline, from boom figures, has probably been at least 40 per cent. Such properties often do not more than bring the amount for which they have been mortgaged. They have never yielded any return since they ceased to be cultivated and held for building purchases. In many cases the taxes must have made an enormous hole in the money paid for them. The law as it previously existed went far beyond the aim of those who avow their desire to confiscate all rent; the taxes have eaten into the capital put into land which yielded no rent. Such of us as will have to pay more taxes in consequence of the change, cannot pretend to be in love with it, though it would be difficult to deny that it is reasonable. In all cases where possible the taxes should bear a direct relation to rent. In England, McCarthy estimates that the rating or assessment bears about the proportion of six to eight of the rent, and Parliament some years ago assumed it at twelve to fourteen. A radical mistake was made in Canada when the assessment was put on the assumed value of the property instead of the rent it produces.

A brilliant achievement was the passsge of the British over the Malakand and the Shandar Passes, at one point 14,000 feet high, amid the snow, with machine and mountain guns to carry over. In the fighting that occurred the Chittral tribesmen suffered a good deal, with the result that Umbra Khan's forces melted away, and his day of power is virtually over. But the questions which was sure to arise, on the heels of success, are who is to succeed him, and what is to be done with frontier country which divides

British India from Russian Turkestan? Lord Roberts proposes that it should be retained, in plain language annexed; but the India Government thinks the proposal impolitic, as the conquered and discontented tribesmen would be ready to intrigue with and actively join the Russians in some emergency in which the northern frontier of India would be threatened with invasion. Great nations with unstable frontiers generally like to have a small country between them and their rivals, to act as a boulevard, to keep them apart in peace and to form a battle ground in war. The Chitral country, in this respect, occupies the same relative position between British India and the Russian territory that Afghanistan does, and it is a question whether it would be better for India that both these countries should be independent. If it could be kept under British influence there can scarcely be a doubt this would be best, for the nearer England and Russia approach in this part of the world, the more likely is a trial of strength between them to take place. In the Chitral, as there have been in Afghanistan, there are dynastic troubles to be encountered, and where there are rival claimants for the chiefship of power, instruments for foreign intrigue to play with are not wanting.

France is willing and anxious to use the undefined territorial dispute in the Upper Nile region as a leverage to get England out of Egypt. England is apparently preparing to turn the tables by making the evacuation of Egypt a means of getting France out of Tunis. There are no signs that England will loosen her hold of the Upper Nile valley. Appearances are very much the other way, in the earnest determination evinced to complete the Mombassa and Uganda railway.

$6,000,000 STREET RAILWAY SHARES: HOW WERE THEY FABRICATED?

When the Toronto Railway Company puts down the "cost of road and equipment, including real estate and buildings, $8,774,070.39," it is pertinent to enquire by what process this enormous "cost" was incurred. Do these figures represent a fair transaction or a series of fair transactions, or do they cover a gross abuse of the privileges of the company's charter? The charter gave the company power to "grant and issue its shares as paid-up shares in payment or on account of payment of the price agreed to be paid" for the rights acquired, in the first instance, from the city of Toronto; or it might give the persons from whom it was purchasing "credit on their subscriptions for shares." Here was a choice of methods by which payment for what the company was getting, in the shape of the road and the right to run it for thirty years, could be made. Both the property and the right of running the road were comprehended under the somewhat cloudy name of "rights." Which of the alternative methods was acted upon? The actual form adopted is not important. The real question is whether what was done was done in good faith and on business principles.

To begin with, the buyers and the sellers, as far as appears, were practically the same persons. They sold to themselves and they bought from themselves. Unfortunately, they had authority to do this; but what we contend is, that they were bound to make the sale and the purchase in good faith, on ordinary business principles; they were not at liberty to abuse the confidence of the Legislature which gave them this authority, and so to misuse their privilege as to make a colorable transaction, which would enable them to put millions of nominal share capital on the market over and above the fair value of the property and rights acquired. What does the authority to issue "shares as paid-up shares" imply? What obligation does it impose? It assumes that the shares were to be treated as if a hundred dollars had been paid for every one hundred dollar share. The term paid-up shares means shares fully paid up; not eighteen or twenty or twenty-five dollars paid on each share, but a hundred dollars on a hundred dollar share. True, the money need not be paid, but an equivalent must be got in exchange for it. A fictitious price could not be put upon the "rights" for which the shares might be given in payment, for that would be equivalent to treating the shares as not paid up, but as shares on which a percentage had been paid. Paid-up shares, for this purpose, must mean shares at their full or par value; and if they had such value no business man would exchange five or three of them for an equivalent not more than equal to one. Could the company rate the "rights" which they were buying, practically from themselves, at a purely fictitious price, for the purpose of unduly swelling the sum of the shares to $6,000,000? This is what we want to get at.

If the company acted on the other alternative and allowed credit on subscriptions for shares as an equivalent for the rights which they were selling to themselves and buying from themselves, the credit must be for the full amount of each share, and could not be merely nominal. The effect of giving it would be to impart to the shares the status of paid-up shares, or shares on which the last cent had been paid. And the question recurs: "Could the company rate the 'rights' which they were buying, practically from themselves, at a purely fictitious price, for the purpose of unduly swelling the sum of the shares to $6,000,000?" This is what we want to know. Mr. Trout's application to the Attorney-General, not yet answered, has this discovery for its object. In the necessity of preventing the company making current millions of fictitious capital will be found the reason and the justification for his intervention.

Does any human being really believe that the Toronto Railroad, with its equipment and 27 years of unexpired privilege, is worth $8,774,070.39, or anything approaching that sum?

FIRES ON THE FARM.

A correspondent who asks for some statistics of fire waste in country districts in Canada is referred to the sheet of fire losses by mutual companies published annually by the Ontario Government in the report of the Inspector of Insurance. In one year, 1892, there were 1,481 such fires, resulting in a loss of close upon $500,000 to the companies. In 1893 the number of fires so reported was 1,598, and the loss $580,000. What the loss was over and above insurance we can only guess. Several hundred of these fires were caused by lightning, about a hundred by incendiaries, while three hundred and sixty are put down to preventible causes. These causes are sparks, matches, defective flues, defective chimneys, lamps and lanterns, stoves and pipes, spontaneous combustion, etc., etc.

The summer months are the worst for fires on the farm, and it is easy to see why this is the case. People then use summer kitchens, which are generally board sheds with a sheet iron stove pipe (often rusted into holes) stuck through the wooden roof or side. The pipe gets red hot and chars the wood, or the sparks set fire to the roof or to the chips that lie close about the door. Commonly enough the farmer or his hired man lights his pipe with a match and throws the still burning match away. Suppose it falls into a pile of sawdust or shavings—a paper wrapper—a bundle of straw. There is a blaze, and what wonder. Hot ashes or

live coals are put into wooden boxes or else thrown upon the ground to be blown about by the wind. Lamps with broken glass, or no glass at all, are used in the barn. And so one might fill a page with instances of the many forms of carelessness as to fire.

OUR FIRE APPLIANCES.

Toronto has now *two* steam fire engines, the chairman of the fire committee of the city council, Mr. George McMurrich, having properly taken the responsibility of ordering another Ronald engine, which reached the city on Tuesday last. Yes, Toronto has two steam fire engines, and when the Merryweather comes she will have three. Detroit has eighteen, besides a fire tower and fire boat. To be on a par with Detroit as to relative fire-fighting appliances Toronto should have twelve steam fire engines. What fools those Detroit people must be (in the estimation of the Toronto city council) to go and fool away money in buying eighteen engines! Our council has appeared to think Toronto under the special protection of Heaven in the matter of fire, because this is such a truly good city. They weakened a trifle in that belief, however, on Sunday, January 6th, and were rendered even more unbelieving by the great fire of January 10th; but after the 3rd March—another Sunday, too—when nearly a million dollars more went up in smoke and the rates of insurance were raised, they abandoned the attitude of the waggoner praying to Hercules, and really did a little something to help themselves by ordering two fire engines. Will it need another sweeping fire in the east or west end to convince them that larger mains are needed? The repeated alarms for a week or two from boxes 24, 25, 26, are an indication that some one has an interest in seeing a fire devastate that part of the city.

SACRIFICE SALES.

Among the interesting questions which the Montreal Retail Dry Goods Association have from time to time discussed is the advisability of "Sacrifice Sales." When a merchant happens to strike a special bargain, he, as a usual thing, advertises the fact, and moved by motives of philanthropy, or other motives, invites his townsmen to share in the good thing. The store windows are placarded, and other merchants in the town who have not purchased at a bargain must either reduce their prices below a normal selling value or allow their goods to remain on their shelves. One merchant cuts on a special line, another offers something else at a "drive," and so on along the line until we find normal profits the exception and not the general rule. Many men appear to be in business for the harm they can do their competitors. They are trade wreckers. But one goal awaits such people—bankruptcy; but before they receive their merited deserts incalculable injury is done to the legitimate tradesmen who are unfortunate enough to come in their way.

THE MORTALITY EXPERIENCE OF THE CANADA LIFE ASSURANCE COMPANY.

The Canada Life Assurance Company was organized in 1847, and for nearly half a century it has been engaged in life insurance business. During all these years there have been no Canadian mortality statistics to which our companies could refer for guidance in the preparation of their premiums, or for dete mining the reserves necessary to be laid aside in order that their contracts may be carried to a successful termination. For these purposes they have have had recourse to British mortality experiences. In 1877 the mortality tables of healthy male lives, prepared by the British Institute of Actuaries, were adopted by Parliament as the Canadian standard of valuation, the rate of interest being placed at 4½ per cent.

It has long been observed that the actual death rate among our companies in Canada is less than the expected rate according to the Hm. table, or according to tables prepared from American statistics. The mortuary statistics of Canada, as published in the Dominion Census of 1891, also show a very low death rate as compared with similar statistics of other countries. That Canada is one of the healthiest countries in the world is now confirmed by the statistics compiled by the Canada Life Assurance Company, giving its experiences with its insured lives during the period of forty-six years, from 1847 to 1893. This important and laborious investigation has been carried out and brought to a successful completion by Mr. Frank Sanderson, the assistant of President Ramsay in the actuarial department of the company.

Female lives were excluded from this experience, as were also all the lives that were accepted by the company at an extra or rated-up premium. The investigation therefore was confined to determining what rates of mortality, lapse, etc., have prevailed among male lives which were accepted after medical examination as healthy or "select," at the usual rate of premium.

The system adopted for tabulating the observation is what is known as the "Policy Year Method." By this method each risk is traced from anniversary to anniversary of the policy, and each death is allocated to the exact policy year in which such death occurs. We are thus enabled to determine the exact death rate during each year of assurance. From observations tabulated by this method, what is known as "Select Mortality Tables" may be prepared, and also tables showing the effects of lapses.

In tabulating the discontinuances, Mr. Sanderson has adopted a suggestion made by Dr. Sprague, the eminent Scotch actuary, in a paper read before the Institute of Actuaries about a year ago, and has separated the withdrawals by lapse and surrender from those discontinuing by reason of their policies maturing or expiring in the case of endowments and term assurances. This renders the statistics more valuable in calculations of rates by voluntary withdrawals.

In the volume issued by the Canada Life, the original Table of Observations from which the mortality and other tables are deduced, is printed in full and occupies about twenty-eight pages. This adds very much to the value of the work, as it furnishes a source from which much statistical information may be derived. A Table of Mortality has been formed from the original observations and graduated by means of Makeham's formula. By comparison with the mortality experiences of companies in England, Scotland, United States, Germany and Australia, it is shown that the lowest rate of mortality of all these is that experienced by the Canada Life. The number of deaths in the Canada Life from ages 20 to 79 inclusive, amount to only 71.2 per cent. of the number expected by the Hm. Mortality Table; to 78.8 of the number expected by the American Experience Table, and to 95.1 per cent. of the number expected by the tables of the Australian Mutual Provident Society. This favorable experience is not confined alone to the early years of assurance, but is maintained when the first five years of assurance are excluded.

It is interesting to note the effect which a low rate of mortality has upon policy values. It does not follow necessarily that because the death rate in a mortality table is much lower than it is in the standard table, the policy

reserves derived from the table with the low death rate will be less than the standard reserves. In fact the opposite is often the case. The following table will give an indication of how the Reserves, calculated by the Canada Life Experience Table, with 4 per cent. interest, compare with those of the American 4, the Hm. 4, the Hm. 4½, and the Carlisle 4 :

RESERVES FOR ALL LIFE POLICY OF $1,000.

Age at issue 30.

Duration. Years.	Canada Life. 4 p.c.	American. 4 p.c.	Hm. 4 p.c.	Hm. 4½ p.c.	Carlisle. 4 p.c.
5	48.12	45.91	51.52	47.27	45.42
10	104.52	101.01	110.10	101.81	99.59
15	169.53	166.37	178.17	165.27	163.88
20	243.00	242.33	253.43	238.56	223.11
25	323.96	327.13	335.80	318.83	311.00
30	410.54	417.84	423.14	405 11	402.70

RESERVES FOR 20-YEAR ENDOWMENT ASSURANCE POLICY, $1,000.

Age at issue 30.

Duration. Years.	Canada Life. 4 p.c.	American. 4 p.c.	Hm. 4 p.c.	Hm. 4½ p.c.	Carlisle. 4 p.c.
5	175.67	170.48	172 86	165.75	169.75
10	392.48	384.61	386.78	375.64	384.18
15	676 47	654.96	656.06	646.15	651 60

It will be observed that the values derived from the Canada Life experience are greater both for life and endowment assurances than those obtained from the Carlisle and American tables. As compared with the Hm. table, the reserves required by the Canada Life experience are less in the case of life policies and greater in the case of endowment assurances.

It may be supposed that a very low rate of premium would be sufficient for an all life policy when the rate o mortality experienced is very low. A calculation by means of the Canada Life Experience Table shows the net premiums required vary from 83 per cent. at age 20 to about 87 per cent. at age 60 of those required by the Hm. Table. The difference is thus seen to be small, considering the difference in the mortality rates of the two tables.

Mr. Sanderson has deduced from the observations a number of tables by which the effects of selection are clearly shown. These confirm what has before been brought out in many similar investigations, that the rate of mortality among insured lives depends upon the time that has elapsed since entry, as well as upon age; and that as the life grows older and further away from the point of selection, there is a rapid rise in the death rates.

The facts brought out regarding the lapses show that out of 12,891 discontinuances by surrender and lapse in the first 46 years of the Canada Life's existence, 6,077 withdrew within one year (or at the most within one year and a-half) from entry, and that after the second year a very low lapse rate was experienced.

As this is the first and only investigation of the kind that has been made among insured lives in Canada, the thanks of the actuarial profession will be due to the Canada Life Assurance Company for placing within their reach so complete and valuable a collection of data.

TREND OF TRADE.

Those optimists who last winter were bold enough to predict a revival of industry with the approach of spring, have not been disappointed. The course of the markets during the last several weeks determined beyond disputation that trade circles are feeling renewed vigor. Mild weather and the approaching opening of navigation are encouraging features, and from this time forward we may expect each week to bring with it increased commercial activity. Wheat is firm and has advanced several points during the week.

Briskness in the grocery trade is unusual for this season of the year; none of the staples find any special movement, orders being of a general nature and extending over a long list of commodities. The dry goods jobbing trade, which in April is confined almost exclusively to sorting up business, is fairly active. Hardware merchants report the trade movement this last fortnight as very satisfactory. In the provision trade the market is glutted with dairy butter, eggs are in abundant supply, while hog products show a firmer tendency. The "bulls" are in possession of the beef market. Hides continue to be firmly held at recent advances. Leather is active, cutters having apparently at last decided to accept the views of tanners concerning the value of this commodity. Fall samples in boots and shoes are in display, and advanced prices are the general rule. Merchants are paying 20c. the pound for fleece wool, and expect that the new clip will open at about this figure. The 1894 clip brought 17c. per pound when first offered on the market. While the lumber trade is not as active as could be desired, the movement is increasing, and prospects growing brighter.

BOOTS AND SHOES ADVANCING.

Montreal manufacturers have at last come to the conclusion that they must pay increased prices for leather. Some cutters were fortunate enough to purchase their snpplies for the fall trade before the rise in the market began, and are consequently happy in the prospects of good profits. For, with scarcely an exception, manufacturers of foot wear are advancing the list prices of their goods. This has become a matter of necessity, for the great majority of the manufacturers are compelled to buy their leather on the basis of values recently established higher. In Montreal last week a meeting was held in the committee room of the board of trade builning, at which representatives of the following firms were present: James McCready & Co., J. & T. Bell, the Ames, Holden Co., Ltd., the Thompson Shoe Co., Jas. Leggatt & Co., Z. Lapierre & Co., James Whitman & Co., James Linton & Co., George T. Slater & Sons, Michaud, Lefebvre & Co., and Fogarty Brothers. Mr. Charles F. Smith occupied the chair. It was the general opinion of the meeting that higher prices were a necessity. The question of forming a section of the board of trade was mooted, and met with the approval of nearly every one present. It is expected that steps will soon be taken towards organization.

TRADE WITH AUSTRALASIA.

Special Correspondence of the MONETARY TIMES.

The trade returns of New South Wales for the year 1894 have been given out, and they illustrate as well as anything can the prevailing conditions of dulness and restricted trade. The value of imports is £15,801,641, and of exports £20,577,673. This is a decline of £2,305,394 on imports and £2,343,550 on exports as compared with 1893. The total trade for the year, £36,379,314, is lower than that of any previous year of the decade.

In 1884 the aggregate was		£41,738,206
" 1885	"	40,487,568
" 1886	"	37,031,064
" 1887	"	37,693,067
" 1888	"	42,149,407
" 1889	"	46,157,991
" 1890	"	44,660,941
" 1891	"	51,377,417
" 1892	"	42,748,773
" 1893	"	41,028,258

The following are the countries with which this trade was principally done:

IMPORTS.

From	1892.	1893.	1894.
Norway	£ 22,007	£ 28,106	£ 29,193
Belgium	227,363	129,114	115,119
France	77,436	49,436	70,649
Austria	.....	20	1,304
Germany	581,402	373,233	345,364
Italy	27,353	16,981	24,124
United States	823,522	526,331	542,427
Great Britain	8,883,983	7,218,000	5,983,189
Canada	10,655	33,316	52,740

The Canadian figures are not vast, but their growth shows movement in the right direction, and they furnish the only instance where the imports were much larger in 1894 than in 1892:

	Exports		
	1892.	1893.	1894.
Belgium	£ 951,570	£1,121,606	£1,121,822
France	806,693	1,134,072	1,037,440
Austria	.....	.....	.....
Germany	1,017,456	979,898	917,310
Italy	20,898	47,236	27,648
Netherlands	94,425	50,841	37,577
United States	1,529,980	626,566	374,541
Great Britain	7,653,915	8,269,507	7,956,377
Canada	37	8,374	14,523

The most remarkable feature of this table is the comparative reduction in the exports to the United States, greatly to the disappointment of the people of this colony, who were led to believe that the removal of the duty on wool would lead to a much larger demand in this great staple.

Exports to Canada also show a decided advance. The gain in imports from the United States was in manufactured goods, wearing apparel, blacking, carriage makers' materials, lubricating oils, writing paper and books, paper bags, preserved and dried fruits, plated ware,

hardware, machinery, leather and paraffine wax. There was a large decrease in the importation of sewing machines and carriages, owing to previous overstock and the depression. In almost all the branches of manufacture in which that country has increased its trade, Canada ought to be able to follow. In preserved fish the trade of the United States fell from £19,023 to £14,754, while that of Canada advanced from £3,719 to £4,335. In dressed timber the trade was:—

	1893.	1894.
Canada	£ 330	£ 1,786
United States	2,605	2,170
In rough timber—		
Canada	16,373	18,213
United States	50,915	45,729

The Canadian advance in dressed timber was largely in butter boxes, and unfortunately the refusal of the butter makers to use boxes made from spruce will destroy that trade in the future unless some means of thoroughly deodorizing this wood can be found. A new item in the imports from Canada which will be of interest to British Columbia is hops, of which 11,913 lbs. were received here. It is to be feared that the price much disappointed shippers, owing to the great drop in prices last year. The hops sent were represented to be rather strong, and unequal to those from Tasmania. A sample of East Kent Goldings, which were tested by an expert, were found to be very good and almost equal to the English hop. A brewing would be necessary to make the test a thorough one. If a practical test proved them to be equal to the expectancy from its appearance, it would be worth from 20 to 24 cents per pound, a better price than can be got in any other market.

A quantity of malt malted in England from Californian barley has been received in Sydney and sold to local brewers, who report favorably on it, although the grain is thin and the extract derived from it is small. The same grain malted in California had previously been tried here with poor results. Malting cannot be done in Sydney to good advantage on account of the climate, and the same reason is given for the failure to make good malt in California. As the North-west territories are producing a fine sample of two-rowed barley and the climate is suited for malting, it is to be hoped that a market for the Canadian product can be found here.

The export trade from the United States is done by sailing vessels from New York. From two to three ships are usually dispatched a month. In January six so sailed. Their cargo was a miscellaneous one. Among the articles sent is a quantity of pine lumber, plaster of paris and grindstones. These articles were originally doubtless the produce of Canada. Occasionally ships come here loaded with spruce and pine from the St. Lawrence. A market has already been found in Australia for rubber goods, cottons, saws, carriage material, musical instruments and agricultural implements. There is no reason why these goods should not be utilized as cargo for a line of sailing vessels, sailing from the St. Lawrence monthly. Cheap freight is an important item in fixing prices of goods for Australian markets, and this would give the cheapest available freight for Canadian manufacturers.

The Canadian Commissioner is desirous of opening a room which could be utilized as a combined sample and showroom for Canadian products. The goods could thus be brought to the notice of the trade and also to the notice of consumers, as it would become a free exhibition of Canadian goods that would be sold in this market. This would cost something for rent and caretaking, but if the manufacturers co-operated it doubtless would be found to be the cheapest and most effective method of securing a connection and a market.

The shipment of live cattle to England, which was begun in the latter part of last year, is now attracting a great deal of attention here, and three ships with deckloads of cattle left this port this month. The estimates are that cattle can be laid down from Australia to London at a trifle over £15 per head. These estimates omit a number of expenses that in large operations must be considered, and it is doubtful if, at present rates of freight, insurance, etc., the total cost, calculating cattle at £5 per head, will not be nearer £18. For lack of ship accommodation, even if profits are as estimated by optimists, the number that can be carried will not be large, and the obstacles to be overcome discourage the belief that any great number will be sent to England for some time. This is well for Canadian feeders, for Australia has some 12,000,000 head of cattle, of which less than 2,000,000 are dairy stock. One colony alone, it is said, can furnish three-quarters of a million head per annum if there was a means of getting them to the London market at a profit.

Australians are not altogether satisfied with their banking system, and the leading papers frequently refer to the Canadian system generally very favorably.

Sydney, New South Wales, 18th March, 1895.

* * *

—It is reported that enquiries have been lately made in Montreal for an ocean freight quotation, for 6,000 tons of American rails, to be shipped to England *via* that port.

BRITISH WOOD MARKET.

While the prices of timber in Old Country markets continue low, trade is quiet, and there is abundant supply of nearly all kinds of wood, it is still true that the movement during March was more satisfactory than for some months previously. Farnworth & Jardine's Liverpool circular of 1st April says the tonnage arriving from Canada to this date from all places during the years 1893, 1894 and 1895 has been 16,952, 19,750 and 24,915 tons.

Among Canadian woods, in both waney and square pine, little has been doing, values are unchanged, and the stock is ample. Red pine has been more enquired for, but prices rule low. Oak has moved off more freely, but prices are unchanged, and the stock is still too heavy. *Ash.*—The arrivals have been from the United States; the demand has been fair, but the stock is too heavy. Elm has moved off slowly; there is no change in value, and the stock is moderate. *Pine Deals.*—The deliveries have been disappointing; there is no change in value to report, the stock remains much too heavy.

New Brunswick and Nova Scotia Spruce and Pine Deals.—The arrivals have consisted of 1,200 standards during the past month, against 1,174 standards and 317 standards corresponding time in 1894 and 1893. The deliveries have been fair, but prices rule low, and the stock is still too heavy. A number of contracts have been made for the coming season, but at low rates.

Birch.—The arrivals have consisted of one parcel of logs from St. John, which was sold by auction at a fair rate. The deliveries have been small, and the stock is still ample. Planks have not been imported; there is rather more enquiry, but prices still rule very low, and the stock too heavy.

United States Oak.—Of logs only a few small parcels have arrived, which have gone direct into consumption; the stock is still too heavy and prices low. Of oak planks there is little change to report; values do not improve, and the stock is quite ample.

British Columbian and Oregon Pine.—This wood still moves off very slowly and the stock is too heavy; there is no change in value to report.

United States staves have arrived freely, but have been in fair request without change in value.

Baltic and European Woods.—The arrivals during the past month have been 15 vessels, 9,951 tons, against 10 vessels, 4,771 tons, during the like time last year. Of fir timber there have been no arrivals; the deliveries have been small and the stock is ample. Red and white deals have not been imported; there has been a little enquiry, but the stock is much too excessive. *Flooring Boards.*—The import has been large, but the deliveries have been disappointing, and the stock has accumulated and is now too heavy. Contracting is very slow, and it is difficult to make sales without reducing values. Masts and spars have not been imported; there is no change in value.

PRINCE EDWARD ISLAND LOBSTER PACKERS.

Merchants have for some time been complaining of the poor quality of canned lobsters offered here, and when the new pack arrived last season several consignments were refused. A Prince Edward Island paper publishes an interesting interview between a local packer and a prominent English importer, in which the latter severely criticises the methods of P. E. Island lobster packers: "In the first place the P. E. Island packers use a poor quality of tin plates for their cans, and the lobster becomes black and unsightly. Many packers now try to obviate this by lining their tins with paper, but notwithstanding this precaution, which is certainly good, a plate thickly plated with tin is used; the result is that the fish becomes discolored in a few months. Soldering is largely done with spirits of salt, etc., a drop of which going through on to the fish will turn the whole contents of the tin black. If rosin could be used generally, it would be a great point gained. Sufficient care is not taken to exclude dead fish, as lobsters should be alive when thrown into the boiling pot. A good many P.E. Island lobsters have a sour smell, from imperfect cleaning, or possibly from the water in which they are boiled not being changed sufficiently often. Prince Edward Island packers have a habit of packing their tins with large meat at the top and bottom, and filling in between with small "shredded" meat, often very discolored and evidently consisting of the sweepings of the packing board. The trade here wants no stale or unsound fish. At present, lots of lobsters are so irregular that a buyer has to draw a great many samples to get an idea of what a lot of 200 or 300 cases is, and even then he may find a lot turn out very different to what he had expected. If all lobsters could be depended on as sound and merchantable, and could be graded, say, 1st, 2nd or 3rd class, according to whether they were all tail or claw, or contained a greater or less proportion of small meat, we should have made a very great step towards putting the trade on a satisfactory footing. A Government superintendent might be employed to oversee the packing, as I understand this has worked most satisfactorily as regards your cheese industry

SOME ENCOURAGEMENT TO ARTISTS.

The Government of Ontario has done a sensible thing in appointing a committee of members of the Legislature to order or select pictures by Canadian artists to decorate the Legislative buildings. The move is made none too early; for assuming that only a limited sum will be available each year for the eminently proper purpose mentioned, it will take some years to fill with worthy pictures the spaces on lofty walls which now look so bare. The committee is composed of Mr. Speaker Balfour, Hon. Mr. Hardy, Hon. Mr. Gibson, Hon. Mr. Harcourt, Messrs. Garrow, Hobbs, Whitney, Caven, McPherson, Oliver Howland and Dr. Ryerson. We are not made aware exactly what scope this committee is allowed. But we trust that no time will be lost in procuring oil paintings of former Speakers to replace the sombre crayon portraits of those functionaries which now throw a chill over what ought to be a handsome and cheerful room. The motto over the fireplace, "*Hæc olim meminisse juvabit*," cannot by any latitude of fancy be made to refer to those funereal-looking effigies. Then we would venture to suggest that the decorations of some other rooms in our legislative halls are sorely in need of improving. A reading-room with elaborate oak woodwork and an onyx mantelpiece is not beautified by hiding the walls here and there with the cheapest of cheap German lithographs, however loyal the subjects. Nor are the grotesque plaster casts that at present surmount the shelves of the library quite the sort of thing to add dignity to what is a handsome, if plain, chamber. It is quite understood that everything cannot be done at once, and one is prepared to be told that the Government must be economical. Indeed, it has been economical with a vengeance in this matter, for the hundreds appropriated should have been thousands. At the same time Ontario is not a poor province, nor is Toronto a backwoods town. There are the buildings, with lofty and stately chambers. It is not consistent with the dignity of the place or its occupants that the decorations should be cheap and tawdry. The step which has been taken toward giving Canadian painters a chance to embellish a public building is a welcome encouragement of art. And we venture to think that Ontarians at large will not grudge any reasonable sum spent annually in this direction.

A SPECIMEN ESTATE.

What is called in the letter of a firm of American attorneys "A deliberate steal," is brought to our notice by one of the victims. A storekeeper in Minnesota named Simon Jacobs appears to have planned, some time last year, a scheme to obtain a lot of goods on credit and realize on them without paying for them. And the notice of the district judge, dated at St. Paul on 23rd March last, indicates that the scheme has been well carried out. Mr. Jacobs purchased last summer goods to the value of many thousands of dollars. At least he owed $30,000 in all, and of this some $20,000 was for goods bought within ninety days of his subsequent failure. Then he made an assignment of his estate in October, 1894. The assignee's statement shows that the whole sum realized by him was $668, of which preferred claims and expenses absorbed $504, leaving the pitiful amount of $164 to be divided amongst creditors. Several firms of Minnesota lawyers made efforts to secure something for creditors, but, as one of them writes, "there appears to be nothing in sight. Most of the accounts are small, running from $50 to $200 or $300, and no one client has felt disposed to put up the money necessary to successfully fight the steal." Thus a fraction of a cent in the dollar is all that remains for creditors.

The firm which sends us the correspondence in this notable case is the Dominion Suspender Co., of Niagara Falls, who write: "Do not ever again mention anything about crooked Canadian failures in comparison. Here is something that beats anything we have ever had. We thought it too good to file away before letting you see it. This is a sample of one of the many debts we have had to deal with in the great United States of America. This party was rated in the mercantile agencies from $10,000 to $20,000 All the assets, when the creditors, to the amount of $20,000, came to take hold of it, was about $1,000. As you will see by the letter, this realized $668, and attorney and assignee got a big part of it, $503, leaving the magnificent sum of $164.28, to be divided among the creditors to the amont of $20,000. We, fortunately, were not in heavily."

We are not sorry to be unable to recall any Canadian case of dishonest failure quite as bad as this. That Jacobs was able to make so nearly a complete steal—he stole 99⅘ cents out of a possible 100—indicates, when the number of creditors is considered, that it is as easy to obtain credit in the States as it is in Canada. It is natural to ask, can anything be done in a case of the kind to recover from this wholesale swindler some part of his booty? Something might be done, but it is necessary first to spend money for proceedings to make him disgorge; and few care to undertake so thankless, if not hopeless, a task. There was a case four or five years ago where Canadian firms, McMaster & Co. and Caldecott, Burton & Co., if we remember rightly, joined hands and engaged G. C. Gibbons, of London, to pursue a rascally swindler, named Draper, of Winnipeg, as far as San Francisco, and had him arrested, compelling him to disgorge $16,000 in notes. In this instance, it is well to recall, the San Francisco judge held, following New York decisions, that the law of the place of remedy (Canada) must govern, that in fact it made no difference where the fraud was committed. Thus our wholesale merchants may see that they have a remedy in American courts against absconding Canadian debtors, if they choose to take the steps necessary to enforce restitution.

EASY-GOING BUSINESS.

We have seen a statement of the affairs of Aikenhead & Sloan, who began business two years ago on Church street, in Toronto, as handlers of fruit by the carload, and afterwards dealt in fish. There are between twenty and thirty creditors to the amount in all of close upon $6,000, and the assets are $300 or $400, according to the assignee. We have also seen the evidence taken in the Court of Chancery as to the origin of the firm. Aikenhead swears that they put no money of their own into business. Sloan borrowed from his grandfather $1,500, on which they started. Aikenhead borrowed $500 from a man in Goderich named Gibson a year or two later, on a note backed by his (Aikenhead's) father. This $500, A. says, does not appear in the books of the firm because "I did not think it necessary to put it in," but it has not been paid back. In the first few weeks of business the firm lost $1,340 of their $1,500 capital by shipping apples to Minneapolis. Then Sloan borrowed $1,500 from his uncle on a "straight note," having previously told the mercantile agency an entertaining story about their going to put $4,500 into plant and about his owning a patent on Muskoka land, and a patent knob "supposed to be pretty valuable." Sloan declares their credit was pretty good when they started, that they did a business of about $1,000 a month, he being principally out on the road. He admitted that he couldn't pay his note to his grandfather when it came due, and he could not pay the note to his uncle when it came due, but that the firm was getting into debt and incurring further liability all the time, and this he seemed to think all right.

In answer to questions 357 to 363 of his examination in court, Sloan relates that the first goods the firm bought on credit were a car load of lemons got in Montreal, for which a 30-day note was given They borrowed from a cousin of Sloan's the money to pay this note; so that the firm had borrowed from Sloan's grandfather, father, uncle and cousin, while Aikenhead borrowed on the security of his father's name. But these parties, it seems, do not rank as creditors.

Mr. Aikenhead, the evidence goes on to recite, used to draw no cheques for his personal expenses, "he took the money out of the till as he wanted it." They were paying $1,000 a year rent, were this reckless firm, employed a bookkeeper and also a salesman round town, and yet their business was only about $1,000 a month. Indeed they were virtually insolvent in the first year of their business, but this did not prevent their buying where they could on credit.

The lawyer who cross-examined Aikenhead questioned him as to statements of over-estimating their assets. A. replied: "I think he (Sloan) said the patent (knob) was worth $5,000." This was one of the assets, so-called, on which the mercantile agency were to rate him up, if they were soft enough to do so. But this precious knob never realized 5,00) cents, and is lying in Mr. Dick's office to-day, Sloan says. Why cannot such happy-go-lucky procedure as this be punished in some way? All that creditors will get out of this estate when the assignee's expenses are paid may be three or four cents in the dollar. What right have such people as the members of this firm to be in business, preying upon the commercial body? And why do twenty or thirty firms give credit to such men?

SOREL CHAMBER OF COMMERCE.

At the general meeting held on April 8th, the president of the Sorel Chamber of Commerce, Mr. C. O. Paradis, delivered an address. He admitted that the report he made a year ago was very optimistic. "It seemed to me then," said he, "that things were about to improve; that the railways would succeed in their future projects; that real estate in the town would resume its normal value; that the Government would respond to our reasonable demands in naming a resident judge for the Richelieu district; and that, in a word, commerce would receive a new impulse within a very short time." Although Mr. Paradis does not find his forecasts entirely realized, it is because of the uncontrollable circumstances, unhappy and unexpected events, the two great enterprises on which the city counted so much—the railways—having been arrested in their progress. "Gentlemen," the president went on, "the Government has just voted $50,000 for the reconstruction of the bridge across the river Yamaska, and we believe ourselves right in sup

posing that the railway will be re-opened to traffic, with its marked advantages to the commerce of our city, bringing in the farmers from the eastern townships, establishing besides its coal depots among us. As to the other iron road, the Provincial Government has also voted $50,000 for a bridge across the river Richelieu, and it is supposed that in a few weeks the work will be begun. Another question which has agitated this chamber: I congratulate you upon the large amount of work done during the winter in the usual yards, for the Richelieu Company, the Sincennes & McNaughton line, and the Public Works Department. In closing, permit me to offer you my most sincere thanks for the marks of confidence and sympathy of which you have given me evidence during the three years that I have had the honor to occupy the presidency in this chamber." This address was received with applause, and the president's report unanimously adopted. Also the report of the treasurer, showing a balance in hand. The officers and council of the previous year were unanimously re-elected, as follows:

President—C. O. Paradis.
Vice-President—L. T. Trempe.
Secretary—W. L. M. Desy.
Treasurer—J. A. Proulx.
Council—Cyrille Labelle, J. U. R. Latraverse, L. Lacouture, L. S. Robitaille, Ph. Beuchemin, C. J. C. Wurtele and Arthur Langlois.

RAT PORTAGE BOARD OF TRADE.

The annual meeting of the Rat Portage Board of Trade was held on Monday, 8th April. A prominent part of the business of the meeting was the election of officers, who were chosen as under to serve for the current year:—

President—George Drewry.
Vice-president—D. C. Cameron.
Treasurer—A. H. Dickins.
Secretary—F. J. ApJohn.
Council—Messrs. Fardner, R. A. Mather, J. M. Savage, J. T. Mackay, J. W. Colcleugh, A. Carmichael, C. W. Chadwick and W. Margach.

STAR LIFE ASSURANCE SOCIETY.

Established in the year of our Lord 1843, the Star Life Assurance Society last month held its fifty-first annual meeting. The extent of this company's operations will appear when we say that its total assurances up to the close of 1894 amounted to £13,926,500, equal to more than sixty-nine millions of dollars. Its business is progressive, too, as we find from a comparison of some totals in its two latest years:

	1893.	1894.
Total in force	£13,288,227	£13,926,500
New policies	4,125	4,902
New assurances	1,339,925	1,510,462
Annual income	542,255	592.060
Assurance and annuity fund	3,527,785	3,572,564

The amount paid to policy-holders in respect of claims was last year over a million dollars (£208,289), besides which over a hundred thousand dollars (£25,924) was distributed in the shape of bonus additions to policies. After payment of all expenses and claims in 1894, the balance of income over expenditure is £246,190. From this amount the sum of £201,412 has been paid in respect of the quinquennial profits December 31st, 1893, to the shareholders and to policy-holders who have commuted their reversionary bonus for an immediate cash payment, and the balance has been added to the assurance and annuity fund, which now stands at £3,572,564, or more than seventeen millions eight hundred thousand dollars.

NATIONAL ASSURANCE COMPANY OF IRELAND.

The fire premiums of this company for last year amounted to £279,932; the fire claims to £175,938, equalling 62.85 per cent. of the premium income, and the commissions and expenses to £86,102, equalling 30.75 per cent., which leaves something like 6½ per cent. to the good. The surplus on the year's fire account, £17,891, is added to the fire reserve fund, which is thereby swelled to £99,082 sterling. In the life department the sum of £1,889 has been added to the funds by the operations of the year. The transactions of 1894 enable the payment of 5 per cent. dividend and the carrying forward of £6,795. The annual meeting was arranged to take place on Wednesday, 10th inst., at No. 3 College Green, in the good old city of Dublin. Many in Canada will remember the visit, a few years ago, of Mr. Harold Englebach, the actuary and secretary, and will be glad of another call from that popular gentleman.

The Halifax Board of Trade is seeking to obtain an extension of custom house business hours. Halifax merchants think that duties should be payable between nine and four, instead of ten and three as at present.

ATLAS ASSURANCE COMPANY.

The eighty-seventh annual meeting of this company was held in London last month, and the eighty-seventh annual report was presented. The company does both fire and life business, but it is with the fire branch we in Canada are principally concerned. The year's fire business of the Atlas showed a marked improvement over 1893, the premiums, £362,853 net, were larger and the losses much smaller, being only 54.1 per cent. of the premiums this year, as against 68.4 per cent. in 1893. The profit balance of last year is £59,794; from this a dividend equal to 22 per cent. upon the original paid-up capital of the company is declared, and £31,000 added to the fire fund. The fire and reserve funds now stand at £347,325, equal to say $1,236,000. The total assets of this old and strong company now exceed two millions of pounds sterling. The life assurance funds are $1,447,617.

FOR GROCERS AND PROVISION DEALERS.

The Cuban sugar market is very firm.

The oyster fisheries of Tracadie, N.B., are being re-planted.

The Kent County Dairying Company, N.B., are building a cheese factory.

The inhabitants of Nelson, B C., are drinking beer brewed by a fellow townsman.

The farmers of Kouchibougac, N.B., are also moving in the direction of a cheese factory.

BRIGARTINE "Boston Marine," from Barbadoes, discharged a cargo of molasses at St. Stephen last week.

There is talk of a condensed milk factory in Sherbrooke in connection with the proposed fruit and vegetable cannery.

The Canadian Pacific Railway Co. have agreed to give special rates and accommodation to British Columbia fruit growers.

The first season's carload shipment of fresh salmon was made from New Westminster, B.C., on April 4th. From this time on it was the intention of dealers to make weekly carload shipments of salmon to the east.

Niagara fruit growers advocate the establishment of a daily fruit market in Hamilton, separate from the central market, and think the old Royal Rink at the corner of Catharine and Main streets would be a first-rate distributing point.

The Brackman & Ker Milling Company, of Victoria, B.C., have, it is said, decided to establish an oatmeal mill and elevator at South Edmonton, Alberta. T. W. Lines has been admitted into the firm, and will manage the Edmonton mill.

The Canadian Pacific Railway will build a warehouse for the storage of flour at Windsor, with a capacity of 5,000 barrels. This action is the result of the company's intention to run a steamer to this port from Fort William and Port Arthur.

On account of the death of Mr. George Childs, the respected president of the Wholesale Grocers' Association of Montreal, the management and exhibitors of the Food Fair and the members of the association postponed its opening in the Windsor Hall until Tuesday night.

The maple sugar season has begun very late this year in the Eastern Townships of Quebec, but last week the sap began to run with a will, and many farmers were busy making sugar. One man at Sutton, Richard Wyatt, made 950 pounds of sugar on Thursday last.

It is said that Hon. Mr. Costigan, Minister of Fisheries, will order an immediate investigation of the stocks of canned lobsters still held at Yarmouth, and that some considerable seizures will be made if the law prohibiting the catching of lobsters under nine inches in length is being evaded.

J. W. Dearman contemplates making a new apple-packing crate of his own invention in Wolfville, N.S. The package is in the form of a crate, and each one holds about half a barrel of apples; they are well designed, neat and airy, and well suited for their purpose. They are lined throughout with paper, and so constructed that the fruit is free from pressure when stored on shipboard.

Some days ago a mortgage on the premises of the Kingsville Preserving Company was foreclosed, and the whole is to be sold on Monday next. The failure of the concern is attributed to the control being given to people, with large salaries, not properly acquainted with the trade and not economical. The situation of the factory is an admirable one as far as regards fruit and vegetables for canning.

The farmers of Manitoba are taking hold of dairy products in earnest this spring. A correspondent writing from the west says that 200 new cheese factories are to be erected in the province. Although it is difficult to believe that these figures are not an exaggeration, we must remember that Manitoba is a large province, and its inhabitants never do anything by halves. Should Manitobans enter into cheese produc-

tion on an extensive scale, it is but reasonable to anticipate a fall in the price of Canadian cheese. The importation of Australasian fresh meats into London, Eng., has already put a damper upon the spirits of Canadian exporters of cheese, and any material increase in the output will not relieve the outlook of its disagreeable features.

DRY GOODS JOTTINGS.

The first Good Friday—Robinson Crusoe's man.

A bed-spring factory will in a few days be opened at Fonthill.

Seven million miles of thread, it is said, are annually used in the United States.

The Bayliss Woolen Co., of Mount Dennis, Ont., recently suffered a $800 loss by flood.

Extensive improvements will shortly be made to the Walton woolen mills in Dunnville.

"Too much manufactured stock on hand," is ascribed by the Moncton papers as a reason for the closing of the cotton factory of that town.

April and May are good umbrella months, and Messrs. Irving & Co., manufacturers, 368 Yonge street, report a rush of orders. Mr. Geo. T. Irving, who is at the head of the firm, is deserving of good treatment at the hands of the trade.

Some American authorities predict crépons for the fall trade, but jobbers here are inclined to look askance at this view. Undoubtedly some black crépons will be called for in the autumn trade, but present indications point to all wool cheviots and serges as leaders.

Toronto merchants are almost unanimous in the opinion that the spring trade of 1895 totals a higher value than that of last spring. In view of the fact that during the year there has been a considerable shrinkage in values, this must be taken as indicative of a satisfactory state of things.

The lowest price charged by Worth for an ordinary silk evening gown was $250. The coronation robe of the Dowager Empress of Russia he charged $20,000 for, and another costume of silk, trimmed with "real" lace, for a South American heiress, this creator of fashions charged $25,000 for.

If Canadian tweed manufacturers continue to show from year to year an improvement in pattern and texture such as this season's styles display, the word "Canadian" may some time become a recommendation, instead of a handicap, as it unfortunately has been hitherto. At 25 cents and 37½ cents a Toronto jobber is showing two lines of Canadian tweeds that cannot be surpassed in value by imported goods.

The Crown sued the Woolen Mill Company of Montreal, says the *Star*, for $16,000 for damages done to the Lachine Canal by the erection of their mill. The company, on the other hand, put in a counter claim for $12,000 for damages done to their mill by the Government. The counter claim was thrown out, Justice Burbidge deciding that he had no jurisdiction to hear it. The main case has not yet been disposed of.

A volume of some 260 pages, enclosed in a beautiful lithographed cover, is styled by the publishers of the *Draper's Record*, London, Eng., "a special spring number." Color-printing is destined for great things, and will be found especially useful in trade journalism. The spring patterns of ribbons, laces, garments and millinery lose none of their beauty in the color-prints of the *Draper's Record*. A Canadian merchant who wishes to keep in the closest touch with English textile centres could do nothing better than take that journal.

The farmers of Manitoba and the Territories appear to be only too willing to adopt anything that will relieve them from the position of exclusive wheat growers, which for the most part they now occupy. The cultivation of flax has yielded good profits, and the industry is being extended. Messrs. J. & J. Livingston, of Baden, Ont., have placed over 3,000 bushels of flax seed with farmers in the vicinity o Emerson, Manitoba. The farmers of this district expect that flax growing will prove very remunerative, if prices remain as at present. About $4,500 was paid for flax marketed at Emerson last fall.

Pleasant social intercourse and intelligent, helpful discussions of trade subjects are ends to be attained by a retail dry goods association. Departmental stores, the peddling nuisance, the credit system, and a score of other questions are fruitful themes for discussion. The tradesmen of Halifax, N.S., dealing in dry goods, millinery, tailoring, men's furnishings, and hats and caps, have formed an association. The following officers have been elected: President, E. T. Mahon; vice-president, C. S. Lane: secretary-treasurer, W. L. Kane. Executive committee—Messrs. W. L. Barnstead, W. B. Freeman, F. A. Marr, and James Halliday. The secretary-treasurer was empowered to draw up a copy of the proposed by-laws, and submit it at the first regular meeting of the association.

The annual general meeting of the shareholders of the Dominion Cotton Mills Company (limited) was held last week at the offices of the company, Hochelaga. Mr. A. F. Gault, president, was in the chair, and there were also present Mr. Jacques Grenier, vice-president, and the following directors: David Morrice, R. L. Gault, J. O. Villeneuve, S. H. Ewing and C. E. Gault. Among the shareholders present were Messrs. L. H. Archambault, Thos. B. Brown, J. P. Cleghorn, Charles Garth, Jas. Jackson, A. C. Leslie, Bart. McLennan, D. Morrice, jr., W. J. Morrice, J. L. Marler, Ed. Nield, James Wilson, jr., and others. The annual report presented to the meeting was regarded by the meeting as a thoroughly satisfactory one. At a meeting of the directors, held later, the old board of officers was re-elected as follows: President, Mr. A. F. Gault; vice-president, Mr. Jacques Grenier; directors, Messrs. R. L. Gault, S. H. Ewing, J. O. Villeneuve, David Morrice and C. E. Gault.

The migration of Canadian dry goods men to Europe at this season of the year has begun, as will be seen from the following list of arrivals published by the *Draper's Record*, April 6th: Mr. B. B. Cronyn (Messrs. W. R. Brock & Co., Toronto), Mr. Thos. B. Crossley (Halifax), Mr. J. C. Fisher (Messrs. Wyld, Grasett and Darling, Toronto), Mr. H. M. Belcher (Messrs. Gault Brothers and Co., Montreal), Mr. H. S. Molson (Messrs. Gault Brothers and Co., Montreal), Mr. C. J. Scott (Toronto), Mr. F. A. Cookson (Messrs. Glover and Brais, Montreal), Mr. Hyslop (Messrs. Hyslop and Co., Toronto, formerly Hyslop, Caulfield and Co.), Mr. H. J. Caulfield (Messrs. Caulfield and Co., Toronto, formerly of Hyslop, Caulfield and Co.), and Mr. Frank May (Messrs. Thos. May and Co., Montreal), Mr. O. A. Barnett and Mr. E. St. Pierre (Messrs. Thibaudeau Brothers and Co., Montreal; Mr. W. Radford (Messrs. Greene, Son and Co., Montreal), Mr. James and Mr. W. P. Slessor (Messrs. James, Johnston and Co., Montreal), Mr. John Miller (Messrs. Cook, Son & Co.), Mr. C. Constive (Messrs. Constive and Co., Montreal), and Mr. G. W. Montgomery (St. John).

INSURANCE ITEMS.

Hon. David Mills and Mr. T. H. Purdom, barristers, of London, visited Chatham last week in the interests of a new stock life insurance company it is proposed to organize. They interviewed several Chatham capitalists.

How the municipal insurance scheme of Alderman Daniel Lamb of this city strikes people abroad may be judged from the following, in the *Monitor* for April: "Toronto wants to try the experiment of municipal insurance, or rather, probably sundry politicians in that city are anxious to create some new berths."

In Winnipeg, at midnight on Wednesday, April 10th, the new Mulvey school building was totally destroyed by fire. The Provincial Government museum and Normal school library were burned. Loss, $30,000 to $40,000; insured for $16,000. The despatch says the firemen were unable to save the building owing to poor water supply.

The residents of a number of places in the Eastern Townships are evidently alive to the necessity of proper fire appliances. We observe that the municipality of Rock Island recently purchased a fine new hose cart and 750 feet of hose. Captain Oliver Garceau, jr., is organizing a fire company and will institute a series of weekly practices.

The report of the London Guarantee and Accident Co. (Ltd.) states that the premium income for 1894, less bonus and rebates to assured and re-assurances, was £133,503, and the interest on investments £8,240. The reserve fund amounts to £87,000, and the balance of revenue account to £73,066. The invested assets on December 31st were £226,235.

The many friends of Mr. A. E. Harrington will be pleased to hear, says the Halifax *Chronicle*, of his promotion to the position of inspector of the Provident Savings Life Assurance Society, of New York, for this province. He has been associated with the company as agent for this city for several years, and his promotion is an evidence of the appreciation in which he is held by the officers of the company.

The inquest into the Simpson fire is finished, and the jury returned a verdict that it was of incendiary origin, and advised that the conduct of W. J. Sprott, Wm. E. Farley, David Livingstone and Alex. McKee in connection with the affair should be investigated by the police magistrate. Sprott, Livingstone and McKee were employes of the Holmes Protection Company, and Farley was the engineer of the burned building. All but Farley have been arrested.

The debris is being removed from the burnt district of Summerside, and several new buildings will likely be erected on the site of those destroyed by fire a few days ago. It is said that Mr. R. C. Macleod has decided upon the rebuilding of his carriage warehouse and show rooms. Messrs. J. R. Butcher and C. E. L. Jarvis, St. John, were at Summerside several days adjusting the losses by the fire.

Work is progressing rapidly in the interior of Mr. R. T. Holman's new brick block, which is to be completed as soon as possible. The building is now being wired for electric lights, of which there will be upwards of 160.

An examination was held at Woodville, Ont., last week, before a magistrate, into the recent incendiary fires at that place. Alexander and Donald Carley, who had been arrested togther with Michael Malone, were discharged, but Malone was sent for trial in June. The evidence offered went to show that Malone had offered Alex. Carley $100 several times to set fire to the Royal Hotel, and repeated his offer on the night of the fire, which Carley again refused, and Malone said he would do the job himself and Carley could go home, which the latter did. Carley had only been at home a short time when the fire bells rang and the Royal Hotel was found to be in flames. The magistrate concluded that the evidence offered was sufficient to warrant him in sending Malone up for trial at the June assizes.

A property loss of at least $50,000 and an insurance loss of $29,000 was occasioned by the burning, one morning last week, of the well-equipped sawmill of A. Cushing & Co. at Union Point, near the Suspension Bridge, St. John. This handsome mill had been running winter and summer without a stop since 20th March, 1893, and its proprietors have orders on hand for 4,000,000 feet of lumber. The insurances are as follows: Royal, $5,000; Liverpool & London & Globe, $5,000; Queen's, $4,500; Western, $4,000; Lancashire, $2,500; Phœnix of Hartford, $2,500; Quebec, $1,687.50; Ætna, $1,250; Eastern, $1,500; Keystone, $1,000. The first mill built on this site was in 1852; it was burned. The second erected was burned 24th May, 1870. The machinery of this latest mill consisted of two gangs, one band saw, three planers, three lath machines, six box machines, one clapboard machine, and three double edgers.

ANSWERS TO ENQUIRERS.

A. L., Sherbrooke, Que.—It was probably in this journal you saw the statement referred to. At any rate we printed in 1893 or '4 a list of great exhibitions. Here are the principal ones; London, 1851; Paris, 1855; London, 1862; Paris, 1867: Vienna, 1873; Philadelphia, 1876; Paris, 1878 and 1889; Chicago, 1893.

BANKER, St. John's, Newfoundland.—Shall reply to you by letter. It will take a day or two to hunt up the decisions on the point in question.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, April 18th, compared with those of the previous week:

CLEARINGS.	April 18.	April 11.
Montreal	$8,813,534	$9,563,348
Toronto	5,214,834	5,429,529
Halifax	894,294	1,130,590
Winnipeg	631,065	741,382
Hamilton	579,643	729,071
Total	$16,133,370	$17,593,920

Aggregate balances this week, $2,089,400; last week, $2,243,634.

On account of the Good Friday holiday, and our going to press early, we did not, last week, give the figures for week ending 11th. We do so now:

CLEARINGS.	April 11.	April 4.
Montreal	$9,563,348	$9,481,008
Toronto	5,429,529	4,968,076
Halifax	1,130,590	1,084,866
Winnipeg	741,382	744,625
Hamilton	729,071	597,375
Total	$17,593,920	$16,875,950

Aggregate balances last week, $2,243,634; previous week, $2,297,742.

—The following electric railway companies received assent to their incorporation in the Ontario House this session: The Brantford, Port Dover and Galt Radial Company; the London Radial Company, which is intended to extend to a number of the villages, etc., west of London; the St. Thomas Radial Company, which is to extend southward to Port Stanley; Kingston and Gananoque Railway Company; the Hamilton, Burlington and Lake Shore Railway Company; the Hamilton and Niagara Falls Railway Company. Among railways seeking incorporation or amendments to their Acts are the Grand Valley Railway, which has been incorporated. So has the Guelph Railway Co., and power is given to the city of Guelph to confirm an agreement with George Sleeman; the Windsor, Amherstburg and Lake Erie Railway, the Hamilton Valley City and Waterloo Railway are both incorporated likewise.

—The following item occurs in the Omemee correspondence of the Lindsay *Post*: "Woodville has purchased a hand fire engine from Evans & Co. here, and two other villages have about decided to follow The secretary of the Fire Underwriters, Toronto, testimony is that the Evans' hand engine far exceeds in power any other manufactured." And the Oakwood correspondent of the same paper says that village has bought one of the same engines. We took occasion to enquire at the office of the fire underwriters in this city what were the grounds of the remarkable recommendation vaunted above. The reply of the official in charge was that no such puff of the engines named had been given, and that they knew nothing about the Evans' engine. "Since January, 1894," Mr. McCuaig added, "hand engines have ceased to affect the rating of municipalities for fire purposes, and we have not recommended any make." It might be well for Evans & Co. to explain how they venture to make a statement so devoid of foundation as the above.

—The Board of Trade of British Columbia, which is hereafter to hold monthly instead of quarterly meetings, passed a resolution pressing upon the attention of the Government at Ottawa the memorial to the Imperial authorities of the sealers interested in the Paris award. The board urges that if the British Government will not advance the sum ($425,000) which the United States Congress refuses to pay, the Ottawa Government shall provide in some way for the payment of the sealers' claims, some of whom are needy. Mr. A. B. Hendrix, of the Pilot Bay smelting works, wrote to the board, calling attention to the fact that the lead market of Canada is now supplied with both pig lead and white lead from lead mined and smelted in Mexico, with cheap Mexican labor, which is paid 80 cents per day. Mr. Robert Ward, in view of his removal to England, has resigned his office of trustee.

—The decline in exports from the United States of foreign and domestic merchandise for nine months ended with March last, compared with the same period of 1893-4, was more than twelve per cent., while there is an increase in imports of ten per cent. The exports of merchandise for the nine months ending March, 1895, were $622,760,675, as compared with $709,327,841 for the corresponding months of the preceding year. The imports of merchandise, both dutiable and free, for the nine months ending March, 1895, aggregate $535,525,930, as against $480,870,487 for the nine months ending March, 1894. The excess of exports over imports for the nine months ending March, 1895, was $87,234,745, while the figures for the corresponding period in 1894 are $228,457,354, a great difference.

—Not much change is observable in the figures of the Western Bank of Canada, submitted at the annual meeting of that corporation in Oshawa last week. The earnings were 9¾ per cent. net, and the usual dividend of 7 per cent. was declared. A larger sum than last year was added to Rest, which is now $100,000. Again the directors are able to say no serious loss has occurred during the year. Circulation stood at the close of February at a somewhat higher point than a year ago; deposits are practically the same. Assets readily available are maintained at a high proportion. The election of directors resulted in the choice of the former board.

—The Toronto Incandescent Light Company has issued its fifth annual report. We give part of the statement. The revenue of the year has increased from $89,885, as in 1893-94, to $104,574 for 1894-95, while operating expenses of all kinds for the year have only increased from $54,257 to $59,195. "After providing for the half-yearly dividends, amounting to $35,178, a sum of $8,000 has been added to rest account, and a further sum of $2,000 to contingent account, leaving a balance at the credit of these two accounts of $42,000, which is a little over 7 per cent. of the paid-up capital.

—A Chamber of Commerce has been formed in the town of Iberville, Que., and already has brought its influence to bear in favor of some public works which the citizens desire by interviewing the Minister of Public Works. The officers of the Iberville Chamber are: A. J. Corriveau, honorary president; T. Thuot, president; P. Thuot, first vice-president; Mr. Mignault, second vice-president; and F. Boisvert, secretary. The board of directors, Mayor Nadeau, Messrs. J. Bissette, E. Lavelle and C. Quintin.

—At a meeting of the Amherst, N.S., Board of Trade, held a week ago, a discussion was had as to starting new industries in the town. Special committees were appointed by the president to gain information in reference to starting a woolen mill and also a grist mill in the town this spring.

Correspondence.

A LACK OF PATRIOTISM IN CANADIANS.

Editor MONETARY TIMES:

SIR,—I have been paying considerable attention to how your city council are acting this year, for two particular reasons, (1) the boodle enquiry, and (2) the reckless manner of looking after your fire appliance wants. I fancy nearly all Ontario is doing the same thing, that is, keeping an eye on Toronto. I wish to draw your attention to the question of the fire appliances and the manner your council is dealing with this very important subject. A calamity strikes the city in the shape of three very large fires. Owing to the know-more-than-the-Chief policy of the average alderman, Toronto lacked a steamer. All that was asked for by the Chief was just one steamer. Now, Toronto goes wild: Good engines that were in existence and ready for sale and delivery in an hour's time; home-made and more adapted to Canada and its climate than any other engines in the world. There are four firms in different parts of this broad Dominion who make steam fire engines. All three are overlooked because they are Canadian, and foreign engines must be purchased that require months to make and deliver, and cost ever so much more. I ask is this fair to Canada, is this fair to the ratepayers or mechanics of Toronto who receive wages from the firms manufacturing engines in Ontario? The public say no. The ratepayers must furnish the money to send to a foreign firm. What is the use of our national policy? Our factories and our men had better move.

I have seen both the leading makes of English engines at work and nearly all the Canadian engines in use, and every one of the American make; more, I have seen their working parts separated. I have stoked and engineered them, and have paid particular attention to steam fire engines for over twenty years, and as yet I have failed to meet with a single maker superior to Canadian. If we look into the tenders lately before the fire committee in Toronto, we find nearly all the Americans equal in weight, about 1,000 pounds heavier than one of our best Canadian machines, while they are about 3,000 pounds, or about a ton and a half, heavier than the English or Merryweather engine, which is a ton lighter than the Canadian. Canada and the United States annually lose over $160,000,000 in fire loss. All Europe does not compare with this sum. Surely the experience of these much burnt countries should be a match for the European. I will be willing to wager a copy of THE MONETARY TIMES for one year to each of the builders that no Merryweather engine weighing 5,150 pounds, nor any American engine weighing 8,000 pounds, can beat the Canadian, at weight quoted, in a series of fire duty tests, for a day or a week's run. If the aldermen decide that two engines are needed, would it not be a better policy to buy three Canadian engines at $14,000 than two Merryweathers at $14,000, and have a spare engine in case of accidents *that must come*.

I submit that the business men, and the insurance men, or board of fire underwriters, will agree that three fire engines of equal capacity are more useful and more valuable than *two*—or put two Canadian engines at $9,500. The difference between the cost of the foreign will buy a couple of chemical engines, and some horses, etc., to haul them. I hope your people—I mean the experts and the aldermen—will see their mistake, as a matter of business, "and learn a lesson in patriotism," the lack of which is killing Canada. Montreal is worse than Toronto, and London has just performed a similar act in the selection of an aerial truck. More were non-Canadian tenders than foreign, yet the committee, every member of which is a Tory, voted to send the money away from home that should remain to strengthen the muscle and mind of the hundreds of Canadian workmen that are out of work.

You cannot find a single modern English or Canadian-made fire engine or piece of fire appliance in the whole United States. And ask Mr. Massey how many binders or mowers they have sold the Yankee, and get his answer.

The National Policy is all right. We must now get National Patriotism, or we die.

Yours, truly,

A SON OF CANADA.

London, 13th April, 1895.

MONTREAL AND TORONTO FIRE LOSS.

The Editor of the MONETARY TIMES.

SIR,—I have perused, with some amount of interest, the remarks of your correspondent, Q. & C., in your issue of the 12th inst. I fail, however, to see that they at all affect my figures and the conclusions arrived at as expressed in my letter of 22nd ult. The loss reports, as contained in the *Insurance Chronicle*, are given, and are taken as at least approximately correct. If they are not, I fancy the editor of that publication would have given the public notice to accept them as merely approximate, and not as authentic. Further, assuming that no losses under $1,000 are reported, I have no hesitation in affirming that losses under this amount in Montreal are at least equal to, if not in excess, of those in Toronto. I know this from most reliable sources.

For twenty years Toronto has been a veritable gold mine for insurance companies More than fifty per cent. of the profits that have been realized on Canadian business during that period, our city has contributed It is too true that owing to the supineness and criminal indifference of our civic authorities, Toronto has seriously suffered by the late series of conflagrations, following so closely one upon the other as to be simply appalling; like the fabled phœnix, however, I have no doubt she will arise again to the enviable position which for so many years she has occupied as the banner city for insurance companies.

Your correspondent agrees with me that the Big Village has had a unique record to the close of 1894, but asks, "Where, oh where are we now?" We are right here, and notwithstanding the heavy calamity that has befallen us, we still show a magnificent balance on the credit side of the ledger.

It was both amusing and ludicrous to witness the rush of excited managers and general agents to the city immediately following the late fires, as though no such event had ever been witnessed on this continent heretofore, and after all what did it amount to? At the utmost one and a-half million of dollars divided between thirty or more companies. Why, in St. Johns, N.B., in 1877, the companies unitedly paid nearly six and a-half millions, several of the companies paying from two to six hundred thousand each. Again, in St. John's, N.F., in 1892, the loss to insurance companies aggregated about four and a-half millions, many companies paying from two to five hundred thousand dollars each. And what of poor old Quebec, that for fifty years past has been periodically fire-swept, involving our companies in hundreds of thousands of loss. From not one of these places can companies ever expect to be recouped of their loss within the next century, whilst the business of Toronto is rapidly expanding, and her intelligent and enterprising population almost doubling every decade. I look forward with the utmost confidence that within two years Toronto will more than repay the amount of loss sustained.

Truly yours,

AGENT.

Meetings.

CONFEDERATION LIFE ASSOCIATION.

The annual meeting of the above association was held at the head office of the company, Yonge, Richmond and Victoria streets, Toronto, on the afternoon of Tuesday, the 9th inst. There was a large attendance of policy-holders and shareholders, and members of the agency staff of the association.

Hon. Sir W. P. Howland, C.B., K.C.M.G., was called to the chair, and Mr. J. K. Macdonald, managing director, acted as secretary of the meeting.

The following report and financial statements were submitted:—

REPORT.

Your directors beg to submit to the policy-holders and shareholders the twenty-third annual report of the association, covering the operations for the year 1894. In doing so it is scarcely necessary to state that the year was one of unusual stringency and general depression in all branches of trade. This could scarcely fail to have a marked influence upon the business of life insurance, and in view of that fact, it will be a source of gratification to all persons interested in the association to observe the substantial progress made and the large volume of new business secured. It has not been deemed wise to depart from the policy which has guided your directors in the past, and therefore new business was sought for only at reasonable cost.

Your directors have had before them 2,321 applications for a total insurance of $3,631,550. Of these 2,218 for $2,469,550 were approved; 98 for $152,000 were declined, and 5 for various reasons were deferred. Adding the revived policies, which had been written off in previous years, and bonus additions, the new business for the year was 2,248 policies for $3,528,204 of insurance.

The total insurance in force at the close of the year was $25,455,342 under 16,625 policies on 14,667 lives.

The death claims for the year were light, being 93 deaths under 105 policies, calling for a total insurance of $164,287.50. Under a re-insurance this amount was reduced by the sum of $1,994.50, making the net claims $162,293. This is a striking evidence of the care exercised in the selection and acceptance of new business, and is a high compliment to our field staff.

The financial statements submitted herewith fully exhibit the position of the association on the 31st December last.

The auditors have continued to give close attention to their duties, and have been thorough and prompt in their work. Their report will be found appended hereto.

Your directors are pleased to be able to state that the head office building is filling up very well, considering the effect of the prevailing depression upon all property of the kind. A considerable portion has been rented during the past year, and more since the beginning of the present year.

All the directors retire, but are eligible for re-election.

W. P. HOWLAND,
President.
J. K. MACDONALD,
Managing Director.

Managing Director.

AUDITORS' REPORT.

We beg to report that we have completed the audit of the books of the association for the year ending December 31st, 1894, and have examined the vouchers connected therewith, and certify that the financial statements agree with the books and are correct.

The securities represented in the assets (with the exception of those lodged with the Dominion Government, amounting to $84,500, and those

deposited with the Government of Newfoundland, amounting to $25,000), have been examined and compared with the books of the association, and are correct and correspond with the schedules and ledgers.

The bank balances and cash are certified as correct.

(Signed) W. R. HARRIS,
WM. E. WATSON, F.C.A.,
Auditors.

Toronto, March 7, 1895.

The president, Sir William P. Howland, moved the adoption of the report and financial statements submitted to the meeting, and in doing so alluded to the commercial stringency which had prevailed during the past year, and whilst these unfavorable conditions had had some effect in limiting the amount of business done by life insurance companies, yet it was gratifying to note that the amount of business on their books had not only been generally maintained, but had shown a satisfactory increase. This association during the past year secured policies representing $3,528,804. The total insurance in force at the end of the year was $25,455,342.

The company had maintained a careful and conservative policy, being determined to keep the expenses of obtaining business within a reasonable limit, and to use every precaution in the selection of risks. An evidence of the latter is to be found in the fact that we have had only 93 deaths during the year, the total claims thereunder being $162,298 only.

The business of the company continued to receive during the year the special attention of the managing director and staff at the head office, and the favorable results obtained must be attributed to this fact, and also to the very efficient organization which the company have throughout the Dominion.

It had always been the view of the managing director and the board that the statement of the affairs of the company should be placed before you in as clear, concise, and simple form as possible. That being the case, and the statements having been in your hands for some time, it will not require any special explanation from me, but if any information is required by any gentleman present in regard thereto, I am sure the managing director will be happy to afford it if requested.

Mr. W. H. Beatty, vice-president, in seconding the resolution, said:—

I think that we have fair reason to congratulate ourselves upon the amount of business which has been secured during the past year, which has all been obtained in the Dominion of Canada, with the exception of Newfoundland, which we suppose will very shortly be a part of the Dominion, and where we re-established an agency during the year. The business shows an increase all along the line. The president referred to the depression which had existed in commercial affairs, but when we consider the very large amount of money that is paid for life insurance in the Dominion, aggregating many millions of dollars, we cannot but conclude that it is an evidence of the very solid financial condition of the country.

Allusion was made to the manner in which the head office building of the company was being rented, which could not fail to prove satisfactory to all interested; it was now beginning to pay fairly well; there was every reason to expect that within a short time it would prove to be a very good investment. It was not possible to expect a large building such as this, which was not only a credit to the city of Toronto, but to the whole Dominion, to yield a large return from the outset, but there was every reason to hope that within a limited time we shall have a return from it that we cannot get from any other investment affording equally good security.

I am perfectly satisfied with the report, and I have no doubt our shareholders and policyholders will be also. I have much pleasure in seconding the resolution.

The motion was carried unanimously.

Resolutions were moved thanking the directors, management, and also the agency staff for their services during the past year, and carried unanimously. They were severally responded to, numerous references being made to the satisfactory report which had been presented to the meeting.

The retiring board of directors were all re-elected.

After the meeting adjourned a meeting of the new board was held, and Hon. Sir W. P. Howland, C.B., K.C.M.G., was re-elected president; Messrs. E. Hooper and W. H. Beatty, vice-presidents.

WESTERN BANK OF CANADA.

The thirteenth annual meeting of the shareholders of the Western Bank of Canada was held at the head office of the bank, Oshawa, Ont., on Wednesday, the 10th day of April, 1895. The following shareholders were present: Messrs. John Cowan, W. F. Allen, J. A. Gibson, T. H. McMillan, Thos. Paterson, C. W. Scott, John McLaughlin, Geo. Lavis, R. S. Hamlin, Robt. Dillon and Thomas Conant.

The president, Mr. John Cowan, occupied the chair, and Mr. T. H. McMillan acted as secretary to the meeting. The following report was submitted:

REPORT.

The directors beg to submit the thirteenth annual report for the year ending 28th February, 1895

The earnings of the bank have been well maintained, notwithstanding the prevailing depression.

The net profits of the year have amounted to $35,945.53, being at the rate of about 9¾ per cent. upon the average paid up capital, which, added to the balance, $4,506.26, at credit of Profit and Loss, carried forward from the previous year, amounts to $40,451.79.

From this sum two half-yearly dividends of 3½ per cent. each have been paid, and an addition of $7,500 made to the Rest, which now stands at $100,000, or about twenty seven per cent. of the paid-up capital of the bank, leaving $6,995.10, which has been carried forward to Profit and Loss account.

No losses of moment have occurred during the year. The agencies of the bank have recently been inspected and found in a satisfactory condition.

JOHN COWAN,
President.

Oshawa, April 10th, 1895.

STATEMENT OF ASSETS AND LIABILITIES OF THE WESTERN BANK OF CANADA ON THE 28TH DAY OF FEBRUARY, 1895.

T. H. MCMILLAN,
Cashier.

It was moved by the president, seconded by the vice-president, and carried, that the report as read be adopted, printed and circulated amongst the shareholders.

Mr. McLaughlin, seconded by Mr. Scott, moved that the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors of the bank for the manner in which they have conducted the affairs of the bank during the past year. Carried.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged
Premiums collected by the company weekly at the homes of policy holders
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Agents wanted in all the principal cities. For information apply as above.

Mr. Paterson, seconded by Mr. Dillon, moved that the thanks of the shareholders be given to the cashier and other officers of the bank for their attention to the interests of the bank. Carried.

On motion of Mr. Conant, seconded by Mr. Hamlin, the meeting proceeded to elect by ballot seven directors to fill the place of those retiring, Messrs. C. W. Scott and John McLaughlin being appointed scrutineers.

The scrutineers reported the following seven gentlemen as having received the unanimous vote of the shareholders, viz.; John Cowan, R. S. Hamlin, W. F. Cowan, Dr. McIntosh, W. F. Allen, Thomas Paterson, and J. A. Gibson, who were duly elected directors for the ensuing year. A vote of thanks was tendered to the chairman for his able conduct in the chair, and the meeting adjourned.

At a subsequent meeting of the new board, John Cowan, Esq., was unanimously elected president, and R. S. Hamlin, Esq., vice-president.

INCREASES OF WAGES.

We published, about a week ago, a list of certain notable increases of wages which had been made within the few days immediately preceding. We are now able to extend this list by several interesting additions. The increases already mentioned were as follows:

Moses T. Stevens & Co., prominent manufacturers of woolens in New Hampshire; increase of 15 per cent.; a restoration of old rates.

Thomas Dolan & Co., manufacturers of woolens in Philadelphia; increase of 15 per cent.

Globe Iron Works, Cleveland, Ohio; the 15 per cent. which was taken off one year ago.

Wholfender, Shore & Co., Cardington, Penn.; increase of 5 per cent., or half of last year's reduction.

Washington Mills, Lawrence, Mass.; increase announced on April 5, affecting from 3,000 to 4,000 employes.

We now add the advances which are set forth below, the most important of them being the increase at Fall River, which will probably be followed by a general advance in that manufacturing centre.

Fall River Iron Works Mills (cotton goods), Fall River, Mass., increase of a little more than 10 per cent. ordered on April 10 by President M. C. D. Bordon; restoration of rates paid before the reduction of Nov. 5, 1894; 1,800 employes.

American Linen Mills, Fall River, Mass.; increase ordered on April 10.

Worumbo Mills, Lisbon Falls, Me.; increase of 10 per cent. ordered a few days ago.

Willimantic Linen Company, Willimantic, Conn.; a general advance of 5 per cent. (being one-half of the reduction made in October, 1893), ordered on April 5; nearly 2,000 employes; company "for the last six months," says the Hartford *Courant*, "has been crowded with business, and has been employing all the help the works would accommodate."

Belding Brothers & Company's silk mills at Rockville. Conn.; notice of an increase of 5 per cent. given to 400 employes on April 6th.

Grosvenordale Cotton Company, North Grosvenordale, Conn.; an advance of 10 per cent. (being a restoration of the rates paid before the reduction of April, 1894), ordered on April 13; 1,200 employes affected.

E. W. Chapin & Company's woolen factory at Chapinville, Mass.; increase of 10 per cent. made last week, being a restoration of the wages paid before the reduction of one year ago.

The Lakeside Manufacturing Company of Leicester, Mass., the Boston *Commercial Bulletin* says, "will shortly restore the 10 per cent. reduction which went into effect a year ago."

The United States Cotton Company, Central Falls, R.I., gave notice to its employes on April 11th that their wages would be increased by an addition of from 5 to 10 per cent.

A despatch from Fall River, Mass., published by the New York *Tribune* on April 14, says: "It is generally conceded that an advance of wages will be given in all the mills in the city. The advance will be in the form of a restoration of the schedule in operation before Aug. 20, 1894, and will mean an increase of about 12½ per cent. over present rates."

The McKinley tariff became a law on Oct. 6, 1890, and the enactment of it was followed by a long list of reductions of wages in the protected industries. Several of these cuts were made in November, and a few were announced on the day of the general election in that month. A majority of the changes took place, however, in the following January, February, and March.

The recent increase of 15 per cent. in the Western Pennsylvania coke district may serve to recall the fact that the long and bloody strike of 15,000 coke workers in the same district, against a reduction of 10 per cent., began in February, 1891, four months after the McKinley tariff became a law. The present tariff is now a little more than seven months old.—*N.Y. Times.*

OF INTEREST TO PRIVATE BONDSMEN.

C. W. Holden, of Boston, "Our Charles," has a very pertinent way of putting things, and as he has been a diligent student of the *Monitor* for many years, he is always sound in the main and usually in the details. His notions of the private bondsman iniquity tally exactly with our own—and so are right, of course. Charles has become manager in Massachusetts for the Fidelity and Deposit Company of Maryland, and these are the conundrums he propounds to private bondsmen:

1st. How many of these bonds have you signed during your business life?

2d. Do you realize to what an amount you may be liable? Nothing between you and the poorhouse but the honesty of several men—perhaps only the honesty of one man!! You are told, "It is only a matter of form—a mere bit of red tape;" but the "tape" is strong enough to hold you.

3rd. Is it a "tape" or a chain?

4th. Do you know of your own knowledge whether the estates, which, by signing the bond as surety, you have practically guaranteed, are being properly managed or not?

5th. Is the executive, administrator, trustee or guardian for whom you are sponsor, using good judgment?

6th. Do you realize that you are liable for his mistakes in judgment, as well as for his honesty?

You refuse to endorse a friend's note because you doubt his ability to meet it when due—"that is business;" but you become his bondsman for ten times as much without a thought of your liability or a doubt of his prudence or good judgment. What do you call that?—"Business?"

7th. Do you keep informed in regard to the financial standing of your co-surety?

8th. Can you tell at the present moment whether he is financially responsible for one-half of the amount of the bond you signed with him or not?

9th. Do you know whether he is dead or alive?

10th Do you recollect who he is?

11th. Did you ever know?

If you can answer all these questions to your own satisfaction you are to be congratulated; if you cannot, you will begin to realize what "red tape" is liable to cost. You have been signing these or other bonds, because "some one has to do it;" "it is a favor to a friend in assisting him to get his appointment or situation," etc., etc.—*Monitor.*

THE FAITH CURE.

Under the caption of "Christian Paganism," the *New York Press* writes trenchantly as follows: "When the infant Viking pined, the Norse mother made sacrifices to Freya; when the son of the Greek fell ill, the Athenian matron burned costly incense to the family Penates; when the little child of the East Indian sickens, the mother beats her breast and places banyan fruit before her bone fetish; when the little child of the modern "Christian Science" believer is smitten with typhoid fever, the mother kneels before the absurd and canting egotism of her own belief, and makes sacrifice in the life of a child."

—Col. Jim Harris, president of the Harris Bank of Terrell, Tex., and one of the picturesque figures of the Lone Star State, is dead. The funeral services were held March 8th under the auspices of the Masonic fraternity, and were attended by friends from throughout the State. One of the peculiarities of Colonel Harris was his attachment for a red blanket, which he usually carried about with him. When the casket was lowered his red blanket went with it, folded on top.—*Banker's Monthly.*

—A telegram of April 5th, from Duluth, states that a big pool of insurance companies has been formed, containing some of the largest European and American companies, headed by the British and Foreign Insurance Company, for a reduction of marine insurance rates. It will do business by general agencies, and bids fair to drive out of business vessel agents on the whole chain of lakes. The pool has already made many contracts on grain, flour, etc., at rates from 60 to 65 per cent. lower than those in vogue last season.

—A man went to a well with a five-quart can and a three-quart can. He wants to bring back four quarts of water. How will he measure this? Answer—He fills the five-quart can; out of the five-quart can he fills the three-quart can; he throws the three quarts away and pours the two quarts into the three-quart can; he fills up the five-quart can again and fills up the three-quart can again out of this, which takes one quart out of the five-quart can; therefore he has four quarts left, accurately measured. *-Edinburgh Scotsman.*

—A novel project is mentioned in a Buffalo despatch of last week. A concern called the American and Canadian Navigation Company is to run two steam ferry boats, each long enough (250 feet) to carry twenty-six laden cars, and equipped with ice breakers so as to run winter as well as summer. The idea is to run them from the New York shore of Lake Ontario to Cobourg and Port Hope, and they will be used largely to carry coal. A railway will, however, have to be built between Batavia and Oak Orchard Harbor.

—The steel ship "Swanhilda," Capt. Fraser, owned by J. W. Carmichael, of New Glasgow, N.S., has just completed a long ocean race of 15,000 miles with the American ship "Shenandoah," Capt. Murphy, of Bath, Maine. The "Swanhilda" sailed from Portland, Oregon, on the 30th of November. The "Shenandoah" sailed from San Francisco on the 2nd day of December. Both arrived together at Liverpool on the 26th of March. The Nova Scotian vessel had 600 miles further to sail, and can consequently claim the race. This is the second time these two clipper ships have raced round Cape Horn.

At Sweetsburg Que., recently Judge Lynch rendered judgment in the suit of the Stanstead & Sherbrooke Mutual Insurance Co. against the Central Vermont Ry. Co., maintaining the action with costs. The suit arose over the depot square fire in Waterloo, in May, 1892. The plaintiffs had policies on property destroyed to the amount of $4,800, and after settling with the policy-holders the Central was sued on the ground that the fire originated from one of their engines. The costs are very heavy, probably $2,500, and the judgment is for $4,800 in addition. It is the intention of the railway company to carry the case to the court of last resort.

MONTREAL MARKETS.

MONTREAL, April 19th, 1895.

ASHES.—Receipts last week were very limited, but a few fair lots have come to hand this week so far. No shipments are reported. We still quote $4 to 4.10 for first quality pots; seconds, $3.75. Pearls are rather easier at $5 75 to 6.

DRY GOODS.—The weather of last week—almost continuous rain for four or five days—was such as to knock all life out of the Easter trade, and city retailers universally complain of a very dull week. In the country districts matters have been no better, but despite all this there is a certain amount of sorting business being done, and as fine bright weather seems now to be the prospect, it is hoped matters will improve. Some of the millinery houses are having a second opening this week, and the attendance is described as very fair. General collections are almost poorer than last month.

FURS.—Some fair lots of raw furs are coming in from back sections, but otter, mink, marten, etc., are showing poorer quality, and skins have to be sorted pretty closely to bring quotations below. Spring rats now coming in bring 15c. for prime. We quote for strictly prime skins: Beaver, $3.25 to 4.00; black bear, $15 to 25.00; cub, do., $5 to 10.00; red fox, $1.25 to 1.50; muskrat, 7 to 10c; spring, ditto, 15c.; lynx, $1.50 to 2.50; marten, $1.25 to 1.75; mink, $1 to 1.50; skunk, 50c. to $1; otter, $8 to 10.00.

Buckwheat	16,679	10,233

GROCERIES.—In the grocery line the week has been a dull one. The heavy rains of last week in the province have caused numerous freshets, damaging bridges, and making roads impassable in many sections, so that the movements of commercial travellers have been much impeded, and trade interfered with. There is not much to be noted in the way of changes in values of groceries. The Guild lowered the jobbing price of granulated sugar last Monday to 3½c. per lb., though it is claimed that 3 and five-sixteenths is the best figure the refiners will give. Yellows remain at the old figures, from 2½ to 2¾c. The Redpath factory is shut down for a fortnight, owing to the water being let out of the Lachine Canal. Teas are quiet at the moment, but considerable curiosity is evinced as to the opening of the Japan market, which will take place a little later than usual this year. In other lines we hear of nothing new whatever

HIDES AND TALLOW.—The hide market is excited and higher, and tanners are now being asked 8c. per lb. for No. 1 green light hides, heavy stock bringing no better price. Some dealers are reported to be holding on speculation, and it would not occasion surprise if still higher figures should be reached. Calfskins are advanced to 7c., though a dropping market is reported in the United States. Lambskins, 10c.; sheepskins, 65c. each. Tallow continues very dull, and the best quality will not bring more than 5c. per lb.

LEATHER.—There have been several failures in the shoe manufacturing line within the week; one of these is rather a surprise, but no further complications of the kind are anticipated. No

very active buying of leather can be reported at the moment, nor will there likely be until manufacturers begin to look for stock to make up fall orders. Owing to the general advance we revise quotations as below. We quote:—Spanish sole B.A. No. 1, 19 to 20c.; do. No. 2 to B.A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 20 to 23c.; No. 2 do., 19 to 20c.; common, 17c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 22 to 24c.; grained, 24 to 26c.; Scotch grained, 28 to 30c.; western splits, 17 to 20c.; Quebec do., 14c.; juniors, 12 to 14c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 13 to 14c.; russet sheepskin linings, 30 to 40c.; harness, 20 to 25c.; buffed cow, 11 to 13c.; extra heavy buff, 14c.; pebbled cow, 11 to 13c.; polished buff, 9 to 11c.; glove grain, 11 to 12c.; rough, 18 to 20c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The movement in iron and heavy metal goods is still a restricted one. Summerlee pig iron has been offered, it is said, at $18.50 to import, about the same opening figures as last year. Domestic pig may be called a shade easier at $16.50 to 16.75. American iron has been coming forward in moderate lots on contract at about $18.50 to $19. Tin plates are no firmer here or the other side, notwithstanding that a number of the works there have been shut down some time American boiler plates are easier at $1.75. Ingot tin is cabled strong, but does not show advance on this side. A 125-ton transaction was reported in New York the other day at a shade over 14 cents. A feature of the moment is the absolute dearth of No. 9 steel zinc. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19 50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.50 to 16.75; Ferrona, No. 1, $16.50 to 16.75; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, according to finish; P. D. Crown, $3.75; do. I.X., $4.50; Coke I. C., $2.60 to 2.85; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 16 to 16½c.; bar tin, 25c.; ingot copper, 10 to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25: American do., $4 to 4.25. Antimony 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ½c; ¾ in., 3½c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Orders keep coming in fairly. Turpentine has weakened materially, and is now quoted at 50 to 52c per gal. as to lot, with a chance of going lower before the week is out. Latest accounts from the seal fishery report a catch of over 300,000, which is near to a fair average. No change has yet been made in glass quotations, though the situation in Europe would fully warrant an advance. We quote:—Turpentine 51 to 52c. per gallon for single brls; two to four barrels, 50 to 51c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4¾c.; genuine red do., 4¾c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

WOOL.—A cargo of Cape wool, comprising about 1,200 bales, has just arrived at Boston for this market. Some 400 bales had been sold before arrival. The demand is rather better than earlier in the year, and the market may be called a little firmer. We quote Cape at 14 to 15½c.; some short can be had at 13c.; B. A. scoured, 25 to 31c.; domestic fleece, 19 to 22c.; pulled supers, 20 to 21½c.; extra, 23 to 26c.; Nor.-West, 11 to 12c.; British Columbia, 10 to 11c. per lb.

TORONTO MARKETS.

TORONTO, April 19th, 1895.

GRAIN.—The wheat market is firm, and in the face of an active demand from local millers quotations of Ontario wheats have advanced several points. It is safe to say that visible stocks in Canada are small. What farmers still hold is, of course, an undetermined quantity. Until the close of seeding operations deliveries from farmers' hands must be light. The barley season is now about over, and with the exception of feed qualities, only a few straggling lots are moving. There is an easier feeling in oats, and the market is dull, having shown no improvement during the week. Peas are dull, at 57 to 58c. Little rye is offering and little is wanted; the last sales made were at 50c. per bush delivered here. There is nothing doing in corn.

THE VISIBLE SUPPLY.

	April 13, '95. Bush.	April 14, '94 Bush.
Wheat	70,486,000	69,218,000
Corn	12,221,000	16,021,000
Oats	5,727,000	2,654,000
Barley	490,000	530,000
Rye.....	213,000	398,000

The stocks of grain in store at Port Arthur on April 6th were 698,287 bushels. During the week there were received 23,823 bushels, and shipped 3,932 bushels, leaving in store on April 13th, 718,178.

GROCERIES.—Business is good and has been so for the last ten days. The number of orders received are thought to be in excess of the usual quantity at this season of the year. The roads are bad, but travellers in some sections report improvement, and with the continuation of present weather the public highways will soon become more passable. Dried California fruits are in request; apricots are selling at 11½ to 12½c.; pears at 7¾ to 8½c.; peaches, 11 to 12½c. Maple syrup is offering quite freely; bottles, presumably containing a quart, $1.80 per doz.; gallon tins, 75c.; half bbls., 65c. per gal.; bbls., 60c. per gal. In canned fruits no change has been made since we reported gallon apples

These prices are wholesale by the car-load.

5c. doz. lower. The selling committee of the Packers' Association is in session, but no further change in prices is anticipated. The Lenten demand for canned fish is over, leaving some considerable stocks here. There are whisperings of contracts in canned salmon, but we have not heard of any contracts being made, and from our western advices we would gather that packers are not anxious to make contracts at present. As reported last week, the feeling in corned beef is exceedingly strong, and the bulls at the moment appear to be in full control.

HARDWARE AND METALS.—During the last several weeks trade has been exceedingly good The general movement in fence wires, garden tools and other articles in request at this season of the year is satisfactory. Heavy goods are in fair request. Both cut and wire nails find free movement. Prices are steady and without change.

HARD WOODS.—Trade is improving, although there is not yet that general activity in the market that dealers would like. As usual at this time of the year, dry hardwood is scarce, and although the movement may be limited, prices are firm and no change in quotations have been made recently. Birch finds fair request, the demand for red being especially good in 2 to 4 in. cuts. Basswood is in good demand, stocks are scarce, and it is very difficult to obtain good dry stock; quotations are somewhat stiffer than they were at our last report. Only a nominal enquiry exists for butternut, chestnut and cherry. Soft elm is in good demand at previous quotations. Rock elm is quiet. There is a surfeit of elm, and in proportion to the supply the demand is poor. Red oak is in fair demand and quotations slightly advanced.

HIDES AND SKINS.—Since last reported the market has continued firm and without change. Tanners are complaining of values, but no decline in quotations have been made. Offerings are dirty and grubby, running largely 2's and 3's. Sheepskins are steady at 95c., and it is thought that at this figure the market is settled for the rest of the season.

PROVISIONS. — Receipts of butter continue large; large rolls are in moderate request at 12½ to 13c.; common descriptions are entirely neglected, while tubs also find scant request. Cheese is quiet and steady. Hog products are firmer. Stocks are generally admitted light, not only in Toronto, but throughout the Dominion. A further advance in price, while not a certainty, is yet one of the probabilities of the future. Eggs are easy at 11c. per doz. The Easter egg market was, as usual, a disappointment. Farmers held back stock for several days previously, and then the rush came, followed by its natural consequences. Poultry and eggs are not marketed with any degree of wisdom, and in attempting to get only the top price for their product farmers more often secure the very lowest. There is no change in dried and evaporated apples to report.

WOOL.—There has been absolutely no change in the wool market during the week. Dealers are paying 20c. per lb. for such fleece as is offered. But the quantity offering is small. If there were any quantity of fleece wool to be marketed it is quite probable that a further advance might be made, as American mill men are anxious to purchase Canadian fleece. But dealers have come to the conclusion that even in the remotest corners there is but little fleece left. If the present warm weather continues, and the spring of 1896 is an early one, the new clip will soon be on the market. It is expected that 20c. will be the opening quotation, or an advance of 3c. over the opening market last summer. Stocks of pulled combing wool are pretty well cleaned up, and when any stocks accumulate they are at once sent to the United States We notice that some of our Montreal contemporaries report large sales of American pulled wools to Ontario knitting mills. As we reported a month ago, some of the mills imported several hundred thousand pounds of fine pulled wools to take the place of Canadian super wools. But the experiment was not the success factory men had expected, the wools being more greasy, and losing more in scouring than our wools, and this movement has been discontinued.

Messrs. Coates Brothers, Philadelphia, in circular of 15th inst., say: "Business in domestic wools has lately been more quiet in all markets, and this is somewhat accounted for by the purchases of foreign stock at the late London sales being sufficient to supply the immediate wants of the trade. The remainder of our old clip and the arrivals of new wool are hardly yet sufficient to attract buyers, but as the season advances a better trade is expected on all grades. Worsted spinners continue to be well supplied with orders, but many are using foreign wools, and they claim that, notwithstanding the late advance abroad, they are not ready to use much domestic until our more attractive new wools arrive in sufficient quantity for their wants Woolen yarns continue very quiet. Manufacturers of some lines of woolen goods are busy, while others are doing but little. If the late advance in many staple commodities is an index of a permanent improvement in general trade, the coming wool clip should not only participate therein, but the situation is further favored by there being so little old stock to be carried into the new season."

Unconditional
Accumulative Policy
ISSUED BY THE
Confederation Life Association
TORONTO, ONTARIO,

It is a simple promise to pay the sum insured, in the event of death.
It is absolutely free from all restrictions as to residence, travel and occupation.
It is entirely void of all conditions save the payment of premium.
It provides for the payment of the claim immediately upon proof of death.
It offers six modes of settlement at the end of the Dividend Period.
It is absolutely and automatically non-forfeitable after two years, the insured being entitled to
(a) Extended Insurance, without application, for the full amount of the policy, for the urther period of time definitely set forth in the policy, or on surrender, to a
(b) Paid up policy, the amount of which is written in the policy, or after five years to a
(c) Cash value, as guaranteed in the policy.
Full information furnished on application to the Head Office or to any of the Company's Agents.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restrictions as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

SAFETY AGAINST ELECTRIC FIRES.

We admit that in England and Germany more precaution is taken; generally speaking, work is done well or not at all. Now, for the solution of the matter; the case is diagnosed, what is the cure? It is evident that the foundation corner-stone of absolute safety against electric fires must start in insulation of electrical conductors. After making an exhaustive analysis of every insulated wire made in the United States, in England, Germany and France, and a knowledge of the manner in which they are made and handled, from the drawing of the copper to the finish of each and the uses for which they are designed, I find that on this fundamental point there hangs a tale. Not 50 per cent. of the wire that goes on the market to-day is fit for use. Many of our electric light wires are carried into storehouses containing valuable merchandise by a tar or wax covered wire, with the poorest braiding that the unskilled hand can do, hidden from immediate view by the aid of wax used to give a finish under the polishing machine. Next we find the old underwriters' wire with its "white locks" crawling in because "it's cheap." One word for the underwriters' insulated wire for inside equipment. It has been, when properly made, the safest wire for inside work, but it has not the lasting qualities required for a number one wire.

We must have good insulation first; then the wiremen must handle the wires carefully, they must take time, do all their work honestly, all joints must be made and covered by a competent man, and, above all, a genuine electrician who knows how the work should be done should lay out the work and inspect it. As the wire enters the building it should go through a fireproof tube. If wire is laid through concreted spaces the owner of the property had better pay a few dollars for lead pipe rather than suffer a loss.

I find that there is, with all the applications at hand, some cause for criticism yet with the management of the dynamo. Switches for electric light and power need as much attention as the switches of the railroads to prevent accident. Again, great reliance is placed on fuses, which in many instances are overestimated as to their capacity and safety. It is the anxious hope of insurance companies that a genuine fire-proof insulation will be found, that when properly put up can be relied upon.

My opinion is that there is absolute safety from electric fires if the conductor is sufficiently large for any required current; that the conductor is carefully covered with a first-class seamless rubber insulation first, next to the wire, then a second covering over the rubber of a refractory element or compound, then carefully braided and handled in putting it in place, so that no abrasions are made, and all joints carefully insulated, that all entrances and exits are through porcelain tubes. The day is not far distant when all wires will be lead encased for concealed work in buildings.—*C. T. Snedeker, in the Electrical World.*

THE NEW YORK LIFE.

The trustees and officers of the New York Life Insurance Company celebrated the fiftieth anniversary of the company's organization, on April 10th, at the Lawyers' Club, New York. It is a coincidence that the company's annual election of trustees and board meeting fell on the same day and month, April 10th, that the company was incorporated, half a century before. About fifty guests were present, and very nearly half the number have been connected with the company over twenty-five years.

Speeches were made by president McCall, Mayor Strong, Major Livingston Mims, of Atlanta; Mr. William H. Appleton, trustee since 1852; Mr. Wm. A. Booth, trustee since 1863; Mr. William B. Hornblower, Mr William L. Hill, of St. Louis; Mr. J. Sanchez and Mr. David Burke, of Montreal, Canadian trustee of the company.

Letters were read from Mr. Pierce, superintendent of insurance for the State of New York; Mr. Alexander G. Hawes, manager for the Pacific coast and connected with the company for twenty-five years; Mr. Spencer S. Benedict, of Sioux City, Iowa, the only surviving trustee of the board of 1845; Mr. James B. Wallace, of Brooklyn, who holds the only policy in force issued in the year of organization; Col. W. B. Hamilton, of San Antonio, Texas, an active agent for thirty years, and Mr. William E. Ingersoll, of Paris, foreign director general, attached to the company since 1874.

The following is quoted from the address to Mr. John A. McCall, president of the company:—

RESUME JANUARY 1, 1895 — RECEIPTS AND EXPENDITURES FROM ORGANIZATION.

BANK STATEMENT.

The weekly statement of the New York City Associated Banks, issued on Saturday, April 13th, showed an increase in reserve of $992,850 The banks now hold $14,922,775 more than the legal requirements. The changes in the averages show an increase in loans of $584,800, an increase in specie of $915,800, an increase in legal tenders of $829,100, an increase in deposits of $3,008,300, and an increase in circulation of $57,300.

The following is a comparison of the averages of the New York banks for the last year:

	April 13, '95.	April 14, '94.
Loans	$481,023,100	$456,939,400
Specie	65,387,000	100,099,600
Legal tenders	75,493,400	121,608,000
Deposits	503,830,500	563,506,400
Circulation	13,141,300	11,042,300

The following shows the relation between the reserves and the liabilities:

	April 13, '95.	April 14, '94.
Specie	$65,387,000	$100,099,600
Legal tenders	75,493,400	121,608,000
Total reserve	$140,880,400	$221,707,600
Reserve required ag't deposits	125,957,625	140,876,600
Excess reserve above legal requirements	$14,922,775	$ 80.831,000

The following table gives the surplus reserve at this date for a series of years:

1895	$14,922,775	1890	$ 452,000
1894	80,831,000	1889	6,065,550
1893	11,072,550	1888	10,870,425
1892	15,788,500	1887	4,488,650
1891	5,612,950	1886	14,722,650

THE CANADA COMPANY.

The annual general court of the proprietors of the Canada Company was held on March 27th, at 1 East India avenue, London. Sir Robert Gillespie presided, and, in moving the adoption of the report, said he thought that, in face of the prolonged adverse condition of trade and the scarcity of money in the Dominion of Canada, the transactions of the past year could not be considered as unsatisfactory. They had disposed of 13,274 acres during 1894, giving as a general result an advance of 11 per cent. on the valuation of 1886. Taking the average of the eight years since 1886, during which time they had sold 76,000 acres, he found they had realized 75s. an acre, as against an average annual valuation in 1886 of 61s. 4d. an acre. They had also been able to lease, with and without the option of purchase, a considerable extent of the company's inferior lands in Eastern Ontario, as well as reclaim lands by the drainage of Lake Burwell.

He reminded the proprietors that the whole of their capital had been returned, with the exception of £1 per share, which was provided for by an investment in Metropolitan stock, and that they had a surplus property which, according to different valuations, was worth between £573,340 and £850,456. The year 1894 showed a further reduction in the expenses of £900, the total decrease since 1890 being £3,296. He then moved the adoption of the report and accounts, which showed that in 1894 two dividends, amounting together to £1 6s. per share, were paid, and that on December 28 last a further dividend of 10s. per share was declared. Mr. G. P. Currie (deputy chairman) seconded the motion, which was adopted

THE STEAM ENGINE AND FUEL.

In calm and drought the windmill and the water wheel must come to rest, but the throb of the steam engine's mighty pulse remains undiminished. If its fuel does require to be brought to it, we have it within our power to make the supply regular, rendering the continuity of its action thoroughly reliable. Unlike these simpler motors, moreover, it is not chained to the source whence it derives its power, but may be stationed wherever required; or, taking its supply upon its back, it can make off with the speed of the wind, carrying man and his commerce over land and sea.

The widespread distribution of fuel and water also renders the steam engine ubiquitous. It has opened for itself a door of welcome in every land and climate where fuel of any kind is found, or to which it can be conveyed, and it is equally efficient on the surface of the earth or in the depths of the mine.

In view of the labor involved in procuring fuel, economy in its use is important. About a century ago, when the improvements in the steam engine had so far advanced as to render its employment profitable, it was found even then, in its most perfect form at that time, to require twelve pounds of coal per hour for the development of each horse power, and in the inferior engines of that period it might have taken double this quantity. Since then the steam engine has been undergoing a steady process of evolution, and in the present day an engine which requires over one pound and a half of coal for the development of the same power is considered wasteful. — *Chambers's Journal.*

—The Chaudiere mills, says the Ottawa *Journal*, will open as soon as the ice clears from the river. Gangs of men are at work in all the mills getting the machinery in shape to begin operations about the middle of this month. There is a good stock of logs on hand at all the mills, so there will be no delay this spring on account of shortage of logs.

—A singular accident occurred on April 10th at the Manchester Ship Canal. The steamship "Harold" entered the Latchford lock of the canal at full speed. She smashed the gates, passed through and dropped sixteen feet into the water below. The gates weigh 300 tons. One sank and the other hangs across the lock. The attendants closed and bound with hawsers the upper gates, thus preventing the disaster which otherwise would have resulted from the 16-foot difference of the water levels. The "Harold" was much damaged by her collision and her plunge.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial Increases have been made in **New Business, Total Business in Force, Income and Assets.**

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses and contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

DECISIONS IN COMMERCIAL LAW.

DREW v. GUY.—The action was brought to enforce by injunction a covenant not to carry on a business similar to that carried on by another lessee of the plaintiff's named Rowen. The covenant was contained in a lease made by the plaintiff to the Aerated Bread Co., of whom the defendant was assignee. Rowen, another lessee of the plaintiff, was a hotel-keeper and carried on a restaurant on licensed premises connected with the hotel, and the covenant of the company was to the effect that they would not carry on the business of a restaurant similar to Rowen's. Prior to the assignment the company had carried on a restaurant on the demised premises, at which they sold tea, coffee, pastry and cold meat, but not any hot meat except beef pies, which was not objected to. After their assignment to the defendant he continued to carry on a similar business, but in addition sold hot meats and other things not sold by the company. The defendant, however, had not a license, and his business was on a smaller scale, and his premises of an inferior class to that of Rowen, and his prices were much lower. The Court of Appeal in England thought that the addition of hot meats to the defendant's bill of fare was a violation of the covenant, and that the test of similarity was not whether they sold alcoholic drinks, or were similar in appearance, but whether the defendant's restaurant was so like Rowen's as seriously to compete with it.

IN RE SASSERTHWAITE.—Chattels settled by a husband on his wife by post nuptial settlement, and being in a house which is the matrimonial domicile at the date of the husband's bankruptcy, are not in the apparent possession of the husband within the meaning of the Bills of Sale Act, though the settlement is not registered under that Act, if the possession is consistent with the trusts of the settlement, according to Vaughan Williams, J.

GREAT NORTHERN RAILWAY v. PALMER.—Where a railway company issues a ticket on which a notice is printed, that it is only to be used to the station named thereon, the passenger holding such ticket, provided the notice is brought home to him, is not entitled to travel beyond such station, and merely pay the ordinary single fare for the extra journey travelled. According to Wills, and Wright, J.J., such a ticket constitutes a special contract between the railway company and passenger.

COUNTY OF GLOUCESTER BANK v. RUDRY MERTHYR COLLIERY CO.—It was decided by the Court of Appeal, in England, that where by the articles of association of a company the directors are empowered to fix by resolution what numbers of directors shall be a quorum, whether any or what quorum has been so fixed is a mere matter of the internal management of the company, as to which a purchaser for value (*e.g.* a mortgagee) is not concerned to enquire. Such a purchaser will, therefore, if he takes in good faith and without further notice of any irregularity, acquire a good title even though, in fact, the number of directors by whose authority the contract was made, or the corporate seal affixed, was less than that prescribed by the resolution aforesaid.

"MOROCCO BOUND" SYNDICATE v. HARRIS.—The English courts, in the view of Kekewich, J., have no jurisdiction to restrain by injunction an infringement, in one of the countries of the copyright union, of the international copyright granted by the Berne convention, although the party against whom proceedings are taken is a British subject residing in England.

INFRINGING A TRADE MARK.

A German firm was punished last month before an English court by fine and forfeiture for infringing a Sheffield brand. One Mr. Heinrich Kaufmann, of Solingen, conceived the idea of making a trade mark very like the celebrated mark of Messrs. Joseph Rodgers & Sons. Then he entered upon negotiations with Messrs. Kayser & Glossop, of Eyre street, Sheffield, to make cutlery goods bearing said mark. On the trial, before the Sheffield magistrate, expert evidence was called to show that the tulip and crossed daggers of the German firm sufficiently resembled the star and Maltese cross of Joseph Rodgers & Sons to mislead the average East Indian native, and the words of the Act are "so closely resembling as to be calculated to deceive." These goods were for the Indian, and not for the English, market, and the defendant admitted his acquaintance with their destination. It is well known in the Sheffield trade, that the natives in the Indian bazaars cannot read English, and rely on the marks and the general appearance of the goods. But furthermore, the defendant placed on the scales, made in Sheffield, the words "German manufacture"—words which were obviously untrue, and probably also an infringement of the clause of the Marks Act, which deals with false indications of origin. The stipendiary imposed a fine of 10 guineas, with the forfeiture of six gross of razor scales. This should be a warning to manufacturers in Sheffield that the Merchandise Marks Act is not a statute to be lightly regarded.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE Exhibition Association of St. John announces that its 1895 exhibition will open at that city on September 24th, and remain open until October 4th.

W. S. COLLINS & Co., commission merchants in Toronto, have assigned, and unsecured creditors need not expect a large dividend.——Several changes have been made in the style of the wood-carving and contracting firm of John Fletcher & Sons, Toronto, who are long-established builders. F. W. Fletcher, one of the sons, now continues the business, and is offering creditors 25 per cent. His principal creditor is secured by a chattel mortgage. Under the circumstances this offer may be accepted.

IT is about a dozen years since Wm. Oelschlager opened a foundry at Port Elgin in the county of Bruce. Last autumn he moved to Berlin, hoping to improve his position. At this time he claimed to have assets of $8,500 and liabilities of $3,000. But as his assets were not available as a basis of credit, he was obliged to put his affairs into the hands of an assignee. ——An assignment has also been made by R. A. Reade, picture dealer in Chatham.——In 1890, Gilchrist, Kent & Co. failed as general storekeepers at Orangeville. The stock was then sold to Kent & Co. at 67 per cent. (Mrs. Kent being the sole owner). Of late business has been very dull with them and the landlord has the bailiff in possession, so Mrs. Kent assigns.

A LIQUOR dealer in Toronto Junction, named E. Blundell, has got into difficulty and assigns. Formerly he was a piano polisher, and the $1,000 he had saved from his earnings went to Mrs. Gillies, the former owner of the business. A fortnight ago he gave a chattel mortgage, which appears to have resulted as above stated.——Some time ago Thomas Edwards, hotel-keeper at Woodville, was burnt out, and claimed a loss of $4,000. This was too heavy a strain upon his resources, and he assigned. ——In the fall of 1894, James W. Auld bought the insolvent stock of the Wilson Carriage Manufacturing Co., Hamilton. Last month he disposed of the business, and now makes an assignment.

SOME years ago Thomas D. McRossie succeeded his father, A. B. McRossie, who made a bad failure as a shoe dealer in Napanee. Last Nov., Thos. D. bought the shoe business of Hamilton Bros. in Woodstock. In February of the present year he opened another branch store in Ingersoll. This expansion was entirely too much for his capital, and the Napanee business was disposed of in order to relieve him, but this proving insufficient he makes an assignment.——Robert Shields removed from Mono Road to Phelpstone, where he purchased the general stock of S. Haney. At this time Shields claimed to be worth $2,500. About two weeks ago he asked creditors for an extension owing to dull trade; instead of granting this they ask him to assign. This he has done to W. A. Campbell.

THE late George Childs, whose death we mentioned in last issue, was buried in Montreal last week, his pall-bearers being Messrs. Hugh McLennan, J. C. Holden, M. Babcock, Wm. S. Patterson, W. W. Lockerby and Dr. Bazin. The officers of the Board of Trade and members of the Council attended the funeral in a body, and floral offerings were sent by the Dominion Wholesale Grocers' Guild, the Montreal Wholesale Grocers' Association, Council of the Board of Trade (of which deceased was a member) and the Retail Grocers' Association of Montreal. For some forty years Mr. Childs had been a prominent merchant of Montreal, and well deserved the high estimation in which he was held as a prudent and honorable man. We understand that by his will his executors (his sons Arthur and George), are directed to wind up his business within two years.

Mercantile Summary.

FORTY or fifty years ago, among the biggest and most important importing houses of the city of Quebec was Jeffery & Co. The head of that firm was Mr. W. H. Jeffery, an energetic, whole-souled, hospitable gentleman, who was president of the Stadacona Club, and one of the best known men in the city. Retiring from wholesale business, Mr. Jeffery purchased a place near Richmond, Que., and went thither to reside, engaging of late years in asbestos mining near Danville. He maintained his spirits and his habits of activity to an old age, and when he died last week he had attained the great age of 85 years

WE understand that the Kemp Mfg. Co. are asking the city for a free site on the Don River, also exemption from taxes, for an enamelling factory which they purpose building to be carried on in conjunction with their already large tin manufacturing plant. The new works will employ, we are told, 100 hands. In case the city does not grant these conditions the company will likely start in the natural gas region of Essex county, where they have been offered free land, exemption from taxes, free fuel (a very important item in enamelling manufacture). They would use natural gas.

IN Quebec Province the following failures are recorded for the week: L. W. J. Paiement, general dealer at Grande Freniere, near St Eustache, is in difficulties and about to assign. He has been in trade since 1887, when he assumed the business of his father, getting an extension on the liabilities. He now owes $9,500.——A lumber jobber of Hatley township, O. Belanger, is offering a compromise of 30 per cent cash ——F Lambert, carriage maker at Nicolet, before reported in difficulties, has now assigned and shows liabilities of about $3,000 ——J Romuald Labelle, baker, Iberville, is away, and the Judge has ordered a meeting of his creditors for May 3rd.——W H. Jekill, a small country dealer at Morin's Flats, has become discouraged trying to make business a success in that poor section, and has taken a situation in the United States. He owes about $2,700 and has left a few hundred dollars worth of stock and some poor book accounts.——J. St. Pierre, keeping a general store at St. Gedeon, in the Saguenay district, is offering his creditors 50 cents on the dollar; liabilities are $2,500. He failed before several years ago, and a lack of education has militated against his business success.

WM. BIRD, a Toronto grocer, has got into difficulty and assigned.

THE town of St. Boniface, Manitoba, is giving a $10,000 bonus to a boot and shoe factory, which will employ a large number of hands.

N. S. TARR, for the past twenty odd years in the Berlin wool and fancy goods business in Ottawa, has got behind, and is reported to be offering his creditors 40 cents cash.

A FIVE per cent. dividend is to be paid to the creditors of the Green, Warlork & Co. bank, inside of the next 20 days. This statement is made by one of the assignees to the Vancouver *World*.

AMERICAN carpets are being sold in England. They are the cheapest grade of ingrains, made almost entirely of cotton. They are sold in England because they can be made more cheaply than English goods of similar grades.

D. M. RICHARDS & Co., hardware dealers, Charlottetown, P.E.I., have assigned. The firm only dates from 1893, beginning on small capital. The liabilities, partly preferred, are stated at $8,000, with assets apparent of $7,200.

A CHARTER is being sought for the Imperial Brush Company of Montreal, authorized capital to be $140,000. The provisional directors are to be Hon. A. Desjardins, R. Forget, Joseph S. Bousquet, Hormisdas Laporte and R. Bickerdike.

THE Myrtle House is the name of a summer hotel at Digby, N.S., one of the pretty spots on the Bay of Fundy. It has been renovated throughout, and can accommodate 50 persons. A new summer hotel is one of the probabilities for next year.

GOVERNOR MORTON has just signed a bill enacted by the New York Legislature which provides that free baths shall be maintained in New York city throughout the entire year; that they shall be open at least fourteen hours daily; and that both hot and cold water shall be supplied.

THE estate of A. Landreau, grocer, Renfrew, Ont., who became insane through an accident several weeks ago, has been put into insolvency. His wife owns the real estate, and files a claim of some $900 for rent and money loaned her husband. She offers the other creditors 20 cents on the dollar.——Barsalow & Whitehall, plumbers, at Brockville, have made an assignment. Barsalow was previously unsuccessful.

THE new steamer "Northland," sister ship to the "Northwest," of the Great Northern Railroad line, is to carry 442 cabin and 211 steerage passengers, and a crew of 150 men. She will run between Buffalo, Cleveland, Mackinaw and Duluth. She cost about $750,000.

THE S.S. "Campana," owned by Smith & Keighley, now in Toronto harbor, is to take the place of the S.S. "Miramichi" on the route between Pictou and Montreal this year. She is a twin screw steamer of 1,300 tons, having first-class accommodation for 100 cabin passengers.

HANTSPORT is now an incorporated town, and the councillors elected are J. E. Stevens, S. H. Mitchener, Charles Davison, Capt. T. A. Masters, H. W. Sweet and Horatio Parker. There are two nominees for the mayoralty, W. A. Porter and William Whitman. Election to take place to-day.

THE fifth annual meeting of the British Columbia Fruit Canning and Coffee Company was held at Vancouver on 16th inst. After writing off bad and doubtful debts and making allowance for depreciation of plant, a good balance of profit on the year's business was shown. It was resolved to increase the output this year.

THREE shipbuilders at Parrsboro, N.S., have schooners in the frame; there is one at Board Landing, one at Fox River, one at Port Greville, to be launched about 1st May, and one at Spencer's Island. H. Elderkin & Co. have a large barquentine and two schooners on the stocks, all of which will be launched this summer.

HENRI DUVERGER, dry goods jobber, Montreal, is unable, apparently, to complete his compromise arrangement, for he has assigned at the demand of La Banque du Peuple. The schedule filed shows a direct indebtedness of $28,000; indirect, to La Banque du Peuple $19,000, La Banque Jacques Cartier $13,100.

THE iron steamer "Campana," which left Toronto yesterday in tow of the tug "Petrel" for Kingston dry dock, will there be cut in two by the Collins Bay Rafting Company and towed down the canals to Montreal. She is to be fitted out in that harbor and to take the route between that port and Pictou, N.S., in the interest of the Gulf Ports Steamship Co., who purchased the vessel to replace the "Miramichi," which has been on the route for nearly twenty years.

METALLIC covering for the sides, as well as the roofs of buildings, is found to be desirable as protection from the weather, as well as from fire. We hear that the Metallic Roofing Company, of Toronto, has sold to the Ogilvie Milling Company, covering of the kind for thirty grain elevators in Manitoba and the North-West Territories This is no small order, for it implies upwards of 200 tons of siding and roofing.

THE success of Hamilton's first electric radial railway, the Hamilton, Grimsby and Beamsville, has been remarkable. A statement of the business of the road for the six months ending April 20th, shows that the road carried 69,851 passengers, which is nearly 400 per day, and the freight business shows a decided growth. The road has distinctly benefited the trade of Hamilton, according to the testimony of some of its merchants.

THE effects of W. H. Ferguson, dealer in fuel, ice, etc., at Portage-la-Prairie, have been sold under the power of a chattel mortgage. Previous to this, a number of judgments had been obtained against him.——The property of the Whitewood Milling Co., Whitewood, Man., is advertised for sale by the sheriff.——Morley Gilroy, livery stable keeper, at Moosomin, Assa., has had his effects disposed of by the bailiff under a chattel mortgage.

C. J. ROBSON, a New Westminster, B.C., fruit dealer, who did a snug and prosperous business there for years, now finds that he has entirely too large an amount invested in real estate, and makes an assignment. He owes $3,000 to general creditors. This does not include real estate liabilities.——Late last year the British Columbia Plumbing and Heating Co, of Vancouver, purchased the business of W. G. Warren. At that time they had a capital of $2,500. We already hear of their assignment.——In the same city Welsh & Nightingale, grocers, have freely granted credit, and as they cannot realize on their outstandings, they are obliged to ask an extension of time.

BELOW we note several small Montreal failures: C. H. Budd, doing a men's furnishing business, has filed consent to assign, owing $3,100.——J. F. Long, a shoemaker, has also assigned, with liabilities of $700.——J. Hemond & Co., saloon, propose paying 25 cents, cash, on debts of $1,000.——J. Borduas, who started a small haberdashery business last fall, on $500 of borrowed capital, has been unable to make

GWATKIN & SON . . . . .

57 Bay Street
Toronto

business go, and has turned his estate over to the assignee; obligations about $2,000.—— Cassidy, Bonner & Co., of Montreal, manufacturers of leather belting, etc., a young firm dating back about two years, are reported to have assigned. Liabilities are small.

THE fire committee of the Toronto city council has agreed to the purchase of a Ronald steam fire engine. The reason for delay in the supplying the Merryweather engine is that the unusual conditions imposed by the Toronto experts necessitated new pumps being made for it.

BEING unable to carry out the proposition made a month ago of paying 20 per cent. to his creditors, J. C. Hart, general storekeeper at Alliston, has assigned to E. R. C. Clarkson.—— To recover arrears of rent the bailiff has taken possession of George Walker's grocery, Hamilton. His property has been chattel mortgaged for years.——What looks like an attempt to get the start of creditors has been made by Stewart, Hewat & Co., general storekeepers at Orangeville. On Saturday last they sold their stock to A. & W. Johnston, of that town, at 82½ per cent. discount, receiving payment for the same. After this they settled with their banker and a few friends who were badly in need of money at that moment. This transaction has justly been the cause of a great deal of indignation on the part of creditors.

AN UGLY FAILURE.

After a brief but not uneventful career, W. S. Collins & Co., Church street, Toronto, have closed their doors. This firm started in the produce commission business last fall, without capital, as far as can be ascertained, but with a wonderful stock of brazen assurance. In connection with their wholesale establishment, three retail stores were set agoing, and a very free use made of printer's ink. Circulars and advertisements alluringly set forth the advantages to be reaped by the country merchants who would entrust their consignments of produce to this philanthropic firm. The firm, on its part, would sell direct to the consumer for a modest 5 per cent., thus securing extreme retail prices. The bait took well, and consignments poured merrily in, which were in due course sold direct to the consumer, and the proceeds placed where they would do W. S. Collins & Co. most good.

The prudence or good judgment of country merchants in thus allowing themselves to be defrauded cannot be commended. Any enquiry made to the commercial agencies or the wholesale trade of Toronto would have elicited the information that only spot cash transactions with this firm should be entertained. We are informed by the assignee that the assets as handed over to his care consisted of three empty barrels! It is necessary to give a word of warning and counsel to country merchants who ship produce for sale to this market. Do not accept as gospel truth the assurances made in specious circulars regarding extravagant prices that can be realized for you by unknown firms. Ask your wholesale dry goods man or grocer to furnish you with some data as to their reliability before doing business, not after. There are many reputable firms in Toronto who will gladly undertake the honest handling of your produce, and to whom a disclosure like the present is a matter of painful concern

TORONTO, FRIDAY, APRIL 26, 1895.

THE SITUATION.

The somewhat boisterous wail set up by some students of the University of Toronto, last winter, died down to an inglorious dirge, when a commission asked to be told, in all soberness, what it was all about. The students in their charges said that they did not like the personal appearance of one of the professors, and in the examination they were anxious to apply, contrary to law, a religious test to fathom the soundness or expose the unsoundness of some others. The guardian placed over the toilet room could not have been more repugnant to them if he had been a veritable Bashi Bazouk. The students wanted to nominate outside lecturers, and to send such professors as did not please them to the right about. The allegation that there was something wrong in the appointment of the lecturer on history was not sustained, and if he refused to take the position at a stipend that he could not possibly live upon, he had a right to do so; the rule that required a shilling's worth to be given for sixpence was not unalterable, and was in fact properly altered. Mr. Riddell, counsel for the students, very properly withdrew the charges which could not be proved. But after this was done, the commissioners declared their readiness to listen to volunteer evidence regarding them, their conduct in this respect presenting a strong and favorable contrast to the ruling in the late Boodle investigation. The necessity of some certain rules of discipline to which to subject the refractory students was the one fact which the investigation made plain. These will doubtless be supplied. Mr. Goldwin Smith, who had private conference with the commissioners, is said to have given the weight of his experience in favor of a severance of the connection between the University and the Government. It is not probable that the authorities will admit that the time has come for taking this step. But it may come.

Sir Edward Grey has officially announced that the British Government has not been made aware of the contents of the treaty of peace between China and Japan. Conflicting telegrams have been purporting to give the terms of the arrangement for some time past. From Japan comes the statement that she gets no trading advantage from which other treaty nations are excluded. England and France had the right to navigate certain rivers in China, and it would be strange if Japan had not now got the same privilege. Whether any, and, if so, what territorial rights, have been ceded by China to Japan is still in doubt. The French papers have tried to create the impression that Russia, France and Germany are acting together to review the treaty, with a view to its possible modification in their own interests. If there be any intervention, it would probably require a more complete European concert than the alleged combination presents. Europe will be likely to take precautions against her interests being injuriously affected by the peace settlement. England objected successfully to the treaty of San Stefano in 1878, and the Berlin Conference reviewed the agreement to which Russia and Turkey had come. But what was done at Berlin had been secretly pre-arranged between England and Russia on the one hand and England and Turkey on the other. Some sort of intervention, by means of European concert, is not impossible, on the present occasion, though England shows no disposition to take part in such a move.

Some one representing the Government of Canada is to visit England to present to the British Government the arguments which official Canada has to offer in favor of the denunciation of the Berne copyright convention. Probably some member of the Government will be entrusted with this task. Unless the argument proceed entirely upon the right of Canada to control all copyrights within her borders, just as she controls patents, it is difficult to see where the agent will get his right to speak against the Berne convention. No one who has created a Canadian copyright has asked to have this convention denounced. Those who ask to have that step taken are printers and publishers who desire to get control of British copyrights to make money out of them; who, if they use the constitutional argument at all, only use it as a means of helping themselves to get access to these copyrights, not by agreement, but by force of law. That the change advocated will not be in the interest of Canadian authors, Mr. Goldwin Smith has expressed a decided conviction. Piratical printers, he thinks, will get hold of English copyrights and not pay for them, and Canadian authors will have to compete against unpaid British authors. The late Sir Daniel Wilson also favored the Berne convention, and those who ask to have it denounced are generally ready to sacrifice the Canadian author to the printer. Still, above and beyond all this is the constitutional right of Canada to control all copyrights within her borders. But in making good that control, the rights of British authors should be guarded against the possibility of piratical treatment. The Government ought to undertake to enforce some responsibility on printers and publishers who may be empowered to force a contract on unwilling British authors.

All Canada now knows from the words of the Premier that, unless Manitoba acts upon the Order-in-Council and deals with the Separate school question, in what has come to be called a "remedial" way, the Dominion Government will do so. "If the time should come," says Sir Mackenzie Bowell, "for the action of this Government," in the premises, "the people of Canada will find that the present administration are quite prepared to assume the responsibility which may fall upon them, no matter what the results may be." He professes great respect for provincial rights and expresses a strong desire that Manitoba should supply the remedy by the exercise of her own powers; but if she should fail to do so, he considers that the duty of the Dominion to interfere will become clear. That duty there are some who fail to admit. They contend that the right of appeal, like any other appeal, may be followed by an adverse judgment. In any case, it is desirable that the

question should be got out of the way before the elections come on. In three or four weeks Manitoba ought to be ready to send her answer. If affirmative, there will be nothing left for Parliament to do ; if negative, as all indications foreshadow and even positive statements make certain, the time for action indicated by the Premier will have come. There will be opportunity to pass the "remedial" measure, whatever it may be. If this be done, it will cease to be an issue at the elections, and other issues will take its place at the polls.

Canada, in connection with Australia, has been asking to be relieved from the obligations of two treaties made by England with two European countries. And now, in connection with the Franco-Canada treaty, another difficulty of the same kind crops up. Austria, most unexpectedly, insists on sharing the benefits of this treaty, under a treaty with Great Britain in 1876 ; and the German Empire is in a position to claim the same priyilege. On this point, we are told, there is nothing for Canada to do but to yield. The effect will be to extend the benefits of her treaty to herself as well as to those other countries. Some legislation at Ottawa will be necessary before the Franco-Canada treaty can go into operation. Without some legislation at Ottawa, the wines of Australia and the Cape cannot get the benefit of the treaty.

FINANCIAL REVIEW.

We give below a condensation of the figures o the statement of Canadian banks for the month of March, which bears date Ottawa, 19th April. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

The present outlook for business, and of course for banking also, is a little more hopeful than for some time back. The rise in wheat, which has gradually mounted up until it comes to fully ten cents per bushel, would be a more important factor if there were heavier stocks held over in the country. But even as it is, the rise will benefit holders of both wheat and flour; and as it is nearly six months till the time when the new harvest will be marketed, the rise will be a substantial benefit in any case ; if for no other reason than that it will have put an end to the feeling of utter doubtfulness and despondency which had begun to prevail, and which had taken the heart out of all grain dealers and millers, not to speak of growers. Even at present prices, the cultivation of wheat will prove to be a very poor business, and only possible at a profit on new lands that have not acquired great value; and also in some parts of the North-West where good crops can still be depended on. Another element of hopefulness, so far as our natural resources are concerned, is the considerable rise in the price of cattle, in the great markets of the world. It is reported, and no doubt with truth, that American buyers of cattle have penetrated to Manitoba and have bought up all the spare cattle they could lay their hands upon. If this be so, it may be the beginning of a trade that is susceptible of increase to very large dimensions, for Manitoba is well within reach of the greatest cattle market on the continent. And it is very likely that the quality of north-western cattle is superior to that of the south-western States and Texas. The Ontario cattle trade of 1895 has already begun, and shipments are ready to be made as soon as the port of Montreal is open. It is to be hoped that shippers may have a good season this year, and make up the losses they suffered last year. All this of course tells upon banking prospects. In addition, the English demand for timber and deals is likely to be brisk and at good prices. This English trade, in spite of the dull times in Great Britain, has been remarkably steady and the prices realized have been very satisfactory. The American lumber trade has been affected, of course, by the dreadfully dull times prevailing in the United States. Lumber is always one of the first commodities to feel the influence of general depression, and one of the last to recover from it. But the signs of recovery are hopeful at present. The great staples are improving, and there is a general feeling of confidence in the monetary position. The determined stand made by the President in behalf of a sound currency is giving confidence to all great business and financial enterprises.

It is a pity that the fundamental question could not be lifted up out of the debasing influence of party politics altogether. It is so to a large extent in the East. All manufacturers, traders, bankers—the men that carry on the business of the country, that move its products to market, and sit at the very helm of all the wealth-producing enterprises of the land, are a unit for sound currency, no matter what political party they may belong to.

We emphasize the fact that these are not mere money lenders, but wealth-creators and producers ; by furnishing the means by which what would be mere dead and useless products in the hands of the wheat farmer, the cotton grower, the sugar planter and the cattle raiser, are brought forward into use and activity, and made to take their part in supplying the wants—first of the nation, and then of the world at large.

The notion that sound money is only wanted by the great capitalists, who lend and stand idly by to see their interest growing, is a perfect delusion. It is the men who are carrying on the mass of the daily commercial traffic and manufacture of the country, and the bankers, whose whole business is concerned with the vital streams of commerce, that are fully as much set upon a gold basis for the currency as any large capitalist can be. At all events, the attitude of the President is most encouraging and hopeful, and will raise the credit of the whole nation in the estimation of the monetary world.

It need not be said how important his action is for ourselves. We have maintained a sound currency through all the vicissitudes of our career. There is no class amongst us that is affected with currency heresies and follies. Canada knows very well that gold is incomparably the best standard of value, and that it would be madness indeed for her to disturb her relations with the whole commercial world, and with England especially, for an inferior one.

The bank statement we publish to-day has one peculiar feature, in that it shows an increase of circulation for the month of March. In former days the circulation came steadily in from February to June, but these conditions of business have materially changed, and in fact are changing still, especially in the greater variety of products and enterprises and lines of business available, and the opportunities of making profit all round the year.

The discounts of the banks show a large increase, betokening a development of business activity for the month; but they are not so large as a whole as they were a year ago.

Deposits, on the contrary, show an advance of more than ten millions for the year. The steady increase in this item is one of the most remarkable features of the whole monetary position of the country.

We call attention to our usual summary of banking totals in Quebec, Ontario, and the other provinces:

ABSTRACT OF BANK RETURNS.

31st March, 1894. [In thousands.]

Description.	Banks in Quebec	Banks in Ontario.	Banks in other Prov's.	Total.
Capital paid up	34,728	17,670	9,712	62,110

THE GRAND TRUNK RAILWAY.

When the *Times* and other leading English journals take upon themselves to advise the withholding of proxies from the present directorate, the great public interest felt in the management of the Grand Trunk Railway becomes manifest. This unusual step indicates the pressure of opinion upon the shareholders. If the Government of Great Britain had reached an equally critical stage, the result would probably be a change of ministers; but when the shareholders of a commercial corporation hold the votes, it is impossible to tell what the decision will be. In the past, the critics of Grand Trunk management have been able to effect nothing. That there has been an immense falling off in traffic, the critics do not seem disposed to take into account; but they are not dealing with an isolated exception, and such of the shareholders as have never known the luxury of a dividend may well be forgiven if despair makes them desperate. The present ground of glimmering hope is, that some particular individual can work out a scheme of salvation for the road. The individual is known, named, and it would seem, ready to undertake the work. If any change be made, it will probably be of a radical character, going to the foundation of the whole system, and involving its vast scaffolding of complications. The opinion gains ground that things cannot long go on as they are with the corporation, and that some new plans must be tried. As the opposition to Sir Henry Tyler had got 5,000 proxies representing a capital of £18,000,000, two days ago, it is almost a matter of certainty that Sir Charles Rivers Wilson will get the opportunity to see what he can do to revive the drooping fortunes of the road.

THE ELECTRIC RAILWAYS ACT, 1895.

Experience, concurring with the position taken by THE MONETARY TIMES, had shown the necessity of enacting some general provisions relating to all electric railways, and the present Act is intended to meet that want in the future. It applies to all electric railway companies incorporated last session or hereafter to be incorporated. That it is not made to apply to roads previously chartered, shows the danger of granting undue special privileges, and the difficulty of overriding them when once granted. In an extreme case, it is always possible to fall back on the principle that a corporation which is the creature of legislation is subject to remedial action by the authority that created it.

It is satisfactory to know that the abuses perpetrated under a loose provision in the incorporating Act of the Toronto Railway Company cannot, under the safeguards of the new statute, be repeated in future. Section 49 enacts that "every share in the company shall be deemed and taken to have been issued and to be held subject to the payment of the whole amount in cash." Under this clause, we should imagine, full payment of the shares in cash cannot easily be evaded. There are people who will try to evade the provisions of the most salutary law enacted for the protection of the public, and who, when evasion will not serve their purpose, will not scruple to resort to a direct breach of the law. If we look at the history of corporations in the

United States, it would be easy to find a large number of cases in which the obligation to pay a company's stock in gold was fraudulently evaded by borrowing the amount for a week or a day; and it would not be impossible to find concerns which made handsome profits by advance loans for such purposes Ruin and disaster must always be liable to follow in the train of such action, until some means can be found of making fictitious capital do the work of real. Breach of laws, passed for the protection of the public, is not the less a crime.

How the capital of an electric railway company shall be employed, after it has been paid in, is detailed in the Act with amplitude if not surplusage of minuteness. Promotion expenses naturally come first in order; next, payment for surveys, plans and estimates; "and"—a very stringent provision—"all the remainder of such moneys shall be applied to the making, equipping, completing and maintaining of the said railway and other purposes of the undertaking." The stock can neither be watered directly in its creation, nor indirectly in the expenditure on construction. But to secure this end, another abuse, not unknown to at least one trolley company, is struck at. Everyone in the employment of the company or concerned or interested in any contract under it, is by that fact disqualified from becoming a director. This is a far-reaching provision, and the extension of the principle would lead to some conspicuous displacements. The principle is the same as that which disqualifies a contractor with the Government to sit in Parliament or in any of the provincial legislatures. And no director shall be at liberty to become interested in or derive any profit from a contract with the company. If this inhibition be disregarded any shareholder or any municipality through which the road passes will have right of action to enforce the law. Incongruities arising out of the holding of conflicting positions are coming more and more into disfavor. When a railway director profits by a contract with the company for which he is trustee, he violates the principle that a trustee is not permitted to profit by the trust reposed in him.

The new Act requires the electric companies to make returns to the Government according to a prescribed formula. The ordinary share capital is to be distinguished from the preferential; the amount of ordinary bonds, municipal loans, bonuses, the amount of subscription to shares and to bonds, as well as capital from all other sources, are to be stated. One column is to show what is actually paid in cash under each of those heads. The actual cost of the railway and trolley stock is to be given, as well as the earnings of the company, and a summary of working expenses. It is unfortunate that the actual cash cost of the Toronto railway and its equipment cannot be demanded under the new statute.

BARGAIN DAY.

"Several of the leading dry goods stores report that they were so busy on Saturday that the customers had to be turned away." Thus remarks a newspaper published in a neighboring city, and the same is true of many other Canadian towns. A crowded store on Saturday presents an inspiring scene, but one that, from a business point of view, is not altogether satisfactory. There is an art in selling goods, in gauging the tastes and wants of a customer, that cannot be exercised by a tired clerk in the rush and hurry of a crowded store. Saturday is, and probably always will be, "Farmers' Day." The problem that presents itself to the energetic merchant is how to draw out the city trade during the first five days of the week, and obviate the seemingly inevitable crush of rural and urban buyers on Saturday. Bargain Days are no longer an experiment, and have done much to solve the question. What day will be your Bargain Day? Monday, Tuesday, Wednesday, Thursday or Friday, any day you please, so long as it suits the majority of your customers. Should prices be reduced on Bargain Day, and to what extent, is a problem each merchant must solve for himself, guided by his peculiar class of trade and the actions of his competitors.

INSPECTION OF ELECTRIC LIGHT.

A subscriber in an eastern province asks if it be true that Canada was the first country to undertake the inspection of electric light, and if so, when the law came into operation providing for meters and inspectors. We are unable to say that Canada is the first country to do so, but she is certainly among the first. "An Act respecting the Inspection of Electric Light," 57-58 Victoria, chap. 39, was passed on 23rd July, 1894; but time was allowed for obtaining and proving standards and apparatus. The Act came into force, we believe, on the 1st April, this year. Its administration is under the control of the Department of Inland Revenue, and the measure, while affording protection to consumers, is regarded with favor by electric light companies.

Its first provision determines the unit of electricity by which the supply of current is to be measured: 1,000 watt-hours, or the equivalent thereof in ampere-hours, is the commercial unit of supply. Persons or companies contracting to supply electricity are held responsible for the maintenance of their lines, fittings and apparatus in a proper condition. But the contractor is not liable for variation of pressure caused by unavoidable accident or the uncontrollable condition of the elements. If any such contractor discovers on the premises of a purchaser a dangerous connection with the earth, of an electrical resistance of 5,000 ohms or less, he may discontinue the supply of current to that purchaser until the earth connection has been removed. And if in such case the purchaser is dissatisfied, he may, on application to the Department, have his wires and fittings tested. No one shall steal or waste the current, under penalty of punishment for theft.

Meters are to be used for measuring current which indicate by suitable dials the amount of energy passing to the purchaser's wires. While the electrolytic meters already in use may be continued, if the consumer likes, no more are to be bought, for all future ones are to be direct-reading, as the gas meters are, and subject to inspection. Up to the present time there has been no inspection, and while the Edison chemical meter is scientifically correct, its reading is entirely in the hands of the supplying company.

The Act in substance means that if meters are used they must be inspected and stamped by Government officials. No other inspection is intended, or indeed possible. Gas inspectors are now being instructed how to make the necessary tests. As a rule meters are only in use in large cities. In smaller towns and villages a flat rate usually prevails.

A purchaser of electricity has power to call in a Government inspector to test the pressure of electricity supplied by a contractor, on payment of a fee. The tariff of such fees is to be published in the *Canada Gazette*. All contractors for the furnishing of electricity are to take out Government certificates on the 30th June each year, and to pay a prescribed fee therefor.

CANADIAN TRADE IN 1894.

The total foreign trade of Canada in the year ended with June, 1894, amounted in value to $240,999,889, consisting of $123,474,940 imports and $117,524,949 exports. This aggregate is less than either the previous year or 1892, but greater than any twelve months' Canadian trade, with those exceptions. The amount in money value done with Great Britain is the largest for twenty years, while that done with the United States shows a decided falling off compared with 1893.

It is seen that animals and their products furnish $33,000,000 of our exports; forest products, $27,000,000; field products, $18,000,000; fisheries, $12,000,000; minerals, $6,000,000; manufactures, $8,000,000. Of these exports seventy-four millions out of one hundred and seventeen millions goes to the British Empire. This is equal to sixty-three per cent., while twenty-six per cent. goes to the States.

The countries with which we principally traded in 1894 were as under:—

Country.	Exports to.	Entered from.
Great Britain	$68,538,856	$38,717,267
United States	35,809,940	53,034,100
Germany	2,046,052	5,841,542
Newfoundland	2,818,592	814,562
West Indies	3,443,761	3,677,411
South America	1,392,285	872,392
China and Japan	540,849	2,524,919
Australia	322,745	143,317
France	544,986	2,536,964
Spain	56,274	389,293
Portugal	79,363	47,106
Italy	109,188	402,443
Holland	281,058	344,706
Belgium	708,455	550,237

Taking figures of aggregate trade in the compilation on page vi. of the return, and selecting from the tables on pages 356 and 508 and 509 various countries and islands, and adding together imports from them and exports to them, we arrive at the following percentages of total commerce with different countries:

With	Proportion of total trade. Year 1894.	Year 1893.
Great Britain	46·51 per cent.	44·69 per cent.
United States	38·50 "	42·05 "
Germany	3·42 "	1·98 "
France	1·33 "	1·36 "
Other European countries	1·68 "	1·49 "
British West Indies	1·78 "	1·31 "
Other West Indies	1·98 "	1·64 "
Newfoundland	1·57 "	1·34 "
Other British possessions	1·09 "	·90 "
Other foreign countries	2·14 "	3·44 "
Total	100·00	100·00

It will be gratifying to those who loyally desire the increase of trade within the British Empire to discover, as they may from this comparison, a growth in the trade of Canada with the British Possessions of 2·71 per cent. in the last fiscal year, namely, from 48·24 per cent. in 1893 to 50·95 per cent. in 1894. Expressed in dollars and cents, this growth was from $115,929,800 in 1893 to $117,500,371 in 1894.

Our transactions with outlying portions of the British Empire grew from $8,409,500, equal to 8·55 per cent., in 1893, to $10,239,400 last year, which is equal to 4·44 per cent.

The purchases of last year were prudently limited. There is scarcely a kind of dutiable goods among the many we compare in the following table of which the imports in 1894 were not smaller than in 1893.

As a result, there is a shrinkage in the total Canadian imports of dutiable goods in 1894 compared with 1893 of rather more than seven millions of dollars, viz., from $69,878,000 to $62,779,000. The decrease is seen in dry goods, in metals, paper and books, leather, wines, in fact in almost all kinds of merchandise. We compare, below, some thirty or forty different items.

DUTIABLE GOODS IMPORTED DURING 1894 AND 1893.

	1894.	1893.
Brass and manufactures of	$369,357	$445,175
Copper " " "	157,539	352,406

—It says a good deal for the activity and importance of the Georgian Bay route that we find two new steamers built for it this season. The "City of Toronto," a side-wheel passenger boat, was launched on Saturday at Owen Sound by the North Shore Navigation Company, to ply between Penetang, Midland and Parry Sound. The "Majestic," which was floated at Collingwood on Tuesday last, belongs to the Great Northern Transit Company. She is a screw steamer, 230 feet in length.

THE GREAT LAKES TRADE.

The commerce of the great lakes of North America is so large a subject, its growth within the memory of the present generation has been so phenomenal, that one scarcely knows how to attempt a description in one article. Perhaps the best way will be to give a few figures illustrating the volume of traffic as it was in 1855 or 1860, and contrast them with the far greater figures of to-day. It was considered a great event, the opening of a new era indeed, the completion of the canal at Sault Ste. Marie, between Lakes Huron and Superior. This was in 1855. At that day the copper, the iron, the silver of Lake Superior had scarcely been exploited. The tonnage through the canal in its first year only reached 100,000 tons; in 1875 it had grown to 1,258,000 tons, and last year it was 18,195,000 tons, represented by 14,491 passages. The average size of the craft in 1875 was 618 tons; in the year 1894 it was 910 tons.

Lumber shipped through the Sault Canal in 1855 amounted to 126,000 feet only. For many years it did not reach a million, but after 1877 the trade grew by leaps and bounds—for example, from 44 million feet in 1880 to 128 million in 1885, to 361 million feet in 1890, and to 722 million feet last year.

The coal movement through the canal forty years ago was trivial, that of 1855 reaching only 1,414 tons, which would not make half a load for a single vessel of to-day. Year by year it crept up, keeping pace with the marvellous development of the metal industries of Lake Superior, until from tens of thousands of tons in the seventies it reached hundreds of thousands in the eighties, and millions of tons in the nineties, attaining its maximum in the 3,008,000 tons of the year 1893.

Now for the ore trade itself. More than half the iron ore used in the United States comes, we are told, from Lake Superior, and 95 per cent. of it is shipped by water. Previous to 1878 the whole quantity despatched from the Superior region aggregated 10,426,842 tons. In the sixteen years since then the annual shipments have ranged from one million tons to nine millions, and in 1894 the quantity was 7,755,000 tons. Of this, 1,624,000 tons went to Cleveland; 1,987,000 tons to Ashtabula; 976,000 tons to Fairport; and lesser quantities to Erie, Buffalo, Toledo, &c.

The huge iron and steel steamers that bring this ore down the lakes take coal for an upward cargo, and from Ohio and Pennsylvania ports on Lake Erie and from Buffalo the coal of these two States is shipped in millions of tons to Lakes Huron, Michigan and Superior, whose borders produce no coal.

One of the most noteworthy things about the development of traffic between east and west by way of the lakes is wondrous reduction in rates of carriage, and last year appears to have surpassed all previous records in low freights for lake carriers. Mr. G. V. Callahan, in his paper which appeared in a recent Cleveland *Plain Dealer*, reminds us that whereas in 1867 the average cost of carrying iron ore from Escanaba [which is at the upper end of Lake Michigan] to Lake Erie was $4.25 per ton, by 1870 it had been reduced to $2.50, and in 1894 ore was carried at 40 to 46 cents per ton. This is acknowledged to have been absurdly low, and 50 cents is spoken of as a likely opening rate this year.

As to grain, the sailing vessels of 1858 and 1860 used to get 14 to 16 cents for carrying a bushel of wheat from Chicago to Buffalo. In 1872 the average rate had been lowered to 7½ cents, since which date it has been coming down pretty steadily year by year, the average since 1878

being 2.9 cents per bushel. But last year, the extraordinary spectacle was seen of vessels and steamers carrying grain over this long water route, a thousand miles, for 1¼ cents the bushel.

Coal has, of course, been greatly cheapened to the West by reduced prices of transportation. Even within ten years the rate per ton from Buffalo or Ohio ports to Duluth or Chicago has been practically cut in two. In 1886 and 1887 vessel men obtained 86 cents and $1.06 per ton for carriage; in 1894 all they got was 25 to 46 cents, as to port. It requires some exertion of the mind to realize, as Mr. Callahan puts it, that a ton of coal can be carried 1,000 miles by water for the same price as is charged by a laborer in a city for transferring it from the sidewalk to one's cellar.

A lake fleet of steamers, whose capacity is estimated at 12,000,000 tons, is yearly engaged in transferring grain from Chicago to Buffalo. On the 25th March last there was, according to statements by an authority in that city, between 30,000,000 and 40,000,000 bushels of grain at that port, 4,500,000 of it in floating craft waiting for the opening of spring and the remainder in the elevators. During the year 1894 there were no fewer than 8,329 steam and sail vessels entered the port of Chicago and 8,407 cleared.

It is common and it is natural to insist upon the economy of modern low rates of carriage, and the millions saved to the farmers of the west by low freights on the lakes is often and eloquently stated. But nothing is said, not even by way of a dirge, of the scores and hundreds of vessels superseded by these steel monsters of to-day—nothing of the millions of capital invested in smaller craft, which is impaired or cancelled because such craft cannot be made to carry cargo so cheap, relatively, as the new 3,000 or 4,000-ton boats. Yet the problem is a serious one for owners or stockholders in smaller vessels. Where is this extension of size in vessels, and deepening of waterways and harbors, to end? The eagerness of the Americans to overdo enterprise, and the impulsive way they dash at novelties, was well satirized by an old vessel captain of Detroit last fall, who, when asked what he thought of the Twenty Foot Channel, replied; "Oh, I reckon its all right, so far, but it won't stay right very long; for as soon as they get the channels and harbors deepened to 20 feet, along will come some enterprising d—n fool and build a boat with 21 feet draft, and then raise heaven and earth to have Uncle Sam begin digging all over again."

THE AFFAIRS OF THE MUTUAL RESERVE FUND, OF N. Y.

Mr. Pierce, Superintendent of the New York State Insurance Department, has had an official examination made of the N.Y. Mutual Reserve Fund Life Association. It is not likely that President Harper will spend quite so much of the funds of the society in publishing this report as he has done in the case of those made by some of the outside State Superintendents, for the New York official recommends "a conservative and more economical administration of affairs." Superintendent Pierce does not shut his eyes to anything he deems improper in any company's practice, and while he admits the company's solvency, his report condemns several evil things in the doings of the Mutual Reserve. "I deem it my duty," he begins, "to make certain recommendations which, in my opinion, will protect the interests of the membership." From whom do the members need protection? The sequel will show it is the officers who have been guilty of impropriety. He proceeds:—"It appears from its statement of the past year, that $358,504.83 of the mortuary receipts of $3,525,162.16 were used in expenses."

These mortuary receipts were to have been held sacred from dissipation. But here was the great sum of $358,504.83 completely used up in one year's extravagant expenses, over and above the admission fees, and the $3 per $1,000 which the members pay, specially, every year, for expense purposes. The Superintendent admits that Section 1, of Article V., appears to permit something of the sort, but he appears to think the annual dues and admission fees should be sufficient, and that if anything is to be taken out of the mortuary fund to supplement them, the "by-laws should be so amended as to explicitly set forth the exact percentage of mortuary assessments which may be used in expenses if necessary." The officers have promised to attend to this, and will, no doubt, by means of proxies obtained through agents, be able to vote that the by-law be changed accordingly, and that the expenditure was necessary to the prosperity of the society in the past, and will continue to be in the future. But where is the boasted security for the distant future, if that fund is to be thus voted away in current extravagance? The straightforward course would be to call for an adequate expense fee for each $1,000 of insurance in force. When the association started, $2 a year was all that was ever to be devoted to expenses in addition to the $8 admission fee. But in a very few years the vanity of the officers in publishing long-winded and frothy speeches all over the world far outran the $2 limit, and in October, 1866, $3 from all new comers was substituted. Those who got in during the $2 regime of economy continue to pay only $2 per $1,000 each year, we believe, while all others pay $3. But the expenses have so far outrun this provision as to call for Superintendent Pierce's strong protest. He says that by the increase of the business "the income from the admission fees and dues is correspondingly increasing, and the same are available for expenses." Oh, yes, of course, it might be said, but then the $358,504.83 came in so easily, our members did not feel it, and it will be made all right by a vote at next annual meeting.

Then, again, the constitution of the society, as set forth in its earlier documents, provides that "Twenty-five per cent. of each assessment is set aside as a Reserve Fund, and may be used for three purposes:—(*a*) to guarantee the payment of all certificates in full; (*b*) to pay all death claims over the American mortality tables; (*c*) to make policies self-sustaining after 15 years' membership." But Superintendent Pierce now finds: "It appears that since January, 1889, twenty-five per cent. of the net mortuary assessments have not been placed to the credit of the Reserve Fund," and this, he explains, is in accordance with an amendment then made to the constitution; but this amendment, he points out, "is in contradiction of Sec. 1 of the same article," and, therefore, he concludes, "this section of the constitution or by-laws is now inoperative and should be rescinded."

Next, the Superintendent criticises the "bond statements" issued by the society to members at the end of five years, and to be used ten years later, "towards the payment of future dues and assessments, provided the Reserve Fund has not, in the interval, been used for the payment of death claims. Such a state of things," he declares, "in the affairs of a great corporation, by which a large future liability is created and exists, should be corrected." He concludes this branch of the subject by the statement: "The issuance of these bond statements, the value of which is so remote and contingent, is such as not to meet with my approval."

In the financial statement, $124,842.97 is deducted from the assets as not collectable, and $187,614 is the amount of claims being resisted, but the balance of assets over liabilities is shown to have been $3,473,566 at the date of the examination. President Harper has been seriously ill for several months past, and unable to take any active part in managing the business, but is now said to be recovering, and likely to be able soon to return to New York.

ONTARIO BOOT AND SHOE MANUFACTURERS.

The Ontario boot and shoe manufacturers met in the Toronto Board of Trade building, on Wednesday last, for the purpose of discussing the advisability of organizing a section of the Toronto Board of Trade. This action was suggested by the tanners who some months ago allied themselves with the Board of Trade. On the occasion in question, Mr. W. B. Hamilton occupied the chair. Representatives of the following firms were present: W. B. Hamilton, Son & Co., J. D. King & Co., Harvey and Van Norman, R. H. Greene & Co., Garside, McKellar & Dallas, F. J. Weston & Sons, Toronto; Ames, Holden & Co., Montreal; Laidlaw, Watson & Co., London; J. McPherson & Co., Hamilton; G. V. Oberholtzer, Berlin; Hepburn & Co., Preston, and others In the discussion that followed it was found that about one-half of those present were already members of the board. It was, however, considered advisable to organize a section, and the gentlemen whose names follow were appointed a committee to take the necessary steps in this direction: Messrs. Hamilton, King, Bonnick, Van Norman, and Garside. A general discussion of the trade situation followed. It was pointed out that an advance in values was inevitable, that manufacturers could not pay fully 20 per cent. higher prices for their leather and still sell shoes on the present lists. An advance, however, will be difficult to establish. Retailers are not disposed to fall in line with higher prices, and are unwilling to place even small orders on the new basis of values. The evil of placing travellers on the road to canvass orders for a new season, before the preceding season had fairly closed, was discussed. Montreal and Quebec houses already have their travellers on the road seeking fall business, and it is whispered that more than one Ontario house is in the same position. The meeting was unanimous that in the best interests of the trade travellers should not begin to solicit fall orders until June or July, but like many other interesting discussions, this one ended "in talk."

DRY GOODS JOTTINGS.

The higher price of silver has caused an advance in Asiatic silk markets.

The St. Coix cotton mill, at Milltown, N.B., was shut down a part of last week on account of heavy freshet in the river.

The Merchants' Import Co., Toronto, has removed from 16 Melinda street to larger premises at 8 Melinda street.

With the single exception of beaver, the British Columbia catch of fur-bearing animals during the last season was unusually large.

Winnipeg merchant tailors have unfortunately not found the early closing system satisfactory, and by agreement it will cease to be.

The Royal Corset Company, of Sherbrooke, Que., have secured the services of a new manager, Mr. Charles Freeman, of Newark, N.J.

Essex merchants will close their stores, as a round robin signed by the leading merchants says, "at 6 o'clock, town time, every Tuesday and Friday between May 3 and October 29, A.D. 1895."

Messrs. D. T. Chapman, D. W. Douglass, and Geo. Cooke have been appointed a committee by the Amherst, N.S., Board of Trade to enquire into a project for the establishment of a woolen mill in that town.

Simcoe dry goods merchants have agreed to close their establishments at six o'clock p.m., except Saturdays and nights before holidays, during the months of May, June, July and August, beginning on first day of May and ending on last day of August.

Two C. P. R. engineers at London laid a charge of fraud against a Toronto man. They claim that over a year ago they purchased cloth from a pedlar on the understanding that if the stuff was unsatisfactory it could be returned to the headquarters of the firm in Toronto, and gave notes for $27.50 each. The cloth proved to be shoddy, but when the purchasers went to the "firm's" alleged quarters in Toronto they found it was a flour and feed store. A warrant was issued in March, 1894, for the pedlar's arrest, but he had left London, and evaded the police until arrested in Hamilton last week. The notes had been sold, and when collection time came the engineers settled only at the instance of the courts. It is but reasonable to suppose that two suits will be bought from reputable London merchants soon this spring.

An evidence of renewed prosperity is a strike of the employees of the Cornwall Manufacturing Co. for an advance in wages. We have so long been accustomed to strikes against reductions, that a strike for an increase is a real novelty. Economists show, that while as a general rule, strikes against a decrease in wages are a failure, strikes for an increase are often successful. The idea resolves itself into this, that employers and employees are alike ruled by the market at large. When trade is good, wages and profits rise; when trade is poor, wages and profits fall. The question now to be solved is the condition of trade. If the industrial conditions are sufficiently improved the employees must win their case, but otherwise they must lose it. In this connection, as gauging the market, the strike is especially interesting.

FOR GROCERS AND PROVISION DEALERS.

St. John, N.B., north end grocers will organize.

Perth is to have a brewery, with Messrs. Grant and Mattman as proprietors.

W. M. Parker, of the Sandwich hatchery, placed last week a million white fish fry in Lake Ontario.

The Erie Mills, owned by John Campbell, St. Thomas, will be closed for about three months, while capacity is increased from 500 to 600 barrels a day.

Crop reports received by the Northern Pacific Railway Company from various agricultural districts in Manitoba indicate that seeding conditions were very favorable

One does not expect to buy cheap fruit in Manitoba, and yet a Portage La Prairie firm advertises bananas, oranges, lemons, etc., two dozen for 25 cents. Dealers are cutting prices.

The members of the Montreal Board of Trade have been notified that in future the stop-off charge on grain from the West, *via* C.P.R., consigned to Point St. Charles for furtherance, will be one dollar per car, instead of one cent per 100 lbs., as heretofore.

The Texas Lake Ice Company, New Westminster, B.C., shipped to Australia, by the steamship "Warrimoo," from Vancouver, 3,000 lbs of fresh spring salmon. Regular shipments of fresh salmon will be made in the future on every steamer to the Antipodes.

The people of British Columbia have talked a great deal of co-operation and indulged in several experiments along that line. A co-operative store is to be started in Vancouver. Shares in the concern will be set at $5 each, and no man will be allowed more than 20 shares.

The British Columbia salmon catch is, according to latest reports, showing improvement. The export trade is, however, very depressed. Large shipments of steelheads from the Sound to New York and Boston have served to keep the price of salmon lower than ever before known at this season.

At a regular weekly meeting of the Ste. Cunegonde council, a petition from the Grocers' and Butchers' Associations asking that a heavy tax be placed on peddlers was referred to the license committee, as was also a petition from the Grocers' Association for a reduction of their business tax.

The Charlottetown, P.E.I., *Patriot* says that preparations for lobster fishing at the east end of P. E. Island are on a more extensive scale this spring than ever before. One firm alone will have 3,000 traps on a strip of seven miles of coast. There was never so many factories as this season will show. Preparations for trawling for cod on the north side are also on a large scale

The Canadian Department of Trade and Commerce have received a letter from the Canadian commercial agent at Christiana, stating that large quantities of milk in a frozen condition are being shipped from Norway and Sweden to England. The freezing process, which has been patented, is so thoroughly effective as a method of preservation that the milk is sold in London as "fresh milk."

A number of friends banqueted Mr. W. H. Ferguson, for many years one of London's best known grocers, at the Tecumseh House, on the occasion of his departure to Detroit. Mr. Thos. C. Irving, of Bradstreet's, sat at the head of the table, while Mr. W. Bremner, of Perkins, Ince & Co., Toronto, occupied the vice-chair. Mr. F. received an album, filled with portraits of his friends. Many toasts were honored and a jolly evening spent.

A conference was held at the Hamilton Board of Trade rooms last Saturday between the directors of the Hamilton, Grimsby and Beamsville Railway and a deputation of fruit growers from Grimsby, Winona and other places, relative to the proposed establishment of a daily fruit market at the Hamilton terminus of the H., G. & B. road. The idea appeared to be that the market should be wholesale up to 7 a.m. daily, and retail during the remainder of the day. It is proposed

to organize a company to take hold of the project. No market fees are to be charged, and the market will be for both domestic and foreign fruits.

The Montreal Wholesale Grocers' Association at its last regular meeting passed a resolution tendering its sincere sympathy with the family of the late Geo. Childs, who was the guild's honored president "As the head of one of the oldest wholesale grocery houses of this city, he won from all who came in contact with him the highest regard, his upright and unblemished character, kindly disposition and charm of manner endearing him to all his business associates, by whom his death is most sincerely mourned, and by whom his memory will be affectionately cherished.". The vacancy caused by the death of Mr. Childs was filled by the election of Mr Chaput to the presidency, and owing to that gentleman's advancement to the presidential chair, Mr. George A. Childs was elected vice-president.

BOOK AND STATIONERY ITEMS

It is already time for baseball; the bats and masks, and other baseball supplies are in demand, and Spalding & Brother are the men to supply them.

Crepe tissue papers are still coming in for use by ladies for fancy costumes, for flower pots, for artificial flowers. The quantity used of these is enormous.

"The Story of Sonny Sahib," by Mrs. Everard Cotes (Sara Jeannette Duncan) is the title of a new story said to be full of interest for older as well as younger readers

The next volumes in the series of "English Men of Action" will be "Dundonald," written by the Hon. J. W. Fortescue; and "Colin Campbell, Lord Clyde," by Mr. Archibald Forbes.

Mrs. Humphry Ward's new book is to be entitled "The Story of Bessie Costrell," and will be ready in two or three months. The Toronto News Company have secured the Canadian market for this much looked for book.

Among recent Yankee notions is the Deviline Whistle, which has a good deal of the small boy's devil of noise in it; and the Eureka Puzzle, a little brass circlet, is one of the devices to develop people's patience, or rather impatience

The Toronto News Company has a Canadian 75-cent edition of *Trilby*, which is selling like hot cakes. And no wonder, for it contains reproductions of DuMaurier's original drawings and is of admirably clear print and good paper.

Mr. Canniff Haight, whose pleasing volume, "Country Life in Canada Fifty Years Ago," will be remembered by many, is preparing another book, with profuse illustrations, to be sold by subscription, entitled "Here and There in the Home Land."

We find the following paragraph in an American paper, attributed to an American author: "The haunts of happiness are varied, but I have more often found her among little children, home firesides and country houses than anywhere else." The real author of it is Sydney Smith, the English divine and wit.

To those who desire to learn something of astronomy or to those who wish to continue the researches they have already made into that fascinating branch of science, the siderial sphere of Mr. Mungo Turnbull, of this city, offers a very ingenious and complete instrument This is the invention which won a medal and diploma at the Chicago Exhibition, and we understand that the patent right for its construction in America is for sale.

Some days ago, Leonard Scott, the New York publisher, died at the great age of 85. He was born and brought up at Tower Hill, parish of St. David, New Brunswick, close to the borders of Maine And of that neighborhood he gives a description in his 1866 volume, entitled "Reminiscences." Readers of Blackwood thirty or forty years ago will recall the name of Leonard Scott & Co. as the New York publishers of that magazine

Every letter from Professor Blackie bore his motto penned in Greek characters in his own handwriting in the left-hand corner of the envelope. "Adopt it," he said, "and it will turn earth into Heaven; it will revolutionize society in the twinkling of an eye." This motto was: "Speak the truth in love." (Ephes. iv. 15.) And the second motto was, "All noble things are difficult to do." Letters he divided into four Bs—"Business, Blethers, Bothers and Beggary."

Higgins' Vegetable Glue is announced to be "a novel semi-fluid adhesive, for manufacturing or household use. It will stick paper or cloth to paper, wood, leather, glass or metal." We have not tried it, but we have tried Taurine Mucilage, a vegetable gelatine, the result of a new chemical discovery, and in one of the new bottles it is the neatest and cleanest thing of the kind. The same Higgins, of Brooklyn, makes inks, writing inks, drawing inks, colored inks, which are highly recommended in the States, and for which Brown Bros. Co. are Canadian agents.

CLEARING HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, April 25th, compared with those of the previous week:

Clearings.	April 25	[illegible] 18
Montreal	$10,111,987	$8,[illegible]13,534
Toronto	5,561,292	5,214,834
Halifax	977,608	894,294
Winnipeg	711,384	661,005
Hamilton	573,540	579,643
Total	$17,935,761	$16,133,370

Aggregate balances this week, $2,873,487; last week, $2,989,400

The course of spring business, or rather the opening of it, is watched with a good deal of anxiety in many quarters. The beginning of navigation is late by reason of late-lingering ice in the upper lakes The New York State canals will not be open till the 3rd May, although the Sault Ste. Marie Canal is already open. The Welland opened on the 20th instant, and the other Canadian canals are to be opened about the 1st May. Although grain vessels have got through the straits of Mackinaw, the Georgian Bay harbors are still full of ice. Country roads are bad; in some districts very bad, and we have heard of livery keepers refusing to hire out teams to commercial travellers who wished to visit interior points. In these circumstances conntry trade cannot be brisk. At the same time a hopeful feeling is general, and there is in some quarters a real lack of goods. In Montreal and Toronto a good Easter trade has been done

—Mr Sheppard Homans, the eminent actuary of New York, has retired from the presidency of the Provident Savings Life Assurance Society, feeling the necessity of some relaxation of his labours He continues, however, to be the consulting actuary, and the directors have paid him the compliment of electing him chairman of the board They express, at the same time, their high appreciation of the very valuable services he has rendered the society ever since it was founded His successor in the presidency is Mr Charles E. Willard, for a number of years superintendent of agencies, and lately second vice-president. Mr. Willard is said to be a man of excellent ability, and he has certainly had good experience, and is warmly recommended by Mr. Homans as "well qualified to win that success in the future which the Provident so well deserves."

—Regret at the death of Mr. B. Ross McConkey, many years a servant of the Canadian Bank of Commerce, and of late manager of the Guelph branch of that bank, is wide-spread and sincere. Few men had obtained, by attractive qualities of character and manner, such a hold upon the esteem of a community as Mr. McConkey had upon the people of Guelph and vicinity. His funeral was one of the largest ever known in that quarter. We understand that his successor in the charge of the branch is Mr. Wm. Maynard, who for some ten years past has had charge of the Stratford branch of the same bank. Strong testimony is borne by the people of Stratford to Mr. Maynard's good qualities. He is a banker of experience and prudence

—On the 18th May work is to be begun on the waterworks of Digby, N.S. The estimated cost is within $340,000. The town council considered tenders on Saturday night last, nineteen bids in all having been received, some of them from the United States. The contract for the construction was awarded to Messrs. Wood, of Bridgeville, Pictou, for $14,499. Tenders from the Londonderry Iron Works for the pipes, Toronto Engine Works for hydrants, the Truro Foundry for special castings, and Burrill-Johnston Company of Yarmouth, for valve boxes, were accepted. The water is to be brought a distance of five miles.

—Mr. William Rowland, inspector for the Sun Fire Office, died last week at the age of 70 Mr Rowland was an insurance man of good repute and long experience. After he came from England in 1852 settling in London, he went into the service of the Hartford Company under Mr. Chaffey; then he was with the Queen, afterward inspector for the City of London, and joined the staff of the Sun, under Mr Blackburn, in 1892. From the freshness of his face and the activity of his habits, no one could have supposed that he had reached three score and ten years

—It is stated by the Moncton *Times* that Mr. John Trainor, who has been acting manager of the Merchants' Bank of Halifax branch at Moncton for some time, goes to Kingston, Kent county, New Brunswick, to take charge of the branch there. Mr Abbot, who has been in Kingston, takes the Moncton branch, the same authority says.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st March, 1895.

J. M. COURTNEY, *Deputy Minister of Finance.*

PETROLEUM ADVANCING.

There has been a decided flurry in petroleum On Saturday last there were large purchases at $1 95 per barrel for crude The Standard Oil Company, the big American concern, is said to have made $10 000,000 by the rise inside of ten days. The conviction grows that the Standard and the Russian monopoly have come to an agreement to keep up prices at a stiff figure. The pipe line reports show that the total production is about 75 000 barrels per day Of this amount the Standard owns 30,000

According to a Berlin cable of Monday last, there are despatches from St. Petersburg, stating that the Standard Oil Company and the Russian oil producers have perfected their agreement, which awaits now the Finance Minister's sanction before becoming operative. The rise in the price of oils is likely to cause the more energetic exploitation of the works in Alsace and Lorraine, which already provide 5 per cent. of the entire amount consumed in Germany. Production in Westphalia also has been stimulated greatly. There is an effort being made to get up a European combination to combat the Russian and American deal.

TENDERS FOR COAL.

The Consumers' Gas Company of Toronto, Ont will receive tenders until noon on Monday, 29th April next, for the supply of thirty thousand tons, at 2 00 lbs.) of Youghiogheny or Westmoreland lump gas coal.

The coal to be screened over a one and one half inch screen, the coal to be delivered in about equal monthly quantities between May 15th and December 15th next

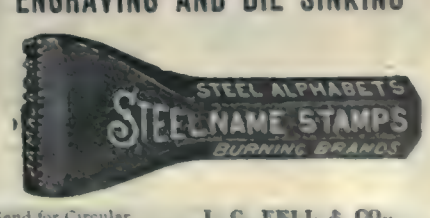
ENGRAVING AND DIE SINKING



Send for Circular **I. C. FELL & CO.,** 67 Victoria St., Toronto

—An unrivalled debater, Mr. Chamberlain has yet to prove his title to the name of statesman. His one effort in this direction has been by no means successful. No one speaks well of his Bankruptcy Act—not even Mr. Chamberlain himself, who told the Birmingham jewelers on Saturday week: "I regard the Bankruptcy Act very much as Mark Twain regarded his first-born infant. One day he was dandling the child upon his knees, and his wife came in and said, 'Well, Samuel, you can't deny that you love that baby dearly.' 'No,' said Twain, 'I can't admit that, but I don't mind confessing that I do respect the little thing for his father's sake.' (Laughter.) Now, that is precisely my position towards the Bankruptcy Act, and if you can improve in any way the condition of my infant by taking off a limb here and there, or by adding another limb, all I can say is I shall be most happy to assist your efforts"—*Grocers' Review.*

—A new means of distinguishing diamonds from imitations has been invented by the chemist of the Physical Institute at Geneva, Mr. Margott. He uses an aluminum pencil, with which it is possible to make a mark or write upon glass or any other substance containing silicates. Upon such surfaces, which are first moistened, the pencil will leave a perfect white mark of silverlike metallic brilliancy, which cannot be destroyed, even by the use of chemicals. Only diamonds are impermeable to the touch of the new aluminum test. All the other gems contain more or less silicic acid, and the aluminum pencil will, therefore, leave its mark on them.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 7 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments -no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

MONTREAL MARKETS.

MONTREAL, April 26th, 1895.

ASHES.—There have been some moderate sales to Britain for shipment by first direct steamers, and values are a shade firmer. No. 1 pots are quoted at $4.05 to 4.10 seconds, $3.70 to 3.75; pearls are relatively easier at $5.65 to 5.75. Receipts are a little more liberal, a few fair lots having come in during the last few days. Stock at present stands 220 of pots and 44 of pearls.

CEMENTS AND FIREBRICKS.—An import order for a lot of about 3,000 barrels of English cement, the first important order of the season, was placed last week at $1.95 for a consumer, the price being considered a good one. Jobbing orders from stock, which is low, are being filled at $2.05 to 2.10 for English, $1.90 to 2.00 for Belgian, and the market will be in good shape for new arrivals, which are expected about 3rd May. Firebricks are jobbing at former prices.

DAIRY PRODUCTS.—Beyond a moderate local demand for fresh made creamery and dairy, the butter market is very dull and easier. We quote fresh creamery 19 to 20c.; Townships dairy 16 to 18c., Morrisburg, 16 to 17c., Western, 14 to 16c. per lb. Old stock is very difficult to sell. In cheese there is almost an absence of business. From 9¼ to 9½c. per lb. is about the range for old cheese, and 9c. for new fodder cheese. Exports last week were 12,060 boxes. Eggs are lower at 11 to 12c. per dozen.

Buckwheat	10,233	20,749

DRY GOODS.—In this line of trade there is no very marked improvement visible. City retailers report business good on bright days, but there has been a good deal of showery weather to keep shoppers at home, and from this cause and bad roads country stocks are not greatly broken into, so that sorting business with wholesale houses is not as active as is generally looked for at the season. Country remittances are much complained of by our merchants

GROCERIES.—Letters from commercial travellers continue to be full of the subject of bad roads, some of them reporting the refusal of livery men to hire out teams to take them to interior points, and at many places on the railroads business is reported poor, owing to the scarcity of farmers coming in to trade. As can readily be imagined, therefore, the distribution of merchandise is but a moderate one. Among city jobbers, too, there is not a great deal doing. The tea market is very dull, and not much enquiry reported, except for low grade Japans, which are not readily available. There are yet no reliable indications as to how the market in Japan will open for new crop. Coffees are steady with some moderate trading reported. We quote Rio 19 to 21c., Maracaibo, 20 to 22c., Java, 24 to 27c., Mocha, 28 to 30c. per lb. In sugars all the demand is for the two extremes, granulated and low grade yellows; medium and bright yellows are not wanted at all. At the factories 3⅝c. per lb. is still the nominal figure for standard granulated, but fair lots are being done at the quarter. In yellows 2 7-16c. is reported the lowest figure, though some claim to have done a shade better. Barbadoes molasses is quoted at 29½ to 30c. in lots, and 32½c. the single puncheon. The milling company have made no revision of the price list for rice as yet. Dried fruits are dull and without change.

HIDES AND TALLOW.—Hides continue exceedingly scarce, and dealers are paying 7c

per lb. for both light and heavy hides of first grade. Some sales to tanners are reported at 8c., but some dealers prefer to hold. Calfskins are steady at 7c. per lb.; lambskins 10c.; sheepskins 75c. each. Tallow is still very dull, with 5c. per lb. as the top figure.

LEATHER.—The recent advance is fully maintained, and a Bristol, Eng., merchant who was in town the other day stated he could not touch black leather at the prices asked. It is understood he picked up a few lots of sole. Buying is not very active at the moment, a good many of the large shoe manufacturers having contracted ahead some time ago. Dealers are buying among themselves more than cutters, a certain speculative movement being afloat. A Toronto dealer bought quite a good lot of harness leather the other day. We quote:—Spanish sole B.A. No. 1, 19 to 20c.; do. No. 2 to B.A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 20 to 23c.; No. 2 do., 19 to 20c.; common, 17c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 22 to 24c.; grained, 24 to 26c.; Scotch grained, 28 to 30c.; western splits, 17 to 20c.; Quebec do., 14c.; juniors, 12 to 14c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 13 to 14c.; russet sheepskin linings, 30 to 40c.; harness, 20 to 25c.; buffed cow, 11 to 13c.; extra heavy buff, 14c.; pebbled cow, 11 to 16c.; polished buff, 9 to 11c.; glove grain, 11 to 12c.; rough, 10 to 20c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Some houses report a little more business doing in heavy metals, but still in small lots only, and no transactions of importance can be noted. Summerlee iron has been sold at $21 in small lots; car lots would be done at $20.50; offers of $18.50, to import, have not resulted in business. Warrants are cabled at 42s. 6d. Very few enquiries are coming from the West, where the Americans have not only captured most of the pig iron business, but are also sending in sheets, gas piping, etc. Tinplates are dull, and not a whit higher. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $20.50 to 21.00; Eglinton, $19.50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens pig, No. 1, $16.50 to 16.75; Ferrona, No. 1, $16.50 to 16.75; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25 according to finish; P.D. Crown, $3.75; do I.X., $4.50; Coke I. C., $2.60 to 2.85; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5¼c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 10 to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25; American do., $4 to 4.25. Antimony 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3½ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Turpentine is tumbling down to ordinary prices, and is quoted this week at 49 to 50c. per gal. Seal oil is said to be higher in England, and it is claimed most of the new catch will go there; local prices are unchanged. A good deal of anxiety is felt about future prices of glass; but in spite of the strike situation in Belgium, sales are reported here at $1.15, and even $1.10 in large lots. In other lines there are no changes. We quote:—Turpentine 51 to 52c. per gallon for single brls; two to four barrels, 50 to 51c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6¼c.; tins, 6¾c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal., in small lots. Leads (chemically pure, and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4¾ to 4¾c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.15 to 1.20 per 50 feet for first break; $1.25 to 1.30 for second break; third break, $2.80.

WOOL.—The situation is little changed from that of a week ago, and sales reported are mostly small and of the cheaper sorts. We quote Cape at 14 to 15½c.; some short can be had at 13c.; B.A. scoured, 25 to 31c.; domestic fleece, 19 to 22c.; pulled supers, 20 to 21½c.; extra, 23 to 26c.; Nor.-West, 11 to 12c.; British Columbia, 10 to 11c. per lb.

TORONTO MARKETS.

TORONTO, April 25th, 1895.

DRUGS.—Business conditions are undoubtedly improving, and the drug trade is feeling it as well as other industries. Collections are made with less difficulty, although there is yet room for improvement in this respect. Glycerine is firm and advancing. Camphor is strong at advanced figures. Castor oil, opium and morphine are easier. Paris green will soon spring again into life, and will begin the season on nearly the same basis of values as last year.

GRAIN.—Whether there is a scarcity of wheat in Canada has ceased to be a matter of controversy; everyone is willing to accept the fact, and even the millers who held out the longest against buying, hoping for a fall, are now bowing to the inevitable. The following table may be considered approximately correct:

	April 22, '95. Bushels.	April 25, '94. Bushels.
Montreal	399,707	632,843
Toronto	22,000	120,742
Kingston	5,000	5,000
Winnipeg	233,000	353,000
Manitoba elevators	1,542,000	2,361,000
Fort William, Keewatin, Port Arthur	1,148,000	2,620,000
Total bushels	3,349,707	6,092,585

A supply of 3,349,707 bushels in April, 1895, as compared with 6,092,585 bushels April, 1894, or a deficit of 2,742,878 bushels, is a startling fact of which cognizance must be taken. To show the nature of this market 8,000 bushels of wheat was sold this week in Toronto at 75c., which not a great many weeks ago was offered in vain at 51c. While advances have been made abroad, the strength is for the most part due to local influences. When at the low price of 47c. a great deal of wheat must have been consumed for feed purposes, for in this way only can the present scarcity be accounted for. As compared with one week ago winter wheat at 69 to 73c. is 2 cents per bushel higher than last week, spring at 67 to 73c. is 1 cent per bushel in advance of last quotations, while Manitoba wheat is quoted at 78 to 86c. Oats are dull and at 36 to 37c. easier. Peas are not firm, the market being weak at a decline of 1c. per bushel. There is little doing in barley. Rye is wanted, with but little offering; sales made east at 52c.

THE VISIBLE SUPPLY.

	April 20, '95. Bush.	April 21, '94 Bush.
Wheat	68,626,000	68,425,000
Corn	11,529,000	14,566,000
Oats	6,242,000	2,665,000
Barley	511,000	371,000
Rye	167,000	300,000

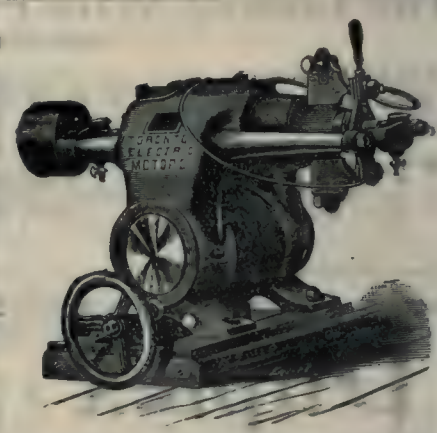
The stocks of grain in store at Port Arthur on April 13th were 718,178 bushels. During the week there were received 7,722 bushels, and shipped 666 bushels, leaving in store on April 23rd, 725,284.

Fine Electric Street Cars

OUR SPECIALTY

We also manufacture **Horse and Trail Cars** of every description

PATTERSON & CORBIN
ST. CATHARINES, Ont.



TORONTO ELECTRIC MOTOR CO.
MANUFACTURERS OF
Arc Lamps for Incandescent Current.
Repairing a Specialty.
107 Adelaide St. West, Toronto.
DYNAMOS AND MOTORS
MONTREAL ELECTRIC CO., Agts. for Province Quebec, 302 St. James St., Montreal

ELECTRIC WATER WHEEL GOVERNOR
(PATENTED)

Variations in speed detected by fast running, sensitive Governor Balls. Gate movement instantly set in operation by electric current. Quick and powerful action.
Thirty days trial.

These prices are wholesale by the car-load.

GROCERIES.—Business is good. Retail merchants are ordering freely, and jobbers are quite satisfied with trade conditions. In dried fruits there is considerable movement in choicest Gulf currants at 7½c. Some shipments of Mocha coffee are expected here soon, and as the market is almost bare of choice stock, they will be well received. Rice is moving freely. The movement in sugars is good and the market strong. In London flavoring Ceylon teas and Indian Pekoes are exceedingly firm.

HARDWARE AND METALS.—Jobbers universally regard trade as good. A fair number of orders are being received, and the country retailers are buying more freely than at the corresponding period last year. Orders received cover general lines of hardware and tinware. The principal demand, however, is for such seasonable goods as screen doors and windows, green wire cloth, poultry nets, churns, spades and shovels, harvest tools, horse pokes and rope. Trade in cut and wire nails is exceptionally good, although shipments are not in car-lots, but rather in 10-keg lots. Trade in metals is fairly good. Galvanized iron is in strong demand. Outside of the reduction in Manilla rope, there has been no change in prices of consequence. Manilla rope is now selling on an 8½c. basis.

HIDES AND SKINS.—We had scarcely gone to press last week when the hide merchants met and decided to advance prices 50c. a hundred. This action was not taken without some objection, but, as it was wisely pointed out, so long as tanners were willing to purchase at the advance, hide merchants should not stand in the way. Dealers are now paying 6c. to tanners for fresh green hides. The Chicago situation was from last reports holding firm. A merchant returning from the United States, however, expressed his opinion that the top notch had been reached. A number of American firms are carrying large stocks of hides, for although deliveries are small, consumption has also been greatly reduced. Tanners are not anxious buyers at present values, and until the market loses some of its present feverish excitement they will hold aloof until their necessities drive them to make purchases. The tanners' position is well described in the following paragraph from the Chicago *Review*: "The continued strength of hides is a serious matter to the tanners. Leather values advance slowly, but are far from agreeing with the prices of hides. The packers have no compunctions. They are determined to get every cent out of their hides that the market will stand. Light cow hides are 131 per cent., and native steers are 76 per cent. higher than they were a year ago, and all the other grades show similar increases in value. Leather quotations have advanced less than 10 per cent., and in some selections less than 5 per cent. Local dealers have also advanced calfskins in sympathy with hides. For a long time the economic law of substitution has been in play in this market, and hides have been taking the place of calfskins in the manufacture of a number of commodities, but the higher price of hides has restored the old demand for calfskins, and with it comes higher values. Sheepskins are not offering freely. Prices range from 90c. to $1, according to quality.

PAINTS AND OILS.—There is a good general movement in both paints and oils. Values remain fairly steady. Since our last report, however, turpentine has taken a sudden drop and stands at 42½c., as compared with 52c. a fortnight ago. This is due to speculative influences in the Southern States.

PROVISIONS.—Trade is fairly active. Butter continues much depressed, rolls are offering at 10 to 12c., and at these prices are accumulating. A sale of tub butter was made at 4½c. this week. The quality was as inferior as the price would indicate. New cheese is offering on the market, and jobbers report sales at 9¾ to 10c. per lb.; the quality is fairly good. There is a firm feeling in hog products, partially because of the recent sharp advance in beef; some dressed hogs continue to offer and bring $6.25 to 6.50. Eggs are easier at 10 to 10½c. the dozen; stocks are not small, and the public are apparently satiated after Easter experiences. Dried apples are quiet and steady. Evaporated apples are not active and the market is devoid of life. A quantity of maple syrup is offering here, fair in quality, with sales at 60 to 65c. per wine gallon measure.

SEEDS.—The weather is now favorable in nearly every district of the country for all kinds of cultivation. Trade in seeds is active, and, as usual, delay in ordering has led to a rush at the last moment. Some quotations have advanced, while others have sagged off a little since our last report. Red clover is worth $6.40 to 6.75, alsike $4.50 to 6.30, and timothy $3 to 3.50. These prices are for jobbers' stock.

WOOL.—There is nothing new to say of fleece wool, and indeed at this season of the year no one expects anything interesting in this market. The market is well cleaned up, and the new clip a month hence will find a good reception. For pulled wools the mills are making their usual enquiries, but there is nothing more than a normal demand. Stocks of domestic pulled wools are not large and prices hold steady.

SEE THE NEW . . .
Unconditional
Accumulative Policy
ISSUED BY THE
Confederation Life Association
TORONTO, ONTARIO,

It is a simple promise to pay the sum insured, in the event of death.
It is absolutely free from all restrictions as to residence, travel and occupation.
It is entirely void of all conditions save the payment of premium.
It provides for the payment of the claim immediately upon proof of death.
It offers six modes of settlement at the end of the Dividend Period.
It is absolutely and automatically non-forfeitable after two years, the insured being entitled to

(a) Extended Insurance, without application, for the full amount of the policy, for the urther period of time definitely set forth in the policy, or on surrender, to a
(b) Paid up policy, the amount of which is written in the policy, or after five years to a
(c) Cash value, as guaranteed in the policy.

" " " 1894, $4,239,050 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

COMMISSIONS IN FIRE INSURANCE.

A report has been made by a special committee of the New England Insurance Exchange, which deals with an important feature of fire insurance management, namely, the extravagant commissions paid for business. The president of the Continental, a prominent New York fire insurance company, wrote some time ago as under on the subject to the *Standard*, and his utterances deserve careful attention from fire underwriters:

"In your issue of last Saturday I find the report of the special committee of the New England Insurance Exchange on commissions, covering a proposed agreement, which it is stated has been subscribed to by a large proportion of the companies. It is in favor of 15 per cent. flat commission on the amount of premiums written at any agency as the maximum and only commission to be paid.

"In the prelude which the committee presents under fifth heading allusion is made to a supposititious agent who 'has taken risks not considered by him desirable, and the first step which has made possible such a condition may have been taken when one of his companies offered a money premium.'

"This is a singular paragraph in support of a flat commission, because it is not an argument against a high flat commission, but rather against a low flat commission. It may safely be stated that there would be more undesirable risks taken by those agents who are unscrupulous if the commission were 10 per cent. flat than at 20 per cent. or 15 per cent. There would be a greater incitement to secure volume as the only chance of an adequate income in proportion as the percentage of straight commission is lowered.

"The paragraph which I have quoted is, on the other hand, directly in support of a profit-sharing compensation. If the agents to-day were paid 10 per cent. flat on the amount of premiums written, and at the end of the year 15 per cent. on the profits of the agency, those agents who are careful to inspect and supervise the business would make the most money, whereas under present conditions those who are careless and indifferent, writing anything and everything, make the most, and those who are careful make the least, because through carefulness they decline business on which they would otherwise make commissions.

"The gentlemen who have framed this document endeavor to convey the impression that their action is in line with the interests of the public, inasmuch as it is in line with a reduction of commission.— It should be remembered that it depends on what money is paid for, as to whether it is an objectionable expense from the property-owner's standpoint. If it is paid to secure inspection, supervision and the prevention of fires, it will be expended directly in the interest of the property owners and will tend to reduce the rates of premium by reduction of losses. It would be better for the insuring public to-day if the expenses of the business were increased to 70 per cent., if such expenditure, by securing reforms, would reduce the loss ratio to 20 per cent.; indeed, on the present rate of premium, if the expenses were 80 per cent. and the losses reduced to 10 per cent., it would be better for the public than if the expenses were 10 per cent. and the losses 80 per cent.

"The present method of paying agents a flat or straight commission of 15 per cent., especially as it is paid in advance, on the first day of the term covered by the policy, justifies the inference on their part that no further service is expected of them than to put the risks on the books of the company; if they supervise the risk during the life of the policy and cancel in consequence of discovered faults, they are actually required to refund the commission on the return premium. Is not the whole present system, therefore, of paying agents, manifestly incorrect? I can have no better authority for this statement than the following resolution, which was adopted by a unanimous vote at the largest convention of underwriters ever held in this country, viz., the United Fire Underwriters of America, which met in New York, November 17, 1882:—

"'*Resolved*, That the question of the quality of the business done by any agent, as determined by its results, should form an important element in determining the commission to be paid to such agent, to the end that over-insurance should be guarded against and moral hazards more carefully considered.'

"It may be asked, why, then, does so experienced a convention of underwriters as the New England Insurance Exchange vote in favor of a flat commission when it may be well supposed that the majority of them believe in a profit-sharing commission? The explanation lies in the fact that a minority of the companies are opposed to paying anything but 15 per cent. flat, and the majority are willing, as a matter of expediency, to surrender a vital principle for the sake of harmony. I believe a large majority of underwriters to-day are in favor of paying a profit-sharing commission and no other, and if the insuring public and the members of the legislatures could once understand the enormity of the present method of conducting the business, resulting in millions of preventable loss, all underwriters would be forced by them to pay on this plan. It would need, I believe, but the simple statement to them of the following proposition:

"Fire insurance is a business which is transacted throughout the country by agents living in the various cities and towns, and depends for its profit on careful inspection, supervision, and good judgment; therefore, those on whose inspection, supervision and good judgment the profit depends should be paid in part, at least, according to results, as shown by profit to the company, and not entirely according to quantity or the amount of premium secured for the company.

"The company which I represent has persistently contended for this method of compensation as an option for years past, and will continue to so contend. Its assets, therefore, are probably included among those of the companies quoted as not signing the agreement.

"As already stated, the gentlemen who framed this document claim that they are endeavoring to reduce the expenses of the insurance business in the interests of the insuring public, and that 5 per cent. increase of commission expense is a burden upon the public. That depends on what the 5 per cent. is paid for. If it is paid simply for volume, it is; but if it is paid in a profit sharing commission it will secure service which will reduce the percentage of losses. And I wish to close what I have to say with a statement which may be regarded as preposterous, and as such may be ridiculed, but I make it deliberately, and believe implicitly in the truth of it, viz., that if all agents of all companies throughout the United States to-day should be paid, instead of 15 per cent. on the amount of premiums written, 10 per cent. on the amount written, and 15 per cent. on the profits, it would be discovered that the premium rates could be reduced to 85 per cent. of what would be necessary on a flat 15 per cent. commission, thus making a saving of 15 per cent. in the cost to the assured, while at the same time both the agent and the company would make more money than they do now.

"Very truly yours,

"F. C. Moore, President."

A NEVADA ADJUSTMENT.

The following contribution to the *Knapsack*, written by Edward Niles, was read at the annual meeting of the Fire Underwriters' Association of the Pacific, San Francisco, February 20th, 1895:

Some say special work is hard, and that experience is necessary for success in that line. I made my first trip last week, wrote up some new business, adjusted a loss, and found it easy. I suppose there is a difference in men, but I'm a student. I've read the rate books from one to four, and all of the Pacific Insurance Union circulars, including those that didn't go. I know "Lowden's" Adjustment of Book Losses by heart, and have studied the Kinne Rule over and over, but oh! I hope I will never have to adjust a loss where the policies don't read alike. If there's anything in Tiffany, Griswold or Hine I'm not posted on, it must be in later editions than mine. I've even read the Otey Manual clear through, including the dedication and diagrams. So, whrn the manager called me up from the supply department and started me on a special trip, I was sure I'd succeed because I had the theory down fine, and all I had to do was to apply it. I didn't travel far, but I may go out again next summer and stay longer.

First, I went to Elko, arriving there January 3rd. Agent Jones gave me $2,000 on the "Diamond Hotel." On the 5th the hotel burned. That was too bad, for it set a splendid table. I don't know why they did not get me to adjust that loss.

Then I went to Be-owa-we and took the stage for Weeping Water Station, 30 miles west. There I appointed J. Westley Ferguson, agent. He is also postmaster, justice of the peace, notary public, stage agent, express agent, and has a cattle range of 3,700 acres near the station. I insured his dwelling-house and showed him how to make the rate under Book 4

"First," I said; "the basis is seventy-five cents."

"As low as that?" asked the new agent.

"Yes, but that's on each hundred dollars, you know."

"All right," said Ferguson.

"Then for deficiencies we add seventy-five cents."

"What's that for?"

"Isn't there an old silk hat stuck through a broken window upstairs?" "Yes."

"Well, you can see by the book that we have to charge seventy-five cents for a *stove-pipe* through the side, window or roof."

"Correct," said Ferguson.

"Now for the exposure charges."

"The dwelling stands alone," said the agent; "there's no other building nearer than two miles."

"Hold on," said I pleasantly, "we must go by the book. For frame dwelling-house situate two miles east of said dwelling, on said ranch, fifty cents, and for frame private barn situate on said ranch three miles west, fifty cents."

"Are they exposures when they are so far away?" asked the agent.

"Well," I answered; "to be fair and square with you, I don't think them very dangerous, even in a strong wind, but we have to charge for them just the same, for the rule says: "Charge for every other building in the *range*."

"That's *all right*," said Ferguson. "I see you know your business."

"Any objection to my adding the 'adjuster's clause?'" I asked.

"No!" he replied, "everything goes. You're pretty good on addition, old man, add anything you want."

So I wrote $2,000 on his dwelling for five years, annual rate two and a half, term rate seven and a half, premium $150, and then went to Reno, where I made my first adjustment. The policy covered $500 on a frame dwelling-house, $300 on household furniture and $200 on one violin.

The assured was a professional musician well known in Reno, a distinguished violinist, and appeared to be a man of superior education. Everything checked up all right until I came to the violin.

"Professor," I said: "that must have been a fine fiddle of yours to have had $200 insurance on it. Where did you buy it?"

"It was left me by my father," he replied, and the tears came to his eyes; "it had been in our family for many years."

When he said this I knew I had him, but I never changed countenance, and continued, "What did you value it at?"

"It was priceless. I refused $4,000 for it. It was insured for a trifling sum, for I never expected a fire."

"What make was it?"

"A genuine Stradivarius, and was inscribed 'Antonius Stradivarius Faciebat, Cremona, 1771.'"

"Who was Faciebat?" I asked. "One of the firm?"

He looked at me, wearily, and answered, "Faciebat is Latin for 'he made it' The violin was made by the great Stradivarius at Cremona, Italy, in 1771."

"In 1771, and this is 1895. Then it was a hundred and twenty-four years old, *and we supposed we were insuring a new, first-class* violin. Of course, you don't make any claim on that item, professor?"

"Why not?"

"Look here," said I; "see what Tiffany says," and I pulled the book on him. "Musical instruments depreciate annually 5 per cent. You can figure the depreciation yourself, professor. A hundred and twenty-four years at 5 per cent. a year leaves no value, and Griswold says: 'Where there's no value there's no liability.'"

"But—" said the professor.

"Tiffany," said I—

"D—n your Tiffany and Griswold, too," said the professor; "was there ever such an idiot?"

"Do you mean me?" said I.

"Never mind, sir," he replied. "I'll write to the company."

"Very well," I answered, and left him.

But I never understood *why* the company finally paid him a total loss.

Edward Niles.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co.
of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

DIRECTORS

J. AUSTIN (Founder Dominion Bank), **President.**
Hon. Justice Maclennan. James Scott, Merchant.

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses and contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

FIRES CAUSED BY STEAM PIPES.

Neither ordinary live steam nor "superheated" steam will heat a pipe thick and strong enough to convey it to a degree sufficient to produce a fire on wood, however dry. It will not even set charcoal aglow or in a blaze But dry charcoal, when the heat is removed from it, being nearly pure carbon, will absorb oxygen from the air under favorable conditions, so rapidly as to produce active combustion—that is, a glow or a blaze The process of the origin of a fire from a steam pipe is: The heat from a steam pipe will, in course of time, char, or, as the chemists say, carbonize, wood in contact or close to it. When this charring process extends to any depth in the wood it presents a surface full of fissures and cracks, thus exposing a large section to the air. This process of charring drives the oxygen out of the charcoal portion and keeps it out while the heat is kept up. When the heat is removed the charcoal reabsorbs oxygen from the air, and if the action is rapid enough in a dry atmosphere, combustion is the result. This explains why fires in steam plants and buildings heated by steam, that originate from steam pipes, always occur after the pipes have cooled—generally during the night. The idea of "superheated" steam in a cold pipe is the most absurd one we ever "ran up against."—*Southern Lumberman.*

SLANDER IN PRAYER.

In a decision rendered in connection with the suit for slander brought by Miss Tessa L. Kelso, librarian of the public library of Los Angeles, Cal., against the Rev. J. C. Campbell, Judge Clarke overruled the demurrer of the defendant that his statement was privileged because it was uttered in the course of a prayer before his congregation in the First Methodist Episcopal Church. The court holds that no prayer containing a slander publicly uttered can be exempt from the legal consequences, and that no communication made by a pastor to his congregation is privileged because of such relation.

HOW TO MAKE AN ENGINEER.

At a meeting of the Leeds Association of Engineers, held during the past winter, Mr. W. Clayton, who presided, said that Englishmen were told they were not to compete with foreign rivals, because continental people had superior technical education. It was nothing of the kind. Continental nations were able to compete with us because they could supply at lower prices, and that, in turn, was because men worked longer hours for less money. Technical education was a good servant, but a bad master, and conducted on the lines at present pursued in this country, would lead to nothing but disaster. It was no use sending a lad for three years to a technical school, and then at 19 or 20 giving him a few months' experience in a work shop. To make a good engineer, the good old plan of apprenticeship must be adopted. Let a boy get used to his work, and then let him learn, what he could never do at a college, business habits This was the only way to make an engineer, and no other way would be successful

A NEW FEATURE IN TRAVEL.

In April, 1895, an arrangement was put into operation by the Great Northern Railway and the Northern Steamship Company which merits the attention of other roads. This is, says the *Railway Review*, a department of personally conducted first-class tours, including all travelling expenses. For the management of this business, Mr A C Harvey, formerly for many years engaged in organizing California tourist parties in the New England territory, and an agent of the Great Northern Company ever since its formation, has been appointed general tourist agent of the joint lines. This new departure in the railroad service promises to be of great public benefit. The scheme includes personally conducted trips at frequent intervals during the summer, from all parts of the country east of the Missouri River, to the Yellowstone National Park, the Pacific Northwest, Utah, Colorado and Alaska.

VALUABLE MINERALS IN LABRADOR.

We learn that the report of W. P. Low, of the Dominion Geological Survey, on explorations in the great Labrador peninsula, has been published. Mr. Low and his colleagues in two years travelled 5,660 miles in Labrador. He makes mention of good commercial timber, mostly spruce, balsam, poplar and white birch, in that country. All lakes and rivers of the interior were found well stocked with fish, those of the eastern watershed especially so. Lake trout, often of large size, brook trout up to seven pounds weight, large whitefish, pike, landlocked salmon and two kinds of sucker were all taken almost everywhere.

Perhaps the most important geological information obtained is the discovery of a great and hitherto unknown area of cambrian rocks, extending northwest from north latitude 53 degrees beyond the west side of Ungava Bay. These rocks are made up of a great thickness of conglomerate, sandstones, slates, shales and limestone, together with intrusive igneous rockets. Their chief economic value is due to the immense amount of bedded iron ore found along with them. The ores are chiefly specular and red hematite, with beds of siderite or carbonate of iron Thick beds of fine ore, associated with jasper, were found

Mercantile Summary.

LENNOXVILLE is now provided with the incandescent lights on all the principal streets.

THE total importations of champagne into the United States for 1894 were 257,087 cases.

THE St. John's *News* says that M. Steel & Co. are removing their wholesale grain and provision business from Melbourne to new quarters in the old St. Francis Hotel, Richmond.

MR. HUGH LEONARD shipped 400 tons of chromic iron from his mines at Little St. Francis to England recently. The ore yielded 50 per cent. pure material. If this be an ordinary specimen the find is a valuable one.

THE British Columbia Oil and Guano Co., Ltd., has been registered in England, with a capital of £20,000, to transact in the United Kingdom and British Columbia the business of making, refining, and dealing in all kinds of guano, oils, furs, etc.

RECENT minor failures in Montreal are as follows: K. Aubut, a small dealer in teas and crockery, has made assignment.—Ephrem Lemay, tailor, has also assigned, owing $1,100.—A demand of assignment has been served upon Jos. Dupont, grocer. He has only been in business about two years, and a lack of proper attention is assigned as the cause of his troubles.

ESSEX town will repair its waterworks at a cost of $1,000.

FOREIGN whiskey, principally Scotch (about one-eighth American), came into Canada last year to the extent of 217,089 gallons, valued at $287,930, paying duty of $461,316, equal to $1.60 per gallon.

CANADA took from European countries in 1894 no less than 190,031 gallons brandy, valued at $303,386, yielding duty of over $400,000. Of gin, 428,490 gallons, value $157,151, the duty on which was over $900,000.

A GENERAL dealer named George Kennedy, at St. Andrews, Manitoba, has got into financial trouble and made an assignment. At one time he was in a fair position, but during the past five years his assets have been diminishing.

A CHARTER is being sought for "La Compagnie de Cigares de L'Epiphanie," otherwise the L'Epiphanie Cigar Company. The proposed capital stock would be $10,000, and the principal promoters are Messrs. J. M. Fortier, cigar manufacturer, Montreal; J. E. Majeau, M. Roch, P. A. Trottier, J. M. Bourgouin, M. Forest, and E. Prudhomme, of the parish of L'Epiphanie. We understand that it is intended to make cigars from Canadian leaf.

Mercantile Summary.

"THE glorious vintage of champagne" did not cost us a serious lot of money last year, compared with the quantity of that luxurious beverage that our United States neighbors drink. The imports into Canada of champagne last fiscal year were 5,342 dozen quarts and 9,564 dozen pints, of an aggregate value of $136,542, the duty on which was $68,371.

IN consequence of the continued low price of grain in Manitoba and the Northwest, resulting in an inability to realize upon their claims against farmers, the Watson Manufacturing Co., Ltd., of Ayr, Ont., have concluded to go into voluntary liquidation under the direction of the court. Upon the petition of the company a winding-up order has been granted, Hugh McCulloch, Esq., sr., of Galt, being appointed provisional liquidator.

THE Quebec Natural Gas Co. is seeking incorporation, with a proposed capital of half a million of dollars, and the names attached to the application for a charter are those of prominent men. Among them are Messrs. Henry Hogan, of the St. Lawrence Hall, Montreal Hon. J. A. Ouimet, Minister of Public Works, C. T. Viau, J. U. Emard, advocate, H. E. Vautelet, engineer, and Eugene Coste, mining engineer, Buffalo. The company is to operate in the vicinity of Montreal.

Mercantile Summary.

THE boot and shoe stock of J. Grant, at Belleville, was sold at 47½ per cent — The grocery stock of W. Bird, Toronto, realized 67½ per cent.

IN the Halifax mayoralty contest last week Mr. David McPherson was elected mayor of that city over Mr. J. C. C. McIntosh by a majority of 148. The contest was the most exciting of the kind.

WM. ASHE, a rather prominent contractor at Ottawa, who has also been a city alderman, etc., is reported embarrassed, and a meeting of creditors has been called. He was formerly of the firm of Shore & Ashe, who dissolved two years ago.——D. Clement, general dealer at Alfred, has compromised $3,200 of debt for $1,600

AFTER doing the work of a life insurance agent for a number of years, Duncan McEwan succeeded J. W. McEwan in the baking and confectionery business at Stratford, but owing to lack of experience in that line and to granting credits too freely his assignment can be no surprise.——Another assignment is that of W. J. Cook, veterinary surgeon, Stirling.

A DESPATCH from Halifax, dated Saturday last, says that at a meeting of the directors of the Eastern Assurance Company, held on Friday afternoon, it was decided to transfer the entire business of the company to the Union Assurance Society of London, England. "The deed of transfer signed last evening guarantees the shareholders 50 cents on the dollar of capital. The Union also assumes all liabilities of the Eastern Company from noon yesterday."

EARLY in the year 1891, Sarah Dunlop & Co opened store in North Bay with a stock of over $1,500 in boots and shoes, only a portion of which was paid for. The business was managed, or rather, we fear, mismanaged by her husband, for we now hear of her assignment to her chief creditor, a Woodstock firm ——Stewart, Hewat & Co., general storekeepers, Orangeville, whose troubles we noted last week, have assigned —An offer of 25 per cent. is made to the jewelery creditors of W J Burk, at Alvinston Mr B states that last year's business was the worst he had found in his dozen of years experience.——Previously a farmer, Robert Robertson embarked in general merchandizing at Loring, but without success, as we hear of his failure. Dealing in hay seems to have been the direct cause of his assignment.

THE Canadian Rubber Company is getting ready a shipment of 30,000 pairs of shoes for Australia. Orders have also been received from that country for many thousand feet of hose and belting.

BUFFALO is the latest American city to adopt Mayor Pingree's (of Detroit) plan of potato patch farming for the poor. Mayor Jewett, of Buffalo, has appointed a committee to raise $5,000 for the scheme.

A WEEK ago the monster ship "Olive Bank" completed her cargo of lumber at Hastings' mill, Vancouver, and sailed for South Africa. She had on board 2,323,684 feet of rough lumber. Her cargo consists of extra large and heavy timbers. Her net tonnage is 2,427 tons.

THE famous "Long John" distillery, situate at the base of Ben Nevis, was almost totally destroyed by fire on Friday morning, April 12th. All the machinery was destroyed. The damage, which is covered by insurance, is roughly estimated at £10,000.

ANGUS MCNAUGHTON, for many years in business at Huntingdon, Que., in a quiet way, but with a heretofore good record, called a meeting of his creditors in Montreal a few days ago, and made an offer of 50 cents cash in the dollar.

A HUNTINGDON correspondent of the *News* relates that John Ford has sold his farm on Trout River, about one and one-half miles from the village, to Walter R. Spencer, of Elgin. The property comprises 83 acres, house and buildings. Compensation, $4,000. A. R. Cameron has sold fifty acres in New Ireland, without buildings, to Thomas Durwin, for $1,475.

A GENERAL merchant and lumber dealer, of Ohio, Yarmouth Co., N. S., Wm. Crosby, has assigned. He was involved to the extent of $5,000 to $6,000 in the recent failure of L. G Crosby, and the Bank of Yarmouth secured judgment against him not long since for $6,700. ——At Amherst, in the same province, Dalton & Etter, a young grocery concern, about a year in business, are reported assigned.

THE board of directors of the Grand Trunk Railway which resigned on Tuesday last, was composed as under:—Sir Henry W. Tyler, president; Geo. Allen, John A. Cluttons-Brock, Lord Claude Hamilton, William Unwin-Heygate, Alexander Hubbard, William Braime Jefferies, John Marnhame, Sir Henry M. Mather-Jackson, Sir Frank Smith. The committee of shareholders which has secured a majority of proxies is supporting Sir Charles Rivers Wilson as the new president. Mr. Girdlestone is chairman of this shareholders' committee.

ON page 53 of the last trade Blue Book we find the following entry under dutiable goods: "Imported, 342 pairs curling stones—334 pairs from Great Britain and 8 pairs from the United States—valued at $1,506; duty paid, $376.50. Of the stones aforesaid 192 pairs came into Ontario and 150 pairs went to Manitoba." We are happy to say that since that date curling stones have been put on the free list.

DOHERTY & FOSTER, tailors, St. John, N.B., whose failure was noted several weeks ago, have succeeded in arranging a general compromise of 25 cents cash, on liabilities of $15,000.——H. B. White, general dealer, of Centreville, N.B, is offering his creditors 20 cents on the dollar He has apparently been in a state of chronic "hardupness" for some years past, and judgments against him have not been unfrequent.

FOLLOWING the three recently noted failures in the Montreal shoe trade comes the announcement of a demand of assignment upon R. Smardon & Son, shoe manufacturers at Three Rivers. Mr. Smardon has been long in the shoe business, but with a very checkered career. He was originally of the firm of Smardon & Young, Montreal, who dissolved in 1877, and he failed shortly after and arranged a compromise in 1886. It was in 1888 that he removed to Three Rivers, under a municipal bonus, but had considerable difficulty with unskilled labor. In April, 1893, he assigned, and the business was reorganized under the present style, Mrs. Smardon and his son becoming the partners

AN assignment is made by W. H. Ballard, tailor, at Listowel. For a number of years he was a member of the firm of McMillan & Ballard, who dissolved in Jan., 1894. At that time the latter was supposed to be worth $2,000. Not being popular, the number of his customers gradually diminished and the result is as above stated.——John A. Carscallen, grocer, etc., at Northbrook, for some years carried on milling in that vicinity, but his premises were several times burnt out. A year ago he started storekeeping with, as he claimed, assets of $2,000 and no liabilities. Now we hear of his assignment. He has always enjoyed the reputation of taking care of himself

A MEETING of the creditors of J. Vanstone, jeweler, Fergus, has been called for Wednesday next. His father holds the stock-in-trade in security.——An assignment has been made by a grocer named John Atkinson, Toronto. Nearly six years ago he compromised with creditors at 55 per cent.——After disposing of his furniture stock at Wingham, T. Cornyn has, it is reported, taken his departure across our border.—— The Garden City Carpet Manufacturing Co. succeeded Stephen Syer in St. Catharines, with a capital stock of $10,000. Now we hear of their assignment, owing $3,000 or $4,000 and having assets of about $400. It is not quite six months since the company became incorporated.

THE following country failures in Quebec Province are to be noted for the week: John Duffee, a carriage-maker, long in business at Moe's River, but for the last year or so at Martinville, has assigned. He has had the reputation for some years of rarely settling an account without suit. -- A. Raymond, general dealer, St. Stanislas de Kotska, whose failure, with liabilities of about $15,000, we recently noted, is reported to have arranged a compromise at 25 cents cash.——E. Catudal, of East Farnham, a carriage maker in quite an important way of business, has been served with a demand of assignment. The establishment of large western carriage factories began to cut into his business some years ago, and some inclinations to sporting tendencies did not help matters. He is said to owe about $8,000.——Another carriage maker, C. R. Morrison, of Shawville, has made a judicial abandonment of his estate. He has of recent years also tried his hand at farming, hotel keeping, and mail driving.——Philemon Laberge, of Yamachiche, a general merchant formerly of Lapigeonniere, has assigned to the court on demand. He is said to owe $12,000.——J. R. Labelle, baker, Iberville, is reported to have compromised small liabilities at 30 cents on the dollar.——Jean Rodrique, a farmer of St. Francois de la Beauce, who engaged in a small liquor business just a year ago, has made an assignment for the general benefit.——Ernest Clermont, in general business about eight or nine years at St. Narcisse, Champlain county, is seeking a compromise at 50 cents on liabilities of about $3,000.

It is announced by circular that Mr. J Lorne Campbell retires on the 1st May from the stockbroking firm of Campbell & Wyatt, Toronto The business will be continued by Wyatt & Co, and Mr H F Wyatt, the senior member of the firm, trusts he may have a continuance of public patronage.

THE AIKENHEAD AND SLOAN ESTATE

We have received a letter taking exception to our remarks in our issue of 19th April respecting the firm of Aikenhead & Sloan. What we said was induced by a perusal of the evidence of the partners under examination. The solicitor who writes to us has a firm belief in their honesty and has this to say: "Their history as a firm is briefly as follows: In the beginning and early part of their firm operations they were assisted by loans from their relatives. They did not borrow from strangers nor friends, but from their relatives, who have never pressed or filed their claims. They put all this money into plant and machinery for cold storage business, investing therein upwards of $4,500, which still remains there, not squandering it or using it for themselves, but believing and hoping to conduct under the operation of it a successful business, this really meaning too large an expense in plant and leaving them with a limited capital—a mistake of judgment probably, but not a crime. They met with, shortly after this commencement, two business losses in which there may have been lack of business foresight, such as old experienced men would have shown, losing thereby about $2,500, and drawing as a result very heavily from their available capital funds. Through the depressed times they met with other business reverses involving smaller losses. Instead of employing some scientific system of bookkeeping and carefully recording and checking business thereby, they were not in all respects watchful of same, and actually did withdraw from their *own* till money in Mr. Aikenhead's case about $300 per year, and about the same (no more at all) amount in Mr. Sloan's case, or accurately, $150. Lastly, they placed, in absolute good faith, what they considered a fair value on their patent and other assets. The great difficulty was and has always been that there was too much money put into good machinery and plant and too little kept for ready capital to buy and sell, the latter business being the most profitable in this cold storage business; this, combined with the business reverses mentioned, baffled their hard work and efforts to keep the business going, and the result was assignment." The MONETARY TIMES is accused by this letter of being too hard upon the firm, libelling them cruelly, and so on. We are willing to let any fair-minded business man judge whether, upon the statements of this letter given above, we said anything more than the facts justify. Granting their honesty and good intentions, they lacked foresight and business judgment, they did not keep books properly, they did not record and check their transactions as they should have done They lost their own money and their friends' money, as they had a right to do, but they unwisely went further, and bought on credit $5,000 or $6,000 worth of goods, whose vendors do not now get ten cents in the dollar

HULME v DRACHENFELS BANKET GOLD MINING SYNDICATE—A debenture charging a company's "property" does not *prima facie* include uncalled capital, according to Vaughan Williams, J., but it may do so if the debenture is issued in pursuance of articles of association treating uncalled capital as forming part of the property chargeable

Debentures.

THE SITUATION.

That Canadian reprints of American books, copyrighted in the United States, can be legally sent into that country, is an opinion which comes across the border as a genuine surprise. It is given on the authority of Solicitor-General Conrad of the Department of Justice, and of Solicitor Reeve of the Treasury Department, Washington. Of course not even these concurring opinions can settle the law, but they leave little doubt that it is as they state it. These officers could have had no prepossession in favor of the conclusion to which they felt it their duty to come; the opinion has at least the merit of being thoroughly impartial. The case on which this opinion was called for was this: A copy of a cheap edition of "Ben Hur," an American copyrighted book, printed in Canada, found its way to the United States, and the question was whether it had a right to go there. The owner of the copyright will not necessarily be bound by the opinion of the law officers; he can appeal to the courts for an authoritative decision. If Canadian reprints can go into the Republic, they only slip in through a loophole in the copyright law, which Congress would be sure to close at the first opportunity. It would not be safe for Canadian publishers to rely on the opinion of the law officers, or even on a favorable decision of the courts; for the facility of entrance of such reprints into the Republic is manifestly due to an oversight in the law makers, which is certain to be supplied whenever the legislative authority becomes seized of the question.

Another copyright question has been decided judicially, Chancellor Boyd delivering the judgment. The question was whether the holder of a British and Canadian copyright can print the work elsewhere and import it into Canada. The decision was to the effect that this can be done. The contention of the plaintiff was that the importation was an infringement of the Canadian Copyright Act, and that it was necessary that the work should be printed in Canada. If the publisher had held only the Canadian or the British copyright, the presumption is that he would have had to print in this country. When it comes to controversy the self-styled Canadian Copyright Association is not happy in its management; it makes use of weapons which are too weak for the work to be done. In the legal contest it lost because the law was against it.

An extraordinary statement has been made, and by journals which rank on the Government side, to the effect that a promised aid of $2,500,000 to the Winnipeg and Hudson Bay Railway would not be granted, in consequence of a change in the contractors; which implies that the promise was made on the condition that Mr. Mackenzie, of the Toronto Railway, should be a contractor, and that the aid may be withheld if he be dropped out by the company. The reasons alleged for the withdrawal is that the company owed the old contractors, of whom he was one, money on a previous contract. The Government, in granting aid to a railway, might reasonably stipulate that the company should meet its past obligations; but there could be no justification for making the granting or refusal of aid depend upon the personality of the contractors. Such a stipulation, if insisted on, would be sure to give rise to suspicion injurious to the Government. The substituted contractors are, it seems, Americans; but would that circumstance justify a change of front? Let us not be misunderstood: we are far from saying that any aid of the kind ought to be granted to this road; but if the Government decided in favor of the grant, the making or withdrawing of it should not depend upon conditions which are capricious and unreasonable, to say the least. The promise of aid, if a promise was given, was an improvident act, which a parliamentary majority might sanction, but which would not the less be difficult to justify. The security to which the Government is to look for the loan is a mail service to the Saskatchewan, estimated at $80,000 a year. If Parliament should refuse to vote the $2,500,000, the company threatens to stop the work and fall back on the Government with a claim for the amount expended. It is evident that no such claim could be enforced; for the promise of aid, it was known from the first, must depend upon the will of Parliament. In reality, it is not likely to let contracts till the question of Government aid is settled.

The spirit of unrest which seeks to provoke a premature disclosure of the state of the negotiations between Canada and Newfoundland is fairly met by the plea that it is not in the public interest to divulge the facts at present. The anxiety to know the actual state of the case is natural, and what is more, it is co-extensive with the interest taken in the proposed annexation of the Island to Canada. When the delegation left for home certain proposals made by Newfoundland had not been considered, and since then, pending the decision upon them, the Newfoundland legislature has been adjourned, but not prorogued. It does not follow that the decision will be either a full acceptance or a complete rejection: in negotiations of this kind counter proposals and modifications of offers received are common.

A nation in the condition of Great Britain, with colonies scattered over the whole world, is constantly liable to friction arising out of contiguity with all sorts of neighbors, reasonable and unreasonable. Some time ago, Nicaragua undertook to deport the British agent, in mere wantonness, thinking she might rely on the Monroe doctrine for immunity against the outrage. When England demanded compensation for the injustice, Nicaragua resisted payment, in the vague hope of being sustained by the Washington government. All through the trouble, the United States appears to have acted in a spirit of perfect fairness; and if misled at all, the Nicaraguans must have given themselves over to the indiscreet guidance of some individual Americans. Something of this kind must have occurred, if we are to believe the complaint said to have been uttered by a Nicaraguan official high in rank, that the Americans had first led them on and then deserted them. The Mon-

roe doctrine does not deny the right of a sovereign power to demand and enforce reparation from another nation for an affront. When Nicaragua refused to pay, there was nothing for it but for Great Britain to send a few war vessels and take possession of the port of Corinto. The Nicaraguans, at first, withdrew from the town and cut the telegraph wires; but finding no relief from the Monroe doctrine, they began to consider the inconvenience of the situation, and whether it would not be better to promise to pay, in a few days time, if Great Britain could be induced to withdraw her vessels. A settlement of the dispute appears to be near.

On every point raised by the contumacious students of University College the commissioners decide against them. Chancellor Blake is declared free from blame or even suspicion of wrong influence to secure the appointment of Prof. Wrong. Of the attempt to bring in outside lecturers without authority, the commissioners say: "The conduct of the students both in printing the programme without the authority of the University council, and in refusing to publish the apology demanded in the *Varsity*, was contumacious and inconsistent with their duty." They think that an absence of tact has sometimes been shown in dealing with the students. Better means of bringing the students under discipline are recommended. Along with their report, the commissioners send to the Government certain recommendations made by Mr. Goldwin Smith and Chancellor Burwash of Victoria, respectively. The first raises the question of ending the connection between the University and the Government; and the latter, besides suggesting that one governing body should not control more than five hundred students, points out that there is danger in the present system of fellowships, the fellows being apt to sympathize with the students and to try to get professorships for themselves. Some time before the recent trouble there was a well defined conspiracy among aspirants to professorships and lectureships to obtain positions; and some of the embers of the old agitation helped to light the flame of the recent contention. The tempest in a teapot will do good. The commissioners plead want of time to found any recommendation on the suggestions made by Mr. Goldwin Smith and Chancellor Burwash. One or both of them may bear fruit in the future.

The commissioners appointed three years ago to take evidence on the question of prohibition have reported adversely to the advocates of that measure. They think that saloons should be abolished, that habitual drunkards should be subjected to some better mode of treatment than imprisonment, and that repeated offences against the license laws should be visited with heavier punishment. They think that license certificates should not be subject to annual renewal, but, in the case of good conduct, should be subject to something like permanency. Dr. MacLeod, of Barrie, the Commissioner who makes a minority report, is in favor of prohibiting the manufacture or sale of liquor.

REVOLUTION IN THE GRAND TRUNK RAILWAY.

Sir Henry Tyler and the old board of the Grand Trunk Railway have given way before the superior force opposed to them, and the new management will have to try to do what is possible to put the road on a better financial footing. As no new scheme of relief has been put forward in advance, they will be at liberty to do the best they can without being confined to predetermined limits. There are some things which it will be found impossible to do. By no magic of management can all the vast capitalization, in all its ramifications, be made productive. To suppose that the ordinary shareholders could reasonably expect a dividend would only be to propagate a delusion which must have become practically dead under past experience. To revive it now could answer no useful purpose, and the effect must be of mischievous tendency. Sir Charles Rivers Wilson, who has the credit of being a railway expert, will be looked to for some radical change of programme. The policy of the old management was to stagger along under the overshadowing load of unproductive capital as long as they could, holding out, from year to year, hopes of amendment, through improved conditions. These hopes have proved will-o'-the-wisp; and the new management will probably seek relief in some form of reconstruction. The question is very likely to be asked: What is the use of trying to carry a load of dead capital, which has never earned, and never can earn, a dividend? But an answer to this question, whatever form it might assume, would not provide a complete remedy for the evils under which the road is suffering.

The capital which earns no dividend makes no demand on revenue; the trouble is that in other particulars the revenue is often insufficient. The accumulation of preferences, almost ludicrous in the mere nomenclature, will be very difficult to deal with. The fact will have to be admitted that there has been a heavy loss of capital from first to last; and expert enquiry will be likely to show whether sacrifices will be required to be made outside the shareholders' capital. It will probably appear on investigation that no readjustment will be possible except in a spirit of compromise to which the consent of some classes of bondholders may be required. And when the experts have done their work, the difficulties of administration, under the new order of things, will begin. The difficulty arising out of the centre of the management of a railway being four thousand miles from the scene of the operations cannot be denied; whether it be capable of being remedied is another matter. The C.P.R. would seem to present some useful hints in this direction. But, it must be admitted, the cases are not quite parallel. The misfortune is that nobody in this country has any large pecuniary interest in the Grand Trunk, while the largest individual interest in the C.P.R. is to be found in Montreal. The new management of the Grand Trunk have a herculean task on their hands, and it will be interesting to see how they will proceed to its accomplishment.

THE LEGISLATION OF THE ONTARIO SESSION.

The legislation of the session of the Ontario Legislature as it came forward was mentioned and commented upon in THE MONETARY TIMES. It is not proposed here to deal further with any of the private Acts, but rather to give suggestions which may be of assistance to the public generally.

Difficulties have arisen in determining whether the hours mentioned in statutes for doing things should be governed by standard time or real time. Public officers, hotel keepers, courts and persons generally now know that the standard time is to govern. The standard time for that part of the province which lies east of the meridian of eighty-seven degrees west longitude is to be five hours behind Greenwich time, and west of the same meridian six hours behind Greenwich time.

All property situate within this province, whether the deceased owning or entitled to it was domiciled in Ontario at the time of his death or was domiciled elsewhere, is made subject to the payment of succession duties. In all civil

cases tried after the first of August next, ten jurors out of the panel of twelve may give the verdict or answer the questions submitted to the jury by the judge.

Where the net value of the real or personal estate of any person dying without a will, after the first of July next, leaving a widow but no children, does not exceed $1,000, it is to belong absolutely and exclusively to the widow, and if the value of the estate exceeds $1,000 after payment of debts, funeral and testamentary, and the expenses of administration, the widow is to be entitled to $1,000 absolutely and exclusively in any event.

The changes in the Act respecting assignments for the benefit of creditors are to the effect that where a fraudulent transfer has been made, and the party to whom it has been made shall have sold or disposed of the property or any part thereof, the money or other proceeds realized for it may be seized or recovered in action by the creditors or the assignee, if there has been an assignment for the benefit of creditors; but innocent purchasers are protected. Where there has been an assignment for the benefit of creditors, if the majority of the creditors present at a regular meeting pass a resolution asking for it, the assignor may be examined upon oath as to his estate and effects, and as to the property and means he had when the earliest of his debts or liabilities existing at the date of the assignment was incurred, as to the property and means he still has of discharging his debts and liabilities, and as to any and what debts are owing to him. He may be compelled to attend, and if he refuses to answer questions may, on motion to a judge, be committed to jail for twelve months.

It shall not be necessary hereafter to renew mortgages given to secure debentures of companies where a by-law authorizing the issue of debentures was made and registered in accordance with the provisions of Debentures Registration Act. The provisions respecting the dower of a wife in mortgaged property, referred to in a recent number of THE MONETARY TIMES, has become law.

The Act respecting Short Forms of Leases has been amended in such a way as to provide in that form of lease hereafter that the lessee may remove and carry away from the premises leased all fixtures, plant, machinery, utensils, shelving, counters, safes or other articles in the nature of trade or tenant's fixtures, or other articles belonging to or brought upon the premises by the lessee, and that the lessee in making such removal is not to do any damage, and if he does, he is to pay for it. And to further provide that in the event of fire rent shall cease until the premises are re-built. The difficulties that have arisen as to tenant's trade fixtures only occur where the lease is one in the form required by the Short Forms Act. The same difficulties may arise in the future, as in the past, as to the right to remove tenant's fixtures, unless the tenant is careful to see that he gets the benefit of these two new provisions, for it is the statute and not the law that has been altered.

In the case of an assignment for the benefit of creditors the preferential lien of the landlord for rent is restricted to the arrears of rent due during the period of one year last previous to, and for three months following, the execution of the assignment, and after that as long as the assignee retains possession of the premises leased. Notwithstanding any agreement to the contrary, in the case of an assignment for the benefit of creditors, or in case an order is made for the winding up of an incorporated company, who are lessees, the assignee or liquidator is to be at liberty within a month after the execution of the assignment or making of the winding up order, to give notice to the lessor in writing of his election to retain the premises occupied for the unexpired term of the lease, or such portion of the term as he shall see fit, upon the terms of the lease and upon paying the rent provided for by the lease.

The Act respecting electric railways is very voluminous, and embodies many of the safeguards by which railway undertakings are by the Ontario and Dominion Railway Acts surrounded.

Any person having a contract for the supply of goods or materials, or who does supply them to a contractor for work for which the corporation pays or is liable directly or indirectly to pay, is disqualified for membership in the municipal council. Lands hereafter taken for public works may be expropriated on filing by the municipality all plans and specifications and giving notice of the filing to property owners, who must put in their claims (if any) within sixty days after the service of the notices, which claims may then be submitted to arbitration. Transient traders, power to license and regulate whom is given to municipalities, are hereafter defined to be such persons who have not resided continuously in the municipality for a period of at least three months next preceding the time of the commencement of business therein.

To reduce the expense of arbitrations to fix damages under contracts or by reason of trespass or expropriation of the municipality, it is decided to appoint an official arbitrator in the city of Toronto who shall act alone for all parties, be paid $20 a day for services, have the assistance, if he desires, of a properly qualified assessor of sound judgment, experience and knowledge, to assist him. In this way it is expected that the cost of municipal arbitrations, in Toronto at least, will be largely reduced. Power is given to extend the jurisdiction of the arbitrator to the township of York, if the council of the township petition for it.

The Assessment Act is amended by taking away from cities the option of assessing vacant lands, in excess of two acres, as farm or market garden lands, and making it compulsory to so assess them; and by providing that goods in the possession of a warehouseman are not to be seized for taxes, nor are goods in the possession of an assignee for the benefit of creditors, nor in the hands of a liquidator, under a winding-up order, to be liable to be seized for taxes, except such taxes as were properly collectable from the premises in which the goods were at the time of the assignment or winding-up order. The provisions of the Act for the prevention of fraud in the sale of fruit, set out in a late number of THE MONETARY TIMES, are made law.

Restrictions are placed upon the further chartering of trust companies. Hereafter no such company can be formed without having first paid, at least, $100,000 of the capital stock, and having satisfied the Provincial Secretary respecting the fitness of the applicants for the discharge of the duties pertaining to the trust, and that the application is such as to commend the confidence of the public; and even then, only after notice has been given to all existing trust companies at the date of the application. To enable any such company to become or be appointed guardian of the persons of infants, or committee of the interests of lunatics, will require hereafter a special Act of Parliament.

In conclusion, let us add that the Law Courts Act, which has been fully dealt with before, the consolidation of the Judicature Act, the Act consolidating and amending the Agriculture and Arts Act, and the Act respecting Leases, Sales and Mortgages of Settled Estates, have all passed into law.

—The Customs returns at principal ports are indicating a somewhat increased import. At Montreal, the Customs duties collected in April amounted to $404,994, against $398,066 in April 1894. At Toronto, the increase was still greater this year being from $293,581 in April, 1894, to $326,231 last month.

OUR COTTON INDUSTRY.

We have received from Montreal a statement of the capacity, number of hands and wages paid in the cotton mills of Canada, as at 15th April, 1894. This statement shows that our twenty cotton factories had in operation at that date 12,104 looms and 491,252 spindles, and that they employed 8,216 hands, whose yearly wages amounted to $2,102,000. The industry, it will be admitted, is an important one; and the rate of average wage paid to the eight thousand employes, $256 per annum to each man, woman or juvenile employed, will, we venture to say, compare favorably with that of any other country at a time when reduced rates of wages prevail so largely. The hands and machines in each mill are given as under:—

DOMINION COTTON MILLS CO.

Mills.	Looms.	Spindles.	Hands.	Wages.
Hochelaga	1,264	56,532	832	$230,761
St. Anne's	524	21,948	353	81,197

Gibson Cotton Co, Marysville, N.S.	652	26,112	550	190,000
Hamilton Cotton Co., Hamilton	71	6,000	200	48,000
W. Parks & Son, St. John, N.B.	300	15,000	300	120,000
	80	15,000	200	
Total in Canada	12,104	491,252	8,216	$2,102,231

Of the 8,000 hands nearly 5,000 are employed by the company controlling the fourteen mills first mentioned on the list, which mills, distributed over four provinces, have almost two-thirds of the total number of looms in the country.

Two of these mills, the Hochelaga and the Merchants, both at Montreal, make bleached goods; the Magog mills produces prints only; half-a-dozen mills make plain greys, half-a-dozen more, shirtings; still others, denims, ginghams, linings, ducks, while at St. John, Halifax, Cornwall and Hamilton, yarns and warps are manufactured, as well as denims and other fabrics. The Montreal Cotton Company makes a great variety of linings, silesias, &c. When it is remembered that in the seven years from 1879 to 1885, no less than nineteen cotton mills were opened in four provinces of Canada, resulting in a most embarrassing overproduction of cloth, it argues capable management to find the manufacture so prudently adapted to the demand as to enable the keeping of all these concerns going, as they are to-day, making a healthy variety of goods.

—Mr. William W. Ogilvie, the extensive Canadian miller, has been elected a director of the Bank of Montreal in the room of the late Mr. Meredith.

PHILANTHROPY CARRIED TOO FAR.

Although there is a general obligation on the part of all persons to tell the truth, surely this is a duty imperative upon those who pose as "unco-guid," or as philanthropists, and on those who occupy positions which should cause their utterances to be without any doubt as to their reliability and good faith.

Those who make false statements intended to induce persons to part with their money who have not such educational advantages as enable them to detect fallacies in arguments and in calculations, are doing wrong. Rich men and influential men should be as amenable as are poor men to the laws which stamp the obtaining of money by false pretences as a crime.

Were this the case, would any such persons make any such statement as the following

"ILLUSTRATION,

showing the cost of carrying and paying off a loan of $1,000 on ten shares of stock, estimated maturity in ten years:

No. of Months.	Monthly Payments.	Total Amt. Paid.	Amount Borrowed.	Cost of Loan.
120	$13.30	$15.96	$1,000	$596

"From the foregoing it will be observed that the borrower has paid out, and in sums little more than the monthly rental of a property of the same value, *a less amount* in the end than he would have paid on a loan of the same amount and for the same period at six per cent. per annum, obtained in the ordinary way. He has been enabled, in short, to convert his rent into a fund for the purchase of a homestead free of incumbrance.

"Had he obtained a loan at 6 per cent. in the ordinary manner, he would have just paid out, in interest, in ten years $600, and at the end of that time would not own a brick. *He would still be in debt to the extent of $1,000.* If a tenant, he would merely hold a bundle of landlord's receipts." (The italics are from the original document.)

If this "illustration" is intended to make any person believe that by borrowing from the institution issuing this document, the borrower is to pay less than 6 per cent. per annum for his money, it is a deliberate piece of deceit.

Let us see: A loan of $1,000 with interest at the rate of 6 per cent. per annum, repaid by monthly instalments of $13.30, would be paid off in 95 months at a total cost of $1,261, being 25 monthly payments less than are required by this benevolent promoter of thrift and $335 less in money.

If this $1,000, at 6 per cent. per annum, were repaid in semi-annual instalments of $79.80, which is the sum of six of the monthly payments of $13.30, then the whole loan and interest would be paid off by a total of $1,273, or $323 less than is required by this philanthropically economical thrift-promoting plan.

If the repayment of a loan of $1,000, with interest at the rate of 6 per cent. per annum, were made by annual payments of $159.60 (12 times $13.30), then the total payments of principal and interest would amount to $1,292, or $304 less than by this selfishly-devised scheme for encouraging self-denial.

If this pamphlet is not for the purpose of endeavoring to persuade the reader that the repayment of loans by the method proposed will cost less than ordinary loans of the same amounts, with interest at the rate of 6 per cent. per annum, then it has no meaning whatever.

It is true that if any person borrows $1,000 at 6 per cent. per annum, and does not repay any of the principal, the borrower will owe the whole $1,000 at the end of the term, but if he has been repaying part of the principal from time to time, he will neither owe the $1,000 at the end of the term nor will he pay out $600 for interest. But surely business men do not pretend that the $13.30, paid month by month from the time of the receipt of the loan, does not, month by month, repay part of the principal, when they on the last page of their pamphlet acknowledge that it does.

If $13.30 per month would repay part of the principal to them, then $159.60 per annum, or $79.80 per half year, or $13.30 per month paid to anybody else, would both repay part of the principal and would reduce the amount of interest payable to anybody, but them.

Let us examine another of the statements in this paragraph, as follows: "At the end of that time he would not own a brick."

Just wait a little while till we see another of their statements, which is: "*Loans are only made upon first mortgages or improved city or town property, in an amount not to exceed 60 per cent. of the appraised cash value thereof.*" So, to borrow $1,000, the borrower must own improved city or town property to the cash value of not less than $1,666.66. Now does $1,000 borrowed from this benignant, benevolent association put any more bricks on the property than $1,000 borrowed from any other company or individual would? If not, what in the world does this statement about not owning a brick mean? This statement about not owning a brick cannot be for the purpose of either enlightening or explaining anything, because if it were it would be misleading, because the man who borrows $1,000 on a straightforward plan can put as many bricks

on his "improved" property as can the man who borrows $1,000 on this expensively cheap system.

This beautiful pamphlet is further picturesquely illustrated by the addition to the paragraph of the declaration: "*If a tenant, he would merely own a bundle of landlord's receipts.*" It is somewhat difficult to understand what "a tenant" has to do with a loan upon first mortgage or *improved* city or town property, or how a loan of $1,000 from this magic source can benefit the borrower more than $1,000 borrowed at a less costly rate, or how it would be more efficient in changing him from the condition of a tenant.

Perhaps this allusion to tenancy may be in consequence of another statement in this wondrous publication, which says that the borrower from the publishers, in paying out $13 per month, has paid out, and in sums little more than the monthly rental of a property of the same value, *a less amount*, etc., and "he has been enabled, in short, to convert this rent into a fund for the purchase of a homestead free of incumbrance."

Where is the property of the same value ($1,000) which will rent for $13.80 per month? Will the compilers of this illustrated pamphlet tell where a rental of $13.30 per month is legitimately obtainable, in any town or city on property of the value of $1,000, except under very exceptional circumstances, if at all? If they will, then there may be some excuse for them! Is it not more nearly the fact that improved property in towns and cities does not yield one-third of $13.30 per month net after payment of taxes and repairs, and that Toronto property does not yield an average of 4 per cent. per annum net?

Economy is good. Habits of economy, thrift and prudence should be encouraged; but those who exercise the necessary self-denial should not be deceived by specious statements. If they are imposed upon for the time being, they will wake up some day, and being then alive to the facts, will not bless those who have deceived them.

No one can reasonably expect, as a purely business matter, to borrow money or buy goods at retail so cheaply as they are bought at wholesale, but that does not excuse those who persuade the ignorant that they are getting money in comparatively small sums to be repaid by driblets, at the same or less rate of interest than is usual with large sums repayable in large amounts.

The "instalment plan" is often a costly plan; if it is a convenience to the borrower, then he should pay for the accommodation, but he should not be misled. No one has a right to get the money of another by publishing misleading statements.

HENRY LYE.

GLEANINGS FROM THE BLUE BOOKS.

The percentage of duty applied on the total value of merchandise, both free and dutiable, amounted in the year 1889 to no less than 20.6 per cent. It has been steadily coming down, however. In 1890 it was 19.63 per cent.; the next year 19.52 per cent.; in 1892 it had receded to 16.13 per cent.; in 1893 it was 16.39 per cent. and last year went as low as 15.69 per cent. Applying the duty in the same way, the rate per head of the estimated population came down in the same period from more than $5 per head to $3.86 per head.

According to the trade returns just issued, the value of merchandise from the United States transported through Canadian territory and shipped from the port of Montreal, was less in the fiscal year 1893-4, than it had been for some half dozen years. In 1889 such merchandise amounted in value to $10,314,000; in 1891 to $13,202,000, but last year it fell to $8,186,145. Most of this was destined for Great Britain, about 80 per cent. in fact, the remainder being for Germany, Newfoundland and the United States. Of the goods for Britain, $2,786,000 worth was grain and field products; $3,786,000 animals, dead meats and dairy produce; the remainder woods and manufactures, such as leather, whiskey and tobacco. It was mostly lard (6,214,000 lbs.) which went to Germany, together with some tallow, some bacon, 430 tons bran, and 23,100 barrels flour.

The amount of money raised by the Canadian Government during the last twenty years by means of Customs duties is an interesting subject of consideration. From July, 1873, to June, 1879, under the Mackenzie Tariff of nominally 17½ per cent., designed for revenue only, the duty totalled from $12,000,000 to $15,000,000 a year. Then came the "National Policy," which in the next few years sent the duty up. In the fiscal year 1880 the sum of $14,138,849 was collected; then as under:

Year 1881	$18,500,785	Year 1888	$22,209,641
" 1882	21,708,837	" 1889	23,784,523
" 1883	23,172,308	" 1890	24,014,908
" 1884	20,164,963	" 1891	23,481,069
" 1885	19,133,558	" 1892	20,550,581
" 1886	19,448,123	" 1893	21,161,710
" 1887	22,469,705	" 1894	19,379,822

Mr. Simon McLean's essay on the "Tariff History of Canada" tells us that during the years 1874 to 1878 the rate of duty on all dutiable goods averaged 20·4 per cent, while in 1879-1883 the average was 25·14 per cent.; in 1885, average 26·11 per cent.; 1886 it reached 27·5; and in 1887-8 had risen to 30 per cent.

The countries from which dutiable goods came into Canada, and the amounts of revenue collected on them were, in part, as under in 1894:

Country	Value dutiable goods.	Duty collected.	Percentage of duty.
Great Britain	$27,493,160	$8,245,845	30·
United States	25,823,636	6,960,950	27·
France	2,181,612	1,019,568	46·7
Germany	3,458,171	978,224	28·2
Holland	239,640	879,107	367
Belgium	468,906	119,020	25·3
Spain	381,251	207,724	54·4
China	459,894	220,588	47·9
West Indies	947,124	365,876	38·6

Thus we see that merchandise from Spain, France and China yielded the highest percentages of duty, from Belgium and the United States the lowest. If we take the Spanish West Indies alone, we find the rate of duty on the $320,000 worth of goods we bought there to be 64·3 per cent.; but these were mainly Cuban cigars, luxuries on which a heavy import is laid. The goods we get from France are also largely luxuries, such as brandy, champagne, fancy goods, silk and wool dress goods. From Spain we bring wines, fruits and nuts; from Holland gin and some other articles.

In the fiscal year 1894 the average rate of duty collected on merchandise subject to import duty was 30.85. The value of dutiable goods entered that year was $62,779,182, on which the duty was $19,379,822.

Fourteen hundred thousand dollars worth of spirits and wines imported last year paid duty of $2,395,000 into Canada's treasury (171 per cent.); and $280,000 worth of manufactured tobacco imported paid $287,700 duty (over 100 per cent.).

On paper and manufactures thereof the duty paid last year in Canada was $329,497; the value, $1,064,599; the rate of duty, 32½ per cent.

$9,493,629 worth of wool goods paid $2,876,873 duty, an average of 30⅓ per cent. duty; of silk goods, $2,481,414 worth paid $743,402, equal to 30 per cent.

Importers of books and periodicals paid $229,300 to the Canadian Government in 1894. This was equal to nearly 22 per cent. duty on the $1,063,000 worth of reading matter they brought in.

ENGLISH SHOE STRIKE.

Advices received from London during the week indicate that the great boot and shoe strike is almost at an end. Arbitration has, at last, put an end to an industrial war which, if not soon ended peaceably, must have finally resulted in the extermination of the parties concerned. So far as we have been able to learn, the whole grievance of the operatives, in this case, consisted in the introduction of improved machinery, and the consequent displacement of labor. At the beginning of the present century, the textile operatives fought against similar conditions and were worsted. Any other result than the defeat of the labor unions in the present trouble was impossible.

It has for some time been a matter of wonder that English boot and shoe manufacturers were able to hold their home trade against the Americans. Most of the improved machinery used in the trade is the product of American invention. England depends now upon America for a good share of many kinds of leather. And, strange as it may appear, the American manufacturers of foot-wear have the advantage in regard to the cost of labor. The amount paid to operatives in America for lasting, putting on sole and heel by hand is 8½d. (17 cents) in Northampton 1s. 6d. (30 cents); for sewing in welt and stitching in America, 2d. (4 cents), in Northampton 5d. (10 cents); for finishing in America, 6½d. (13 cents), in Northampton 11d. (22 cents); total cost of workmanship in America 1s. 5½d. (35 cents), in Northampton 2s. 10d. (68 cents).

Notwithstanding these facts American manufacturers have failed to export footwear successfully to England, although repeated attempts have been made. In 1894 the manufacturers of the United States sent 38,514 pairs of boots and shoes to England, and these of the cheapest kind, having a valuation of only $50,000, or say $1.30 per pair. The whole difficulty appears to be in the extremely conservative spirit of the English public, who refuse to be content with American styles, or perhaps it would be better expressed to say that the trouble lies in the failure of the American manufacturers to cater to the English ideas of what is proper in footwear. But had the strike continued this by no means insurmountable difficulty would have been overcome, and when too late the English operatives would have concluded it was better to have imported American machinery than import American shoes

THE BEAVER LINE RUNS AS USUAL

Our readers know that, owing to the pressure of excessive competition, the Beaver Line of transatlantic steamships fell into financial difficulties last season and went out of commission. This deprived the port of Montreal of one of its best known groups of steamers—the "Lake Huron," the "Lake Ontario," etc. In short, the vessels, or some of them, came into possession of the bondholders, who probably were no more desirous of running them than the stockholders of the company were, since for several seasons profits have been unattainable. However, an arrangement has now been reached which will place these well-known vessels on the route between Montreal and Liverpool. The first of them, the "Lake Superior," sails from the Mersey on to-morrow, 4th May, and is intended to leave Montreal outward on Saturday, 18th May, to be followed on successive Saturdays by the "Lake Winnipeg," "Lake Ontario," "Lake Huron," so that the house flag of the beaver and the maple leaf will again be seen, as heretofore, on the Atlantic during 1895.

This welcome result has been brought about by the public spirit of a syndicate of Montreal gentlemen; prominent among whom are Messrs. James Crathern, Hugh McLennan, Wm. Murray, Alexander Buntin, D. W. Campbell, the last named of whom is manager of the line. Canadians have reason for congratulation on the fact that people of enterprise have been found among themselves to place these staunch vessels again in commission. There is plenty of testimony to the good character of the steamers, and the rates of passage, both first and second cabin, have been placed at figures that ought to attract a good share of passenger travel. Steerage rates and arrangements outward and inward, too, are such as should secure a fair proportion of custom for this representative of the St. Lawrence route.

A NEW OCCUPATION.

We do not propose to say anything about the new woman, but a new occupation for woman is a matter which may properly form the subject of a paragraph. It has been suggested by a clever writer that "the utility woman" is a need of the present day; and there are many directions in which a woman of intelligence and pluck, who can put her pride in her pocket for a while, may be of service to her neighbors and put money in her purse. We heard last week of a case in Toronto where a mother and child were ill many weeks of a contagious disease. Each had a trained nurse; the care of the house and the cooking for these two nurses, in addition to the family, for all that time fell upon one maid, who although willing, was not strong. When the mistress recovered enough to leave her room, she found the maid broken down with strain and overwork. "And," said she, "I did so wish for some trusty person I could engage for a few weeks, so as to let my maid go away and have a rest." Here is a case in which a utility woman would be serviceable.

Various directions in which such a person would be a great desideratum are instanced by Harper's *Bazar*. She should be able to be a housekeeper for short periods on short notice, knowing the proper method of conducting a house and managing children. She should know how to manage a butler's pantry through a dinner party. She should be able to help in the care of an invalid who does not need a trained nurse. She should be able—and willing—to look after a child while its mother attends an entertainment. All these services, it is added, should be paid for by the hour.

Further suggestions as to the usefulness of a utility woman embrace the ability to pack a trunk quickly and properly, as when husband or wife, or both, are called away suddenly. Or, again, if handy with her needle, she might help the family sewing in an emergency, as in the case of a lady whose dressmaker had fallen ill and she wanted some one to freshen up a gown for a party. Further, a want is often felt, by city people going to the seaside, of a person who knows how to close up a large house when the family is gone, and how to air it and make it habitable when the family is coming home, as well as to engage servants.

MANCHESTER FIRE ASSURANCE CO.

The recent meeting of shareholders in Manchester—the seventy-first—was quite unanimous in the opinion that a fire office which is able to build up a reserve fund at the rate of £78,000 annually for the past five years, is one which must be a prosperous institution, likewise profitable. A dividend of 15 per cent. is a good endorsement of the administration of Mr. Moffatt, and of the support given him by his board since taking over the business. The report of the directors showed that the net premiums amounted to $3,787,393.18. The losses, including full provision for all unsettled claims, amounted to $2,411,420.04, say 63.5 per cent. of the premium. After paying all expenses, commissions, and taxes, the fire account for the year closed with a surplus of $120,817. The income from interest on investments yielded $102,717, and the profit on securities realized $5,816, giving a balance carried to funds of $229,351. An interim dividend of two shillings per share was paid in September last, and the directors now recommend a further dividend at the same rate for the past half year, and also a bonus of equal amount, making 15 per cent. in all as against 12½ per cent. in 1893. The capital and reserve funds now stand at $3,400,275, which is an indication of the financial strength of the company.

UNION ASSURANCE SOCIETY.

We observe that the report of this old fire underwriting company has been issued for the year 1894. During the twelve months the income of the society was £774,546, being an increase of £121,878 over that of the previous year. And the accumulated funds stood at the close of the year at £2,619,187, being £156,520 more than that at the beginning of the year. The fire insurance premiums of the Union for the year amounted to £402,114, and the losses by fire, including full provision for all outstanding claims, to £223,457, being 55·57 per cent. of the premiums. The total outgo for expenses of management, commission, etc., was £129,945, or 32·32 per cent. of the premiums, making 87·89 per cent. in all. These outgoes having been paid, there remained a surplus of £48,712, which has been carried to the profit and loss account. In the life department, the number of policies issued during the year was 3,542, for a total sum of £1,157,462, the annual premiums on which amounted to £42,247. The total amount of life premiums brought into the account was £272,798, and the income from interest and fees, and profit on investments sold, was £70,813, making the gross receipts for the year £343,611. Against this amount there are the life claims (£155,449), and other charges for surrenders, commission, expenses, etc, amounting to £71,435, making the total outgo £226,884. The life assurance fund now amounts to £1,695,057. It is the Union which has acquired the business of the Eastern Assurance Company, according to a despatch from Halifax.

LONDON BOARD OF TRADE.

The annual meeting of the London Board of Trade was held on Friday evening last, 26th April, Mr. John Bland, president, in the chair. A pleasing feature of the yearly report was the addition of statistics relating to the city's progress in all branches of trade. It is five years since similar figures were collected. Nine general meetings of the board had been held during the year. The report referred to the prospect of an electric railway running through the streets of London before 1895 had expired. A joint-stock steamboat company had been formed, and arrangements made whereby four large passenger and freight boats running between Toledo, Cleveland and Montreal will call at Port Stanley twice a week during navigation. A wire nail manufactory was established in London during the year, and the inducement to locate there was the superior situation, railway advantages and low freight rates.

The imports into London for four years averaged $2,507,580 annually, and the exports showed a marked increase during 1894, thus: in 1891 they were $598,403 in value; 1892, 678,417; 1893, $797,382; 1894, the large sum of $1,036,662. The returns of the inland revenue department showed: Cigars (manufactured), 22,601,745; petroleum 12,835,081 gallons; malt, 4,487,024 pounds; beer, 1,598,870 gallons; tobacco, 8,891 pounds. The excise duty collected during the year amounted to $365,292.61, viz.: on spirits, $79,259.30; malt, $68,089.48; tobacco, $67,312.05; cigars, $133,781.49; petroleum, $12,155.35; other sources, $4,694.94.

The retiring president, after commenting with approval on the statistics showing the year's business in the city, moved the adoption of the report, which was seconded by Mr. L. H. Ingram and carried. The election of officers for the next year resulted as follows:

President—John Bowman.
Vice-President—A. B. Greer.
Secretary-Treasurer—J. A. Nelles.

The council, arbitration committee, board of examiners, advertising committee, Western Fair representatives, and railway and municipal committee, were elected *en bloc* as nominated a month ago. A committee consisting of Messrs. John Cameron, L. H. Ingram, T. R. Parker and John Bland, will select speakers to handle the various subjects coming before the board. In conclusion, Mr. J. S. Pearce moved and Mr. Cowan seconded a vote of thanks to the retiring president, Mr. Bland, saying he believed in giving honor to whom honor was due, and thanks to those who were deserving of it, to which Mr. Bland replied. The new president, Mr. John Bowman, was well received on making his bow. He referred hopefully to the signs of the return of increased prosperity, as evidenced by the increase in price of such staple products as cotton, beef, wheat, oil, etc.

HARDWARE AND METAL TRADES.

London brass-workers will organize a trade union.

Manufacturers of cast iron soil pipe declare an advance in values amounting to 15 per cent.

Plumbers' supplies on country account are moving somewhat more freely, but the city trade remains dull and lifeless.

Trade with Manitoba and the North-West is fairly good, but collections from this quarter are not as prompt as they should be.

The price of galvanized pipe has advanced, and a discount of 50 per cent. alone, instead of 50 and 5, as hitherto, is now allowed off list

Leather belting is advancing and prices have stiffened fully ten per cent. during the last fortnight. This is due to dearer raw material.

Tinware is not moving freely. The season is advancing, and it is but natural to expect a falling off in the demand for spring specialties.

It is pleasing to note advanced prices in several lines of hardware goods, and we may expect this industry to lag behind in the race toward improvement.

Trade in block iron and sheet steel has fallen off a little, although enquiries for quotations are such that there is every indication of a free movement next month.

Trade in metals is not without encouraging features. Galvanized iron, tin plate and terned roofing are in demand, and shipments from stock are fairly large. Import orders for these goods are being freely booked.

Retail dealers on the north shore of the Georgian Bay and the Upper Lakes are sending in their orders freely now. The first boat leaves Collingwood this week, and carries large shipments from Toronto wholesale houses

The week's trading has not, on the whole, been quite as brisk as that of the preceding week. Orders, however, are fairly satisfactory, and merchants regard the lull as but momentary, and look for renewed activity soon.

If it is possible to gauge the extent of the trade in dairy products during the coming season by the demand this spring for churns and creamery supplies, the trade will be very large. Although the spring is now well advanced, the demand continues and large shipments are being made by Toronto wholesale houses.

DRY GOODS JOTTINGS

Berlin merchants are discussing early closing.

Hamilton tailors object to the representatives of Toronto houses seeking orders in that city.

Large consignments of American cotton goods are being forwarded *via* C.P.R. to Shanghai, China.

Strathroy is ambitious to have a carpet factory, and a movement is on foot to boom a concern to the extent of $3,000.

The Port Elgin, N.S., woolen mills, which have been closed during the greater part of the winter, will soon be in operation again.

The Waterloo Knitting Company, of Waterloo, Que., has begun the erection of an ell to the factory, in which blankets will be made

A meeting was called for last week of the Richmond Water Power and Manufacturing Company, whose affairs are said to be in need of reconstruction.

Fancy gauze, taffeta, and satin ribbons will be noticed on midsummer gowns as belts, collars, bows, imitation box plaits on waists, plastrons, etc.—*Economist*.

The weather as we write is all that could be desired by retailers, and influenced by the warm, summer-like days, the demand for summer dry goods is day by day growing larger.

Montreal retail milliners say that 1895 has opened up badly for them, and although the last few weeks have given evidence of improvement, prospects are not of the brightest sort.

The number of buyers representing Canadian wholesale houses, says the *Draper's Record* Bradford correspondent, has been somewhat further increased on this side. Although a few are operating rather largely, fearing a further rise in prices, others are purchasing with the greatest caution, and complain of the cutting policy induced by the excessive competition in the Dominion, which will probably be heightened when the big United States jobbers start working their ground, assisted by the reduced tariff.

The returns of the Ulster linen trade published for last month give the number of yards of linen exported as 20,338,800, against an average for five preceding years in the same month of 13,966,500 yards, or equivalent to an increase of 45·6 per cent. The increase in value is not proportionate, being £364,067, compared with £320,708, or 13·5 per cent. For the same periods there are shown to be increases to the United States, 89·7 per cent.; British America, 35·9 per cent.; France, 34·9 per cent., and Italy, 28·5 per cent. in quantity.—*Draper's Record*

At the annual meeting of the Globe Woolen Mills Company, Montreal, held at the office of Mr. A. F. Gault on Tuesday, the annual report presented, under existing circumstances, was considered satisfactory The year, on the whole, has not been a good one for woolen mills, and the company has suffered more or less from keen competition. The old board were re-elected as follows:—Sir Donald A. Smith, Mr. A. F Gault, Mr. Andrew Allan, Mr Hugh McLennan, and Mr. R. R Stevenson. At a subsequent meeting of the directors Mr. A. F. Gault was elected president, and Mr. Hugh McLennan, vice-president

The following Canadian arrivals in England are reported by the *Draper's Record*, April 20th: Mr. J. W. Scott (Messrs. Alexander & Anderson, Toronto), Mr. J. D. Keenleyside (Messrs. Robinson, Little & Co., London, Ontario), Mr. T. Brophy (Messrs. Brophy, Cains & Co Montreal), Mr. E. Giguere (Messrs. McCall & Co., Quebec), Mr. A. B. Macpherson (Messrs. Lonsdale, Reid & Co., Montreal), Mr. J. N Richardson (per "Amama"), Mr. J. H. Fleming (the Canadian buyer), Mr. J. L. Bradshaw (Toronto), Mr. N. B. Sellar and Mr. J. Alexander (Messrs. Alexander & Anderson, Toronto). Messrs. Brophy, Macpherson, Sellar and Fleming were in Manchester on Tuesday.

FOR GROCERS AND PROVISION DEALERS

Advices on Japan and Formosa teas are strong in tone.

A new canning factory is being built in Fredericton, N.B.

The grocers and provision dealers of St. Stephen, N.B., talk of early closing.

The Truro, N.S., Condensed Milk Co. are extending their premises with a view to increased business.

American and Canadian brands of corned beef advanced in price again this week.

The Ogilvie Milling Co., Montreal, propose, it is said, to expend $100,000 in elevators in Manitoba and the Territories this year

Under the Government butter bounty of 20 cents a pound, 915 packages have so far been sent to England, 246 medium packages sold in Montreal (at more than the Government price), and 224 inferior packages rejected.

On April 24th, 1,999 crates and 26 barrels of Canadian lobsters were shipped from Yarmouth to Boston by steamer "Yarmouth." They are being sold in the American cities at prices ranging from 12 to 20 cents a pound.

That the sale of intoxicants should in every case be wholly separated from the sale of groceries or other domestic supplies, is the finding of the Royal Commission, which recently presented their report upon the liquor question to Parliament

Recent advices from Calcutta by telegraph state that the estimates for the new season's tea crop are out, and that the aggregate is fixed at 140,000,000 lbs., of which about 126,000,000 lbs. are reckoned as disposable for shipment to the United Kingdom, as against about 118,000,000 lbs. reported at this time last year.—*N.Y. Journal and Bulletin of Commerce*.

A prominent Montreal milling concern issued the following to their patrons last Saturday: "We beg to advise you that, owing to the high price of Manitoba wheat, we are obliged to advance prices of flour. We quote to-day, f.o.b. Montreal, as follows: Patent Hungarian, $4.15; strong bakers', $4; Algoma, $3.25; Glenwood, $2.60; Canadienne, $2 30."

The summer fruit season will soon be in full swing, and merchants are looking to Montreal now for the season's first arrivals. It is to be hoped that we may not experience a glut similar to that of last spring Official manifests report 48,500 boxes as the cargoes of the first two steamers this year, as compared with 77,060 boxes in the two steamers that arrived first last year. This is a promising sign, for although Montreal may some day become a great central fruit market, at present her distributing capabilities are limited.

Just when we were thinking it strange that no one had yet this spring predicted a total failure of the peach crop, we read the following in the Hamilton *Spectator*: "It is a little early to make any forecasts of fruit harvests this year, but, as indications now point, the peach crop looks as if it will be a failure. This is by no means positive, however, as in the fall the wood matured well, but the severe frosts have been hard on the buds, and with this is the fact that there was a large crop last year. Two big crops seldom follow each other in Canada."

The maple sugar season is a time of great interest in many parts of the Eastern Townships. The present spring, however, has not been a favorable one for the industry From Glen Sutton, Fulford East Brighton, Abbotsford, South Stukely, accounts come to the St John's *News*

of an almost uniform tenor: "Small yield," "a poor sugar season," "it did not pay to tap the trees." There have been, however, says one of these correspondents, "the usual sugar parties, and the good social cheer at those parties which we have found on other such occasions."

A swindle has been perpetrated upon a New York merchant by Ferdinand Ferrell, of Palermo, Italy, who seems to have thought that the Sicily orange and lemon trade was permanently affected by the Florida development, and determined to "make a strike" for a dishonest small fortune. Accordingly, when Mr. E. L. Goodsell, of 13 Park Place, placed abroad a credit of $2,000, the bank paid Ferrell $500 on papers showing the shipment of 700 boxes of oranges and lemons. When the goods arrived they were found to consist of a single layer of inferior oranges or lemons in each box, the remaining space being filled with stones, sand and sulphur. This fruit was not worth the freight of $1.70 per box, and Mr Goodsell abandoned it to the Government. There are other like cases of swindling. The Chamber of Commerce has asked the U. S. Government to get the Italian authorities to punish the rascal.

LUMBER TRADE NOTES.

The steel ship "Ancyra," now at Boston, has been chartered to load deals at Halifax for W. C. E., at 32s. 6d.

The St. John *Globe* of last Monday says that Mr. W. H. Murray has sold to Messrs. Stetson, Cutler & Co. fifteen million feet of logs at $9 per thousand feet.

Stetson, Cutler & Co. will start their mill at Indiantown, N.B., as soon as it can be got ready for operation. This mill has been closed down for two years.

The ship "Balasore" takes from St. John this week one of the largest cargoes of deal and birch timber that has ever left that port, viz., 1,638,782 feet deals, and 1,247 tons of birch timber, shipped by W. Malcolm McKay.

British Columbia lumbermen are dissatisfied with the ruling of the United States appraisers that cedar in any shape is liable to duty. The mill owners will probably appeal, through the Ottawa Government, to the Treasury Department at Washington.

The W. C. Edwards & Co.'s mill, at Ottawa, started on Tuesday, 30th April. This is a week later than last year, the delay being caused by the erection of the incinerator. The mill will be run on the eleven hour basis, but the men will be paid enough to place them on an eqnal footing with the employes of the mills running ten hours. They are to be paid 10 per cent. more than they originally received for the eleven hour day.

The mill of Messrs. William Mason & Sons, says the Ottawa *Citizen*, has been undergoing extensive repairs during the winter months. The old circular saws have been discarded, and in their stead are large band saws of the latest approved style. Live rollers, new lumber trimmers and a new log-way have been placed in the mill. The output during the summer is expected to be almost double what it has been for any year in the past. It is anticipated that about twenty million feet will be cut during the season. The mill will commence operations about May 1st.

A prominent New Brunswick lumberman is reported by the St. John *Sun* as saying that the winter's cut on the St. John River and its tributaries, including the Aroostook, will aggregate about 100,000,000 of logs. There will be fully as many new logs as last year, but that season nearly 30,000,000 logs were hung up in the streams. This will leave the number of logs to come considerably less than in the spring of 1894. Mr. Gibson's cut last winter, it is said, will exceed that of 1893-4 by eight or ten millions. There has been a greatly increased cut on the lower St. John as compared with recent years.

"Not in ten years," according to the *Journal*, "have the shipments of lumber from Ottawa during the winter and spring been so dull. Yet, in the face of this, prices, on the average, are firmly maintained. The chief sufferers, so far, by this dullness have been the middlemen, as the manufacturers with their usual good fortune had practically sold all the product of their mills when prices were good. They were also fortunate in selling a very large proportion of the coming season's cut at very satisfactory prices. There is one thing now very favorable to the middlemen, and that is the unusually small stock of lumber on hand, and this is not confined to the Ottawa district alone, but is a general thing throughout the United States as well as Canada. Should the present improvement in general trade keep on, as everything now fully indicates, there is no doubt that the lumber trade will at once feel the benefit, and what now looks like a dull opening will prove to be a safe and satisfactory season."

The Lindsay *Evening Post* says that a "larger quantity of saw logs than usual have been taken out during the past winter on the waters north of here, viz, the Gull and Burnt Rivers. The Rathbun Co. will have 80,000 pieces; the Dominion Bank, 25,000 pieces; John Dovey & Sons, 5,000 pieces; John Carew, 20,000 pieces; Dundas & Flavelle Co., 20,000 pieces; Burke Bros., a large quantity of elm and basswood logs to be manufactured into staves and heading. All the above will be manufactured in Lindsay. Howry & Sons have taken out a large cut of good pine—about 40,000,000 feet; about 25,000,000 feet are on the Burnt River and 15,000,000 were taken out in the township of Sherbourne and will come down the Gull River. John A. Ellis has about 30,000 pine logs. Howry & Sons and Ellis will manufacture in Fenelon Falls. M. Boyd & Co. have taken out 60,000 logs, which will be taken down to Bobcaygeon. Craig & Austin have about 30,000 logs, which will be sawn at Kinmount." On account of the large cut the Ontario Government is building new dams and slides and repairing some of the old dams in order to assist in driving the large cut of logs down the different streams.

INSURANCE MATTERS.

The man who already carries a life assurance policy may take out another, or at least he may be relied on to say a good word as he introduces the canvasser to a "likely subject."

It is worth while to remind solicitors for life assurance, as well as canvassers of other kinds, that in the matter of canvassing letters and circulars are merely introductory. Personal work face to face soliciting, alone affects results that are worth while.

The *Insurance Record* of London is informed that insurance (parcel post) of parcels for Bermuda may now be effected at the following rates:—To secure compensation up to £12 a fee of 5d.; to £24 a fee of 7½d.; to £36 a fee of 10d; to £48 a fee of 1s. 0½d; to £50 a fee of 1s. 3d. No parcel can be insured for more than £50.

As the child is insured so is the father inclined. Industrial assurance is a kindergarten for prudence. Seeds of accumulation and affluence. The self-denial required to insure a burial fund for a baby is a sweet task for a mother. Insurance does not beget murder. Insurance at the start and finish is love and self-sacrifice. Insure the children in the industrial companies.—*Jas. T. Phelps.*

A building permit was granted on April 27th to the Independent Order of Foresters for the hall they are to erect in Toronto. The site chosen is the northwest corner of Bay and Richmond streets, near the new City Hall. An appropriate ornament to the building, which is to cost $140,000 or thereabout, would be a statue of Dr. Oronhyatekha at the top, or, better still, a life-size medallion of the doughty doctor in imperishable brass somewhere on the outer walls.

From Raleigh, N.C., comes the following pleasant information: "A great reform in the method of baling cotton for shipment is about to take place in the South generally. The loss of cotton annually by fire has been very heavy, and the rates of insurance on cotton are consequently high. By the proposed new method much better protection againt fire will be given, with a material reduction in insurance rates. The cotton is to be baled under pressure in cylindrical packages which exclude the air. In this way it will not only occupy much less space, but will be practically incombustible."

With all my practical knowledge of industrial insurance, says a writer in the *Industrial Herald*, I never realized just how vast its extent was until I quite recently read an extract from an English writer, which said that agents of these industrial companies form a body characterized by remarkable intelligence, industry and energy. They work longer hours and for less pay than most of those upon whom they call, and the result of their labors in insurance in force amounts to over $650,000,000, in connection with which, probably, no fewer than $14,000,000 for premiums are made every week, two millions a day.

The accounts of the London and Lancashire Fire Insurance Company for the past year have been issued to the shareholders. They show a net premium income of £846,213, a surplus on the year's underwriting account of £65,256, and interest on investments, etc., £29,722, the latter two items representing a total profit on the year's operations of £94,979. The directors propose to pay the same dividend as for last year, viz., 10s. per share, or 20 per cent. on the paid-up capital. The financial position of the company will then stand as follows:—Capital paid-up, £212,750; reserve funds, exclusive of capital, £700,201; reserve capital at call of directors, £1,914,750.

BOOKS RECEIVED.

BANKS, BANKERS AND BANKING, and Financial Directory of Canada. —This is a second edition of Mr. Garland's convenient book, which has become a volume of more than 500 pages. It is divided into two parts, the one dealing with banking and currency in Canada, the other being a financial directory. The first part contains a sketch of Canadian banking and a synopsis of the banking systems of other countries; gives

various Acts relating to Canadian currency, a digest of commercial laws of the Provinces, legal decisions affecting insurance, the Bills of Exchange Act, the Insurance Act, etc.—all serviceable matter to the banker and financial man. In the Financial Directory are a number of useful tables; lists of agencies of the chartered banks, with their agents: private bankers; bank solicitors; British, Australasian, and foreign banks; National Banks of the United States; monthly bank statements; loan societies' statistics; insurance agents all over Canada. It is a valuable book of reference, and the price, $3, is a reasonable one. From the reputation of Mr. Garland as a painstaking statistician, its information is likely to be found correct. We understand that E. S Moore is the agent for Toronto, who is to be found at No. 30 Wellington street east. The volume is published by Mortimer & Co., Ottawa.

The fourth essay in the series of Toronto University Political Science studies has taken the form of a History of the Canadian Tariff. The essay forms a substantial looking pamphlet of some 50 pages, and it is much to the credit of Mr. S. J. McLean, the writer, that he has been able to confine his sketch of Canadian tariff vagaries since Confederation in such small space. The value of economic writings, and more especially those in connection with a tariff, depends upon the fact that the author approached his subject free from political prejudices. While Mr. McLean has not taken the position of an ultra partisan, he shows leanings towards Free Trade that, perhaps, prevent his giving to the National Policy due credit. Mr. McLean is Mackenzie Fellow in Political Science at Toronto University, and as his first appearance as an author is very creditable, we may look forward to other similar treatises from his pen.

ANSWERS TO ENQUIRERS.

MANUFACTURER, Hamilton.—Probably the case you are thinking of is that of a French manufacturer of bicycles, M. Clement. We described in July, 1893, his relations with his employees, in first arresting 19 of them, 14 of whom were proved to be robbing him, and then withdrawing the charge against them and taking them back into employ, because the remaining 400 struck. It was not from a Belgian journal but a Birmingham paper, that we took the account. It was characterized at the time as a concession to crime, dictated by convenience, if not fear, and so we regard it.

W. M., City.—Do not know of any other individual compilations on the subject than those of the Gore Mutual and the London Mutual companies, which have often appeared in our columns. There is the yearly table of the Ontario Inspector of Insurance, from which we quoted lately. A United States fire company doing a large farm business gave its experience in 1892 of losses thus: Lightning, 21.8 per cent.; incendiarism, 16.5; defective flues, 15.9; sparks on roofs, 9; defective stoves and pipes, 8.7; kerosene, matches, carelessness, lights, spontaneous combustion, 1 to 2 per cent. each.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, May 2nd, compared with those of the previous week:

CLEARINGS.	May 2.	April 25.
Montreal	$10,771,406	$10,111,937
Toronto	5,451,359	5,561,292
Halifax	1,007,881	977,608
Winnipeg	778,907	711,384
Hamilton	550,701	573,540
Total	$18,560,204	$17,935,761

Aggregate balances this week, $3,087,054; last week, $2,873,487.

—The number of British vessels which cleared with cargo for sea from Canadian ports in the fiscal year 1894 was 1,571 of a total register of 1,834,804 tons, carrying 1,174,335 tons weight of merchandise. The Canadian vessels numbered 5,158; register 1,029,235 tons; weight of merchandise 530,528 tons. The foreign vessels numbered 3,892; register, 1,960,124; weight of cargo, 989,111. It is thus evident that the Canadian were smaller vessels, most of them being, we presume, sailing vessels for the West India and other islands, and fishing vessels, while the British and foreign were mainly iron steamers. The total number cleared with cargo was 10,621, the registered tonnage 4,824,163 and the weight of cargo 2,693,974. There were likewise, aside from those clearing for the sea fisheries, 1,687 vessels cleared in ballast The destination of most of the shipping was the United States, many being steamers engaged in the coasting trade; 1,393 of the clearances were for the United Kingdom, 38 for Australia, 483 for the West Indies, 27 for Brazil, 44 for Argentina, 609 for Newfoundland, 21 for Belgium, 51 for Germany, 21 for Holland, 6 for Italy, 27 for Norway and Sweden, 30 for Spain and Portugal, 14 for Uruguay and Colombia, 11 for Chili and Peru.

—There is to be held in Toronto during the approaching summer a congress of persons interested in religion and education from all over America. The purpose of the gathering is to discuss the great social, economic, and moral problems of the day. There are to be different sections: one consisting of authors, editors and publishers; an educational section; a philanthropic section; a woman's section, and a young people's section. The general meetings of the sections will be held on forenoons and evenings, while the sections will meet in the afternoons of the week from 18th to 25th July. Some prominent persons in the United States are co-operating in the scheme; for example, Archbishop Ireland of St. Paul, President Harper of Chicago University, and Bishop Vincent of Chautauqua. A local committee has been formed, of which the president is W. B. McMurrich, Q.C., the vice-president Mr. James L. Hughes, the treasurer Col. James Mason. It is expected that the gathering of delegates will be a large one, and that the railway concessions for the occasion will bring a throng of visitors to Toronto, somewhat after the fashion of the memorable N.E.A. Convention.

—Discussing copyright, and the views of Canadians thereon, the *Illustrated London News* has a paragraph which notes the contention of several English authors that Canadians are unreasonable in demanding that English books shall be printed in Canada as a condition of copyright here. Met by the obvious reminder that Great Britain agreed to this very condition in the American Copyright Act, Mr. Hall Caine says the Canadians are asking, as a matter of principle, what was conceded to the Americans as a matter of expediency. "It is difficult," says the *News*, "to follow this verbal juggle. The Canadians wish to protect their printers just as the Americans have protected theirs. This procedure is part of the commercial policy of the Dominion. The Canadians do not recognize free trade in books or any other commodity. To ask the Imperial Government to veto the Canadian Copyright Act is therefore just as futile as it would be to demand the removal of all Canadian duties on British goods. Personally I think the whole theory of protection is wrong, but that has nothing to do with the claim of the Canadians to regulate copyright in accordance with their commercial principles."

—On Monday last the fire commissioners of Montreal concluded their investigation into the origin of the fire in the tobacco factory of W. C. McDonald. After hearing several witnesses, the commissioners came to the conclusion that the fire was caused by spontaneous combustion. It has been a puzzle to not a few persons to know why the windows of this whole immense building were covered on the outside with strong wire netting, a circumstance which made the rescue of the frenzied inmates, by egress from the windows, difficult. It is now stated that the object of thus covering the windows was to prevent the workmen or work women throwing plugs or pieces of tobacco out of window to friends below. The loss of one woman's life, who jumped from a high window, and the maiming of several more work people, male and female, is much to be regretted. Still, it would seem that their frenzied haste was in part at least to blame for this. An attempt had been made by the proprietor to provide safe means of egress.

—The council of the Montreal Board of Trade, desiring that a royal commission should be appointed to enquire into the municipal government of that city, appointed a committee to take the matter in hand. The chairman of that committee, Mr. George Hague, on Tuesday last, reported respecting an interview of his committee with the provincial Ministers about a royal commission. He said that while the Ministers had expressed their anxiety to meet the council's wishes, there was some doubt as to whether, under the present law, it was in their power to do so. The Attorney-General will decide upon this point and advise the Montreal board at a later date

—There is destitution among the settlers on the coast of Labrador and the north shore of the St. Lawrence from Tadousac eastward. It appears that the crops of these poor people were destroyed last year by heavy rains. The Quebec Cabinet decided on Tuesday to send some $2,000 worth of seed grain by schooner for the relief of the destitute, and this will be divided between the people of ten or fifteen parishes from Tadousac and Bersimis downwards.

—As a proof of reviving commercial activity it is agreeable to find that out of 132 railways in the United States and Canada, the earnings of 73 showed an increase in the first quarter of 1895, and only 59 showed a decrease. For the first two weeks of April, 78 showed an increase and 44 a decrease. Warmer weather and opened navigation on the Lakes will probably cause a still greater improvement in later weeks.

Correspondence.

MISLEADING THE PUBLIC.

Editor MONETARY TIMES:

SIR,—But for indisposition I would have congratulated you before this for the vigorous way in which (in your issue of the 19th inst.) you comment on the grossly misleading puff contained in a recent issue of the Lindsay *Post* of a hand fire engine manufactured by Evans & Co., of Omemee. It is there sought to lead the public to believe that the said firm were manufacturing a hand fire engine of powers exceeding that of any other hand fire engine, and it covertly conveyed information to the public that said engine was a fire appliance of worth and value recognized by the Canadian Fire Underwriters' Association, when the fact is the said engine has not now and never had any official recognition by the Underwriters' Association.

For this I certainly think you deserve the thanks of the public. It is time to put a stop to the imposition of this kind of fire apparatus on the not usually well informed public as to what are efficient fire appliances. To my mind it is largely owing to a class of trifling fire protection worked off on our country towns and villages that the fire loss of our country has attained such serious proportions; whereas if a moderately ample supply of fairly efficient fire appliances were generally provided. from 50 to 70 per cent. of our fire loss could be prevented.

While on this subject permit me to go further and point out what is not generally understood, viz., the grievous extent to which trifling, comparatively worthless, and oftentimes positively dangerous, fire appliances are foisted off on the uninformed public. Take, for instance, chemical fire extinguishers, chemical fire engines and chemical extinguishing compounds. For these various fire-fighting compounds or machines upwards of 700 patents of varions devices have been issued in this country and the United States alone from 1868 down to last year. And yet out of this vast number only about half a dozen have demonstrated by right of merit their right to live. By this it will be seen—readily seen—what a large field is open to the unscrupulous adventurer who industriously works off fakes of this kind on the public. These machines are generally of that class operated by carbonic acid gas, by means of which enormous pressures may be almost instantly generated; and when they are not constructed of suitable material and of requisite strength, an article most dangerous by reason of its liability to explode. In fact some of them are more dangerous to life and limb than to fire, and should never be put into the hands of innocent users. Their sale should never be allowed except after rigid government inspection, which would no doubt be speedily insisted on were the public aware of the number of explosions of this class of machines constantly occurring in this country and the neighboring States, attended in too many cases by loss of life and limb. With your permission I would like, on some future occasion, to recur to the subject.

PRO BONO PUBLICO.

April 30th, 1895.

TRADE WITH SOUTH AFRICA.

Editor MONETARY TIMES:

SIR,—While so much attention is being given to colonial trade matters, we desire to direct the attention of your numerous readers to the colony of South Africa. Inasmuch as arrangements are being perfected for direct steamship connection between Canada and the Cape, it is opportune that the following data should be placed before the manufacturers of the Dominion.

If the material progress of a country can be gauged by its purchasing capacity, then South Africa has every reason to be satisfied with its advance during the past ten years. For if there is one feature which comes out more clearly than any other in their statistics, it is the enormous increase which has taken place in its imports of British manufacture. The total exports to Cape Colony and Natal in 1886 amounted to £3,304,132 (sixteen million dollars); in 1890 they had grown to £9,128,164 (forty-four million dollars). Remarkable as these figures are as an indication of the phenomenal development of South African trade, their true significance is not realized until comparison is made with the trade returns of the other colonial possessions of Great Britain. There is no other individual colonial possession of Great Britain which can show such a remarkable increase of trade during the quinquennium, either as regards the percentage or the actual aggregate increase in value.

TOTAL EXPORTS OF BRITISH MANUFACTURE.

	1886.	1890.
To New South Wales	£7,605,889	£7,334,666
" Victoria	6,766,784	7,101,348
" South Australia	1,518,152	2,040,559
" Western Australia	380,417	464,209
" Queensland	2,219,660	2,128,216
" New Zealand	4,717,465	8,347,43)
" Canada	7,546,902	6,827,023
" South Africa	3,304,132	9,128,164

It will be seen that the rate of increase has not only been greater in the case of South Africa than in any of the other colonies, but that while in 1886 South Africa occupied only the fifth place as a customer of Great Britain, in 1890 she had overtaken all the other colonies and had the foremost rank.

Appended is a list of imports by the Cape in 1886 and 1890 respectively. There is not a line of goods specified in the following list of imports which Canada cannot supply:—

Imports.	1886. Value,	1890. Value,
Apparel and haberdashery	£540,030	£1,125,769
Arms and ammunition	54,824	90,659
Bags and sacks	9,903	12,798
Beer and ale	36,613	43,793
Biscuits	9,071	18,702
Books (printed)	28,659	63,862
Carriages (railway)	4,280	64,937
Cement	6,880	24,459
Chemical productions and dye-stuffs	17,964	65,375
Coal and fuel	68,154	184,874
Corn (grain, meal and flour)	14,833	34,621
Cottons	270,264	458,208
Earthenware and chinaware	17,737	47,301
Furniture	21,688	84,156
Glassware	17,257	38,974
Hardware and cutlery	38,199	122,383
Hats	36,532	71,782
Implements and tools	22,189	72,080
Leather (wrought & unwrought)	196,221	403,833
" saddlery	24,725	116,028
Linens	16,756	28,692
Machinery	40,133	404,188
Medicines (drugs)	25,0 2	66,499
Metals (iron, etc.)	172,057	982,886
Musical instruments	7,989	20,154
Painters' colors and materials	15,450	40,917
Paper of all sorts	37,990	69,028
Pickles, vinegars, sauces	43,290	81,171
Provisions (meat)	47,486	42,863
Silk manufactures	11,846	16,401
Soap	55,761	61,181
Spirits	33,226	63,322
Stationery (other than paper)	28,083	54,970
Wood (manufactures of)	7,793	11,674
Woolens and worsteds	66,701	271,187
All other articles	102,364	541,721

The foregoing should furnish interesting and impressive reading to our enterprising manufacturers. Banking, shipping, and all other facilities to encourage direct relations are now being provided.

We observe in our advices by mail of this day in the Union S.S. Line *Gazette*, that an article on "Banking in South Africa" was read at a recent meeting by L. G. Mitchell, general manager of the Standard Bank of South Africa, Limited. In the course of his address Mr. Mitchell stated that the number of banks and branch banks open for business at the close of last year in South Africa was 171, distributed as follows:

Cape Colony	82
South African Republic	42
Orange Free State	20
Natal	16
Bechuanaland	2
Rhodesia	2
Zululand	1
Province of Lourenco Marques	5
Nyassaland	1

It marks the steady growth of South Africa to remember, that with the exception of a limited number of old established offices in the Cape Colony, nearly all the remaining branch banks on this list have been opened within a few years. After quoting statistics showing the growth and progress of South Africa, Mr. Mitchell remarked that surprising changes had occurred, and had still to occur there. If, however, one would intelligently contrast the condition of the country at successive decimal periods, he would see that its material progress was never in doubt; its march, often slackened, was never permanently arrested.

MURDOCH, BARBER & Co.

Toronto, 1st May, 1895

—The Novelty Works Co., which wanted Dundas to make it a loan of $13,300 to come here, with free site and power and no taxation, has also been dickering with Guelph. It seems to be putting itself up at auction.—*Dundas Banner*.

GOLD THE ONLY STANDARD.

One of Mr. Cleveland's cabinet, Secretary Morton, gave out on Saturday last a rather significant interview on the silver question Coming from a Cabinet minister after the Cabinet council of the 19th, it is regarded as expressing to a certain extent the sentiments entertained by the President.

When asked if he thought anything would grow out of the proposed international monetary conference, Mr. Morton replied: "I do not believe that an international conference can establish permanently a commercial ratio between rye and wheat. But if an international conference can fix the price in gold or silver, it can also fix the price of wheat or any other commodity, and thereby avoid all the possible shrinkages in values which tend to cause panics."

"What," asked the reporter, "should be the policy then of this country, if nothing is to be gained by a further discussion of this question through the agency of an international conference?"

"My own judgment is," said the Secretary, "that we must sooner or later declare that the United States of America recognizes gold as the best and least fluctuating measure of value and medium of exchange which the commerce of civilization has thus far utilized."

"Would not such a declaration made by either of the great parties drive away the silver men in those parties?"

"Yes," replied Mr. Morton. "It is barely possible that the financial fallacies of the Populists and other vagaries may temporarily secure a majority of the voters of the United States. Should such a catastrophe overtake the country the people must learn by experience what they should have learned by diligent study and reason."

It was suggested to the Secretary that the effort might again be made, as it had been in the past, to take a middle ground in the money question, so as to offend as little as possible and keep the great mass of voters as much in line as possible. Mr. Morton denounced this as an unwise policy.

"The time for straddlers has passed," he replied. "Those who are for a sound currency on a gold basis ought to have the courage to say so, and abide by the results of their declaration. It makes no difference to me whether a declaration of truth, either upon the tariff or the money question, temporarily drives voters from or allures them to us."

When asked about the approaching Illinois convention, and what he thought of the proposed work of that body, Mr. Morton replied in general terms as follows: "I have no hesitation in declaring myself utterly opposed to all the free coinage fallacies, all the lunacies, and all of the cheap money illusions and delusions which Populists and other vagarists advocate."

THE RAILWAY-MAN'S TEN COMMANDMENTS.

An English paper prints the following revised version of the ten commandments:—

I.—Thou shalt have no other occupation but this.

II.—Thou shalt not seek the benefit of any trade union, or the likeness of anything that is of heaven above, or that would benefit thee in the earth beneath, but thou shalt bow down to thine official and serve him, whose position hath descended from father to son unto the third and fourth generation, and shows mercy only unto them that keep these commandments.

III.—Thou shalt make all thy humble applications in vain, for the railway companies only recognize the unity which they hate.

IV.—Remember the Sabbath day to work for nothing. Six days shalt thou labor for thyself and family, but the seventh day is the Sabbath, and belongs to thine employers. In it thou shalt work for them, for in six days thy directors lay out thy work, but the seventh they go to church. Wherefore the directors bless the seventh day for its increased dividend.

V.—Honor thy officials and carry tales, that thy days may be long on the line at any wage they may be pleased to give thee.

VI.—Thou shalt use all thy skill.

VII.—Thou shalt commit 300 rules to memory.

VIII. Thou shalt not have regular times for thy meals.

IX.—Thou shalt not make any complaint against these conditions, except through thy

station-master, and then only for the increase of his waste paper basket.

X.—Thou shalt not covet any superior position. Thou shalt not do anything to benefit thy wife, but thou shalt obey thine official—be his manservant, his gardener, his ass, or anything short of being his neighbor.

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week The first figure given is the number of shares; the second, the highest price; the third, the lowest price realized. The total for the week was 3,513 shares.

Sales of Bank of Commerce, 514 at 139½, 137⅞. Hamilton, 30 at 158, 157. Imperial, 85 at 183, 177¾; Dominion, 20 at 263, 263. Standard, 34 at 162¼, 162; Toronto, 20 at 246, 246 Insurance—Brit. Amer., 250 at 117, 116; Western, 697 at 159½, 154. Miscellaneous—Consumers' Gas, 60 at 196, 196. C.P.R. Stock, 25 at 45, 45; Com. Cable, 965 at 147⅞, 144⅝; Bell Telephone, 270 at 153½, 154½; Tor. R. Ry., 226 at 75⅝, 75½; Brit. Can. Loan, 50 at 110¾, 110¼; Can Landed, 15 at 122, 122. Can Per Loan, 21 at 168, 167; Farmers' Loan, 92 at 105, 103; Freehold, 10 at 120, 120; Lon. and Can. Loan, 50 at 119, 119; Ont. Indus. Loan, 29 at 50, 48. Peoples' Loan, 50 at 43, 43.

RAILWAY ECONOMIES.

It is agreed among railway men that the limit of economical working on our main transportation lines has been reached under the present conditions; it is possible that in some instances this limit has been temporarily passed, and that much work will have to be done to bring the cars and the track up to a good standard when the former volume of traffic has again been reached. In such cases, whatever one's theory of corporation finance may be, the probable outcome will be a restoration of the standard of efficiency through the expenditure of money either raised by bonds or in some way made a charge to capital account.

But it is not of such a matter that we are speaking; the question covers broader ground and relates rather to the general profitableness of our railways. It is undeniable that these have been going through a period of great stress, not merely because of the general depression in business, but for reasons that seem peculiar to themselves. One-third or one-quarter of all our railway mileage is to-day in the hands of receivers, a proportion so great when compared to but 1 or 2 per cent. of failures among business men, as to warrant thoughtful consideration. Over-capitalization, bad management, and similar causes are quoted as reasons for this state of things, to which should be added the important matter of very low average freight rates. It will hardly answer to include in this list the wages paid employes. In fact one of the main reasons why the average wages have not been reduced much more during the depression is that railway managers feel that, no matter how deeply wages might be cut down, little benefit would accrue to the companies—under present conditions the rates for carriage would also be cut in like proportion, leaving profits practically as before. The rate question might as well be fought out on the present basis of wages as on a lower one.

The limit of economical working having practically been reached, it would not be human nature for our railway managers, operating and financial, to sit down helpless before the problem. We may be sure that active minds will be keenly looking out for possible savings. Not long ago we gave in these columns a brief account of some of these economies, such as a better loading of trains up to the capacity of the locomotive, which were already under operation. One other possible economy is the increase in train loads to be brought about by the removal of steep gradients. If the public could have access to the maps and profiles of our railways, they would be surprised to learn how many steep hills must be climbed by the engines on nearly every one of them. The company which has no grades exceeding thirty feet to the mile is a conspicuous exception to the common lot. The importance of this statement will be seen when it is stated that gradients much exceeding that figure limit the number of cars in a train seriously, and in inverse ratio to their steepness. Two companies, the Chesapeake & Ohio, in 1889, and the Lake Erie & Western the present year, have made full reports of their properties with maps of grades, etc., for which they deserve much credit.

This matter of the limit of train-loads is one of the most important in our present railway working. If we could double the number of tons in each train on any road, we would reduce the working expenses, in some cases, by one third. This result has for years been sought for through heavier engines and better track, and much has been accomplished; further advance must now come from a levelling of these grades. The work in this latter direction done by the Lake Shore Co. is in evidence before the railway world. The difficulty of putting this possible reform into practice is, that it would cost large sums of money. But certainly, in the absence of any law legalizing pooling, it is easy to see how our companies are to avoid discussing it seriously, for it is not apparent how the carriage of freight at the prevailing rates can be made profitable in any other way. This point is one which the companies now being reorganized would do well to consider. A receivership means not only that the finances are out of joint, but also that an opportunity exists for a rehabilitation which shall really cover the whole case and set the property in the way of being operated with the best possible results. Take the Atchison for illustration. Mr. Robert Moore in December made a report upon the physical condition of the Atchison properties, in which he gave his opinion as to the amount of money necessary to be spent to bring these up to a proper standard; but he said not a word—doubtless he was not instructed to do so—as to the cost of reducing grades, except in Texas. Yet those conversant with the Atchison system state that long trains of freight cars running long distances are made impossible by serious grades, some of them on the new line between Chicago and Kansas City. If we assume that the rates west of the Mississippi and Missouri rivers will gradually decline towards the eastern averages, we have in these controlling train impediments factors which no reorganization plan, if it hopes to endure for more than a few years, can afford to ignore. And what is said of Atchison is true of other insolvent properties. Solvent companies may not wish to discuss this part of the problem until the investing public are once more ready to purchase new bonds, but for reorganization committees it presents an important present question.—*New York Post.*

—Honduras seems to be next on the list of Central American States to be disciplined by Great Britain. There is an essential difference, however, between the British case against Nicaragua and that against Honduras. The former involved an insult to a British Consular officer and outrages upon the persons of British subjects at Bluefields. The motive for British action against Honduras would be merely the bleating of bondholders. The misfortunes of persons who have invested in precarious securities for the sake of large dividends promised by the borrower do not appeal very strongly to our sympathies; and the practice of using gunboats to collect private debts is repugnant to modern ideas of international ethics.—*Phila. Record.*

—Practically all of the managers of vessel property on the lakes, excepting the line-boat managers of Buffalo, have signed the agreement to buy no fuel from Buffalo shippers of hard coal. The line boats have arrangements for fueling at the docks of railway companies that own them, and there is, of course, no necessity of their entering the agreement. No such agreement as this has ever before been so generally signed, and an opportunity is again offered to test the earnestness of vessel owners in matters of this kind.—*Marine Review*

Over 13,000,000 Feet of Land for Sale

Situated in Hochelaga Ward, Beginning at Frontenac Street

This property is well located for factories, the Canadian Pacific runs through its centre, and sidings may be built to any part of it. Easy of access by electric cars.

IS THE GAME WORTH THE RISK?

President Andrews, of Brown University, who is one of the most distinguished advocates of international bi-metallism, has a very clear perception of the consequences of an attempt on the part of the United States to "go it alone" in the effort to rehabilitate silver by authorizing its free coinage at our mints. In a late discussion of this matter in the columns of the Chicago *Record* he says:

If we take up the metal alone, and that course results, as I should anticipate, in the expulsion of gold, we shall have in the first place a financial crisis worse than any ever suffered in the country. This because we cannot in a long time, even by working our mints day and night, coin silver enough to take the place which would be vacated by gold. Prices would sorely fall. Immense numbers of failures would occur. Laborers would be thrown out of work. Altogether a dreadful paroxysm in our business would be precipitated. Slowly the gap left by gold would be filled by the mining and coinage of silver. Prices would then gradually rise. At last they would become higher than now, more and more approaching the Mexican and Japanese level. Some advantages would doubtless spring from this elevation of prices, but it is a mistake to suppose that it would redress the iniquity caused by the fall of prices since 1873, because the rise and the fall would in the overwhelming majority of cases not apply to the same parties. In most instances the very men who have profited by the fall would manage to profit again by the rise. Moreover, wages would rise more slowly than values at large.

But a consequence far worse than any of these would be that our passage to a silver basis would erect against foreign exchange between Europe and the United States just such a barrier as now exists between Europe and Mexico. It would annihilate all fixed par between New York and London, repeating the terrible inconvenience in our European exchanges which we suffered in war times, when we were upon a paper basis. The damage that this order of things would effect, it seems to me, the friends of national free coinage have not sufficiently considered.

MR CHAMBERLAIN ON FREE TRADE.

It was in Birmingham, and at a meeting of Birmingham merchants (the annual dinner of the Birmingham Jewellers' and Silversmiths' Association, held on March 30th) that Mr Chamberlain chose the opportunity of making the following remarks on the question of free trade:--

I am inclined to think that in our staple trades—for instance, in the coal trade, in the iron trade, in the cotton trade, and above all, in the greatest of all our trades, the trade of agriculture—the margin of profit has entirely disappeared. Up to the present time wages have not fallen at all in proportion, but if the present state of things continues it is simply inev itable either that wages will have to be considerably reduced or that works will be closed, land will be idle, and the numbers of the unemployed will be largely increased. Under these circumst nces, which we are bound as courageous men to look in the face, it is not wonderful that people are seeking everywhere for remedies, and it appears to me not to be wonderful either that some people are ready almost to take any remedy which is offered without considering whether the prescription may not be worse than the disease. I find that there are a number of people, and I think an increasing number, who, under the present condition of trade, are coming to the conclusion that our free trade policy has been a failure—(cheers)—and who would, therefore, be ready to go back in the direction of protection. I am not one of those who think that an opinion of this kind, held as it is by many very worthy and intelligent people, is to be treated lightly. On the contrary, I think it ought to be carefully considered, carefully discussed, and seriously treated. I am not going to-night to weary you with an elaborate defence of the policy and principles of free trade. I will only put before you two reasons why I differ from those who desire to abandon it

His second reason, also, does not apply to Canada. It will best be stated in his own language:—

We are, after all, a very small country that plays a very large part in the history of the world, and owing to the fact that we are a small country, we cannot be self-sufficing; we cannot maintain by ourselves, by our own efforts alone, the vast population that is crowded within the limits of our territory. We depend upon our foreign trade. But if, by any means, by protection or any other, you shut the door upon foreign goods, you may be quite certain that the result will be that there will be fewer English goods that will go abroad. All foreign trade is a matter of exchange.

—Whether Annapolis or Digby will be the terminal point of the steamer "City of Monticello" is still a question. A Nova Scotia exchange says that for the present the "Monticello" will run to Annapolis as usual. The Dominion and Atlantic Railway have about completed laying rails on the steamboat pier at Digby, and consequently after May 1st all freight destined to points on the line of the above road will be landed at Digby. The local freight for Annapolis, however, will be taken to Annapolis by the "Monticello."

—Euphrates Esculapius Endymion McJimsey is the name of a clerk in the Recorder's office at Marysville, Missouri. He signs his rather euphonious name with a big rubber stamp. His mother was a student of Oriental history and mythology.

—Jarvis Street Baptist Church in Toronto is one of the few religious institutions which prefers to pay city taxes. Last year it paid its ordinary expenses, its share for civic police and fire protection, etc., and built a mission chapel, all without incurring debt. Giving unto Cæsar the things that are Cæsar's does not necessarily impoverish a church.—*Montreal Gazette*

—In Connecticut they have established a law that prevents a party from establishing a temporary store in a place, selling goods at low prices (generally poor quality articles) and then leaving the town without having paid anything to recompense the town for having taken from it hundreds of dollars that would otherwise have gone to the tax-paying citizens.

—How much do successful barristers make a year? Some particulars given in the number of *London Home* for April throw some light on the question. It is commonly said that Sir Charles Russell never made less than £20,000 or £25,000 per annum for many years preceding his promotion. Both Sir Richard Webster and Sir Edward Clarke are making fully £20,000 a year; and men like Mr. R. B. Finlay, Sir Henry James, Mr. J. T. Murphy, Mr. Lawson Walton, Mr. Fielding Dickens, Mr. W. Willis, Mr. Cozens Hardy, Mr. Graham Hastings, and others, are credited with almost equally large earnings.

Commercial.

MONTREAL MARKETS.

MONTREAL, May 2nd, 1895.

ASHES.—Receipts this month have been short of April, 1894, and the stock in store is 231 pots and 44 pearls, which will be pretty well cleared out by shipments to Liverpool and Glasgow, by first out-going steamships. Some fair lots are expected by first down boats through the canals. Prices are a shade firmer. We quote first quality pots, $4.05 to $4.10; seconds, $3.75 to $3.80; there is considerable range in pearls, some light Americans having been bought at $5.50, while some heavy tares brought $6.

CEMENTS AND FIREBRICKS.—Stocks of cement are well cleared out, and first arrivals of new supplies are expected by the end of the present week. A good many orders have been booked for shipment westward on the opening of canal navigation, but the prices are not reported as satisfactory, and are said to be more closely cut even than last year. From $1.90 to $1.95 is asked for Whites, and equal, but it is said business has been done at figures lower than the above inside quotation, though laid down cost is figured at close to $1.80. In a jobbing way from stock prices are $2 to $2.10 for English; Belgian, $1.85 to $1.90. The past fortnight has seen an active outgo of firebricks, at easier prices, owing to the near approach of new arrivals, and we quote $16 to $22 per m., including Glenboig.

DAIRY PRODUCTS.—Trading is dull in these lines. Butter values are easier, and new-made creamery cannot be quoted at more than 17½ to 18c., old 10 to 12c., and hard to sell at that; Townships dairy, 16 to 17c. for new. New fodder cheese is quoted at 8½ to 8¾c. Receipts of eggs are large, and prices easy at 10 to 10½c.

DRY GOODS.—The fine weather since last writing has had some beneficial effect on sorting orders from the country, and in remittances, too, there is some little improvement noted from certain districts; but general collections are still poor as a whole. City retailers report rather more activity, but they do not seem wholly satisfied with the amount of business doing. Notification has been given of an advance in white sheetings, equal to about 6 to 8 per cent. on last list. Some buyers are already on their way back from making fall selections in Europe.

MONTREAL GRAIN STOCKS IN STORE.

	April 22, '95.	April 29, '95
Wheat, bushels	399,707	360,578
Corn, "	4,382	6,173
Oats, "	190,564	177,603

Buckwheat	20,749	28,701

GROCERIES.—Business may be said to be improving a little, and fair shipments are reported by boat to Ottawa and St. Lawrence River points, the canals now being open. There has been some street discussion as to the probability revision of tea and sugar duties, and it is said there has been some buying of sugars in anticipation of some such move, but there is no known real basis for any such expectation. Granulated is advanced in New York to 4c, being three-quarters of a cent. above the local level. Yellows are firmer locally, there being nothing available now below 2¼c., and the Canada refinery, which is still shut down, is out of low grades. Barbadoes molasses is jobbed at 32½c. in puncheons, and 36c. in brls. and half barrels. Teas are quiet on spot. Cable advices received yesterday report that the market in Japan has opened very high. The steamer of the 27th ult took out several hundred packages of first pickings, none of which, however, are for this market. There is quite a demand for gallon apples, and best packers are sold out, best brands are being held at $2.30 to $2.40, and will likely be higher. Evaporated apples are dearer at 8c. to 8¼c., and there are no dried apples available. Dried peaches and apricots are easier, St. Louis houses offering goods lower, and they are being jobbed at 12½c. to 13½c. Sultana raisins have advanced notably in London, it is said four shillings a cwt., and 7c. is now asked for goods heretofore selling at 6c. In canned tomatoes, corn and peas there is no change. Salmon firm, at 1.35 to $1.40 for best brands. Cohoes $1.10 to $1.15. Lobster packers are looking for orders for new pack, and quote $6.50 for talls, and $7.50 for flats, in cases.

HIDES AND TALLOW.—There are few hides coming into this market, outside points apparently shipping to the United States. In prices another advance has to be recorded, 7½c. being now the figure paid by dealers for No. 1 light and heavy green. It has been claimed that sales of cured to tanners have been made at 9c., but this seems to lack confirmation. It is certain nothing under 8½c. per lb would be accepted, and some dealers would not sell at the

moment at that figure. Calfskins remain at 7c.; lambskins, 10c.; sheepskins, 70 to 80c. each.

LEATHER.—Prices tend steadily upwards, and we have again to reverse quotations all around. There is not a great deal doing at the moment, still we hear of some good lots of sole moving at advanced prices, and for 1,000 sides of glove grain 12½c. was paid a few days ago. Stocks of black leathers are decidedly light. The settlement of the shoe strike in England has led to some cable enquiries for stock, but prices here are much above the English level. We quote :—Spanish sole B.A. No. 1, 21 to 22c.; do. No. 2 to B.A., 20 to 21c.; No. 1 ordinary Spanish, 19 to 20c.; No. 2, 18 to 19c.; No. 1 slaughter, 22 to 24c.; No. 2 do., 20 to 21c.; common, 19c.; American oak sole, 40 to 45c.; waxed upper, light and medium, 32 to 35c.; do. heavy, 27 to 31c.; grained, 32 to 35c.; Scotch grained, 32 to 35c.; western splits, 20 to 23c.; Quebec do., 17 to 20c.; juniors, 14 to 16c.; calf-splits, 30 to 35c.; calf-skins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 14c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 12½ to 15c.; extra heavy buff, 16c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—We hear of nothing new in pig iron. No Glasgow boats have yet arrived with new stocks of Scotch iron, and there is little doing in domestic. The Londonderry company is said to have secured orders for some $36,000 of cast-iron pipe. The "Mariposa" and "Sardinian," now in port, have some fair assortment of tinned plates, etc. English advices report some fair buying of Canada plates and charcoal tins, in which some firmness is anticipated. Prices call for no present revision We quote :—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $20.50 to 21.00; Eglinton, $19 50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.50 to 16.75; Ferrona, No. 1, $16.50 to 16 75; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25 according to finish; P. D. Crown, $3.75; do I.X., $4.50; Coke I. C., $2.60 to 2.85; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, 1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 10 to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4 25: American do., $4 to 4.25. Antimony 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ½c; ¾ in., 3½c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—The movement is hardly so active in these lines of merchandise, the main spring rush being now over, but a fair distribution is still reported. There is some excitement in turpentine, western dealers being accused of indiscriminate cutting, and it is said sales have been made there as low as 40 cents per gallon, though it is claimed there is no stock in Canada at the moment that has cost less than 45c., and Montreal dealers adhere to last given quotation, namely, 49 to 50c. Castor oil is reported a shade firmer in Europe. Other lines are without change. We quote :—Turpentine 49 to 50c. per gallon for single brls; two to four barrels, 48 to 49c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6¼c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal, in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4¼ to 4½c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.15 to 1.20 per 50 feet for first break; $1.25 to 1.30 for second break; third break, $2.80.

TORONTO MARKETS.

TORONTO, May 2nd, 1895.

DRUGS.—Since our last report but little has occurred to change the situation. The distributing movement continues fairly satisfactory. Values are steady, with but few alterations in price lists. Opium is easy. Morphias are not firm. Glycerine and camphor both continue strong. Oil anise seed is firm. The movement in Paris green for the season is commencing, and the market opens upon much the same basis as last year, a shade lower, if anything. It would appear that recent government reports have altered somewhat the consumptive demand, and for gardening purposes a blue vitriol mixture will be used instead of Paris green.

GRAIN.—Every day has added strength to the local wheat situation, and quotations of Ontario wheat since our last report are 7 to 8 cents in advance of our last prices current. We quote: Winter wheat, No. 1, 80 to 81c. per bush.; No. 2, 78 to 79c.; No. 3, 75 to 76c.; spring wheat, No. 1, 82 to 83c.; No. 2, 80 to 81c.; No. 3, 77 to 78c. per bush. An advance of 7 cents in a week's time is a new thing for our wheat market, and indicates great strength. Trading is rather limited, however, and must continue so, as stocks are not heavy. Millers who are not carrying sufficient stock are being compelled to enter the market, and at the changed quotations transactions in 5 and 10-car lots are taking place. Although the advance is in part a reflex of the British and American markets, it is in part due to local causes; and although, at the time of writing, there is a break in the Chicago market, the local situation remains firm. There is nothing new in barley. Oats are unsteady, but, as compared with last week, quotations remain unaltered. Rye is wanted, but trading limited. Peas are dull.

THE VISIBLE SUPPLY.

	April 27, '95. Bush.	April 28, '94 Bush.
Wheat	65,755,000	66,584,000
Corn	11,107,000	13,115,000

These prices are wholesale by the car-load.

The stocks of grain in store at Port Arthur on April 20th were 725,234 bushels. During the week there were received 21,648 bushels, and shipped *nil* bushels, leaving in store on April 27th, 746,882.

GROCERIES.—Business is in fairly satisfactory shape. Values, as usual, at this season of the year, show no important fluctuations. The local stocks of California evaporated fruit are pretty well exhausted, and as the season is well advanced it is not likely that any considerable quantity will be imported until the autumn. Sugars are stronger mainly as the result of bull reports from New York. The *N. Y. Journal and Bulletin of Commerce*, May 1st, says: "Importers are generally well satisfied with the course of the market for raws The hardening of values has been slower than some of the more impatient desired, but for that very reason seems to be very solid and well fortified, and the idea now prevails that the relations of supply and demand will, as the season progresses, prevent any set-back, and are quite likely to add further to line of values. Demand continues good, largely speculative, and rates are still working upward, with assistance obtained to-day in further advance at European markets. The stock in four ports of the United Kingdom is 76,000 tons, against 65,000 tons same time last year. Local jobbers report that retailers are beginning to purchase for their summer needs. Canned fruits and vegetables are moving freely. A stiff advance in Canadian and American canned meats is about the only change to be noted in values; as yet we hear of no change forward contracts in canned salmon.

HIDES AND SKINS.—Cow hides at 3 cents the pound on May 4th, 1894, and cow hides at 6½ cents the pound on May 2nd, 1895, are two widely different quotations, and yet they represent the Toronto market at these two dates. On the 1st of May Toronto dealers decided that the market warranted an advance of 50c. a hundred, and in consequence prices are now as follows: Cows, green, 6½c.; steers, 6½c.; cured and inspected, 7c. per lb. May hides are worth more than the April take-off, but deliveries are yet grubby and dirty, and relative to the price of leather values are much too high. The situation in Chicago continues very strong, as the following from the *Shoe and Leather Review* of 27th inst. will indicate: "There have been several sales and the market is easily ½c. higher on every selection except heavy native cows. The receipts of cattle continue to be exceedingly small. April will show a remarkable falling-off in the cattle supply. Last week and the beginning of this week there was an easier feeling in the packer market, but a few good sales served to quickly stiffen the views of the packers. Tanners have evidently completely given up all ideas of controlling the hide situation. The scarcity is daily becoming more pronounced Unfortunately it is exceedingly difficult to impress upon leather buyers the supreme necessity for higher values." The best sheepskins are bringing 95c. to $1 each, and find ready sale with no accumulation of stocks.

LEATHER.—In sole leather there is active trading at advanced prices. Sales of No. 2 Spanish have been made at 20c. per lb., while we hear of several transactions of slaughter at prices ranging from 22c. to 24c. In other lines there is somewhat of a lull. Splits and grain, however, are fairly active. But no general movement is expected until June, when manufacturers will begin active buying for the fall trade The shoe houses report a fairly satisfactory business in sorting up lines.

PROVISIONS.—We can report little or no improvement in butter. Stocks continue large and prices correspondingly low, rolls selling from 10 to 13c. per lb., and tubs, of common description, bring as little as 5 to 7c. per lb. Cheese is easier this week, with new in good supply at 9 to 9½c., and old selling at 9½c. Hog products are unchanged and firm; the movement is fairly satisfactory. The season for dressed hogs is now pretty well over. Eggs are easy at 10c. per dozen; the supply is abundant, while the demand is rather limited. There is but little doing in dried and evaporated apples. Beans are steady at $1.60.

WOOL.—There is no old fleece in the market and the 1894 season is closed. During the week some small lots of breeder's unwashed fleece was marketed at 10 to 10½c. These transactions were insignificant, and cannot be taken as gauging the market, although it is worthy of note that the prices brought were 1 to 1½c. in advance of similar sales last year. It is impossible to make any estimate of the coming clip. A breeder from the vicinity of Orangeville estimates it at one-third larger than that of 1894. He bases his estimate upon the fact that last spring farmers, rather than dispose of their lambs at the low range of values at that time, carried them over; and, in consequence, increased the size of their flocks. Washing operations usually commence about May 1st, and in June the market will be in full swing. Pulled wools are rather quiet at present; there is no change in prices; stocks are not, however, accumulating. The mills are reported fairly active.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A SERMON TO SALESMEN.

The Rev. George B. Stewart, D.C., preached a sermon to the Harrisburg Commercial Travellers' branch recently, from the text Romans xii. 11: "Not slothful in business; fervent in spirit; serving the Lord." He said:

This is first-class advice. The combination is ideal. Any man possessing these three excellencies of character would be admirable. But where can you find such a man? Possibly when this letter was written to the young Christian church at Rome, some of the disciples really tried to be earnest business men and earnest Christian men at the same time; and possibly they had reasonable success in their endeavor. But times have changed since then. Business methods have changed. The nineteenth century does not do business as the first century did. You have to hustle for business now. It requires undivided attention. Business will not come to you. You must go for it; and you must make pretty good time, too, or you will be left. It used to be there were only two things that did not wait for man—time and tide. Now there are three—time, tide and trade.

Now in view of this change in conditions, can this ancient counsel be practically applied to-day? Can this combination of business and religion be successfully made now? Will not one or the other suffer in every attempt? Competition is the life of trade, but is it not the death of piety? The merchant says to his clergyman when he presses religion on him: "One thing at a time. This is a day of specialties. You can handle only one line successfully. So sell your goods to-day, and look after character later. Get the earth to-day and Heaven by-and-by, if you get it at all. That is about the best you can hope to do. You must not expect to work both at the same time." . . . Now just suppose for a moment that the business man takes the preacher's advice, and with all zeal sets out to serve the Lord; what will be the result? He could not put the biggest berries on top of the basket. He could not take advantage of the ignorance of his customers.

The ancient preacher advised, "Not slothful in business, fervent in spirit, serving the Lord." There are some of us who think Paul was right, that a man's business and principles are not incompatible.

We are prepared, you and I, to deny the statement that when a man is after trade he has to leave his principles at home, aren't we? We do not believe that before you can sell goods to your fellow-man you must first sell yourself to the devil. . . .

We are among those who have faith in righteousness. It has a commercial value. It is not quoted on 'change, for its distinguishing characteristic is that it cannot be sold. But the man who is known to keep it faithfully under every temptation to sacrifice it for something else, enters business competitions lengths ahead of his rivals. His righteousness, his unswerving loyalty to truth, to honesty, to honor, are capital. "Character is property." Industry, virtue, goodness, count. The rule is, the best man should be foremost. Therefore, when a man sets out to be a rascal and gull the community, he usually begins by joining the Church, becoming a teacher in Sunday-school, a president of a Young Men's Christian Association. He knows that even this apparent righteousness will be a great boom to him.

Let a man openly avow that he lies, and cheats, and over-charges, and his business career is soon wound up, if he can persuade men to think that for once he is telling the truth. Simple honesty, straightforwardness, go a long way toward making success. They give him an excellent start in business. They keep him straight; they give him strength and sustenance; they are a mainspring of vigorous action. They give him an open face, a clear head, a strong hand, a steady purpose, a cool judgment. All these are necessary conditions of business success.

I do not want you to miss the point I am trying to make. I am not saying that every man of high principles and unflinching integrity succeeds in business. Some men are foredoomed to business failure, no matter what their principles. Nor am I saying that trickery and chicanery never win. Some men succeed in spite of these. But this is what I am saying, that the strictest attention to business is consistent with the highest moral and religious character; and that the better a man serves God, the better he will prosecute his business, unless he is in the devil's business.

Secondly.—Business and principles are complementary parts of a complete man. You can make no greater mistake than to separate these two, and try to make a complete man or a perfect life out of either alone. There are two pretty clearly defined classes of men in every community. One class do not think it makes much difference what sort of a business man you are, *i.e.*, whether you have high ideals, a firm purpose, vigorous activity in the business part of your life, if you are only religious. Another and much larger class think it is not of much concern of what sort. your views and practice may be in matters moral and religious, if you are only diligent, and especially successful in life.

There seems to be a pretty general impression that as a man cannot be all that is good and noble, therefore he has to make a choice as to what virtues he will especially cultivate. You cannot keep all of the ten commandments, therefore make your selection. You make no greater mistake than when you divide your life into two sections—one secular and the other sacred. You rule business out of the one, and God out of the other, and both sections suffer. You must have a better opinion of your business. You must have a better opinion of God. Take God into your business, and take your business into His service, and you have at once established a combination that makes for the highest success and the completest life. . . . —*The Gripsack.*

MORTALITY EXPERIENCE OF THE CANADA LIFE OFFICE.

The closing decade of the nineteenth century bids fair to be a memorable one in its contributions to our knowledge of the mortality experienced among assured lives in the British Empire. To the great work upon which our own offices are now engaged under the direction of the Institute and Faculty of Actuaries, and to the various special experiences investigated in this country, the future historian of actuarial science will be able to add representative exhibitions of colonial assured life in the experiences of the Australian Mutual Provident, the Canada Life, and—if we are not misinformed—the South African Mutual. Of the colonial investigations, that of the Canada Life, recently concluded by Mr. Frank Sanderson, M.A., acting on the instructions of Mr. A. G. Ramsay, the Actuary and President of the company—to whom we have to express our acknowledgments for an early copy of Mr. Sanderson's report—is of especial interest as the first investigation of the kind undertaken in the Dominion. Those who are acquainted with the history of life assurance business in Canada (an acquaintance that we personally owe to the paper by Mr. Sanderson read before the Actuarial Society of Edinburgh in the early part of last year) will recollect that it dates only from 1846. The Canada Life, which commenced business in the following year, is some twenty years older than any other existing Canadian office, and is practically the sole possessor of any considerable volume of valuable information on assured life experience in the Dominion. The fact that that experience is now open to the actuary, affords a practical and most valuable demonstration of the existence of that keen interest in actuarial topics with which Mr. Ryan was agreeably impressed on the occasion of his recent visit to Canada, and evidences in a manner that deserves every acknowledgment the liberality and enterprise of the administration of the Canada Life Office.

Without attempting, within the limits of the present notice, to discuss in detail the actuarial features of Mr. Sanderson's report, we may say, as the result of a first perusal, that the investigation appears to have been conducted with very conspicuous ability. The data are not of great volume, the number of entrants, deaths and years of life—35,287, 2,789 and 296,481 respectively—falling considerably short of the corresponding numbers in the larger published office experiences, but for what they lack in quantity they make up substantially in quality. They are, in the first place, in the strictest sense homogeneous—all rated-up or temporarily surcharged lives, female lives, and lives insured under survivorship or pure endowment contracts having been rigorously excluded, and the experience being restricted to "assured male lives accepted and continued as average lives." Further throughout the analysed exhibition of the facts, exits by expiry of term assurances (very few in number) or maturing of endowment assurances are distinguished from ordinary withdrawals. The result is that whether for observation of rates of mortality or rates of discontinuance the experience appears to be admirably free from disturbing influences of unknown effect. Again, the business of the Canada Life, although dating only from the middle of the century, has been built up on British rather than what we are accustomed to consider American lines, so that the lives under observation gave the respectable average exposure of 8.4 years, and yielded some weight of evidence at older ages and for the longer durations. With this brief indication of the highly promising character of the investigation, we must leave the methods of compilation (explained, we observe, with commendable completeness and lucidity) and the various developments of the experience for future consideration, and close by remarking that the general conclusion from the investigation appears to be that "the quality of assured male lives in Canada, as evidenced by the Canada Life Experience, is not surpassed by that in the United States, Great Britain, Germany, or Australia," and that this comparison "is not confined alone to the early years of assurance, but is maintained when the first five years of assurance are excluded."—*Insurance Record*, London, 19th April.

NEW YORK'S SINKING FUND.

By the Comptroller's statement on March 1st, the debt of the city of New York was $105,126,232. The amount of cash in the city treasury at that time was $2,249,402. The actual indebtedness of the city of New York is several millions greater than the net debt, the difference being represented by the sinking fund. This is made up of cash or investments put aside from time to time for the liquidation of bonds when they become due.

The items in the sinking fund amounted last year to more than $7,000,000 as follows: City revenue from investments, $2,422,614; city interest fund, $1,650,000; dock and bulkhead rents, $1,856,294; market rents, $302,984; New York and Brooklyn bridge profit, $170,000; railroad franchises, $128,321; street vaults, $97,970; sales of city real estate, $82,260; interest on city deposits in banks and trust companies, $80,315; licenses for cabs, vendors' wagons and pawnbrokers, $76,478; interest from bonds and mortgages owned by the city and commissioner of jurors' fines, $1,537.

In addition to these sources of city revenue, $1,316,764 was raised by direct taxation and $140,000 from old assessments made applicable to the sinking fund. With a revenue thus in excess of $8,000,000 a year, New York in 15 years could pay $120,000,000.

THE PRICE OF LYING.

It was such a bright boy who applied to the grocer for a job that he thought he would give him a little talk, just for a guy.

"If I hire you," he said, "I suppose you will do what I tell you?"

"Yes, sir."

"If I told you to say the sugar was high-grade when it was low, what would you say?"

The boy never turned a hair.

"I'd say it," he responded promptly.

"If I told you to say the coffee was pure, when you knew that it had beans in it, what would you say?"

"I'd say it."

"If I told you to say that the butter was fresh, when you knew it had been in the store for a month, what would you say?"

"I'd say it."

The merchant was nonplussed.

"How much will you work for?" he inquired, very seriously.

"One hundred dollars a week," answered the boy, in a business-like tone.

The grocer came near falling off his stool.

"One hundred dollars a week!" he repeated in astonishment.

"With a percentage after the first two weeks," said the boy coolly. "You see," he went on, "first-class liars come high, and if you need them in your business you've got to pay them the price. Otherwise I'll work for $3 per week," and the boy caught the grocer at his own game, and got the job at $3 per week. —*Michigan Tradesman.*

CANADA LIFE ASSURANCE CO.

Sun Life
Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents or to

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses and contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

HUGH SCOTT, Managing Director. **THOS. WALMSLEY,** Treasurer.

Northern Assurance Company of London, Eng.

Branch Office for Canada, 1724 Notre Dame Street, Montreal. Income and Funds (1893): Capital and Accumulated Funds, $36,465,000; Annual Revenue from Fire and Life Premiums and from interest upon Invested Funds, $5,455,000; deposited with the Dominion Government for security of Canadian Policyholders, $200,000.

G. E. MOBERLY, Inspector. E. P. PEARSON, Agent. Toronto

ROBT. W. TYRE, Manager for Canada.

WYATT & CO.

Successors to CAMPBELL & WYATT.

DECISIONS IN COMMERCIAL LAW.

IN RE BANK OF SOUTH AUSTRALIA.—A decision of the English Court of Appeal is to the effect that an agreement duly entered into on behalf of a company by the liquidator in a voluntary winding-up by which the assets and liabilities of the company are to be taken over by another company, and in the event of the liabilities exceeding the assets, the difference with interest is to be a debt due from the selling company to the buying company, and the liquidator is, if necessary to meet the deficiency, to make a call on the shareholders to the extent of their reserved liabilities, is not *ultra vires*.

HAMELIN V. BANNERMAN.—A vendor by deed sold a piece of land on the banks of a navigable river, "together with a quantity of water-power equivalent to fifty horse-power, to be taken from the water-power and dam of the said vendors on the North River, and now in use to run their manufacture," &c., with a "promise of warranty against all trouble and hindrances generally whatsoever," except during such times as the dam across the river should be out of order, and should be required for the purpose of putting it in repair. It was further agreed that the purchaser should have the right to acquire another fifty horse-power upon stated terms, which right he subsequently exercised. Held by the Privy Council on appeal from the Court of Queen's Bench of Quebec, that under the deed the purchaser had a right to take water from the reservoir to the extent of 100 horse-power in priority to the vendor or any purchaser from him subsequently to the deed of sale, and that the vendor or his assignees could not deprive the purchasers of this right by claiming a right to the water as members of the public. Also, that the fact that a river is navigable cannot prevent a riparian owner from acquiring an interest in its water-power which he can sell along with and as appurtenant to a parcel of his land.

A SOLOMONIC DECISION.

A French railway journal records the following judgment, the scene of which is laid at Bombay: Four merchants bought on joint account a stock of cotton and a cat to keep the rats out of the bales, agreeing among themselves that one paw belonged to each of the four. The cat hurt its foot, and the owner of the injured limb dressed it with a cotton bandage soaked in oil. The bandage took fire—there was no evidence before the court to show how—and the cat in its agony rushed among the bales of cotton and set them on fire. Thereupon the three other joint owners sued the proprietor of the injured limb for damages. Judgment was pronounced to the following effect: "The fourth leg being disabled, it is evident that the cotton must have been set on fire through the fault of the three sound limbs which carried the cat. The blame accordingly rests on them only, and their owners must repay to their co-proprietor his share of the damage caused by the fire."

DEPARTMENTAL STORES AND RAPID TRANSIT.

What is the connection, if any, between rapid transit and departmental stores? The big department store had its origin before electricity ushered in the days of rapid transit, and so we cannot establish the relations of cause and effect, but that a convenient and fast street service has done much for the large store is beyond dispute. In nearly every Canadian city the department stores are down town, as near as possible to the centre, in which the street railway system focuses. In Montreal, it is true, some of the large stores are up-town, but this movement began before the slow-going, uncertain horse cars gave way to the trolley system. We hear of many projects to connect the country places, towns and cities of Canada by electric railways. Some of these ideas have been realized, and several cities of importance have their suburban lines extending several miles out into the country. Country merchants complain now of the severity of the letter order department, but should electric railways become an institution of the country roads, this competition must become more severe.

COTTON FIRES.

The *Marine Journal* of New York has compiled a list of forty-five fires which occurred on cotton-laden vessels last season. These fires were all serious, causing an estimated loss exceeding $1,000,000. By contrast with Egyptian and Indian cotton this loss is enormous, since fires in Egyptian and Indian cotton cargoes are practically unknown. This state of affairs, in the opinion of the *Marine Journal*, is because the American cotton is loosely baled and carelessly covered and handled, whereas the cotton of the other countries referred to is baled so tightly that "it becomes practically as impervious to combustion as a log of wood. It is nonsense to say that our cotton cannot be more closely pressed and more neatly baled." These statements may be mortifying to American pride, but agitation of the question should be welcomed by cotton growers and shippers, in order that similar fires may, so far as possible, be guarded against during the coming season.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

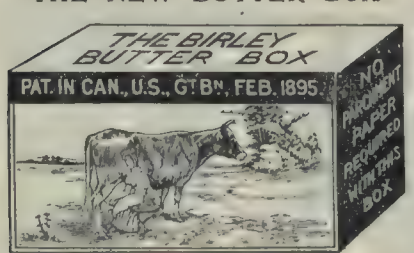
BUFFALO'S population is announced to be 335,709. It has just been ascertained by the police.

AT the new Canadian "city" of New Denver, in the Kootenay country of British Columbia, mining is so brisk that it is said several banks are thinking of opening branches there.

AN amusing notice appears in the columns of the Meaford *Mirror*. It reads as follows: "In the matter of the estate of F. A. Clarke & Co. If the parties indebted to the above estate expect the creditors will expend the amount due by them on postage, they will find they have made a financial error. M. ROBINSON, assignee"

ACCORDING to the statement of that gentleman to a Montreal *Gazette* reporter on Monday last, Mr. S. Carsley has not abandoned his intention of erecting, in Montreal, on his St. James' street property, between the Molsons Bank building and the old Canada Life, a very tall building. The splendid Canada Life structure going up at the corner of St. Peter and St. James' streets will be eight stories in height, but Mr. Carsley says his new building is to be nine stories.

THE NEW BUTTER BOX



This is the latest style of putting up 1 lb. prints. The board is specially treated both inside and out, so as to make it both grease and water proof. By this means the waxed wrapping paper hitherto so generally used is entirely dispensed with, as also are those wooden butter dishes and other such like unsightly contrivances. This box is by far the best and most stylish package for butter that has ever been put on the market. It is also very cheap. If you are interested write for samples and prices to the manufacturers.

KILBIRNIE, Scotland

Sole Agents for Canada:

Geo. D. Ross & Co.,

648 Craig Street, Montreal

TORONTO OFFICE

19 Front St. West.

Mercantile Summary.

THE business of the Ottawa Building and Loan Society was wound up last Friday, according to the *Journal*, after being in existence for eleven years.

ACCORDING to Mr. Ross, of the firm Thomas Ross & Sons, who own or control twenty cheese factories in Argenteuil county, Que., there are good prospects for the coming season. Last summer they had sixteen factories and sold the product for a round sum of $60,000. They estimate this season's output at $75,000.

AN extension of time is asked by W. Abbott, jeweller, of Gananoque, Ont. He has had some litigation with a former partner, which probably hampered him.——Wm. Ashe, the Ottawa contractor, reported in trouble last week, is offering his creditors 50 cents in the dollar.

A REPRESENTATIVE of the Standard Oil Co. of the United States has been visiting Essex county, Ont. Horatio Wigle and Henry Lypps, of Essex, accompanied him, and jointly they leased about 20,000 acres land. They are to bring on oil experts, and a boring plant will be set up about June 1st, within a mile of Kingsville.

Mercantile Summary.

THE Dorchester Hotel Company, Ltd., capital $15,000 in 600 shares, is asking for incorporation under the joint stock companies act of New Brunswick.

AN extension of time is asked by R. E. Lemon, general storekeeper at Nelson, B.C., who has prospered there for several years. Now he finds that he cannot realize upon his mining and other properties, and he owes about $34,000.

THE Globe Furniture Company, of Walkerville and Northville, Mich., took proceedings against the Albion Iron Works, Montreal, and the school trustees of Victoria, B.C., for infringement on the patent of their school seats. A perpetual injunction was given the Globe Company and damages for the amount of $650.

A VALUABLE piece of practical engineering is the Forbes drainage scheme in Western Ontario. The result is that 8,000 acres of marsh land in Tilbury East has, in two years, been converted into fine arable land. There are eight miles of main drains, each 27 feet wide, and the job cost nearly $65,000. The water is pumped into Jeanette's creek, the capacity of the pumps being 32,000 gallons a minute.

Mercantile Summary.

THE work on the steel lake steamer "North Land" is progressing as rapidly as three hundred men can do it, and she will likely be ready by May 20th. The entire electric light plant is completed, and will run 1,200 lights. The ice-making machines and cold storage apartments are ready. The monster engines are about finished. The "North Land" is a sister ship of the "North West," and will ply from Duluth to Buffalo.

THE sale of a Nova Scotian gold mine wa concluded last week. This was the Renfrew mine, operated by the Pictou Developing Company. It was sold to New York capitalists represented by Mr. James P. Page. The amount paid for the property is $75,000, 10 per cent. of which Mr. Page deposited to bind the sale. The property has been making handsome returns, says the *Chronicle*. Capt. McKenzie brought with him to the city a brick of gold worth $3,000, the result of the last cleaning up.

LAST week showed a falling off in east-bound freight at Chicago, only 58,265 tons of dead freight being shipped last week, as against 61,408 the preceding week. The cause was the increased lake competition, 85,705 tons going by water. Last week's shipments were divided as follows: Michigan Central Railway, 3,062; Wabash, 4,577; Lake Shore, 7,989; Fort Wayne, 10,625; Panhandle, 7,175; Baltimore & Ohio, 1,997; Grand Trunk, 1,964; Nickel Plate, 5,66[illegible]; Erie, 8,126; Big Four, 1,768.

A DEMAND of assignment has been made upon J. C. Macfarlane & Co., cigar manufacturers, Montreal. They began business two years ago, under favorable auspices, and with a capital of $11,000, drawn from the firm of Payne Bros. & Macfarlane, Granby, but there has been evident lack of management. They had just recently arranged with the town of Acton Vale, Que., for the removal of their factory to that municipality, in consideration of a bonus of $15,000.

—THE Hamilton *Spectator* says that the gentlemen who are interested in the International Radial Railway Company, now seeking incorporation by the Dominion Government, are Alex Burns, M.A., D.D., Alex. McKay, M.P., Thos. Bain, M.P. (Dundas), John Hoodless, Thos. Miller, M.D., J. E. O'Reilly (Master in Chancery), Peter D. Crerar, M.A., Fred A. Carpenter, W. N. Myles, Thomas Ramsay, R. H. McKay, McKay Bros., A. H. McKeown, J. F. Smith, Wm. Andrews (Guelph), Edward J. Powell (London).

A FIRM of contractors has been examining the town of Perth with the idea of getting up a company to establish waterworks.

ASSIGNEE CLARKSON has moved from 26 Wellington street to the Ontario Bank Chambers, Scott street, Toronto.

THE long established firm of J. H. Botterell & Co., boot and shoe manufacturers, Quebec, is about to retire from business.

THE *Echo* says Mr. Ed. Kennedy has purchased the McKenzie House, Smith's Falls, from Mr. Dan. Tierney, of Perth, paying $6,000 in cash.

J. B. ROSE & Co, metal commission, Montreal, in business under this style about two years, Mr. Rose having formerly been of the firm of Lomer & Rose, have been asked to assign. The firm had been much sued of late.

THE creditors of H. Duverger, wholesale dry goods, Montreal, had a meeting last week, when he made a cash offer of 35 per cent. The revised statement shows direct liabilities of $34,472, indirect $25,042.

THE Toronto Street Railway earnings for April were the best this year. The total gross was $76,862, against $67,990, an increase for 1895 of $6,781. It is expected the savings in operating expenses for the last month will be about $6,000.

THE old adage about the rolling stone, etc., seems true in the case of James A. Ovas, general storekeeper at Brandon, Man. Last November he gave a chattel mortgage to his principal creditor. It was foreclosed a few days ago.

THE death occurred in this city last week, at the age of 73, of Mr. David Saer Lewis, an old and well-known Montreal dry goods merchant. Forty years ago, or thereabout, Mr. Lewis was of the firm Ogilvy, Lewis & Co., and between 1860 and 1870 was head of the firm Lewis, Kay & Co., who did a very extensive business as importers of dry goods. For a number of recent years the deceased had resided in Toronto.

THE list of creditors in the R. Smardon & Son (wholesale shoes, Three Rivers,) failure is a formidable document in length, though large amounts are few, some $3,500 of wages being due the operatives, while merchandise liabilities are about $21,000 ; indirect, about $60,000. The principal items of assets are stock about $7,000, house $6,000, mortgaged for $3,200, and a piece of land at Verdun, near Montreal, valued at $4,000.

A POLISH Hebrew, of Montreal, named A. Pojanor, who started in business some few years ago, and who gradually developed into a dealer in peddler's supplies, has been served with a demand of assignment. He owes some $14,000 among 65 creditors, and the greater share of his assets is in book accounts, which will likely be very difficult of collection.

RATHER unexpected was the announcement that the general store firm of C. & M Mills, at Iroquois, Ont , were in difficulties, but such, nevertheless, is the case. A meeting of creditors is to be held on Friday of this week, in Montral. The liabilities are $30,980 direct, indirect $4,215, privileged $942. The assets are shown at $32,941. It is likely that a composition will be extended them.

JOSEPH COTUDAL dit St. Jean, saloon keeper, of Montreal, has assigned on demand, owing $1,649.——Miss Annie Nolan, doing a grocery business in the Point St. Charles district, Montreal, for the past five years, has been asked to assign. —— H. J. Dreyfus & Co., jewelers, have assigned, with liabilities of $1,250. Mr. D. was originally a jobbing jeweler, but sold out, and went into the furniture trade with disastrous results, being obliged to compromise at 25 cents in 1890. Again in 1893 he became insolvent and was sold out.

THE postmaster at Rogersville, N.B , Peter Thibaudeau, who has been doing a small general business for the past four years, acting under bad advice, has been trying to "get ahead of" his creditors by making an offer of compromise at 30c., cash. Investigation shows that he owes $2,500, and has assets of nearly double that amount It is needless to say his offer will not be accepted.

WE learn that the Toronto Motor Company are making an enlargement of their factory by adding the portion of the building now occupied as an office to their manufacturing department. They are taking possession of the premises next door, No. 109 Adelaide street west, for office purposes. A large boring mill specially adapted to motor work is being put into the factory, which will increase the company's facilities for turning out electrical work.

ABOUT twelve years ago A. Ball began dealing in hats, caps, etc., in Toronto, but it appears did not prosper, as already he has become the hero of three failures. The first was in 1889, when he settled liabilities of $4,500 at 50 per cent. Then he resumed business in the name of his wife. She assigned in June, 1891, with liabilities of $5,000, being $500 in excess of those of her husband. The business was then wound up, and Mr. Ball accepted a situation ; but tiring of this, a year ago, he again opened a store in his own name. He has been unsuccessful a third time, and makes an assignment.

IT is about three years since Gordon & Slaght opened a grocery store in Woodstock. Last November they dissolved partnership, George Gordon continuing the business. At that time a surplus of $3,000 was claimed. It would seem that this surplus was then overestimated, for Gordon now assigns.——After tinsmithing eight years or more at Clifford, Henry Filsinger moved to Mildmay. It is evident that he did not profit by this change, for we now hear of his assignment after being there one year.——A little fancy goods store in Peterboro' known as the "Bentley Fair" is owned by Mrs. C. W. Bentley, and managed by her husband, an undischarged bankrupt. She makes an assignment.

FOR about six years Luke Jefferies carried on a small grocery business in London, and on the 1st instant he sold out, receiving $400 cash, which was paid to his principal creditor, after which he assigned, owing several hundred dollars. Other creditors need not, we are told, expect much dividend, if any.——A few days ago John Bunyan, hotel-keeper at Thorold, had his premises closed by the landlord, and his stock and fixtures were sold.——Wm. Ball, furniture dealer, etc., at Dashwood, failed, and afterwards started business in the name of his wife (Ann). Last month he died, and she has assigned.——After photographing for twenty years or more in Hamilton, Wm. Tarmer has his business closed under the power of a chattel mortgage, and his effects will be sold.

WE note the following failures among country traders in Quebec Province: A. N. Ouimet, keeping a store for the past 25 years at Farnham, has made a private assignment. Though always having the reputation of being a shrewd, sharp business man, his affairs are reported "much mixed," and no definite estimate of liabilities is available as yet.——The embarrassment of A. Charlebois & Co., general dealers at Laprairie, is rather a surprise, for they succeeded the late A. Charlebois, who died very well to do, just about two years ago. Inexperience on the part of one of the partners, and a lack of sobriety with the other, no doubt largely contributed to their non-success. A demand of assignment has been made.——The liabilities

of John Duffee, carriage maker at Martinville, whose failure we noted last week, are set down at $6,000 ——A. McNaughton, of Huntingdon, already reported compromising, owes $7,139 direct and about $5,000 indirect.

THE Perth *Expositor* says that R T. Hicks has bought out the crockery and grocery of A. R. Code & Co., in that town.

IN Toronto there are a few more minor matters to report. The sheriff will sell to-day the coal and wood business of J. R. Caldwell, and the bailiff will sell the assets of F. E. Button, coal and wood. A bailiff is in possession of the boiler shop of J. Bloomer.

ONE of those failures that seem hard to understand occurred at Uxbridge. E. Derusha succeeded to Alex. Brawley's hotel business at that place about a year ago. He came from Claremont, where he was engaged in the same business. His credit has been good and his capital was put at $8,000, but to the surprise of a good many persons, he has assigned.

THE latest Toronto house to venture into the business of woolens and tailors' trimmings at wholesale is the firm of John Muldrew & Co., which consists of Mr. John Muldrew and his son Mr. W. H. Muldrew. The senior partner knows the technique of the woolens business thoroughly, having been connected with the trade for twenty odd years in various capacities, in retail as well as wholesale. He has also been for years on the road, where he has a good conn ection. Many know Mr. Muldrew favorably from his having been first with H.W. Darling & Co., afterwards partner with McMaster & Co., in this city. The junior partner has also had practice in the cloth trade in various departments, so that in respect of experience and reputation the firm is well fitted to expect a share of the trade. Their premises are now in the Merchants' Building on Bay street, but before Dominion Day they expect to be in a new warehouse, 24 Front street west.

As long ago as the year 1880 the firm of King, Leakey & Co. commenced business as general storekeepers in Calgary. King was found to be a pushing man, anxious to do more business than the firm's capital would justify. This disposition, it seems, resulted in an assignment four years later. Then a settlement was made of creditors' claims at 25 per cent. discount. After this the firm determined to "go ahead"; clearly there was no such word as fail in their vocabulary. They built a large store and also opened a branch store at Anthracite. After another period of four years they assigned again. Their creditors were this time even more favorably disposed, and accepted 50 per cent. in full of their claims. In 1893 the firm dissolved partnership and G. C. King retired. The business was then continued under the old style by F. H. & E. W. Leakey, with Mr. King as manager. In January, 1894, they presented a statement showing a surplus of over $24,000, Notwithstanding this boasted surplus, they were obliged to ask their creditors in July last for an extension of eighteen months This they secured. The latest intelligence, we are sorry to say, is that this enterprising concern has made an assignment to G. C. King.

THE SITUATION.

Japan, in consenting to relinquish the territorial rights which the treaty of peace with China gave her in Manchuria, in return for an indemnity stated to be about $10,000, puts an end to all danger of an unpleasant afterclap. The truth seems to be that an understanding has been come to between Russia and China for the right to extend the trans-Siberian Railway south of Vladivostok to a port open all the year round, though it may not amount to a cession of the territory through which the extension will pass. It will be remembered that the British Premier, soon after the outbreak of the war, spoke favorably of the great Russian railway; and it would not be surprising if it should turn out that, to remove the tension, England suggested the compromise which has been agreed to. Of this railroad, which begins at St. Petersburg, only one-fourth the distance has been constructed.

Finding itself called upon to meet a deficit for the current year of $4,500,000, the Government of Canada proposes to reduce the expenditure $2,500,000, and to revive the sugar duty to one-third its previous amount, or say half-a-cent a pound, and to increase the duty on spirits from $2.12½ to $2.25 a gallon. It needs no argument to show that it is the duty of the Government to restore the equilibrium between the revenue and the expenditure, and as this cannot be done wholly by a reduction of expenditure, an increase of revenue becomes necessary. The expenditure for next year is estimated at $86,700,000 and the revenue as equal to this amount, or if times improve, a little more. It is fortunate that so fertile a source of revenue as sugar duties have proved themselves to be is available for the purpose. They are capable of being utilized to a much greater extent than is now proposed. The increased duty on spirits takes us to, if not beyond, the limit to which an impost can be carried without affecting consumption. There are few things which will stand a high duty without reducing consumption so well as spirits; but as mortal purse is not limitless, there is a maximum beyond which the duty interferes with the consumption. That maximum will probably be found to have been slightly overstepped by the imposition of $2.25 a gallon. This increase will have some bearing on considerations growing out of the Franco-Canadian treaty. Relatively to pure spirit, the spirit in French wine will be less taxed than it was at the time the treaty was made. Substantially, the quantity of spirit in wine is the element which nearly all countries base their scale of duties upon; and any increase in the duty on Canadian spirits, in presence of the treaty, has a discriminating effect. The restoration of the equilibrium relates only to the future. The actual gap will scarcely be filled by the late loan. A radical error was made in the estimates of last year, in which no glimpse of the actual deficit was obtained. The Minister of Finance failed to read the tendencies of the times, and to provide for the full demands of the public service under the altered conditions.

An average increase in the public debt of Canada of $5,000,000 a year since Confederation, the Minister of Finance regards as moderate. He put future liabilities, likely to accrue on account of railways and canals in the next few years, anywhere from three to five, at $9,700,000. There are subsidies to railways under contract to the amount of $2,257,000, and others not under contract to the amount of $2,587,259. Does this include $2,500,000 to the Hudson Bay Railway? That, we are told, is a loan, but it is a sort of loan which the borrowers will use every endeavor to convert into a gift, sooner or later. We are told that $1,200,000, usually voted in mileage grants to railways, is not to be repeated this year; but the information given about the Hudson Bay Railway is dubious and uncertain. And $6,000,000 is required to complete the enlargement of the canals to eighteen feet of water. Besides these great items, there is the annual subsidy to the China, Japan and Australian steamship service. The Minister of Finance hopes to meet those obligations out of revenue. But if the worst comes to the worst, the sugar duties can be drawn upon to a much larger extent than at present proposed. The increase of revenue now to be provided for should have been enough certainly to fill, with the aid of the late loan, the gap of the deficit. Will the duties proposed be sufficient for this purpose?

In criticising the budget, Sir Richard Cartwright was at his best. His fault is, ordinarily, that he fails to put himself under the discipline of restraint in drawing on a reserved vocabulary, for which the statesmanship of our day has no serious use. The present sign of amendment ought to be welcomed alike by friend and foe. He did not object, no disinterested person does object, to the increase of the duty on spirits, though he was not sure that it might not prove a temptation to the illicit distiller, and present an opportunity to the smuggler. On jams and jellies, additionally taxed for the sugar they contain, he estimated the new duty at 50 per cent., while on molasses, he thinks, there will be a protection of 70 or 80 per cent. On this point he said: "So far as the tariff is protective the measure of the taxation is the total consumption of imported goods, *plus* the goods manufactured under the tariff in the country." Reducing this principle to a practical rule, his conclusion was: given the quantity of such goods made in the country at double the amount imported, the tax will impose a burthen of $3 for every $1 that goes into the treasury; and the proportion that goes elsewhere than to the treasury will increase the nearer the point of prohibition is reached. Though the figures may represent a general truth, there can be no certainty about them, in individual cases, under all circumstances, for domestic competition does sometimes play a considerable part. Such competition has been the mother of nearly all the great combines. The late tariff reductions Sir Richard puts at only one-fortieth of one per cent., and undertakes

to show that it would require a like reduction every year for 400 years to get down to the average tariff of 1878. He asserted that the English artisan pays in taxes only a twentieth part of what the Canadian artisan pays on everything he requires, except anthracite coal and tea. He puts the total amount paid under the tariff at $60,000,000 a year, one-half of which only goes into the treasury and the other half into private pockets. Having made this statement, it is difficult to see how it can be reconciled with the statement that "manufacturers prospered more up to 1878, and in a far more substantial way, than they have since."

What may be called trial by a coalition of detective and newspaper has of late become unpleasantly familiar in Canada. Trial by detective has, in the case of Clara Ford, received its death blow. The detectives get hold of a young woman, without warrant or other legal authority, and accuse her of murder. For seven hours they keep her on the rack of questioning, till, fairly worn out, she concocts a confession to get rid of her tormentors. She is brought to trial for the alleged crime; the confession is produced and admitted, subject to a reserved case; the jury in forty-eight minutes after retiring bring in a verdict of not guilty. The detectives, we are told, are officers of the court; true, but that fact does not justify them in plying an accused person with questions in advance of the regular trial, and in the absence of the court and of counsel, which neither prosecuting counsel nor judge could put to her. To subject her to such an inquisition is to graft the French system upon the English, a system utterly repugnant to the spirit of British jurisprudence. The practice had just reached its most dangerous point. The Chancellor, whose great abilities all will acknowledge, was in doubt whether it ought to be continued, but with a leaning in favor of it. The Ford case was his first murder trial; he is innocent of the ways of detectives, who sometimes do not scruple to forge the missing link of the chain, which as a whole becomes strong enough to take away the liberty or the life of a fellow creature. The jury in the case of Clara Ford would not sanction a reserved case; they settled the matter for themselves. If in future detectives overdo their part, there can be no doubt that we shall have to face the danger that juries will refuse to aid them by convictions. Trial by newspaper still holds its malignant sway. During this trial the accused was often spoken of as the murderer of Frank Westwood. If the administration of justice is not to become a bye-word among us, means of putting an end to this practice must be found.

A new board has been elected by the shareholders of the Grand Trunk Railway Co., and Sir Charles Rivers-Wilson is made president, for which he is to get £4,000 a year. On the ground that a direct relation between salaries and efficiency exists, how is the Grand Trunk to get service equal to that presumably given by Sir William Van Horne to the Canadian Pacific? Something was said at the meeting about the desirability of keeping the capital account in England and the working expenses account in Canada. It must all along have been recognized that financial accountability is due to England, where the bulk of the capital is held. But beyond this, there is the question, can the authority necessary for the efficient working of the road be advantageously centered three or four thousand miles from the scene of nearest operations? Hints were let drop of hopes that the price of the stock would rise. The fact that much of the stock is hopelessly dead ought to be recognized. Unless this be understood, what will reorganization amount to? A change of figures; and if the stock be forced up a change of victims. What else will be the outcome remains to be seen. It is to be hoped that the new management will see that there was something else to be done besides reorganizing the board, by getting the proxies to flow in a new channel. Till full opportunity has been given for the new board to work out the salvation of the concern, opinions as to the outcome may fairly be held in suspense. There is a consensus of opinion that the new board will do something effective, and if they fail to meet that expectation, great will be the disappointment.

Last November, Mr. Sutherland approached the Dominion Government for a loan of $2,500,000 to the Hudson Bay Railway Company. At the same time he admitted that the claims of judgment creditors amounted to $450,000. The natural reply would have been that a company in that condition, with no revenue and unable to work the forty miles built, had better go into liquidation, and that if there was to be any large advance made, the Government must have a more stable guarantee for a return of the loan than a bankrupt company could offer. A contract for the construction of 250 miles of road was produced. On the 5th March, an order-in-council was made, granting a loan of $2,500,000; the land grant to be held by the Government, besides a first lien on the road. The company undertakes to find the means of repayment by a sale of bonds within two years. But the bonds might not be saleable; a first lien looks well, but when obtained from the Grand Trunk it soon came to amount to nothing by being deferred. Before the end of April, Messrs. Mackenzie and Mann, the contractors, refused to proceed with the construction, and a new contract was made with Donald Grant, of Fairbault, Tim. Foley, of St. Paul, and James Isbester, of Ottawa. Three days later, Mr. Haggart, Minister of Railways, makes the statement that "the Government cannot recognize these contractors." Mr. Sutherland says this means that the Government does not recognize any contractors, its business being with the company. It is doubtful whether this be the true explanation, for Mr. Foster stated in the House, on Tuesday, that the old contract still subsists.

THE LOCAL IMPROVEMENT SYSTEM.

It is the common impression among the taxpayers of Toronto that the local improvement system, which, under abuse, has developed such an enormous capacity for mischief, is a new thing, the outcome of legislation not more than a dozen years old. This is an entirely erroneous impression. Away back in the early fifties the principle that the real estate immediately benefited by any improvement should bear the cost, or part of it, was recognized by law. In 1859 there were introduced into the Municipal Acts of the then Province of Canada, local improvement clauses very closely resembling those now in force. It was provided that on the petition of two-thirds of the property owners representing one-half in value of the property benefited, a city council might assess the cost of any sewer, street opening, extension, grading, paving, macadamizing, etc., on the property benefited, and the assessment might be made either according to the foot front or on the value of the land, or on the value of the land and buildings.

While the law remained in that form a fair number of local improvement works, principally sewers, were executed in Toronto. But the experience of twenty years showed that there was not sufficient inducement to encourage property owners to proceed with the development of their land. The ward system was in full swing. By dint of industrious log rolling, many works that ought to have been paid for by the property benefited were executed at the

public expense. Almost any job could be navigated through the Council, provided a certain number of other jobs benefiting other wards could be put in the same boat. Practically the whole of the vacant land that was brought into the market prior to 1882, had its local improvements, such as they were, constructed at the public expense, chiefly at the expense of the central portions of the city, the relatively heavy assessments on which furnished nearly all the taxes. If the central portions wanted anything done they might do it themselves. They were referred to the then existing local improvement clauses, and when they did, in desperation, execute an improvement at their own cost, up went their assessments, and straightway the outer wards had, from the increased yield of the taxes, more money than ever to spend in developing their new streets. Among such works executed on the old local improvement plan may be mentioned the Nicholson or pine block pavement, constructed by the King street property owners at their own expense. For this work, the only reward they ever received was the almost doubling of their taxes. The pavement itself was a failure, and was worn out and superseded by cedar blocks long before the assessment had run out.

In the meantime the city was growing like a weed. There were almost no roadways that were passable in bad weather. The suburban aldermen would not permit any large public expenditure to be made on the central streets. The condition of the streets was year by year getting worse, notwithstanding continuous outlay. A gang of boodlers, who could have given points to Judge McDougall's victims, were firmly entrenched behind the ward system. They resisted change with the tenacity of a clam. When at length they were forced to let go they turned at once to see how far the changed system would lend itself to abuse. Of the tricks they played it is the intention to give some particulars.

THE MONTREAL COUNCIL.

The sin of extravagance in civic spending has brought the council of Montreal to a serious crisis. The demands made for 1895 by the various committees of the council amounted to $5,162,816, but the finance committee pared down the estimates by $389,000, making the sum of $4,773,816 which was to be raised for the year. But even this reduced amount is $523,000 in excess of what is available, and the problem before the civic body is how to get over the difficulty. Surely it was time for Alderman Wilson Smith to ask whither they were drifting. Between 1890 and 1895, according to that gentleman, the interest charges were increased by free borrowing from $650,000 to $1,115,000, or at the rate of 40 per cent., while the revenue had only increased $400,000, or, say, 17 per cent. The deficit, said the speaker, had been going on gradually for years, as in 1892 the over-expenditure was $86,000; in 1893, $218,000; in 1894, $176,764, after charging $100,000 to loan account. He favored either spreading it over five or ten years, or they might make a reduction of, say, 20 per cent. from the committees. He spoke strongly about the go-ahead-at-any-cost system of improvements, and showed that there was due the city $2,290,000 by proprietors for widenings, and the city had to pay interest on that amount. After discussing various motions and voting upon them, Alderman Beausoleil's amendment was carried, by 16 to 8, the effect of which will be that all committees' expenditures will be reduced 20 per cent., and that application be made to the Legislature at its next session for the means to cover the anticipated deficit of $523,000. Sweeping reductions have been made in the road committee's demands, in the proposed arrangements for burning garbage, and in the parks and ferries appropriations.

FIRES AND FIRE LOSSES.

Day by day, month by month, the fires go on in city and country, now with hundreds of dollars loss, now with thousands or tens of thousands. And people pay but little heed. Only, when some conflagration sweeps away a million's worth of property in a night, the country is suddenly aghast, and people look about, bemoaning their losses, cursing the lack of fire appliances, demanding proper building laws, and otherwise displaying energy for some days or weeks. But those of the sufferers who were not carrying any insurance are pretty sure to be found applying for policies on their new stocks or new buildings.

We find by the monthly compilation of fires in the United States and Canada made by the New York *Journal of Commerce and Bulletin*, that the fire loss for the four months closed with April is seven millions larger than last year, the figures being: Four months 1895—$49,513,250; four months 1894—$42,558,100. Every month's loss this year was larger than in 1894, except April, which was $11,018,000 as compared with $11,540,000 in April, 1894. There were 195 fires last month which destroyed more than $10,000 worth of property each, twenty-six of them —or almost one a day—burned up from $100,000 to $500,000, and one of these was in Montreal.

Writing of those short-sighted persons who do their own fire insurance, or who advocate municipal fire insurance, because a certain town or village has suffered but lightly from fire during five or ten years, the *Coast Review*, of San Francisco, has the following remarks to make:—

This is about the same thing as if a Californian, starting to build a house in October, should say: 'A roof is a needless expense; there has been no rain for six months and I'm going to save the cost of a roof.' This is the kind of wisdom displayed a few weeks ago by a member of the Los Angeles city council, who opposed what he called the 'waste of money' involved in the insurance of the school buildings of that city, because 'we have been insuring school-houses for a long time without a fire.' Twelve days later the school building on Boyle Heights in the above city was burned, entailing a loss of $8,000. This idiocy is at the bottom of the various schemes for municipal self-insurance. A town may have escaped any serious fire for ten years; therefore, argue the short-sighted city fathers, 'let us save the money we throw away on insurance companies.' All at once the unexpected happens, as it has a way of doing, and a fire wipes out a hundred thousand dollars of city property. The city has saved a few dollars in premiums, just as the crazy farmer has saved a few bushels of seed wheat, trusting to chance to sow his fields. There is quite as much wisdom displayed in the one case as in the other.

WHAT WE EXPORT.

Comparing the exports of last year with those of the year before, in respect of Canadian products, we find an increase in minerals, etc., from $5,625,000 to $6,055,000. A small part of this increase is in coal, a larger portion in nickel ore and matte, lead ore, pyrites and gold. There is a falling off in exports of our building stone, marble, sand and gravel, doubtless by reason of the dulness in building operations in the States caused by the depression.

Fish and fishery products show a very marked increase, the totals of money value in this department being $10,321,048 last year, as against $8,253,894 in 1893. There is but little variation in quantity or value of codfish exported

(in which term is included ling and haddock), nor yet in mackerel, halibut or herring; the total of all these being put at $4,518,000 in 1894 and $4,285,000 in the year previous; but in canned lobsters there is an increase both of quantity and value, and in salmon a very marked increase of all sorts, fresh, smoked, pickled and canned. The export of the last named was 24,042,111 tins, valued at $2,386,696, where in the previous year it had been 8,219,518 tins of the value of $870,000. Fresh fish exports we cannot compare, the totals of lake trout for 1893 not being given. Fish oils show a decrease, but "marine furs or skins" a marked growth.

Turning to the products of our forests, the largest item amongst them, deals, shows about the same dimensions, $7,335,000, in the two years, with this variation, however, that less pine deals and more spruce deals were shipped last year than in the previous year. Deal ends show a larger export, so do staves and scantling; but in the important item of planks and boards the falling off in value is great—1,135 thousand feet realizing only $7,964,000, where 878 thousand feet in 1893 realized $9,904,000, a difference in value of more than four dollars per thousand. Neither elm, oak, spruce, nor hemlock logs exhibit any increase, but owing to much brisker relations with the Americans the 127,101 thousand feet exported in 1893 became 279,707 in 1894. Tanbark, lathwood and firewood all fell off. Pulp wood for paper making showed an increase, but in the minor forest products of hop, hoop, telegraph and other poles, or posts and railway ties that we sell so regularly to the Americans, there was a general decrease. The totals under this head were $26,354,000 in 1894, and $27,632,000 in 1893.

When we come to deal with exports of grain and field products, it is important to recognize that a good deal of these going abroad from our sea ports are American grains or flour in transit through Canada. Out of about $27,000,000 worth of such products shipped last year, $9,000,000 worth was American merchandise, viz., 10,381,000 bushels Indian corn, 4,908,000 bushels wheat, 540,000 bushels oats, 141,000 bushels rye. The value of Canadian breadstuffs sent abroad was $12,457,000, of which half was wheat, one-sixth flour and oatmeal. Only 50,000 barrels of American flour went to sea by the St. Lawrence route. We shipped 428,000 barrels of Canadian. Fruit was by no means so large an article of export last year, but it came to over a million, and of hay we sent abroad 276,000 tons, valued at $2,600,000, and clover or other grass seed to the value of half a million.

Live animals are a considerable item of Canadian export, amounting to eight or ten millions a year. Last year it was less than in 1893, being $8,607,000 in value, of which $6,500,000 was cattle and $1,178,000 horses. Dead meats went abroad last year to the value of $4,013,000, as compared with $3,188,000. Furs, undressed, are a good-sized item, nearly two millions of dollars. But the greatest element in this department of "Animals and their products" is cheese, of which we shipped last year 155 millions of pounds, valued at $15,488,000, surpassing the export of 1893 by a million. Butter is a small, but we hope an increasing item of dairy export. The total under the heading of animals, etc., is $33,046,467, of which $31,881,973 is Canadian produce.

Now we come to manufactures, whose aggregate value exported was about the same in the two years. The principal items under this head are wood manufactures and leather, of which there is but little difference in the exports of the two years, viz., $1,385,000 worth of the first (including wood pulp, matches, doors and furniture), and $1,714,000 worth of the second. Cotton goods are a good-sized item, $566,000; agricultural implements another, $466,000; iron and steel manufactures a good sum; pianos and organs, $265,000; whisky, $174,000; oil cake, $205,000. Then there were sold to other countries forty-three ships of an aggregate tonnage of 21,960 tons, valued at $243,000.

It is worth while to notice that if we deduct the unusual amount of American coin and bullion from the United States shipped from Canadian ports in 1893, the total exports of that year will no longer exceed those of 1894. Deducting coin and bullion, the exports of last year were $115,685,000; those of 1893, $114,431,000.

EXPORTS OF CANADIAN AND AMERICAN GOODS.

Articles.	Value 1893.	Value 1894.	American Goods 1894.
Produce of the Mine	$ 5,625,526	$ 6,055,894	$ 254,885

TORONTO TRADE FIGURES.

Less exports but more imports than in the same month of 1894 is the broad showing of Toronto's foreign trade for April this year. The value of imports, according to the Board of Trade Bulletin, was $1,583,948 (of which $443,593 was free goods) and that of exports $277,575. In April, 1894, the imports were $1,389,498 (free $326,717) and the exports $297,905.

The principal articles among free goods are such raw materials for manufacture as hides and skins, $75,850; dyes and chemicals $25,931; metals, $22,292; wool, $14,611; furs, $15,414; jute yarn and cloth, $9,745. Also, anthracite coal, $63,499; fruit, $16,568; tea, $18,969; settlers' effects, $15,282; coffee, $17,622.

We append our usual table of principal imports:

DUTIABLE IMPORTS.

	April, 1895.	April, 1894.
Cotton, and manufactures	$126,486	$69,113
Fancy goods.....	43,241	53,746
Hats, caps and bonnets	44,772	46,510
Silk, and manufactures of	60,739	63,227
Woolen manufactures.....	150,391	132,650
Total dry goods.....	$425,629	$365,246
Brass and manufactures of.....	$7,076	$4,955
Copper, "	528	654
Iron and steel "	98,749	102,492
Lead, "	1,017	5,512
Metals and composition.....	7,868	10,451
Total metal goods.....	$115,238	$124,064
Books and pamphlets	25,137	26,603
Bicycles	37,843	46,107
Coal and coke	.....	27,432
Drugs and medicines	15,695	19,195
Earthen, stone and chinaware.....	17,247	19,667
Fruits, green and dried.....	21,964	24,701
Glass and glassware.....	24,156	.....
Gutta percha	8,111	10,261
Jewellery and watches	16,629	19,318
Leather and m'frs of	31,034	18,286
Musical instruments.....	14,310	10,068
Oils of all kinds.....	14,172	10,017
Paper and manufactures of.....	29,503	32,515
Seeds, flower, garden, field.....	49,692	23,392
Spirits and wines	5,574	2,708
Wood and manufactures of.....	11,007	16,051

Free goods, such as raw materials for manufactures, &c., have been imported rather more largely last month, as a comparison will show:

FREE IMPORTS.

	April, 1895.	April, 1894.
Coal, anthracite.....	$63,493	$53,049
Hides and skins.....	75,850	32,094
Dyes, chemicals, &c..... ..	25,931	30,138
Jute cloth and yarn	9,745	2,947
Metal goods, various	22,292	21,908
Sisal and Manilla hemp	28,402	1,157
Tobacco leaf	2,651	2,930
Wool	14,611	17,630
Tea	18,957	12,709

There is not much variation shown in the values of different kinds of merchandise exported. Dead meats and manufactured goods continue to be the largest items shipped from this district.

EXPORTS OF CANADIAN PRODUCE.

Produce of	April, 1895.	April, 1894.
The Mine	$ 68	$ 22
" Fisheries	10	144
" Forest	3,766	16,341
" Field	77,467	50,582
Animals, and their produce	94,077	136,767
Manufactures	77,976	80,131
Miscellaneous	.....	212
Total	$253,364	$284,202

THE ADVANCE IN SUGARS.

The Budget speech of the Hon. George Foster last Friday contained a surprise for the sugar refiners and grocery interests. Everyone had expected the announcement of a considerable deficit in the year's revenue, but few in commercial circles had looked for an immediate declaration of the remedy to be supplied. Mr. Foster, however, had selected sugars and liquors as the two commodities best able to stand increased taxation. The amended section of the Tariff Act referring to sugars is as follows:—

"All sugars above number sixteen Dutch standard in color, and all refined sugars of whatever kinds, grades or standards, 1 cent and 14-100 of 1 cent per pound; sugar, n.e.s., not above number sixteen Dutch standard in color, sugar drainings, or pumpings drained in transit, melado or concentrated melado, tank bottoms and sugar concrete, ½ cent per pound, the usual packages in which imported to be free."

Under previous tariff regulations raw rugars were admitted free of duty, while sugars above No. 16 Dutch standard and refined sugars were subject to a duty of 64 cents per 100 lbs. This material increase of ½c. per pound was unlooked for, and found merchants, in the West at least, none too well prepared. In Toronto there are two houses who are carying what may be described as fairly large supplies of sugar. Beyond this stocks are only moderate, and the best evidence of small supplies is the fact that refiners' agents are now receiving orders for deliveries to supply current wants. Montreal merchants appear to have been equally unprepared, and a reliable report says that only one house was at the time of the announcement carrying a large quantity of sugar.

The refiners were apparently more fortunate. At the port of Halifax 69,000,000 pounds of raw sugar has been entered since the beginning of the year. The following vessels with refining sugar arrived at Halifax within the last three weeks: Steamer "Robinia," 18,631 bags; steamer "Remus," 29,973 bags; steamer "Castledale," 20,649 bags; steamer "Ramon de Larrinaga," 28,100 bags; steamer "Gardenia," 17,500 bags; steamer "Beta," 6,000 bags; ship "Glooscap," 92,771 mats. This sugar was of course purchased not with any view of escaping possible tariff burdens of the future, but because, in the ideas of the management of the Acadia refinery, the statistical position abroad was strong and advancing. The Acadia company will not, however, retain all the benefits of the advance, for they have in hand a large number of orders for future delivery at prices based on free raws. The Montreal refineries will profit little, if any, by advance in sugars. Stocks of raws in Montreal are not understood to be large, although a number of cargoes are now in transit to that port.

The effect upon the grocery trade will, it is generally conceded, be beneficial. The advance has aroused the grocery trade from a lethargy into which it had fallen. After the continued depressing effect of falling prices, the mere fact of an advance is an agreeable sort of shock. It is not probable that there will be any active trading in sugars, however, until the fruit season, a month hence, begins to influence trade. The market is, from present appearances, in good shape for the future. Advices concerning raw sugars are strong. An American authority says: "In addition to what is considered a steady improvement in the statistical position, operators generally are coming to the conclusion that rates have been and are still lower than warranted by any of the developed influences, take them at their worst. The effect is shown in the willingness to buy for both consumption and investment, and the tendency to offer supplies in reduced quantities and with lessened force. Indeed, the amount of offerings at the moment is very small, and nothing can be reached except at fuller bids."

Refiners' agents are quoting granulated at 4⅛c., and yellows, 3¾ to 4c. per pound in Toronto. From this standard it is not probable that the market will decline, and indeed, a further advance of ⅛c. per lb. as soon as the consumptive demand improves would not surprise the trade.

THE WOOL OUTLOOK.

The wool trade of 1894-95 is practically closed, the only stocks remaining in store being a few odd parcels, for which special bargains are being made. The clip of 1894 closes at 20 cents per pound, but this is no reason that 20 cents should be paid for the new clip; thus early in the season it is absolutely impossible to predict the probable course of values. Although in some sections of the country sheep washing has already commenced, several weeks must elapse before the market opens and the trend of trade becomes established for the year.

The size of the new clip is a matter of uncertainty. Our reports, although as yet incomplete, lead us to believe that the clip will be somewhat larger than that of a year ago. The low price paid for lambs last spring caused many farmers to hold, and, in consequence, flocks in many sections are larger than usual. But in opposition to this must be placed the fact of severe agricultural depression following a general fall in the price of staple cereals, which operated to cause farmers to realize money from every available source. The regular income of the farm proving insufficient, inroads had to be made upon the stock.

Trade in England and the United States is quiet at present. The series of London wool auctions that opened on the last day of April showed depression, and prices were 2½ to 5 per cent. less than the closing values of the last series. This decline was but natural in view of the large offering, viz., 400,000 bales or 160,000,000 lbs. However, latest reports show improved spirit in bidding, and it is quite possible the auction will close at advanced figures, for the quality of the offerings is very superior. The American market is dull, and in the face of stocks of imported wool four times as large as last year depressed values excite little wonder.

One thing is certain, if the 1895-96 season is to be a success, no fancy prices must be paid at the opening of the market. While "free wool" has offered a wider market to the wool producers and merchants of this country, it has not proved the bonanza some over-sanguine people had expected. In May, 1894, Canadian washed ranged in quotations on the Philadelphia market from 20 to 25c.; during July and August, months of uncertainty as to the passage of the bill, quotations dropped to 16 to 23c., to be raised in September to 18 to 24c., and in the following month the market was established for the balance of the season at a range of 20 to 25c. per pound. These figures, it will be readily seen, do not admit of fancy prices to the Canadian farmer, and especially when future uncertainties must be taken into account. The labor question is unsettled, already strikes for wage advances are reported in Canada and the United States, and there are rumors of further troubles. Every wool buyer should scan the future closely and operate in a most conservative spirit.

RIDICULOUS BONUSES.

Municipal financiering is seldom brilliant, and perhaps the source of least remunerative investment to which town councils apply the funds of ratepayers is in bonuses. The fallacy of the bonus system has so often been exposed, that the subject has become hackneyed; municipalities have been deceived so often, that one would expect the question of granting a bonus to be discussed in a common sense way, and business-like stipulations made. And yet the regularity with which industrial corporations seek bonuses is only equalled by the regularity with which Canadian towns grant them. The credulity of town councillors on this side the line has apparently become a by-word in the United States, and American firms of every description "seeking a new site" or "wishing to extend their business by establishing a Canadian branch," have only to make public their designs and be inundated by letters from Canadian municipal authorities. Some of the propositions made are utterly absurd. A company purporting to hail from a Michigan town has been tempting several Canadian municipalities with an offer to establish a branch of their works upon condition that they be loaned $13,300, given free site and power, and exemption from taxes for twenty years. The estimated cost of the company's plant is $16,000. It is probable that these enterprising makers of novelty wares will never see Canada, for there are more attractive bids on the market. A company a little more guarded in describing their wants and less honest in describing their dimensions would succeed where this concern will, let us hope, fail. Bankruptcy is the ultimate end of most concerns established in this way, while a heavy debt and oppressive taxation linger to mark the absurd policy which called them into being.

—According to the assessors of Peterboro, the total value of property in that place for assessment purposes is $4,339,782, as compared with $4,311,000 last year, as reduced by the Court of Revision. There is shown to be an increase of nearly two hundred in the population, which is now 10,385.

MUNICIPAL FIRE INSURANCE.

The Hamilton Board of Trade has considered the subject of municipal insurance, and does not favor the scheme. At a meeting of that body, held on Tuesday, 7th inst, Mr. Seneca Jones read a paper on "Municipal Fire Insurance." He first referred to the law of average, which demands that underwriters' risks be widely scattered, so that too many may not be burned at one time in proportion to the total number of buildings insured. Where this law of average is not observed, the system becomes a mere speculation. Insurance companies protect themselves by limiting their liability in any one building or locality, whereas in municipal insurance the eggs would be all in one basket, for in that system the principle of average is ignored. Insurance is based on the broad and general principle of mutual assistance, where men who have never had a fire cheerfully contribute from year to year to defray the losses of others.

Municipal insurance has its basis on exactly the opposite principle, said Mr. Jones, and if the same system was applied to the individual, no insurance could be carried on. The movement for municipal insurance has its origin in an exaggerated idea of the profits of insurance companies, and the author of the paper showed that these profits are not so great as are popularly supposed, for over a dozen companies have failed or retired from business in Canada in recent years. There is not, so far as he can learn, now a case of municipal insurance being carried on in America, and he believed the scheme to be financially unsound and impracticable

Mr. Kittson, the president, who was in the chair, said that he had statistics showing that out of sixty companies only five have made money in the last ten years. The one which is making the most money is the Liverpool, London & Globe, which, by having branches all over the world, applies the law of average in its most perfect form. In extending the thanks of the board to Mr. Jones, he expressed the hope that municipal insurance would never be introduced here. The opinion of the meeting seemed entirely opposed to the system of municipal insurance, and a motion to that effect was passed.

LEVIS BOARD OF TRADE.

Levis, Que., opposite the city of Quebec, is a live town of seven or eight thousand population. It has a board of trade which the other day had a meeting and elected officers as follows:

President, Mr. Edmond Dupré.

Vice-president, Mr. Damase Lainé.

Secretary, Mr. Alfred Lemieux.

Members of the Council—Messrs. J. B. Michaud, Alb. Lambert, Theo. Arsenault, J. Buchanan, Chs. Darveau, Dr. N. Lacerte, Geo. Lambert, A. R. Roy, J. E. Mercier, Jos. Verreault, J. I. Garneau and Henri Carrier.

PERTH BOARD OF TRADE.

The annual meeting of the Perth Board of Trade was held at the council chamber in the town of Perth, on Tuesday evening, 30th April, when the former council and officers were re-elected. The treasurer showed a balance on hand. A motion was passed to petition the Dominion Parliament to appoint a board of Customs experts to value merchandise as asked for by the Montreal Board of Trade, so as to secure uniformity of valuations. Matters of local interest, including water works, were discussed for a time. The officers are:

Wm. Meighen, president.

J. A. Code, vice-president.

W. B. Hart, secretary.

W. A. Meighen, treasurer.

Council—R. J. Drummond, J. G. Campbell, Dun. Kappen, A. J. Matheson, J. F. Kellock, W. J. Pink, F. A. Hall, Henry Taylor, J. T. Henderson, J. McMaster. All re-elected.

MONTREAL SHOE AND LEATHER ASSOCIATION.

Montreal shoe manufacturers and tanners are evidently determined to work harmoniously together. At a recent meeting of the Wholesale Shoe Association connected with the Montreal Board of Trade it was decided to change the name of the association to the Shoe and Leather Association, and to admit the leather people who had applied for membership.

New by-laws were adopted and referred for approval to the council of the Board of Trade. The following officers were then elected: President, Mr. Edwin Thompson; vice-president, Mr. James Leggatt; treasurer, Mr. John T. Hagar; directors, Messrs. J. C. Holden, Geo, T. Slater, Chas. F. Smith, James Whitham. It might be well for the new tanners' section of the Toronto Board of Trade to open its arms to the shoe manufacturers, and so obviate the necessity of forming a separate organization.

TROLLEY FRANCHISES JUDICIALLY ANNULLED FOR FRAUD.

The Supreme Court of the State of New York, Walter Sloy Smith being the acting judge, has annulled the franchises granted by the corporation of Brooklyn to the Electric Railroad Company and the King's County Electric Railroad Company, on the 19th June, 1893. The suit was brought by Mr. Adamson, a taxpayer, on the ground that the franchises had been fraudulently granted, and that the action of the aldermen constituted a waste of the city's property. The gist of the complaint was that unjust preference had been shown in awarding franchises to those companies. It does not appear that bribery of the aldermen was proved, but the circumstances were assumed to afford presumptive evidence that both parties to the contract had acted fraudulently. The judge assumes, from the nature of the offer made, that the company 'must have known their men" among the aldermen. And he adds, in allusion to the aldermen: "The evidence of their fraudulent purpose is both direct and circumstantial; it leaves in my mind not a shadow of doubt." The decision was that the franchises were given in bad faith as a matter of favoritism, and are void. The companies, under the presidency of Patrick H. Flynn have spent nearly $1,000,000 on the works, and they are now in the position of trespassers. On the strength of this decision, it is thought that the grand jury has evidence enough to indict the board of aldermen and the mayor of 1893, and it is announced that a prosecution will be entered on. There is a statute which makes waste of the resources of the corporation a ground on which to found a remedy.

MINERAL EXPORTS.

The latest Blue Book shows that in 1894 the Canadian minerals exported reached a larger value in aggregate than in the previous year, notwithstanding some serious declines. As examples of the latter, the copper product exported has gone down from seven million pounds in 1893 to a little over a million in 1894, but this was to be expected from the condition of the copper market then; mica, too, has fallen from $96,000 to a fourth of that sum; ores are less, both iron and manganese; oils are less; phosphates are only one-fourth what they were, and gypsum is slightly less. But asbestos export kept up well, first and third qualities showing an increase, and the total export reaching $340,000 in value; gold-bearing quartz, etc., went up from $247,000 to $318,258; metallic lead showed a remarkable jump to three million pounds, valued at $65,000; silver, contained in ore concentrates, exhibits a value of $423,707, as compared with $65,406 a year before. In nickel, if the figures are correct in the return, there was a marked appreciation of value during the year, for with a lesser quantity exported (8,411,000 lbs., as compared with 8,924,000) the money value is put at $808,799, against only $427,557 in 1893. We find, too, a larger shipment of pyrites, but very little plumbago. Our foreign coal trade showed some improvement; where in 1893 the quantity sent abroad was 1,006,000 tons, it had gone up to 1,092,000 tons in 1894, an increase which represents a value of some $280,000. Salt manifests no improvement. The aggregate value of products of the mine exported from the Dominion last fiscal year was $6,055,894; in the previous year it was $5,625,526.

CANADIAN GRAIN CARRIERS.

The decadence of our Canadian mercantile marine on the Great Lakes, or rather its disproportion in size of craft to the marine monsters that our American neighbors are producing of late years, is a subject of wailing by occasional speakers or writers. For instance, in the marine items of last week's Amherstburg *Echo* is the following:

The Canadian marine on the Great Lakes has dwindled away until to-day there are only seven propellers and five barges upon which we can depend for transportation of grain from Fort William to Kingston, say the "Algonquin," "Bannockburn," "Glengarry," "Tilley," "Myles," "Rosedale," "St. Magnus," "Kildonan," "Minnedosa," "Regina," "Selkirk," and "Winnipeg," representing a capacity of about 500,000 bushels in all. The lumber and package business takes up the rest. The "Arabian" and "Shickluna" sometimes carry small cargoes to Montreal.

It seems to us that this is a pessimistic view to take of our lake shipping. If the writer means to exclude from the grain carrying trade such boats as those of the Beatty Line to Sarnia and the Canadian Pacific steamers to Owen Sound, he should not forget that there are many tramp steamers that are open for the trade from Lake Superior to Lake Ontario whenever freight rates reach a paying point. There may be mentioned the "Seguin" 40,000 bushels, "D. D. Calvin" 30,000, "Erin" 30,000, "City of Owen Sound" 27,000, "W. B. Hall" 30,000, "Orion" 35,000, "Niagara" 25,000, "Cuba" 25,000, "Melbourne" 25,000, "Acadia" 25,000 bushels capacity, which are all open for that trade in such an event. Here are ten more boats, of an aggregate capacity of nearly 300,000 bushels. And doubtless further vessels could be added to the list. We are not so badly off, then, as the author of the item would make out.

PATENT RECORD.

The following list of United States patents, granted to Canadian inventors, April 2nd and 9th, 1895, is reported for this paper by James Sangster, patent attorney, Buffalo, N. Y.:

Aloysius Brohmann, Mildmay, road-cart.

Charles Cluthe, Toronto, truss.

John A. McMaster, Leicester, England, assignor to John O'Flaherte Company, Montreal, sewing machine.

Oliver W. Ketchum, Toronto, die for beading metal pulleys.

James W. Hutt and A. J. Phillips, Toronto, assignors, by mesne assignments to J. W. Sefton, Manufacturing Company, Anderson, Ind., and Chicago, Ill., machine for manufacture of paper vessels.

William H. Roden, assignor by mesne assignments to J. J. Crabbe, Toronto, duplicating memorandum book or copying book.

Albert E. White, Dutton, knob attachment

Mineral waters, and beverages of which such mineral waters are the basis, Canada Iron Furnace Company, Limited, Montreal. Essential feature: The word "Radnot," the representation of the imperial crown, and the words "Empress of waters." Used since September 3rd, 1893. (Trade-mark.)

The following list of patents is dated April 16th, 1895:

Edmond N. Cusson, and L. Goullioud, Montreal, Canada, said Goullioud assignor to said Cusson, machine for stamping cigars.

Howard A. Felt, R. S. McLaughlin, and M. L. Evely, Oshawa, said Evely assignor to said Felt, game apparatus

Michael J. Grady, and R. McMillan, Kingston, car coupling.

Hippolyte J. La Force, Toronto, pneumatic tire.

Stephen Lounsberry, assignor to W. A. Howell, Jarvis, adjustable anti-friction band-saw guide.

James E. H. Paddon, Montreal, machine for bending railway rails.

Charles H. Waterous, Brantford, steam boiler.

A further list is dated 23rd April:

James S. Back, assignor of one-half to G. L. Orme, Ottawa, adjustment for detachable necks of stringed instruments.

Geo. G. Bowie, J. C. Rogers, Ottawa, and T. Larkin, Montreal, automatic vending-machine.

James Chapman, Rockland, horse-shoe.

John A. Coates, Sandwick, cross-bow.

William Crawford, Winnipeg, combined air-signal and brake-pipe cock.

Arthur L. Grant and C. G. Richardson; said Grant assignor to C. Riordan, Toronto, and J. R. Barber, Georgetown, refining nickel and copper mattes.

Joseph Kneen, Montreal, transom-operator.

Jean D. Oligny, Montreal, assignor to D O. Frye, Lachine Locks, and L. G. Harris, Toronto, artificial fuel.

Omer Sevigny, assignor of one-half to Z. Therien, St. Guillaume, car-coupling.

William Talbot, Toronto, machine for cutting chenille-cloth.

William Talbot, assignor of one-half to J. P. Murray, Toronto, let-off mechanism for looms.

Cardinal Smith Toye, assignor of one-half to A. T. Anderson, Toronto, portable centre for constructing continuous archways.

Albert Tracy and W. Abbott, assignors of one-half to D. W. Abbott and H. H. Wooten, scraping and dumping vehicle.

ANSWERS TO ENQUIRERS.

C. L., Detroit.—It has been decided by the Supreme Court of the United States that crimes committed on the great lakes of North America are punishable as being committed on the high seas. Even the rivers or other waters connecting the great lakes are, in an elaborate judgment of 1893 or 1894 by Justice Field, included in his definition of the lakes as "high seas."

INVESTOR, Barrie.—Yes, there was such a law passed by the Ontario Legislature, 56 Vic. chap. 33, declaring that "the capital actually and in good faith subscribed, and no more, shall be stated" in the literature of building and loan associations. So the "$5,000,000 capital" and "$10,000,000 capital" boasted, on paper, by a dozen or two such concerns, is now forbidden. But there are other kinds of inflated language used and unrealizable promises made, some in foolish ignorance, others, we believe, with intent to swindle.

CANUCK, Three Rivers, Que.—The meaning of seignorage is something claimed by the sovereign as a prerogative of the crown (or the State), whereby a percentage on bullion brought to the mint to be coined or exchanged for coin, is claimed. Another definition is—and it is probably the one you mean—"the difference between a mass of bullion and the face value of the pieces coined from it."

HARDWARE AND METAL TRADES

Montreal dealers in metals report trade as slow and unsatisfactory

Values are steady. Metals are for the season in fairly good demand, both by way of shipment from stock and import order

Toronto wholesale merchants report trade as falling off somewhat This is to be expected, as the movement in spring supplies should be well over in the second week of May. Ice cream freezers, gas stoves, screen doors, and other articles suggesting hot weather are in good request.

James Watson & Co., Glasgow, report, April 26th "Since our last report the pig iron markets have been strong, and a considerable business has been transacted in Scotch warrants, the price of which has advanced about 9d. per ton. Quotations for shipping brands are also dearer in sympathy."

The Brantford factory of the Consumers' Cordage Company has been turned over to a partnership company consisting of N. K. Connolly, of Quebec; M. Connolly, of Montreal; John Connor, of St John, N. B., and P. L. Connor, of Brantford. The factory, it is said, will be independent of the Consumers' Cordage Co.

Messrs. Crathern & Caverhill, Montreal, are reported by the Montreal *Hearld* as saying: "It is very satisfactory to note that there have been no failures of late in the local hardware trade, although there have been one or two difficulties with payments There is not much improvement in the Northwest trade, but in spite of these things the prospects for a revival are not so dull as might appear on the surface, and possibly the near future has good things in store for the trade."

Petrolea crude, says the *Topic*, is still at $1.75, with Oil Springs 2 cents higher. No sales have taken place on 'Change for some time, but buyers on the street are offering $1.75, and that is the regular price now. Nearly all the rigs in town are busy, but business has not commenced to boom much yet, as the producers are trying to make up for the recent hard times, and want to be assured that the present streak of prosperity is going to last before they go in for much more expense Oil men, however, expect that oil will stay at fairly profitable figures for a long time to come, as all attempts to find new territory of any magnitude in the United States have failed. Refined is 12c. in bulk and 14½ to 15c. in bbls. f.o.b

FOR GROCERS AND PROVISION DEALERS.

You may look for dearer bread soon.

P. Beniteau will start a distillery at Windsor.

The Maritime Province potato market is depressed, and quotatinso low

Wetmore sardine factory at Deer Island, N.B., has begun operations.

The merchants of Port Dalhousie rejoice in the opening of navigation.

Mitchell merchants will close their stores at 7 o'clock during the summer months.

Canada's Dairy Commissioner, Prof. J. W. Robertson, will visit British Columbia in June.

J. H. Falconer, Victoria, B.C., proposes to erect a fruit canning factory at Kamloops, B.C.

Rochester grocers are cutting bread prices and sell bread at one cent a loaf instead of five as usually.

A cheese board has been formed at Tweed. Mr. James Clare is president, and Mr. Thomas Graham, secretary.

The maple sugar season just closing has not been a financial success. Granulated sugars are too low in price to admit of profit in making any description of sugars.

A new industry has been started in Charlottetown, P.E.I. Messrs. Rankin & White are about to export live lobsters, their headquarters being the Steam Navigation Company's wharf

Mr. O'Much—"Look here, that coffee you've been sending me is no good The cook says it won't settle." Grocer's Boy—"That's what the boss says about you."—*Philadelphia Record*

There will be seven lobster factories in operation at Cape Traverse, P.E.I., this summer. The packers are daily mustering their forces for active work, getting their trawls and traps put in order.

The influence of the condition of the roads upon the provision market may well be noted in the instance of potatoes. When the roads were muddy and in many cases impassible, potatoes in some sections were worth a dollar a bag, but so soon as the roads settled the price dropped to almost half this sum. Better roads would truly be a blessing alike to farmer, merchant, and the public

The world's visible supply of coffee, as compiled by the New York Exchange, shows 3,115,990 bags. against 2,754,094 April 1st—an increase of 361,896 bags; and compares with 2,206,280 bags same time last year.

George Robertson & Co., of St. John, N.B., have said good-bye to the general public, and will in future sell only to the trade, having closed their retail store in order to devote all their energies to their wholesale business.

The steamer "Dracona," now on the way to Montreal, shipped 1,000 boxes oranges and 4,000 boxes lemons at Palermo. She carries the following Messina stock: 300 boxes and 800 half boxes oranges, and 2,000 boxes lemons.

The prospects for early closing are not of the brightest kind in many grocery stores. Grocers complain that it is impossible to close their stores early during the fruit season as berries and other fruits are for the most part not marketable until late in the day.

The total quantity of apples shipped from New York to Europe during the season now almost closed is reported at 1,467,081 barrels, which is the largest quantity ever shipped, the previous heaviest season being that of 1891-92, when 1,450,336 barrels were shipped.

Early closing among the grocers and meat dealers on the St. Croix, says the St. Stephen *Courier*, has evidently come to stay. Tuesday and Thursday of each week hereafter will probably find all of these stores closed in St. Stephen, and Calais merchants have very readily agreed to join in the new arrangement.

The first Montreal fruit sale of the season was held at Mechanics' Hall, St. James Street, on the 3rd inst. The entire cargo of the steamship "Astrid," which recently arrived in Montreal from Mediterranean ports, was sold. Buyers from Boston, New York, Quebec, Ottawa, Toronto and Brockville, as well as Montreal, crowded the room. The fruit was sold from catalogue and in lots ranging from a few boxes to several hundred. The fruit was in fair condition and brought good prices.

The promise of the growing crop is bright. As the season develops it is generally conceded that the damage done by early frost in certain localities, will not cause a famine in any kind of fruit. A competent authority puts the apricot crop at 60 per cent. of the enormous one of last year. All other fruits will turn out the largest crop yet harvested. At least so we think, basing the opinion on the favorable weather conditions and the fact that new orchards are always coming into bearing. In spot business there is little doing.—*California Grocer*.

BOOK AND STATIONERY NOTES.

S. R. Crockett has lately written another story, entitled "Bog-myrtle and Peat."

There are some new toy puzzles in the market, the "Trilby" puzzle, the "Forty" puzzle, and various others.

Seal leather playing card cases are made now-a-days shaped like pocket books, and have the registers on the inner side of the flap.

Silver bronze scrap baskets are accessories to the writing outfit of 1894 in the United States, which are often stylishly set off by immense ribbon bows.

Frederick Warne & Co. will publish shortly an illustrated volume entitled "Angling and How to Angle," by R. B. Marston, editor of the London *Fishing Gazette*.

Leather cigarette cases should be "sporty," if anything, and this air is given by the pretty silver whips, horse heads, jockey caps, and parts of harness which are used to ornament leather cases.

Numerous inquiries are being received for the "Parchment Vellum" writing paper and envelopes made by the Raynor Envelope Company, New York. They are handsomely put up in boxes of different sizes.

The story of William the Silent, the "moderate man of the sixteenth century," is well told by Ruth Putnam, in a volume, illustrated, issued by G. P. Putnam's Sons. She tells the story of the Prince of Orange as it is found in his own letters and in official documents.

Miss Lily Dougall, who if we do not mistake, is a Montreal girl, but who will likely be claimed by our Yankee friends, just as Sara Jeannette Duncan was, for "an American," has written "The Mermaid, a Love Tale," published by the Appletons in their *Town and Country Library*.

The author of "The Real Chinaman," is Mr. Chester Holcombe, interpreter and afterwards secretary of the American Legation, at Pekin. He describes and explains some of the more prominent factors in the national life, and shows why some of the Chinese ways, so odd to us, are natural to them. Illustrated, $2. Dodd, Mead & Co.

Said Howells in Harper's Magazine not long ago, describing his first view of the ocean, having looked in vain for the magic of the sea:—"I could not make more of it than there was of Lake Erie; and I have never thought the color of the sea comparable to the tender blue of the lake."

"Vorax," of St. John, New Brunswick, who sends an appreciative letter about these occasional literary notes, and is an admirer of Stevenson in particular, is informed that there is nothing, in our opinion, more ingeniously odd or interesting than that story of Stevenson's, "The Misadventures of John Nicholson."

The following item from the last number of *The Stationery Trades Journal* gives some indication of a lively interest in the early history of Canada: "Messrs. Puttick and Simpson obtained the following excellent prices at a recent sale of books and autograph lettters in their rooms, London: 'Estat Present de l' Englise et la Colonie Francoise dans la Nouvelle France,' Paris, 1688, £19; Sagard, 'Histoire du Canada,' Paris, 1636, £28: Theuet, 'Les Singularitez de la Nouvelle France,' £10 10s."

"Dame Prism" is a story for girls by Margaret Harriet Mathews published in 12 mo. by the F. A. Stokes Co. The plot of "Dame Prism" is original and interesting. A family of children are suddenly thrown upon their own resources, without friends or money. They get permission to live in a railway car, and the book tells how they make a pretty home there, and fight their way to independence. A delightful and helpful story for children, with sixteen half-tone engravings, after original designs by Miss Elizabeth S. Tucker.

In the course of a book review, wherein Trollope's novels are deservedly praised as affording admirable descriptions of English life, Martin J. Griffin, in the Montreal *Gazette*, says: "All healthy minds love good novels. The literature of fiction is full of exquisite and elevating enjoyment for those who know how to find it. The facts of history, the sum of human experience, the play of human emotion, the course of human ambition, the value of earnest purpose, the folly of irregular lives, the poetry of self-denial, the heroism of self-sacrifice, all that makes a picture of life in any age fascinating, may be found among the splendid fictions which our literature supplies."

TEXTILE JOTTINGS.

The Dunnville woolen mill is being improved by repairs.

M. S. McKay & Co., of Galt, are adding to their woolen mill premises.

Slight damage was done by fire to the Globe woolen mills, Montreal, last week.

and mats from cast-off rubbers, silk upholstery goods from collodion and alcohol threads.

Fall prices of American carpets promise to vary but little from the price lists of last autumn.

The Garden City Carpet Company of St. Catharines has been incorporated, with $10,000 capital stock.

The Palmerston flax mill of J. &. J. Livingston was burned recently, with the storehouse and 60 tons of tow.

Mr. George McLaughlin, a long established dry goods merchant of Annapolis, N.S., intends removing to Halifax.

A three-story brick addition is being made to the Stratford woolen mill. It will be used as store rooms, office, and sale rooms.

James Randle, of the Meaford woolen mills, has purchased a boiler for the purpose of dyeing by steam process. This mill is making a special line of carpet, which finds ready sale.

Hoax—"I was trying to think of a man's name to-day and couldn't. Then all of a sudden a shower came up." Joax—"Well, what had that to do with it?" Hoax—"Everything. His name was MacIntosh."—*Philadelphia Record*.

A number of the weavers employed by Messrs. Wm. Parks & Son, St. John, N.B., have struck for an increase of 10 per cent. in wages. Although the textile trade is undoubtedly improving, we would hardly think that the Canadian cotton goods market is in a position to warrant higher wages to operatives.

"What are you giving us?" asks the *American Carpet Trade Journal*, and by way of reply answers:—

"Curtains from glass yarns, rugs from bog peat yarns, mattings

"Voluptuous linoleum from New Jersey forest leaves are among the 'novelties' for which 1894 exclaims 'peccavi.'

"Oh yes; and we forgot all sorts of soft things from aluminum threads.

"Now let some man invent a machine for spinning the parings of finger and toe nails, and for weaving curtains from old salts' yarns. Then watch the sheep bleat and slink away."

SHOES AND LEATHER

Mr A. E Miklin, of Acton, is making moccasins

No more "slaughter sales" for the retailer of footwear.

James Sinclair, Shelburne, Ont., has erected a tannery at that place

"Tan Day," at retail shoe stores, is becoming a popular form of advertisement.

A new boiler will be added to the equipment of the Berlin tannery of Messrs. Lang & Co.

The Union Shoe and Leather Co. of Winnipeg has been incorporated with a capital stock of $45,000.

It will take a liberal amount of talk and advertising to advance the views of the shoe-wearing public twenty-five per cent., and yet this must be done if shoes are to be profitably made and sold.

Arrangements have been made for the establishment of a shoe factory at St. Boniface, Man., by the Union Leather and Shoe Company of Winnipeg. The town of St. Boniface agrees to furnish a cash bonus of $2,000 annually, for five years, and a fifteen years' exemption from taxation; the company, on their part, are to start in with a force of 35 hands, increasing the same to 70 by the end of the second year. They further agree to expend, annually, from $15,000 to $20,000 in wages

The Quebec correspondent of the Montreal *Witness* writes to his paper that, "Owing to his critical state of health, Mr. H. Botterell (H. Botterell & Co., the extensive boot and shoe manufacturers here) has been advised by his physicians to close up his business at once, and arrangements are now being made to wind up his affairs and shut up his factory at an early day. His commercial travellers have all been recalled, and it is expected that by next month the factory will stop work and several hundred hands will then be thrown out of employment."

Speaking to a Montreal *Herald* reporter, Mr. Cassils, of Shaw, Cassils & Co., says: "Regarding prices, they have been very strong, and it would not surprise me to see a still further advance. It is safe to say that in the last year prices for wet salted hides in the leading markets have advanced at least 125 per cent., while dry hides have gone up 50 to 75 per cent. in the same period. No. 1 sole leather is selling in Montreal to-day at 22 to 23c.; No. 2 at 20 to 21c., and No. 3 at 18 to 19c. A year ago the first mentioned grade was only selling at 19c. and the second at 17c., making an advance of 4c. Slaughter sole is worth from 22c. to 26c., according to quality."

—That was a curious occurrence the other day when merchants in Canadian cities received notices to pass their British goods per Dominion steamer "Labrador" before they had received the invoices, which were sent by another vessel, the "Laurentian." One Toronto firm received notice on Monday, 6th, that their goods by the former steamer were in town—the invoices for those goods did not reach Toronto till the 8th, a most annoying delay. The cause of it is, we are told, mails are no longer sent by the steamers of the Dominion Line, which have given good service in respect of fast time. The "Labrador" arrived at Rimouski at 6 a.m. and at Quebec at 6 p.m. on Saturday, 4th. Her passengers reached Toronto Sunday morning, and if she had carried the mails, they would have been here at that time. But the "Laurentian" carried the mails, leaving Liverpool at the same time as the "Labrador," and did not arrive at Quebec until Monday afternoon, 6th inst., making her mails forty-eight hours later. This sort of anomaly must not be allowed to continue. No wonder that memorials to Government are being sent in by boards of trade.

—By reason of some injurious but unfounded reports set afloat in St. John's, Newfoundland a run upon the Canadian bank branches in that city was begun on Tuesday last. Up to noon on Wednesday, according to a despatch to the *Star*, the Bank of Montreal had paid out $40,000; the Merchants Bank of Halifax, $10,000; the Bank of Nova Scotia, $4,000. A run was begun on the Government Savings Bank also, which bank was supplied by the Bank of Montreal, which has plenty of coin. The general manager of the Bank of Montreal stated on Wednesday night that the doors of his branch in St. John were opened at nine a.m. to pay out gold to any one who presented bills for it, but that the scare was all over in two or three hours. At first, says Mr. Clouston, the people "even demanded the redemption of the Dominion Government notes; in fact it was an anti-Canadian movement altogether."

CLEARING-HOUSE RETURNS

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, May 9th, compared with those of the previous week:

Clearings.	May 9.	May 2.
Montreal	$12,060,006	$10,771,496
Toronto	6,310,145	5,451,359
Halifax	1,366,972	1,007,831
Winnipeg	1,018,212	778,907
Hamilton	677,277	550,701
Total	$21,462,612	$18,560,204

Aggregate balances this week, $3,100,867; last week, $3,087,054. The clearings this week are the largest for three months.

—The assistant cashier of a New York State savings bank, who is now serving a ten years' sentence for embezzlement, was married at the time of his incarceration, says *American Investments*. His handsome wife had quite an expectancy in the way of a comfortable fortune from a distant relative, which was known to a certain lawyer, who was himself married. Keeping his eye on the fortune, Mr. Lawyer first secured a divorce for himself, then one for the wife of the embezzler, and closed the transaction by marrying the handsome divorced woman himself, with the pot of money! And the abandoned, convicted cashier, powerlessly watched events from his dark dungeon cell. Talk about gratitude!

—Winnipeg gentlemen are promoting a new local fire insurance company. A sub-committee recommends that the charter of the Canadian Fire and Live Stock Insurance Company be acquired and stock books opened. The *Free Press* says it is announced that stock to the amount of $170,000 had already been subscribed. The stock books were opened a week ago, and nearly all the gentlemen present inscribed their names on the list. The promoters will invite merchants and others in Portage la Prairie and Brandon, and other provincial towns, to become stockholders. It is likely that Mr. R. T. Riley will be made managing director.

—Mr. H. D. Troop has written to the Fredericton Board of Trade about buying a fast steamer for the route on the St. John River between St. John and Fredericton, the trip up and down to be made in one day. The steamer is iron and originally cost $75,000, but it can now be had for $25,000. She is a side-wheeled steamer, with a saloon on the upper deck. The board has asked particulars, and when these are obtained a subscription list will be placed before the public and an attempt made to secure the necessary amount of stock.

—A week ago, the trusted employe of a large grain firm in Toronto, Alexander J. Wilkie, who had been arrested in Chicago, appeared before the police magistrate and pleaded guilty to a charge of embezzling $900. In fact he had been stealing money for a year or more, and had probably made away with thousands of dollars of his employers' money. He was sentenced to five years in Kingston penitentiary. Another instance, this, of the dangerous tendency to live beyond one's means and resort to speculation in the hope of repaying what was stolen.

—We hear of the purchase, by a prominent grain firm in this city, of a quantity of American red winter wheat, on which the Canadian duty of 15 cents per bushel has been paid, and the grain sold to a Canadian milling firm. This is the first case of the kind we have heard of for a long time. The purchase of American winter wheat arises from the scarcity of Canadian wheat of the same grade, the price of which has advanced to 85 or 86c. per bushel for No. 2. Manitoba wheat is neither so scarce nor relatively so high.

—The death of Hon. C. F. Fraser, and more recently the death of Mr. A. M. Smith, left two vacancies on the board of the Ontario Bank. These have been filled by the appointment to places on the board of D. Ullyot, of Peterboro', and Mr. R. D. Perry, of Toronto.

—The Board of Directors of the Standard Bank of Canada have appointed Mr. James Scott, of the Georgian Bay Lumber Company, a director of the bank to fill the vacancy on the board caused by the death of Dr Geo D Morton

---

—A branch of La Banque Nationale has been opened at Roberval, Que., which is on Lake St John and at the northern end of the Quebec and Lake St. John Railway

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the week was 3,684 shares.

Sales of Merchants Bank, 15 at 169, 169½; Commerce, 365 at 139⅜, 141; Imperial, 209 at 183, 186½; Dominion, 75 at 262, 263½; Hamilton, 136 at 160, 160½. Insurance—British America, 242 at 116⅜, 117; Western, 386 at 158½, 159½. Miscellaneous—Consumers' Gas, 44 at 199; Dominion Telegraph, 110 at 118, 200; C.P.R. stock, 285 at 50, 53; Toronto Incandescent Light, 209 at 112; Commercial Cable, 978 at 146, 149⅜; Bell Telephone, 78 at 154½, 155½; Toronto S. Ry., 325 at 74½, 75½; Canada Landed, 20 at 123; Can. Per. Loan, 10 at 156 (20 per cent.), 6 at 167; Farmers' Loan, 70 at 104, 104½; London and Canada Loan, 10 at 118⅜; London and Ontario, 62 at 112; Ontario Industrial Loan, 14 at 48; Tor. Sav. and Loan, 35 at 119.

RESOURCES OF THE SAVINGS BANKS OF RHODE ISLAND.

Of the total $71,364,527 resources held by the 35 savings banks of Rhode Island, on November 17, 1894, as shown by the recently issued annual report of State Auditor Albert C. Landers, $5,705,722 were represented by loans on real estate in western States (less a few thousand dollars in the East); $22,229,543 by loans on Rhode Island real estate; $10,447,878 by investments in city, town, village and county bonds, and $11,372,729 in railroad bonds.

The State law places no restriction on the locality in which the funds may be loaned on real estate mortgages, and that accounts for the liberal patronage of Western loans by Rhode Island savings institutions, as shown by the analytical table found on another page. A reference to that table will show that the investments cover all the western States, some southern ones, and a few in the east. It certainly shows a decided partiality for western loans in preference to eastern ones, whenever the limits of the home State have been crossed in the search for paying securities. Else why so small an amount as $166,714 in Massachusetts, while $1,215,419 was loaned in Minnesota; in New Jersey only $6,000 as against $429,407 in Nebraska, or only $183,365 in Connecticut, while Kansas received $764,443; Iowa, $535,105; Missouri, $239,026, and even far away Texas received $218,550.

The institution which holds the largest amount of western securities is the Mechanics' Savings Bank of Providence, with its $1,520,481 spread over thirteen States west of the Mississippi, two States bounded on the west by that river, and one southern State. . . .

About these annual reports of savings banks there is a lack of that complete data which permits a serviceable analysis of the value of the assets. All of the securities are, presumably, listed at their face value, and no information is given which shows what they originally cost the bank, nor what they are worth to-day. This criticism applies alike to bank and miscellaneous stocks, and to the seven or eight varieties of bonds. Among the railroad bonds are many hundred thousand dollars' worth that were issued by companies that are in the hands of receivers, and the value of whose securities is very much a matter of guess work at the best. Just one instance of this will suffice. One bank lists a batch of Seattle, Lake Shore and Eastern at 75,000, which, so far as we can see, means that the bank holds bonds of that par value, and lists them at the full amount. Turning to an insurance company's statement we find that the bonds of this railroad are deemed worth less than 50 cents on the dollar.

PRICES THEN AND NOW.

Nothing more effectually brings home to householders, says a daily contemporary, the difference between the cost of living at the present time and that which prevailed eighty years ago than a comparison of the actual prices of commodities. A generation is alive now which knows not the struggle which had to be endured in the days "when George the Third was King," not merely to obtain luxuries, but the very necessaries of life. Indeed, it is hardly too much to say that the very articles which were considered luxuries when the century was in its teens now find a place upon the table of the poorest. A London firm engaged in the wholesale grocery trade has issued a useful reprint of a circular issued by it in 1814, giving the quotations for commodities. From this we see the prices which retail shopkeepers paid for their goods at that period. It must be borne in mind that this was before the era of the steam engine; consequently a large sum had to be added to these prices for the cost of conveying produce by stage wagons from the wholesale dealer in London to the grocer in the provincial town, and, after that was done, the retailer had to put on his own profit. Comparing the wholesale prices current for the week ending December 17th, 1814, with those quoted by the same firm recently, some startling figures come out. Tea, which was then sold wholesale at from 6s. 1d. to 11s. per pound, is now sold, duty paid, at from 9½d. to 2s. 2d. Roasted coffee was quoted at from 1s. 10d. to 4s. per pound, whereas the current price is from 79s. to 136s. per cwt. Cocoa varied from 3s. to 5s. 6d. per pound, against 124s. to 146s. per cwt. For white pepper, which is now sold at from 3¾d. to 11d. per pound, 4s. 10d. was then received. Tapioca was listed at 13d. to 14d., against 1¼d. to 3d. at the present time.

Sugar, however, is one of the most remarkable indications of the change that has come over the prices of commodities. We find that the lowest price quoted in 1814 was 104s. per cwt., and that, too, for the brown qualities, so rough and common that the workman of to-day would not put it upon his table. But German granulated sugar is now quoted at as low as 11s. 10½d. per cwt. What with the abolition of the sugar duty, and the folly of foreigners who, through the bounty system, supply us with sugar at less than it costs them to produce it, the British consumer is to be envied. What, it may be asked, would the householder of 1814 have thought if sugar at the prices then ruling had been wasted as it is now? Those were times when lump sugar was an article absolutely unknown upon the table of nine out of every ten people. How could it be otherwise when the wholesale price was from 220s. to 240s. per cwt.? Dried fruits were also very high in price. New currants were quoted at 111s. per cwt.; the price now ruling is 12s. 9d. Rice, which is now sold at from 6s. to 32s., was then quoted at 80s. per cwt. These interesting comparisons cannot fail to make many unacquainted with the condition of the people at the opening of the century wonder how the poorer classes lived. At the time we speak of there was a war duty upon tea of £45 per cent., and the cost of everything was advanced by the scarcity and disturbance to trade produced by the hostilities between France and England. The next year witnessed the Battle of Waterloo; and the fall in prices commenced. Yet there are those who still sigh for the "good old times," and some have even longed for "a good war" to send up prices. It is almost a pity those who indulge in such foolish regrets could not experience the effects of their wish for a brief period, without at the same time condemning their neighbors to a like experience.—*Grocers' Review.*

—*L'Industrie Electrique* states that there are in France 328 central electric stations, in addition to those in Paris. Of these 151 are driven by water power, 39 by water and steam, 119 by steam alone, 5 by poor gas, and 14 by town's gas. The total horse-power is 39,420. Of these stations 260 supply continuous current, 73 alternate current, and three polyphase current. On January 1 of this year there were 84 stations under construction and 74 projected.

New Woollen and Tailors' Trimmings Firm.

JOHN MULDREW,
Late of the firm of McMASTER & CO., under the firm name of . . .

John Muldrew & Company

TORONTO

We expect to occupy our New Warehouse, 24 Front Street West, about 20th June.

Temporary Office:
Room 5, Merchants' Building, 50 Bay Street.

TORONTO, May 1st, 1895.

DEAR SIR,

Having been actively engaged in the woollen business in Canada for the past 25 years, I have decided on opening business on my own account, making a specialty of Woollens and Tailors' Trimmings.

As I have served in every branch of the woollen business from sewing on the bench, head salesman in the woollen and clothing department of the largest concern of the kind in the country, traveller for a large and exclusively woollen house, buyer and managing salesman for another large wholesale woollen firm, and for the past five years partner in the wholesale dry goods and woollen firm of McMaster & Co. in this city, I think I may fairly claim to know the business in its every detail.

I am associating with me in my business my son, Wm. H. Muldrew, who has had a long and careful training, both in retail and wholesale woollens, as salesman, traveller and buyer, and is acknowledged by the trade to be thoroughly in touch with both the producing and distributing markets. We therefore ask the confidence of the trade as a thoroughly equipped woollen firm, feeling that we know both the wants of the consumer and the best sources of supply.

From close observation we are convinced that the only way such an important line as woollens can be handled successfully is as a specialty, by experts who thoroughly understand the business, and devoting their whole time and attention to its vigorous prosecution and development.

For our Opening Season——FALL, 1895

We show an immense range of samples, all **new, fresh and up-to-date** goods, **not an old sample in our whole collection.** Many of the latest novelties made exclusively for ourselves, and every pattern and cloth selected with the greatest care as to its quality for the consumer and its profit producing value to the merchant.

Our particular Specialties for our Opening Season are

Domestic Woollens

(which we believe to be the best intrinsic value for the wearer made in the world)

In these goods we show some beautiful novelties in shades and effects in **SUITINGS** made expressly for ourselves, and representing extra late European ideas as to **SHADE, FABRIC** and **DESIGN.**

Also **TROUSERINGS**; a grand range of tasty patterns and **OVERCOATINGS** in the new shades in **CURLS, MELTONS** and **FRIEZES,** in endless variety.

Imported Worsteds

In **VENETIANS, TWILLS, WALES** and **FANCIES.** These goods have been selected by us with more than ordinary care from the very best makers in Europe. The range will be found large, and our values worth the attention of every close and critical buyer in Canada.

Tweed Dress Goods and Mantlings

The demand for these fabrics has deservedly grown to immense proportions, and will, we believe, be larger this season than ever; we are consequently showing a large and most attractive range which will appeal to every tasty buyer, both for designs and values.

In the hurry and pressure incident to getting into shape, it has been impossible for us to reply in the way we should have liked to the very many kind letters of encouragement which we have received from every part of the Dominion since it has become generally known that we proposed opening business on our own account. We now take this opportunity of thanking one and all for the many expressions of confidence which we have had in this way, and it will be our ambition to prove worthy of all the kind and encouraging words we have had.

Our travellers leave for their respective routes in a few days, and we ask every merchant interested in seeing a large range of carefully selected Woollens, **without an old pattern in the whole lot,** to look through our samples.

Yours faithfully,

John Muldrew & Company

AN "AIR" LINE.

Money must be easily obtained if there is any basis of fact for what the Montreal *Star* alleges, under the heading "Rumored Railway Deal," to be some of the various plans of the promoters of the Atlantic and Lake Superior Railway scheme. According to the rumor, these people are negotiating for the purchase of the Montreal and Sorel Railway as one of the links of the proposed line. It is also stated that the promoters of this scheme have put in a tender on behalf of some English capitalists for the proposed Franco-Canadian steamship line, for which the Dominion Government is offering a subsidy. They propose running from Paspebiac to ports in Southern France, and developing the fruit and wine trade with the Mediterranean ports. The exports from Paspebiac now are chiefly fish and lumber.

—The Danville Slate Company, of which Messrs. Boas and Greenshields are principal shareholders, have purchased for $150,000 the Jeffrey asbestos mines. The number of employes' will be increased, says the Quebec *Chronicle*, and it is also proposed to establish a factory of asbestos tissue. At Thetford asbestos mines there is unusual activity just now, and since the 15th March more than fifty families have swarmed into the place in search of employment. More mining is going on at present than has been the case for a couple of years past. The Bell Company is erecting a three storey building measuring 60 by 40 feet, in which three machines for breaking the ore will be installed.

—A company is being formed to manufacture oil and fish guano from dogfish at Quatsino Sound. The company will be known as the British Pacific Fertilizer Manufacturing Co., Ltd., with a capital of $50,000. It is stated that a good market has been found for the product.

—Following are the Inland Revenue collections for April, Windsor Division: Spirits, $18,977.38; malt, $2,803.50; tobacco, $289.88; cigars, ex-warehouse, $301.20; cigars, ex-fac., $319.92; petroleum, $14.97; other receipts, $110.14. Total, $22,816.81.

—It is expected that one of the new car ferries to ply across Lake Erie between Port Dover and Conneaut, Ohio, will be ready for use by the 15th of June.

BRITISH COLUMBIA FIRE UNDERWRITERS.

The third annual meeting of the Fire Underwriters' Association was held at Vancouver on Saturday, 20th April, when the following officers were elected for the ensuing year: President, C. E. Woods, New Westminster; vice-president, J. C. Maclure, Victoria; 2nd vice-president, J. W. McFarland, Vancouver, secretary-treasurer, C. R. Townley, New Westminster. Executive committee: New Westminster, Arthur Malins, F. J. Hart, and T. R. Pearson, Victoria, C. E. Dickenson, J. St Clair Blackett, and Richard Hall; Vancouver, H. T. Ceperley, J. J. Banfield, and S. O. Richards; Nanaimo, W. J. Leighton, Marcus Wolfe, and J. E. R. Tagart.

A special committee, consisting of the president, Mr. H. T. Ceperley, Marcus Wolfe, and J. C. Maclure, was appointed to memorialize the Provincial Government to have a statutory form of policy postponed till next session of the House. The meeting also resolved that the adjustment clause should be rescinded. Discussion took place regarding automatic sprinklers in connection with the saw mills, and the secretary was instructed to obtain further information.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

MONTREAL MARKETS.

MONTREAL, May 8th, 1895

ASHES.—The shipments by first outgoing transatlantic steamers have about absorbed supplies, and there is practically no stock here at the moment. We quote pots steady at $4 05 to 4.10; seconds, $3.80; pearls, $5.65 to 5.75; we hear of a purchase at former figure.

CEMENTS, FIREBRICKS, ETC.—Some new arrivals of cement are at hand, comprising 1,700 barrels of English, and 2,500 barrels Belgian. Sales of about 2,500 barrels in fair lots are reported to the west, and a steady local jobbing demand exists. We quote $1.90 to 2.00 for English, $1.80 to 1.90 for Belgian. Some new firebricks are also to hand, being a lot of 46,000; prices range from $16 to $21.

DAIRY PRODUCTS.—The first direct shipments of cheese were made by the first outgoing steamers to Liverpool the end of last week, and comprised about 9,000 boxes, principally old cheese. Advices from England are of rather a depressing character, and the market is slow and dull. The cable announces another decline of sixpence, and the market is from 8 to 10 shillings below May last year, so that 8c. would be a full quotation at the moment. Butter is declining: receipts are liberal, and the demand not active. We quote creamery 16 to 16½c.; Township dairy, 15c.; Morrisburg, 14c.; Western, 12½c. per lb. Eggs, 10 to 10½c. per dozen.

DRY GOODS.—The almost July weather of the past week has had a good effect on business, and sorting orders from the country, for summer goods, are more frequent. City retailers are not buying so freely as their country cousins, and do not seem wholly satisfied with their sales. Remittances, the wholesale men say, are better than in April. A buyer just home from Britain reports that business is greatly improved there, especially in the woolen line, and that now certain classes of goods are hard to get. The trade with the United States has been extremely brisk, the sales of Bradford goods alone for the month of February to American buyers being £350,000. French makers of cheap serges also report big business, in some cases single orders for 4,000 pieces, and some manufacturers have had to decline further orders. Silks are very firm and coming more into fashion, especially striped goods. Belfast linen men are also reported full of orders. The advance in domestic cotton sheeting noted last week is confirmed, and it is not improbable that an advance in other lines will shortly be established.

MONTREAL GRAIN STOCKS IN STORE.

	April 29, 95	May 6, 95
Wheat, bushels	360,578	224,856
Corn, "	6,173	7,554
Oats, "	177,603	157,879
Rye, "	4,533	4,860
Peas, "	130,249	116,270
Barley, "	171	
Total grain	679,307	511,419
Flour	23,154	22,699
Buckwheat	28,701	34,939

GROCERIES.—The all-absorbing feature of the moment is the sugar question. The increased duty of half a cent on both raws and refined is exciting much discussion, but in some quarters there is a disposition to believe that the matter has not been finally settled, and that further amendments are not improbable. Re-

finers claim that if the duty remains as at present fixed they cannot turn out yellow sugars at any profit, and it is understood pressure is being brought upon the Government to reconsider the question. In the meantime granulated at the refinery is quoted at 4c. per lb., being an advance of three-fourths of a cent; lowest grade yellows 3¼c., with very few to be had. Molasses is still being jobbed at 32½c. per gal. by the single puncheon. There is some scarcity of McDonald's tobaccos since the fire, and the numerous orders coming in for them can only be filled in part. The enquiry for teas is rather quiet at the moment. Japan letters just at hand say that the labor question will be an undoubted factor in prices, but the season has hardly opened sufficiently to closely estimate the situation.

Hides and Tallow.—There is no weakening in the hide market, but rather the contrary, dealers buying what few are offered at 7½ to 8c. per lb., and tanners are asked 9c. for cured. Calfskins are advanced to 8c. per lb. and lambskins to 15c. each. Tallow remains very dull, and 5c. per lb. bought a lot of extra this week.

Leather.—Sole leather is selling regularly in moderate lots, and has developed a further advance since last writing, 23c. being now asked for No. 1 B.A. in small lots, and 25c. for No. 1 slaughter. Upper is quiet but steady at late advances, and there is no surplus stock in any line. We quote:—Spanish sole B.A. No. 1, 22 to 23c.; do. No. 2 to B.A., 20 to 21c.; No. 1 ordinary Spanish, 20 to 21c.; No. 2, 19 to 20c.; No. 1 slaughter, 23 to 25c.; No. 2 do., 22 to 23c.; common, 19c.; American oak sole, 40 to 45c.; waxed upper, light and medium, 32 to 35c.; do. heavy, 27 to 31c.; grained, 32 to 35c.; Scotch grained, 32 to 35c.; western splits, 20 to 23c.; Quebec do., 17 to 20c.; juniors, 14 to 16c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 14c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 12½ to 15c.; extra heavy buff, 16c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c.

Metals and Hardware.—Domestic pig iron is quoted lower at $15.75 to $16.25 as to lot, though probably the inside figure would even be shaded for a good round order. In Scotch iron there are apparently no transactions, offers of Summerlee, to import, at $18.25 to $18.50 meeting no response. Glasgow advices report a better feeling, and anticipations of a more active trade. Warrants are cabled at 43/6d. Advices from the United States report an advance of $3 a ton in finished bars. Canada and tinplates are exactly as they were; a sale of 5,000 boxes of Canadas for Toronto is reported on p.t. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $20.50; Eglinton, $19; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $19.00; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $15.75 to 16.25; Ferrona, No. 1, $15.75 to 16.25; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25 according to finish; P.D. Crown, $3.75; do I.X., $4.50; Coke I. C., $2.60 to 2.85; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5½ to 5¾c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.75 to 1.80; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65; tank steel, $1.70; heads, seven-sixteenths and upwards, $2.00; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to 2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 10 to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25: American do., $4 to 4.25. Antimony 10 to 12c.

bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec provinces, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

Oils, Paints and Glass.—Immediately after writing last report linseed oil declined to 54 and 57c. per gallon for raw and boiled respectively, but it has since recovered a little, and at the moment is quoted at 55 and 58c. on a cable reporting a firmer market in England, and local stock being small. The "Austrian" brought out some new oil, but not enough to any way replenish stocks. Turpentine is easier at 47 to 48c. per gal. Castor oil is about ½ of a penny a lb. firmer in London. Glass unchanged; some new supplies are expected next week. We quote:—Turpentine 48c. per gallon for single barrels; two to four barrels, 47c. Linseed oil, raw, 55c. per gallon; boiled, 58c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6¾c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2. $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4¾c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2 50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.15 to 1.20 per 50 feet for first break; $1.25 to 1.30 for second break; third break, $2.80.

Wool.—Mill men seem rather diffident about buying at the moment, and only a quiet business is reported. The London sales began last week, and opened somewhat easy, but the competition has become more keen, and values seem firming up a little. A cargo of Cape wool is reported to be loading for this market. We quote, Cape, 13½ to 16c.; Australian, none here; B. A. scoured, 25 to 32c.; domestic fleece, 19 to 22c.; pulled supers, 20 to 21½c.; extra, 23 to 26c. per pound.

TORONTO MARKETS.

Toronto, May 9th, 1895.

Grain.—Wheat continues strong, and the market this week shows further advances. Quotations on the Toronto market stand as follows: Winter wheat, No. 1, 84 to 85c.; No. 2, 82 to 83c.; No. 3, 80 to 81c.; spring wheat, No. 1, 84 to 85c.; No. 2, 82 to 83c.; No. 3, 80 to 81c. Manitoba wheat has also advanced, and quotations, ranging from 85 to 90c., are three cents higher than they were a week ago. Ontario farmers are making scant deliveries now, and offerings must continue light until seed is finished. To-day's Chicago market quotes wheat at 63c. After a duty of 15c., and freight charges of 4 to 6c., according to mode of transit, had been paid, one would think that this wheat growing country of ours might import wheat at an advantage. Oats are firm and 1c. per bush. higher. There is improved trading in oats, and active enquiries from all sources of demand. Several fairly large transactions are reported on Eastern provinces account. Peas are firm and in good export demand, at 58 to 59c.; the market is 1c. per bush. higher than last week. Barley is seasonably slow. Corn and rye remain nominal.

THE VISIBLE SUPPLY.

	May 4, '95. Bush.	May 5, '94 Bush.
Wheat	62,196,000	64,158,000
Corn	9,354,000	10,359,000
Oats	5,816,000	2,659,000
Barley	402,000	352,000
Rye	127,000	226,000

The stocks of grain in store at Port Arthur on April 27th were 746,882 bushels. During the week there were received 49,196 bushels, and shipped 83,593 bushels, leaving in store on May 4th, 712,485.

Groceries.—The tariff changes announced last Friday have absorbed almost the trade's exclusive attention this week. In consequence of the ½c. advance made by refiners, jobbers

These prices are wholesale by the car-load.

have issued new price lists on sugar. Paris lump is quoted 5⅝ to 6c. and extra granulated 4¼c. per lb. Although these are the street's nominal quotations, we learn of several sales of granulated at 4¼c. These were made by houses fortunate enough to be carrying large stocks of granulated sugar. Yellows, however, were not in abundant supply and thus realize the full advance. We quote very bright 3¾c., bright yellow 3⅞c., medium bright 3½c., yellow 3⅜c., Demerara 3¼c. This means a general advance of ½ to ⅝c. per lb. The distributive tea trade is fairly satisfactory. The Japan market is reported as having opened higher. Flavory Ceylon Pekoes are in good demand. Dried fruits find only moderate request. Canned goods continue unchanged.

HARDWARE AND METALS.—If we are not mistaken, trade, during the last week, has fallen off a little. Most dealers throughout the country have purchased the bulk of their spring supplies, and it is but natural to look for less inquiry for garden tools and other articles of similar description. The call for green wire cloth screen doors, ice cream freezers and commodities suggestive of hot weather, is beginning to be heard. Oil and gas stoves are in demand. Trade in heavy hardware keeps up well, and there is good movement in wire nails, rope and hinges. Cut nails are rather slow so far as present movement is concerned. Metals are generally active both by way of shipment from stock and import order. Galvanized iron and block iron are perhaps in best request. The tin plate trade is not so good; roofing is brisk on country account. The city building trade remains dull and lifeless. Barb wire is going out slowly. Orders for annealed and galvanized wire are satisfactory. Prices remain unchanged at last week's quotations.

HIDES AND SKINS.—There is no change in hides. While the market is strong the protests of tanners have been sufficiently strong to prevent further advances. Although the influence of the tanning industry has not been sufficient to bring about a reduction, the future depends upon Chicago. The *Review* of the 4th inst. says: "Light packer cow hides suitable for upper leather sold at 4c. last May. This week a block of them sold at 9½c. Branded cow hides for conversion into union sole have bounded from 4c. last June to 8¾c. Heavy native steers suitable for harness leather sold for 5c. in June, 1894. To-day the price for heavy steers is 10½c. These examples could be multipled. As illustrating prevailing conditions we note that a prominent English tanner was here to buy twenty cars of rough splits, which he wanted to finish for the English market. He returned home without a single car. The boom may be ill-advised, illogical and absurd, as some of the shoe manufacturers say, but it is here, and the strength and far-reaching consequences of it are becoming more pronounced every day." Sheepskins are offering slowly on the Toronto market. A few pelts are coming in, for which 15c. is paid, while the few lambskins that offer bring 20c.

LEATHER.—The market is firm. The movement, however, is not free, tanners and manufacturers both being willing to stand and await events. Tanners say that they can afford to carry until buyers are compelled to enter the market to secure stock for the fall. In the meantime manufacturers are cutting up all the stock they have on hand. *Hides and Leather*, May 5th, reports: "Conservative tanners of upper leather are seeking to help their friends the shoe manufacturers to keep the cost of leather from going to an extreme point. Some of the kangaroo calf manufacturers are paying more attention to goatskins, rather than follow the booming price lists for calf. Sheepskin tanners, expecting their stock to rise in sympathy with other leathers, are somewhat shy towards buyers, feeling satisfied that their product is good property to hold. While no one talks about any weakening of leather prices, there is a general feeling that it will be better for all concerned if some restriction were placed on the buoyant tendency, as manufacturers of leather goods are badly puzzled and perplexed by the conditions confronting them. Harness leather tanners are feeling much encouraged by the increased consumptive demand for their stock."

PROVISIONS.—Depression continues to rule in butter. Old butter is offering here at 5c., while fresh arrivals of large rolls bring but 10 to 12c. We are told that in Stratford recently sales of fresh pound rolls were made at 8c. If this may be taken as representative of other country markets, the low water mark must certainly have been reached. Cheese is quiet and steady, with jobbing sales at 9 to 9½c. per lb. In hog products there is continued firm feeling; prices remain quotably unaltered, while the demand is fully up to the season's average. Eggs are steady at 10 to 10½c. Dried and evaporated apples are dull and in poor request.

WOOL.—Trade in fleece is between seasons, and little or nothing is being done. Elsewhere we refer at length to the situation. There has been no change in the quotations of pulled wools. Stocks are light and trade rather quiet. The mills are not unusually active, and some report difficulties with labor.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

DIGBY'S FISH INDUSTRIES.

Digby, N.S., is a bright little town, whose one boast—although she may boast of landscape—is her fishing industries. The *Courier* gives a sketch of the fish-curing and packing firms of the town in a recent issue. Mr. Boutilier, of Boutilier & Morehouse, Centreville, said, the other day, that the catches and prices (of fish) of late have been hardly as good as last year. His firm, however, shipped 5,000 cases cured haddies [haddocks] this past season, from October 1st to the end of January. They are also this year making a specialty of boneless fish, shipping 1,000 cases. This is a part of the trade they have not tried before, but having equipped their new factory with the required machinery, intend to increase their output by such manufacture. Boutilier & Morehouse are the leading canners of haddies. In 1893 they put up 1,500 cases, last year 1,100, and purpose 1,200 this year. The cans are packed four dozen in a case and shipped principally to the upper provinces. The firm have canned these goods for six years and have brought the art to a high efficiency, their goods being known in all the markets as first-class.

The canning of haddies was tried ten years ago by Mr. G. A. Viets as an experiment. The first attempt failed, but later efforts perfected the method, and it is now a valuable and profitable part of the industry. Boutilier & Morehouse employ 25 men in their factory, and their fleet consists of 25 large boats and 10 smaller. They intend building another factory this summer, which, with their present well-equipped premises, will give them an excellent stand.

D. & O. Sproul, said, in speaking of the present low prices:

"We look entirely to the upper provinces for markets for our haddies and always sell before we ship. But in different parts of the province there are parties who are starting in the business at all times, lasting often only a season or two, then closing up for want of experience or resources. While in being, these sell on commission and thus they greatly affect the market for the selling shipper. We and other shipping firms have nowadays to contend with this influence."

"What were your shipments last year?"

"We shipped 5,000 cases of [cured] haddies and 3,000 drums of dry hake and haddock, and 2,000 quintals of cod. The hake and haddock went to Cuba."

This firm will have about 60 men employed in the lobster fishery which has now commenced. They will have about 4,000 traps set along the shore. They shipped 2,200 cases live lobsters to Boston last year, and will probably have more this season as their preparations are very complete for a good fishing season.

The past season with the firm of Syda & Cousins has been a very good one. The catches, on the whole, of haddock were about the same as the year before, and they had their factory capacities taxed to keep up with the fish brought in. They shipped between five and six thousand cases of haddies. In partnership with D. & O. Sproul in the Digby Canning Co., they canned 350 cases of lobsters, or 16,800 cans, representing about 100,000 small lobsters. These went chiefly to Boston.

"How is the 'Digby chicken' trade? Fallen off, hasn't it?"

"Yes, very much in late years. Ten years ago it was a very important part of the fisheries, but of late the herring seem to have left us altogether and gone out further in the bay." The reason Mr. Syda thought was in part the steamboat traffic on the basin. The steamers' ashes work havoc in the herring shoals. A little is still done, he said, however, along the southern shores of the basin in the chicken catch.

LAKE SHORE RAILROAD.

The twenty-fifth annual report of the Lake Shore & Michigan Southern Railway Company for the year ending Dec. 31, 1894, has just been issued. Perhaps the most remarkable feature in the report—remarkable because of the fact it is without parallel—is that although since 1871, for a period of twenty-three years, notwithstanding the capital stock of the company has remained the same, its mileage has increased nearly fifty per cent., while its construction and equipment account stands as reported in 1883, nothing having been added. By dint of good management and rigid economy the road was enabled to put a small balance (less than one thousand dollars) to the credit of income account after payment of interest and six per cent. dividend, a creditable showing, circumstances being considered. The report contains many statistical tables detailing the operation for the twenty-five years, all of which are interesting, as showing the course of railway traffic during that time. Within that period the ton-miles have increased four hundred per cent., but the earnings have increased only fifty per cent. The receipts per ton-mile have fallen from one and one-half cents to less than six mills, but it has been possible to reduce the cost per ton-mile only from .932 to .406. It is particularly interesting to note that the profit per ton-mile in 1870 (.572) is exactly the same as the gross receipts per ton-mile in 1894.

The same general result also applies to passenger traffic. In 1870 the road carried 2,065,440 passengers for $4,192,960, while in 1894 it carried 4,542,924 passengers for $4,420,642. Another feature brought out by the report is, that notwithstanding the steady decrease in haulage capacity of both locomotives and cars, the freight train earnings per mile have steadily decreased from two dollars and three cents in 1870 to one dollar and fifty-six cents in 1894, the passenger business showing a like result. Perhaps the most surprising fact revealed by the report is, that the average rate per ton-mile on west-bound business is but little more than that on east-bound business. When it is remembered, however, that the coal and coke business of the road constitutes its largest tonnage, this is readily accounted for, although the publication of the figures will serve to correct a very general misunderstanding in this regard. Altogether the report is a very valuable one and reflects great credit upon the management of the road.

A FRENCH SUBSTITUTE FOR FIRE BRICK.

The following is from a French correspondent of the London *Colliery Guardian*: On account of the difficulty of obtaining fire bricks of uniform quality, except from Great Britain, M. Bebois-Reuleaux has devoted considerable attention to finding a substitute at lower cost. After many experiments he has succeeded in obtaining an infusible product containing from 95 per cent. to 98 per cent. of pure silica, which, mixed with another product, is said to insure perfect homogeneity, and at the same time absolute infusibility. The raw materials which are found abundantly in several of the French departments, are so cheap that the bricks may be produced at half the cost of English for an equal quality. Some of these bricks tried in a blast furnace, at the hottest place, are reported by the manager to have stood thoroughly; and in the bridge of a puddling furnace, where only English bricks can withstand the heat, the new bricks were found quite satisfactory, as also in the bridge of a heating furnace worked for 13 hours continuously. At some steelworks, moreover, a half brick of the new manufacture was exposed during a whole day in a Siemen-Martin furnace, and was taken out without having undergone any change, and with the corners still sharp.

MINING IN BRITISH COLUMBIA.

While the mineral resources of South Africa, Western Australia and India are receiving constant attention, it is surprising that the mining development of British Columbia should be left entirely to the Americans. The letter from our Victoria correspondent which we publish in another column calls special attention to the outlook for investors in mines in that part of the world. Our correspondent, we have reason to know, is neither directly nor indirectly interested in mines, and we should have a very strong objection to booming one particular set of mines above all others. What he has written is, we believe, the result of strong convictions and careful study of the conditions existing in his province. It seems scarcely possible to convince outsiders, and particularly the average British investor, of the extent and richness of the minerals of British Columbia in gold and silver. In the district of Kootenay their occurrence in great bodies widely distributed is remarkable. The Silver King properties were syndicated in England, and stocked at $1,500,000. The report of the expert upon which the mine was negotiated is available, and from this it appears that the ore in sight will pay for the mine and leave a surplus of several times its cost. This is the only property in which British capital is largely interested, and it is only one of the great properties that are being developed. The rest are in the hands of Americans, who practically control the mining industry in the southern part of the province, and everything imported, men and machinery, is American.

The Slocan Star, for a sixteenth share in which $100,000 was refused, has a tunnel of several hundred yards working in solid ore. This is perhaps the most remarkable property being developed, but the richness of the ore is not less noteworthy, averaging $100 a ton at the smelter. Picked ores run much higher. There is certainly every reason to believe that this will be the next great mining country. So much is thought of the prospect that three different lines of railway have been built into the mining districts of Kootenay, which depend solely upon the ore to come out for their earnings, and several more have been projected. Our correspondent remarks: "I would like to see the mines in the trade more largely in the hands of our own people, and I am strongly of the opinion that if a commercial and development syndicate were organized in London, and sent out several competent representatives to inspect the country thoroughly, and report upon it as a field for investment, and, secondly, as an opening for trade in British goods, it would open the eyes of your people to their opportunities. The ownership and operation of mines, smelters and tramways in British hands would command the trade in supplies."—*British Trade Journal.*

HIGH PRAISE FOR AMERICAN MACHINERY.

Mr. Hiram Maxim, the well-known inventor and engineer, whose experience in England and other countries has made him in every way a competent critic, writes as follows concerning American machinery:

"When the German Government decided to make rifles on the American interchangeable plan, they purchased from the Pratt & Whitney Company, Hartford, Conn., about $1,500,000 worth of American tools. These were brought to Germany, and a manufacturer in Berlin, seeing the great advantage of the American tools, established a factory and commenced to build them on a large scale. To-day this manufacturer has not only practically driven English tools from the market on the continent, but he is also sending tools to England and selling them at prices considerably below English tools. . . . When I had to equip some very large factories, I found it much to the advantage of my company to purchase the greater part of the tools from American makers.

"German tool makers have profited very largely by the introduction of American tools. Only a very few such tools, as, for instance, milling machines, etc., are imitated in England, but the Germans imitate every mortal thing of any value made in the States, and their work is only slightly inferior to that of Americans. I have purchased and compared genuine American tools with German imitations, and have found that the castings of the former are sounder and stronger, and that the deviation from truth, though very small in the German tools, is three or four times as great as in well-made American machines."—*Iron Trade Review.*

WHAT HAS BECOME OF THE LAW OF AVERAGE.

The editor of *Insurance* broke his leg (he will excuse us for mentioning this matter again, but it is necessary to the present purpose); Ashley, of the *Advocate*, had his foot burned by a falling lamp; the editor and publisher of the *Insurance Post* has been seriously ill in Boston; "Col." Geldert, of the *Insurance Herald*, was painfully bruised in a runaway accident; Patriarch Hine is laid up by an injury to his foot caused by a swinging door; Nat Freeman, of the *Record*, had an attack of pneumonia and narrowly escaped dying; Livingston, of the *Blue and Gold*, nearly choked to death while telling an unusually big "whopper"—all of these calamities have recently overtaken members of the insurance press. What has become of the law of average, that so many misfortunes should have suddenly fallen upon insurance newspaperdom?—*The Chronicle.*

CANADA LIFE ASSURANCE CO.

Sun Life
Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

J. AUSTIN (Founder Dominion Bank), **President.**
Hon. Justice Maclennan. James Scott, Merchant.

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses and contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

DECISIONS IN COMMERCIAL LAW.

DE LAPP v. CHARLEBOIS.—This is an action brought by the plaintiffs to set aside a judgment recovered by the defendant against the Great North-West Central Railway Company, on the ground that it was obtained by fraud, and to establish a lien upon certain lands, and for other relief. The Chancellor who tried the case decided in favor of the plaintiffs except as to the lien claimed by the De Lapp and Mansfield. The Court of Appeal being equally divided upon an appeal from the Chancellor's judgment, the appeal was dismissed.

NEELON v. THE CITY OF TORONTO.—This was an action brought against the corporation of the city of Toronto and E. Lennox, an architect, to restrain them from interfering with, or preventing, the plaintiff from carrying on the works under his contract with the corporation, for the erection of a new court house at Toronto, and to compel the defendants to deliver up possession of the works and premises, and for a declaration that the plaintiff is entitled to use, in the erection of the building, the New Brunswick brown stone delivered upon the ground, and for other relief. The trial judge refused the relief asked, on the ground that under the contract the architect had power to dismiss the plaintiff without the consent of the court house committee of the council. The plaintiff, before the Court of Appeal, contended that the architect was disqualified by bias against him from acting as judge or arbitrator under the contract. The Court of Appeal dismissed the appeal, with costs.

TORONTO STREET RAILWAY CO. v. GRINSTED.—In this case, a passenger, wrongfully ejected from a street railway car, was obliged to stand about for some time before he could get another car, and in consequence caught cold before he could get home. He sued the company for damages, for illness resulting from such cold. The company contended that the damages were too remote to give the plaintiff a right of action against them, but the Supreme Court of Canada held that they were not, and affirmed the verdict in favor of the plaintiff.

CANADA PACIFIC RAILWAY COMPANY v. TOWNSHIP OF CHATHAM.—The railway company built a culvert through an embankment of their railway under a contract between themselves and the municipality of the township of Chatham, made under their respective corporate seals, whereby it was agreed that the railway were to build, and the defendants to pay for, the culvert through the embankment. Before the work was commenced the municipality paid $2,000, part of the contract price. The culvert was built and was accepted, and used by the municipality, who refused to make further payment for it on the ground that the agreement was *ultra vires* No by-law had been passed authorizing the construction, nor were any of the provisions of the Municipal Act with respect to drainage works, such as the examination by the council's engineer, the preparation of plans and estimates, and the issuing of debentures, complied with. The Court of Appeal agreed with the court below in holding that the agreement was invalid, and not enforcible against the municipality.

CANADA BANK NOTE COMPANY v. BANK OF HAMILTON.—This was an action to recover the price of 60,000 forms manufactured for and delivered to the defendants. The defendants received half the goods with full notice and knowledge of the price to be charged for them, refused to accept the remainder, but only used a few of those they had actually received. The Court of Appeal held that the defendants had not elected to keep the goods at the plaintiff's price, that the goods were still the goods of the plaintiff, that the actual use of a part was not the conversion of the whole, and therefore the defendants were bound to pay only for such part as they had actually used, and to return such part as they had not used.

TRENTON v. DYER.—This is an action brought against the collector of taxes for negligence in not collecting the rates. The collector set up that he had not received a roll certified by the clerk under section 120 of the Assessment Act, which provides that "the clerk shall deliver the roll certified under his hand to the collector on or before the first of October, or such other day as may be prescribed by law of the local municipality," and that therefore he (the collector) was not responsible for not collecting. The municipality contended that the delivery of the roll by the clerk is directory, not imperative, but the Supreme Court of Canada thought that it was imperative, and relieved the collector from liability for the alleged negligence

TORONTO RAILWAY COMPANY v. THE CITY OF TORONTO.—The Supreme Court of Canada has affirmed the judgment of the Court of Appeal of Ontario, which, in turn, affirmed a judgment of the trial judge, to the effect that where a railway company accumulates ice and snow on the sides of the street by throwing it from the railway tracks, although part of it may have come from the sidewalks, that the railway company is liable for damages recovered for injuries caused by such accumulation.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

A DEMAND of assignment has been made upon the Montreal tailoring firm of Geo. Brown & Co. Mr. Brown was formerly of the firm of G. Brown & Sons, who failed in 1893.

So greatly is the business of the Kootenay district growing that the Government has determined, it seems, to make Nelson, B.C., an independent port of customs.

THE *Trade Bulletin* understands that Mr. Robert Allen, formerly with Messrs. Stewart Munn & Co., of Montreal, has commenced business on his own account under the firm name and style of Robert Allen & Co., in the Newfoundland trade.

THE liabilities of J. B. Rose & Co., metal merchants, Montreal, whose failure was noted in our last issue, are placed at $43,207, with estimated assets of about $17,000. Some $40,000 of the indebtedness is to the London banking house of Morton, Rose & Co.

THE firm of Boucher & Langstaff, doing business in general merchandise at Rainy River P.O. between Rainy Lake and Lake of the Woods, and at Emo River, Ont., have taken into partnership W. J. Holmes, late of Carp, Ont., and have opened a branch store at Big Forks, in the same district. The firm is to be styled Boucher, Langstaff & Holmes, and their head office is at Rainy River P.O., Ont.

THE NEW BUTTER BOX

This is the latest style of putting up 1 lb. prints. The board is specially treated both inside and out, so as to make it both grease and water proof. By this means the waxed wrapping paper hitherto so generally used is entirely dispensed with, as also are those wooden butter dishes and other such like unsightly contrivances. This box is by far the best and most stylish package for butter that has ever been put on the market. It is also very cheap. If you are interested write for samples and prices to the manufacturers.

Mercantile Summary.

C. S. MERRICK, of Carleton Place, Ont., who has operated quite largely in grain and produce for the past twelve years or so, is reported to be seriously embarrassed. This is understood to be the result of unfortunate real estate speculations in Toronto, in which he indulged several years ago.

A DISSOLUTION of the wholesale dry goods firm of Thouret, Fitzgibbon & Co, Montreal, is announced. Owing to ill-health, Mr. Thouret is compelled to retire, and the business will be continued by the remaining partners, under the style of Fitzgibbon, Schafheitlin & Co., Mr. Schafheitlin residing in Berlin, Germany, as heretofore.

THE Dominion Suspender Company of Niagara Falls have established salesrooms at Elizabethport, South Africa, in charge of E. E. Carter, formerly of Simcoe, Ont. And also on the English brace-makers' own ground, 66 and 67 Milton st. London, E.C, in charge of F. Edward Harrison. Mr. Harrison has charge of the West India trade also, with headquarters at Kingston, Jamaica. It appears to be the case that this company has obtained by keen competition and well-made goods, control of the home market, and we can quite believe that in the near future their export trade will be considerable.

CANADA PAPER CO.

TORONTO and MONTREAL.

Mercantile Summary.

A STEAMER has been building for some months, says the Kootenay *Mail*, which is to run on Shuswap Lake, the South and North Thompson, bringing down ore from the Homestake mine to Kamloops. She is 90 feet long, 18 feet wide, and has machinery from Peterboro, Ont.

A PERMIT has been granted the Toronto Radiator Company for the erection of a two-storey brick addition to their factory on Queen street west, Toronto, to cost $5,000. Their business, it appears, has quite outgrown the capacity of their present premises.

ACCORDING to the Winnipeg *Free Press*, Mr. H. W. McNeill, of the McNeill Company, says that company intends to send a car of Canmbre coal to the coking ovens at New Glasgow, N.S., to be tested for coking purposes, and, if successful, they would establish a number of coking ovens at Canmore, N.W.T.

SIX gentlemen, residents of Richmond, Coaticooke and Melbourne, Que, have received letters patent for the manufacture of wooden wares, and to buy and acquire the land and effects of the Richmond Water Power and Manufacturing Company (limited). It is to be called "The Richmond Industrial Company"; capital, $100,000.

Mercantile Summary.

GRANBY, Que., is still progressing Buildings are being put up rapidly to shelter the increasing population

E. STONE, carriagemaker, in Waterloo, Que., is putting a 30-horse power steam engine into his factory.

IT is stated that the Lake of the Woods Milling Company has contracted for the supply of lumber to build ten new elevators. That company's contract with one lumber concern amounts to 1,500,000 feet.

SOME notion of the hotel industry in Switzerland may be formed by the fact that in 1894 there were 1,393 hotels in the country, containing 79,255 beds. They received 7,779,325 guests The hotel charges were from 8s. 2½d. to 17s. 6d. per day. The total annual receipts were £3,890,000. The taxes amounted to £76,800, and the advertising cost £55,840.

THE result of his experiment to Moise Duquay, a blacksmith of Gentilly, Que., who went into store-keeping three or four years ago, has been an assignment, with liabilities of about $3,000. Inexperience and a lack of sobriety contributed to his failure - Beaudry & Frere, in business a short time at Longueuil as manufacturers of sashes and doors, have been asked to assign.

THE Rat Portage *Record* says that the district will have a capacity of crushing 80 tons ore per day, when the machinery now in course of erection for reducing gold ore is all in place. "The capacity at the Sultana mine now is twenty-five tons, and at the Regina mine will be thirty-five tons. With the machinery coming in for the Regina mine, are two Tremain stamp mills for Mr. Torrance, for the Rossland district, each having a capacity of ten per day."

AN Ottawa grocer, M. S. Beaudry, wants his creditors to accept 15c. on the dollar, their claims amounting to about $1,000 - Wm Ashe, contractor, of the same city, before reported embarrassed, has now assigned.——An extension of four, eight and twelve months is being arranged by F. X. Simard, general merchant, of Ste. Anne de la Pocatiere, Que., an old established trader of some importance in his locality. He owes merchandise liabilities of only $4,400, and has a mortgage indebtedness of $2,600, but has become overloaded with goods, having a stock of some $14,000, and in all shows an apparent surplus of about $20,000

H. C. WALKER & Co., doing a clothing and men's furnishing business at Dartmouth, N.S., has assigned to W.'s father, who held a bill of sale on the stock.

THE steamer "Duart Castle" arrived at St. John last Saturday afternoon from the West Indies. She had on board 600 tons of cargo for St. John and 1,100 tons for Halifax.

THE announcement is made by one familiar with the affairs of the General Electric Company, that the efforts to combine with the Westinghouse Company have been abandoned.

MR. CHAS. CARNEY, formerly in Lemont & Son's upholstering department, has rented a factory at St. Mary's, N.B., to make wire-spring beds, bed-room suites and a general line of furniture.

WORD comes from Halifax that an amalgamation of steamship companies is in progress to conduct business between Halifax, Liverpool and London. The deal results from the recent action of the Furness Company in establishing an agency in Halifax.

LARUE & POULIOT, a young firm of Montreal tailors, have called a meeting of their creditors, and propose making an offer at 25 cents on the dollar. They owe about $2,600, and have apparent assets of nearly $1,600.

THE following stocks were sold at Suckling & Company's warerooms in Toronto on Wednesday: Kent & Company, Orangeville, general dry goods, $7,000, at 33c., to J. G. Strong; Robert Shields, Phelpston, general store, $4,000, at 48c., to H. A. Sydre; Thos. Dunnet & Company, Toronto, hats and caps, $2,000, at 67c., to P. Jamieson.

REPLYING to a question in the House of Commons, Mr. Ives said the contract with Messrs. Pickford & Black for running steamers from Halifax and St. John to the West Indies had been modified, and gave particulars of the new contract, which is for five years, and provides for a subsidy of $15,000 or $35,000 per year, according to the service provided.

MR. W. D. MCLAREN, sr., of the Cook's Friend Baking Powder Co., who is suffering from injuries received by being knocked down by a bicyle on Dorchester street, Montreal, recently, is in a precarious condition, concussion of the brain resulting. In consequence of his accident, and another one occurring on the same day to a lady, the Montreal city council are considering the regulation of bicycle traffic on the streets.

THE business men in Florence are considering the advisability of bonusing the telegraph company to extend a line from Bothwell there.

THE Canadian Pacific Hotel, at Banff Springs, in the Rocky Mountains, opens this week. Mr. Matthews, the manager of the house, accompanied by over thirty waiters, chambermaids, etc., left Montreal on Saturday last for Banff.

A MEETING of the executive committee of the Metal and Hardware Association of Montreal was held the other day, when the selling of goods on a uniform scale was discussed, and a uniform three months' credit basis was favored in place of the present system, which allows a firm to give any term it pleases. A general meeting of the trade is to take place on the first week in June.

Assignments in the western provinces of the Dominion have not been numerous during the week.——J. R. C. Jones, barber at Vancouver, has been sold out by the sheriff.——Ewen Morrison, Victoria, allowed a chattel mortgage to be placed on his lumber possessions last January, and now he has been sold out.——At the same place, Louis Rubinovetz, fruits, etc., has assigned.——And at Nanaimo the bailiff has taken possession of the nursery stock of Geo. Holmes.

A GENTLEMAN acting for Montreal wholesale drug houses, at whose suit executions were issued upon which the sheriff closed the drug store of Mr. Alonzo Staples, obtained a judge's order restraining Mr. Staples from assigning or disposing of his stock in trade. Mr. S. intended to assign for the benefit of creditors to the sheriff, under the Assignment Act recently passed, intending all creditors would share equally and alike.

IN this city the largest failure is that of Davies Bros., furniture dealers. This business was begun about eight or nine years ago by S. J. Davies, who is the sole owner. For a while he had a good trade. His present trouble has been brought about through trying to carry on a large business with a small capital. It is said that had he assigned two or three years ago it would have been better for all concerned. As it is now his assets are about $18,000, and liabilities a good deal larger.——W. Allworth has conducted a small grocery business for five or six years and has now assigned.——Nobody need expect much of a dividend from the assets of Grainger & Co., commission merchants, who have assigned.

ANTHONY C. CHEBOT used to be a farmer He sold his farm, went to Meaford and bought a hotel, which he sold shortly afterward. Then he removed to Port Elgin and bought another hotel, which was about "on its last legs." He did not prove the man to "set it up" again, for now we hear of his assignment.——A couple of years ago H. R. Angus commenced dealing in crockery, etc., in Hamilton. He had a cash capital of $2,000, half of which, however, was borrowed. Of late he has failed to meet his obligations, and upon being sued he has assigned.

T. J. CRONIN, a retail and jobbing liquor dealer of St. John, N.B., generally supposed to be in good shape, has stopped payment, and at a meeting of creditors held on the 10th inst., it was agreed to grant him an extension of 3, 6, 9 and 12 months, without interest or security. The liabilities are $7,677, with business assets of $10,300, not including furniture, fixtures, etc., and an equity in a piece of property.——At Elgin, in the same province, C. & S Goggin, a general store firm of some prominence, also doing something in lumber, are offering creditors 33⅓ cents in the dollar; liabilities are about $16,000.

IT is mentioned with approval by the Brantford *Courier* that the authorities of the Standard Bank have purchased a number of bicycles for the use of their clerks. In this way the employes can get the advantage of syndicate cash prices, and get as much time as required to pay for the articles, having a certain amount kept back from their regular pay. We know of several Toronto corporations, not banks, which have made arrangements of a like kind to enable their employes to procure "bikes," which are now-a-days considered necessaries of life for young men—and for men no longer young. Apparently the wheel has come among us to stay.

AN exchange writer recommends the following for removing scratches from plate glass and polishing the surface: Procure some of the finest emery, put it in a pitcher of water, stir briskly, and pour off, after a few seconds, into another pitcher. Allow the contents of the second to settle, which will take some hours, then run through filtering paper after removing the bulk of the water. The precipitate is a powder which will remove the scratches if applied with the finger, a piece of good cork or felt. The glass will be left cloudy, but a polish can be brought up by a paste of jewelers'

rouge and water rubbed on with the finger, a cork or felt. If very fine results are required, the rouge should be washed like the emery and the impalpable powder used.

THOMAS KERR, Fergus, was a tinsmith by trade. About three years ago he succeeded the shoe business of his father, but from a lack of experience, and what is worse, his inattention to business, he has assigned. Liabilities and assets are both small, fortunately.——Not much longer than a year ago, Campbell & Hutchinson succeeded to the business of M. Campbell, at Harwich. They had a capital of $600. The business has not increased. They have been unable to meet maturing obligations and have assigned.——An offer to compromise at 55 cents on the dollar has been made by W. T. Bunt, sr., general storekeeper at Parkhill. His liabilities and assets are each estimated at about $3,300. We understand all creditors have agreed to accept his offer.

THE list of failures in Canada for the week is not long, nor is the amount of money lost by creditors very large.——At Ayr the Watson Manufacturing Co. has been making agricultural implements for a number of years. The concern was formed into a company in 1892, and the capital stock was placed at $250,000. The same year an extension of time was obtained from creditors for three years, and it looks as if, now that the three years are up, little progress had been made towards accumulating enough money to meet their obligations. The company claims that the trouble arises through poor success in making collections throughout the North-West, where their machines are largely placed. Hugh McCulloch, sr., has been appointed liquidator. The chances are that it will be some time before a dividend is paid.——Another agricultural implement company has gone into liquidation, that of the Mercer Manufacturing Co., Alliston. This concern has been run under different names at different periods, but has never been a success. Robt. Jenkins, this city, is liquidator.

AMONG recent country failures in the Province of Quebec are the following: A. Lemieux, general dealer, L'Islet, whose affairs have been on the down grade for several years past, has assigned after making an offer of compromise, at the rate of 50c. on the dollar. He obtained an extension some little time back. His merchandise liabilities are $2,150, but there is also a mortgage indebtedness.——Joseph Taillefer, a blacksmith at Pont Viau, has compromised his little debts at 30c. on the dollar.——A. Fauvelle, of Rigaud, who has been keeping a small store and peddling through the country, has assigned. A want of education, and too much liberality in the matter of credits, are assigned as the cause of his troubles.——Isaie Domphousse, of Maskinonge, formerly a butcher, but of late years doing business as a bottler, has abandoned his estate. He owes $1,873.——J. Lamoureux, a hay dealer of St. Sebastien, who was a heavy loser by the failure of Marsan & Brosseau, Montreal, last year, has been asked to assign.——A. Daoust, jr., of St. Timothe, for two years a general dealer, and previously in the shoe and harness line, has been served with a demand in insolvency.——B. Neron, general store at St. Jerome, in the Saguenay district, has assigned to the Prothonotary, and a meeting of creditors is called for the 25th instant at the court house, Chicoutimi. The liabilities are $6,785; assets apparent, $4,440.——J. A. M. Davignon, for the past four years a general storekeeper at Farnham, and previously at Frelighsburg, has been requested to assign. A recent suit, entered by a leading creditor for $800, probably led to this action

—In the United States the fiscal year is winding up with a deficit of $50,000,000 and in France with a deficit of 33,000,000 francs, Britain of $569,000. Canada has company.—*Ex.*

—The North Sea and Baltic Canal will be entirely lighted by electricity. Groups of twenty-five incandescent lamps will be installed along each bank at intervals of 250 metres, making in all about 25,000 lamps. Besides this, each lock will be lighted by twelve arc lamps, and there will be electric lamps for the signals.

Debentures.

Municipal, Government and Railway Bonds bought and sold.

Can always supply bonds suitable for deposit with Dominion Government.

THE SITUATION.

New South Wales has resolved to adopt a policy of Free Trade, as it is understood and practiced in England. At the end of a year, during which the present tariff is to remain in force, the only customs duties will be those on wine, spirits, beer, tobacco and opium. Such, at least, is the policy foreshadowed by the Government, and as the legislature was elected to carry out the principle of Free Trade, there is every reason to believe that the measure will be carried. For the balance of the revenue necessary, over and above what the Customs duties on five articles will produce, resort will be had to direct taxation, land being taxed a penny in the £ and income 6d. In this simple way, the Government estimates that there will be a surplus revenue of £56,184. The revenue required must be between forty and fifty millions of dollars; so that the experiment is to be tried on a scale larger than that to which the revenue of Canada has to be adjusted. It is not probable that much more can be got from spirits than hitherto, 14s. per proof gallon. The wonder is rather that spirits have borne so much without defeating the object of the duty. The 6d. a gallon which has been borne by beer is heavy, and cannot be capable of much increase. Sparkling wines would bear a higher duty than 10s. per six quarts. It is obvious that great reliance will be placed on the land and the income taxes. The latter, at 6d. in the £, cannot be much less than about half the ordinary interest of money. This is surely excessive, and is likely to prove the weak point in the scheme, involving serious difficulties in the collection. The land tax is presumably to be assessed on the rental. If this be so, the question is sure to be raised whether land cannot bear more than one-sixth the tax on income. The experiment is a bold one, and if it can be carried out will enormously increase the commerce of the country. The adoption of Free Trade by New South Wales will have a direct bearing upon the proposed reciprocity between Australasia and Canada.

Whatever revelations the trial of Jabez Balfour, the eclipsed English financial luminary, may have in store, they are likely to be largely anticipated before that event. Balfour belongs to the expansive type of which railway Hudson was a conspicuous example. His method embraced the putting off on stockholders unsound properties for more than they were worth. He started a building society, which got into deep water; then he set up another, which took over part of the rottenness of the old concern in exchange for the good money of the stockholders in the new concern. This operation he repeated again and again, till he held the strings of a dozen companies of more or less doubtful complexion, under the name of Liberator Societies. To get subscribers and depositors, he induced clergymen to become his agents, whom he paid a commission of one per cent. for all the business they obtained and one-half of one per cent. afterwards. Dividends and interest were paid without being earned. Enormous sums were lent to favorites, no less than $10,000,000 to one builder. Besides his alliance with clergymen, Balfour had many marks of external piety. It is not necessary to conclude that he was a calculating hypocrite at the start; he may have been perfectly sincere, at first, and when he got into deep water and entered on a crooked course the externals of the old habits remained, becoming a cloak for delinquencies. His career is another example of the danger of pursuing unsound methods and treating unsound properties as sound. It is a warning to keep clear of the reckless expansionist, even though his expansion is confined to a comparatively limited sphere and has not the ambition of the universal genius.

Newfoundland, having a debt fifty per cent. greater, according to the population, than Canada, raises the question, as a preliminary to the accession of the island to this Confederation, how is the overplus, which amounts to about $5,000,000, to be provided for? For Canada to assume it seems out of the question; to do so would be to raise all sorts of complications with the seven provinces; experience tells us that the smaller they are the more unreasonable they are liable to become. Report says that England has been asked to assume the difference, and it is pretty certain that she has declined. Waiting a response to that question is said to have caused the halt in the negotiations. Newfoundland, in her bankrupt condition, would be unable to bear a debt of $5,000,000 as a province of the Confederation. Much less can she stagger on alone, under a debt of $15,000,000, which she had the folly to create. But she will have to try to do so, unless Mr. Bond should succeed in reopening the negotiations for union with Canada, and carry them to a successful issue on some new basis.

Another seizure of American fishing nets in Canadian waters was made last Saturday by the cutter "Petrel." The nets were the property of Cleveland fishermen. The owners, report says, are going to set up the defence that the great lakes being, according to a decision of the United States Supreme Court, high seas, they had a right to fish anywhere except on the reserved shore line. But that decision declares not only the great lakes, but also their connecting waters high seas; and while it may be good as regards navigation, it does not follow that the same rule holds with regard to the fishery. Besides, the British admiralty jurisdiction has not been heard on the question. The admiralty jurisdiction in Canada which has to decide nice questions of international dispute is inconsiderately confided to county judges, whom, as a body, legal wits compare to necessity which knows no law. The jest of course does not imply a general truth; but whatever allowance for exceptions be made, it must be confessed that this jurisdiction is not happily placed. Should the points raised by the Cleveland fishermen take a serious shape, it will come within the reach of diplomacy. The fishery rights in the lakes which form the international boundary between Canada and the United States have hitherto been regulated by a rule dif-

ferent from that now asserted. This is not the first disputed case that has arisen since the Supreme Court declared the great lakes to be high seas; and if there be anything in the contention, how are we to account for the fact that it was not started before? The internal line in the lakes is a distinctly defined water line.

When Japan agreed to let go her hold of Manchuria, only retaining it till she is paid the war indemnity, she did not stipulate for any equivalent in money. Her moderation is generally commended. It is understood that some arrangement will be made with China, by which Russia will be enabled to extend her trans-Siberian railway to an open port in Manchuria. This will have an important effect on the development of her naval strength in the neighborhood of Japan, and in the Pacific Ocean. Japan and England may be found to have common interests far greater than any that have existed in the past. The joint action of Russia, France and Germany would naturally cease with the accomplishment of the object which gave rise to it, though the loose alliance may last for some time. The terms on which the extension southward of the trans-Siberian railway will be carried, it is said, will be arranged by Russia and China separately. In Japan, there is a strong feeling of disappointment over the loss of the conquered territory, which may give the Government some trouble.

The agreement fixing the amount of indemnity payable to the Canadian sealers for illegal capture at $425,000, having failed through the refusal of the United States Senate to ratify it, a commission will meet in Washington in October to settle the amount to be paid. The claims will have to be proved in detail. Another item relating to this seal fishery is that the British Government refuses to renew the arrangement which required British sealers to have their firearms sealed, that is, locked up, before they enter Behring Sea during the prohibited season. This precaution was complained of by the British Columbian sealers, and it is said to have been abused; one master sealed up certain arms, which, on examination, he would represent as all on board, while he kept out others for illegal use. In another instance, a harmless apparatus, thought to be an instrument for the destruction of vessels, was seized. The penalties for illegal sealing of course remain as before. There is said to be one point on which the British and the Americans have not agreed, and that is as to what is to be held to constitute a seizure of a sealing vessel. Sir Julian Pauncefote, the British Ambassador at Washington, is about to visit England, but whether the visit has any connection with the October Commission at Washington is not known.

FRUIT INJURED BY FROST.

Great damage has been done to the fruit crop throughout Ontario by the frost of Sunday night, but the grape vine has suffered most. Some accounts represent the vines in the neighborhood of Niagara and St. Catharines as entirely destroyed. It remains to be seen what revival will be possible under the genial influence of fine weather. For the blackened leaves there can be no revival, and any new growth will be abridged of the early part of the total heat, with the result of late maturing, or perhaps there may be too little heat to produce maturity at all. Even in the south of France the vintner is, every spring, in mortal dread of frost; so that we must not conclude from a single mishap against the suitability of favored regions of Ontario to assure us the full ripeness of the grape. Cultivation of the grape here is in course of expansion every year, and has even now reached respectable dimensions, as may be judged from the fact that good grapes often did not, last year, bring the grower more than a cent and a half a pound. For an industry which did not begin for sixty or seventy years after the first settlements, great progress has been made. It has already become a question what to do with the fruit. Strawberries and peaches, in the more southern parts of the province, have suffered by this frost perhaps severely, and tomatoes, where they had been planted out, were cut down. Other garden plants have been injured. In the west, on the Detroit river, another grape-growing district, less damage to the vine is reported. The apple crop appears to have escaped with little injury, even in places where the damage was greater than in Ontario, although it has not wholly escaped even in this neighborhood. Little injury to grain is reported. In the neighboring States, south and west, the injury is reported to be greater.

BRITISH INVESTMENTS.

It is significant of a marked improvement in the temper of British investors to find, as we do, that the amount of capital going into new loans and new companies thus far is greatly in excess of last spring. Up to the close of April, 1893, the new issues on the London market had been only £15,879,000, and in 1894 only £14,217,000, but this year they were £33,259,000. The largest items in the *Economist's* weekly list to 27th April were the Queensland Government 3½ per cent. loan, £1,250,000, and the Western Australia, £750,000; the other twenty issues ranged from house-hiring to gold-mining, from breweries to golf. Up to May 4th the issues had been increased to £36,000,000 by a New Zealand 3 per cent. loan of £1,416,000, and by a number of co-operative and other joint stock companies, among them such diverse enterprises as African waterworks, farmers' and landowners' insurance, and sectional pneumatic tyres manufacture.

RESPONSIBILITIES OF AUDITORS.

Whether an auditor who examines the books and accounts of a company is, in the doing of this work, acting as an agent of the directors or an officer of the company, is a matter which has been the subject of legal enquiry and decision in Britain. In a late number of the London *Economist* the question is considered, and it is deemed to the ordinary lay mind a self evident proposition that the auditor of a company's accounts is an officer of the general proprietary body, and not of the directors by whom he may have been appointed. "His duties clearly consist in examining and reporting upon the accounts in the interest and for the protection of the company as a whole, and in rather acting as check upon the proceedings of the directors than playing the part of a buffer between the directors and the shareholders, by whom the auditors' fees are invariably paid. But in the case of Mr. Theobald, one of the auditors of the London and General Bank, the point has been taken to the Court of Appeal, and may yet engage the attention of the House of Lords."

It will be remembered that in December last Mr. Justice Vaughan Williams decided that the directors and auditors of this bank, which was started to assist in financing the Balfour companies, were liable, at the suit of the official liquidator, to make good to the general estate dividends which he held to have been improperly paid. The directors and auditors appealed, and the case is still *sub judice*. But Mr. Theobald raised the preliminary objection that he was not an officer of the company within the meaning of section 10 of the Winding-up Act of 1890, this sec-

tion setting forth that "where it appears that any director, manager, liquidator, or other official of the company has been guilty of any misfeasance or breach of trust in relation to the company, the court may compel him to repay any moneys so misapplied." As we have said, the Court of Appeal has decided that Mr. Theobald was an officer of the company, and that therefore he must stand or fall with the directors in the matter of paying dividends which, the contention is, were never earned. It is highly improbable, in the opinion of the *Economist*, that the House of Lords will rule differently, if the case is taken to them for final judgment, for the decision given this week was obviously based upon grounds both of equity and common sense. Indeed, if the ultimate decision should be adverse to that given by the Court of Appeal, there would at once be a very widespread demand for an amendment of the law with regard to the responsibilities of auditors.

THE LOCAL IMPROVEMENT SYSTEM.

SECOND ARTICLE.

A keen controversy had been going on for years concerning the slowness of the improvement of our streets and the reasons therefor. The incompetency of the council was blamed, and year after year new bodies were elected pledged to do better things. Meanwhile a small but growing body of the citizens began to contend that the system of constructing streets then in force was totally unsuited to a new city. However well it might suit a finished city to construct all its works out of a general tax, it was obviously in a new city unjust and impossible to make immense levies upon the citizens at large for the benefit of the owners of the land that was being brought into value with the money of the taxpayers. Some means must be found of transferring to the property benefited the burden of developing it, and at the same time freeing the hands of the central property owners so that they could enter at their own cost upon more permanent works, as they were anxious to do. That was the object of the amendments in the local improvement laws made about the years 1881 and 1882, which have led to such remarkable changes in the looks of the city, its circumstances and its growth; and, we may add, in its prospects.

The amendments that were held to be necessary, and were eventually carried, were in appearance very slight. They consisted merely in enacting that when any property has been specially assessed for work done at the expense of the owners, the property should be exempt from all general rates levied for the like purpose. The effect of the change was prodigious. Perhaps it would not have been so great had it not occurred just at the time when the whole of the continent was beginning to throb with the prosperity that attended the marvellous railroad building and other material development of that wonderful decade, 1880-90. It occurred just at the time when a great rush of native Canadians and Americans was setting in to the cities to take advantage of the plentiful employment caused by the colossal expenditures on works of development that were mostly executed, not only inside the cities, but also outside the cities, and in the latter case mostly by immigrant labor.

However that may be, it is a fact that since 1882 Toronto has spent in local improvements more than $10,000,000, of which about $9,250,000, less sinking fund, remains to be paid. If this expenditure had all been made on permanent works, which, however premature they might be, would some day become productive, not much harm would have been done. But, unfortunately, it is the case that, through most reckless conduct on the part of the property owners, incapacity and want of balance on the part of the city council, and a general losing of heads on the part of real estate men, many of the investments were of a trumpery character, a great deal of harm has been done, and we are now suffering for it.

The greatest of the evil was done under what may be called an excrescence upon the local improvement system —the so-called "initiative" principle. We were going quite fast enough before 1890, when this "initiative" principle, which had already been in existence as a means of compelling reluctant landlords to drain their properties, was applied to local improvements generally. It enables the council to order this, that, or the other work to be done, and the cost assessed on the property, unless a petition, signed by a half in number and value of the property, be presented against such work. Any one may fancy the trouble of getting up such a petition when the signatories are perhaps scattered all over the city or the continent, and personal interviews and long explanations and arguments may be necessary in each individual case. It is often impossible to get sufficient signatures, though the general sentiment may be completely hostile to the so-called improvement. The consequence was that the property owners were in many cases literally robbed of their money and their property by conspiracies between contractors, officials and aldermen who combined to force unnecessary and premature works upon them. The practical working of it was this: Under the influence of the large expenditures of the first few local works there had grown up a prodigiously strong force of contractors—former ward-grabbers—their employees; the civic employees whose work depended upon the ball being kept rolling; and a city council consisting, actually, in the later years of Mayor Clarke, of from 20 to 25 real estate men out of a total of 40 members. These people were vitally interested in spending money. So long as the golden stream flowed they flourished like a green bay tree. They must have spent considerable time in imagining works that were from their point of view necessary to be constructed. They could hawk round petitions asking to have these works done. They were not at all particular how they obtained or made the signatures, nor about the methods employed to placate doubting property owners. If a sufficient number of signatures could not be obtained, through the absence or indifference or incapacity of the owners, or for any other cause, these industrious workers turned their forces upon the city council and procured officials and committees to recommend the initiative principle to be adopted. In many cases jobs of this kind were got through simply from the inaccessibility or absence of persons qualified to sign the anti-petition. By means of the "initiative," thus abused, hundreds of persons have been literally robbed of their property and in some cases of all their means, and the only comfort to be extracted from it is that none of the participators in the proceedings seem to have done themselves any permanent good.

Proceed now to a consideration of how the money has been spent. The local improvement debt that was outstanding 31st December, 1898, was incurred for the following purposes :—

Sewers	$1,846,901 97
Roadways	2,423,400 65
Street extensions, opening, widening, grading, etc.	875,537 47
Sidewalks	528,331 60
	$5,674,171 69

To each of which items must be added a proportion of the city's share of such local improvements, the total of the city's share being $2,806,587.97, probably divisible in the same proportions as the property owners' share.

More than one-half of the debt incurred for sidewalks was for wooden sidewalks. The unwisdom of going through

all the performance of passing by-laws and issuing debentures to raise money to pay for wooden sidewalks is quite patent. Why not form a fund of say $250,000, and to it debit or credit all the costs of and assessments towards wooden sidewalks? The expenditure on that head is or might be made quite regular. This item should disappear from the debenture debt.

As to the item "street extensions," it covers some fearful jobbery. By the misuse of the city's expropriating and borrowing power many miles of useless streets were opened and afterwards equipped with sewers, water-mains, gas and electric lamps, sidewalks and block pavements. Many of these same works are to-day lying idle, and no one will purchase the abutting lands even for the amount of the taxes thereon. Owner and mortgagee have been alike wiped out in some hundreds of cases. Not only has the city lost the money spent under the head of "city's share" in such works, but there may be a further heavy loss to be faced in that from the failure of the land to realize at tax sale the amount charged against it, the city will have to meet the deficiency.

THE RAILWAY RATES COMMISSION.

The commission appointed by Government to examine into the charges made against the Canadian Pacific Railway Company of extortion and discrimination in the matter of freight and passenger rates, has made its report. The members were, it will be remembered, Messrs. P. S. Archibald, of the Intercolonial Railway, William Pearce, inspector of mines, and W. H. Allison, inspector of homesteads, Manitoba, the first-named being chairman. When we recall the nature of some of the charges made against the railway and the bitterness with which they were reiterated, the finding of the commission is certainly in favor of the road, which was called by Manitoba residents various names, from a "bloodsucker" to an "octopus," from a "monster" to a "hindrance to the country."

Many of the complaints made, if not most of them, arose, it now seems, from a misunderstanding of the tariff of rates. And it is noteworthy that none of the large freight shippers were among those complaining. The view taken by the commissioners is that with 18,000,000 acres of unsold lands in the West, any policy of the Canadian Pacific other than that favorable to settlers would be "simply suicidal and ruinous to the company." And the view is reasonable, surely. Thus they find that the C.P.R. authorities "have done everything in their power to foster and encourage the development of the live stock industry." With respect to coal and lumber, the rates charged in Manitoba and the North-West are found to be neither exorbitant nor excessive; "on the contrary, they are exceedingly favorable, as compared with the rates on American roads in contiguous territory;" indeed, in the belief of the commissioners, "they are very little, if any, in excess of the average rates charged on corresponding traffic in the eastern provinces." The local rates for freight and passengers, other than those mentioned above, are declared to be high compared with those charged in the eastern provinces, but not in excess of those charged by the Northern Pacific and Great Northern in contiguous territory. "The local freight traffic, however," the report says, "forms such an insignificant portion of the whole that these rates, even high as they are, cannot add very much to the 'burden of the farmer.'"

In selecting a basis upon which to make comparisons of rates, the commission rejects equally the method of comparison pursued by the Manitoba complainants in making up their case, and that adopted by the railway company in its reply, as making unfair comparisons. And they prepared a table of their own giving rates between localities similarly circumstanced on the C.P.R., Great Northern and Northern Pacific lines of railway. It shows the mileage on the C.P.R. to be considerably greater than on the other lines. The through rates comparison also shows in favor of the latter road.

The report maintains the view, which will commend itself generally to business men, that no fair comparison of rates can be made between railways traversing a sparsely settled country in the West, having very light local traffic, with railways passing through a comparatively old and thickly settled country with large and numerous populous centres, either in Canada or the United States. It is important, also, to bear in mind that the through all-rail shipments amount to only two per cent. of the total traffic. As to farm produce the commissioners find that the Canadian farmer has a decided advantage in rates compared with the American.

An example of what is regarded as an equitable comparison is given in the report substantially as under:

It is maintained in Manitoba that the Canadian Pacific rate from Brandon to Fort William, 482 miles, should be as low as from Fargo to Duluth on the Northern Pacific, 213 miles. But at the latter mileage basis the C.P.R. rate is nearly 75-100ths of a cent per ton per mile, while the N.P. rate is 1 and 45-100ths cents per ton per mile.

The schedule fixed by the Dakota railway commissioners, applied to the Canadian Pacific in Manitoba and the North-West, shows the C.P.R.'s existing rates to be from ½ to 1 cent per 100 lbs. less than the Dakota schedule, from all points west of Regina. Applied to Edmonton and Prince Albert, however, this schedule of rates would be 6 and 7 cents lower than the C.P.R. tariff.

A total is also given showing a comparison of freight rates on live stock on the C.P.R. to Montreal and on the Great Northern and Northern Pacific to New York. From points at equal distances from these terminals the Canadian Pacific rate runs at $184 to $135 per car to Montreal; the N.P. and Great Northern at $191 to $163 for the same distances.

A NEW HOTEL FOR TORONTO.

It is not unreasonable to suppose that what the Windsor Hotel has done for Montreal, what the Canadian Pacific Hotel has done for Banff, what the Chateau Frontenac is doing for Quebec, might be done for Toronto by a large and first-class modern hotel. There is no denying that Montreal has been made a place of annual resort for many persons from the United States and other countries because of the accommodation afforded such travellers by the Windsor, added to the other undeniable attractions of our chief city. And a sufficient number of years have elapsed, Toronto has grown enough in the meanwhile, both in extent and in reputation among Americans, to make the success of such a venture as a large hotel, open winter and summer, much more likely here than it would have been say in 1885.

For some months past the desirability of such a structure has been discussed among leading citizens of Toronto, who felt persuaded that the beauties of the city, the attractions of her harbor and the allurements of the many resorts within a short distance, would be more likely to captivate if strangers could first be assured of hotel accommodation such as they were accustomed to at home. Efforts have been directed towards the securing of a site for such a hotel, and from correspondence we have this week seen there is no doubt that such a site is available, while the prospect of its erection within two years appears at least more likely than at any previous time. By concurrence of the Ontario Government with the authorities of the University of Toronto, a free site for the purpose is offered in the block of land on King street now occupied by the old buildings of Upper Canada College, and the site is

a good one, being 225 feet on King street west of Simcoe running back to Adelaide.

Communication has been opened quite recently by Mr. G. W. Yarker with a New York capitalist who expresses his willingness to undertake the erection of a handsome modern structure, thoroughly equipped. In an interview with a reporter of the *Mail*, Mr. Yarker sets forth some details of the project, thus:

"Briefly, it is this:—My New York correspondent agrees to invest $400,000 in the hotel property on mortgage at 5 per cent.; the citizens of Toronto will be asked to subscribe $200,000 only, in stock or bonds; and for a reasonable bonus, in stock or bonds, the capitalist referred to will erect the hotel; and on its completion form a company who will thoroughly furnish, equip and manage it. You see, therefore, that we shall have the hotel built, furnished and running without further subscription on the part of our capitalists than the $200,000 referred to."

Of course, the question which will at once be asked is, will such an enterprise as an $800,000 or a $900,000 hotel pay? And there are not wanting those who refer to the early experience of the Windsor Hotel Company in Montreal, which was that a large proportion of the money invested by the original shareholders was sunk in the venture. While we think it too much to suppose that a concern like the one outlined would pay dividends from the start, it remains to be considered that the capitalist who offers to undertake the construction and furnishing of a hotel on the scale proposed is no novice at the business, but a man who has put up several such structures in different cities. He knows, besides, a good deal about Toronto, its growth and prospects. And such considerations as passenger travel by rail and lake, the growing popularity of Toronto as a place for conventions of all sorts, its nearness to Niagara Falls, the charms to sportsmen of the Muskoka country, and the other fishing and sporting districts of Ontario, to reach which people naturally pass through Toronto, must not be left out of sight in estimating the future probabilities of hotel custom. Then it is to be borne in mind that the well-to-do American wants the best hotel he can get, the best of everything in it, and is, moreover, prepared to pay for the accommodation. It is on the cards, we are told, to make the new hotel a resort for winter as well as summer, and in pursuance of that idea, to have a roomy and attractive interior conservatory of the kind familiar to the *habitues* of the Niagara Hotel, in Buffalo. And even a roof-garden is spoken of.

The project is one of the most important that has come before our citizens of late, and it will be disappointing if it do not meet with sympathy and substantial support. We cannot well expect to get crowds of wealthy Americans to visit us and make stays long or short in our midst if we neglect opportunities to furnish them with what they mostly look for, first of all, ample and comfortable, not to say luxurious, hotel accommodation.

DRY GOODS' MARKETS.

We have remarked elsewhere the buoyant feeling that exists in several departments of wholesale trade, notably groceries and leather, by reason largely of the advance in prices of commodities which had so long tended downward. In the dry goods trade there are signs of a like feeling. In both cotton and wool the feeling is upward. Canadian cotton mills are sending circulars to say that present quotations cannot be expected to be maintained, but may be raised. And wool must naturally go higher. Some grades have been bought last week in London, we are told, at a price lower than ever before known for like grade, and quotations have since advanced. The London wool sales of last week showed an advance of 5 to 7 per cent.

It is a somewhat curious fact that in the face of this it has been possible for wholesale houses to make contracts for knitted woolen underwear at prices lower than ever. Nothing but the keenest competition can account for this. And while some of our blanket manufacturers, foreseeing the rise in wool, have been trying to increase their prices in order to make sure of a profit, their competitors, it is declared, would not permit it. Certainly the old country woolen manufacturers are not foolish enough to continue old prices in the face of higher values for the raw material. Quotations from Britian for all staple worsted are held subject to advance; the same is true of Italian cloths. Huddersfield and Leeds houses will take no orders for trouserings or coatings except subject to the prices that may prevail on dates of reception. And in woolen dress fabrics, any that have to be made are quoted subject to an advance in price.

British textile makers are busier now with the American demand. The only new feature in flax or linen manufacture is the great activity in canvas for dress sleeves. In the silk market there is no change in dress silks, which are in less active demand of late, but for fancy blouse silks there is a great request, as also for taffetas and trimming silks. The strong feature in Bradford wool dress goods has long been creponnes, which are in especial demand in the best qualities, both for the home trade and for export. Another popular fabric is mohair mixture, on which there is at present quite a run.

Canadian wholesale merchants in this department tell us that, while the feeling among their customers is improved, the buying is still done with extreme caution. There must, however, be a scarcity of goods in many quarters, and as soon as another good harvest is assured it would not be surprising to see buying become brisk. Money has come in from country customers fairly well for some weeks, in spite of bad roads. And a gratifying feature is that the retailers who take discounts for cash are increasing in number.

THE LUMBER TRADE

A singular, not to say puzzling, condition of affairs exists in the lumber trade at the moment. There is a sort of pause—not that any one has fear of values receding, the feeling is firm enough, but that the improved activity in other merchandise either in the States or Canada has not yet reached the lumber trade, and consequently there is but little doing. A good deal of building is going on in American cities, and here and there in the manufacturing districts quite a "boom" is announced in certain kinds of goods, but lumber dealers are not busy, or if so, their activity has not exhausted their stocks, or caused them to look abroad for pine stock. We hear of activity in building in the Eastern States, where stocks of spruce and other dry lumber are about exhausted, but in Albany, now that winter stocks have been depleted by the New England demand, everybody seems waiting for brisker times. The *North-Western Lumberman* says that while "Albany has this spring done a good business, Buffalo and Tonawanda have waited for a demand that has been disappointing in volume. Though some improvement has been manifest in New York and vicinity, it seems to have been characterized by tardiness, limitation of distributive volume, and unevenness as well. Baltimore and Philadelphia have furnished a considerable amount of demand for the different kinds of lumber used for building purposes."

There is no weakness of feeling among Canadian holders, so far as we can learn, for there are no large supplies at Canadian points. On the Georgian Bay, we are told, the stock was never lighter, and so the opinion grows that when active demand comes, as come it must, from the States and elsewhere, pine lumber will be good property. But in the meantime lumber dealers have a good deal of time on their hands.

NORTH BRITISH AND MERCANTILE INSURANCE COMPANY

This great company has had a good year in 1894. Its total income approached two millions of pounds sterling (£1,857,398), which when translated into dollars makes large figures. A meeting of the general court of directors of the company was held in London on Tuesday, 30th April, when the following results of the business for the year ending 31st December, 1894, were reported:

The net fire premiums amounted to £1,440,509 9s. 5d., and the net fire losses to £825,494 10s. 9d. Thus the losses were only 57·3 per cent of the premiums, a low ratio. In the life department 2,290 policies were issued: net amount assured £1,329,221. The premiums were £52,111 13s. 1d. In the annuity branch 547 transactions were entered into, securing the sum of £33,203 11s. 2d., of immediate annuities, £686 12s. 4d. of survivorship annuities, £385 19s. 6d. of deferred annuities and £2,460 of deferred payments, for which the company received the sum of £364,251 19s. 8d., by single payment and £527 10s. 2d., by annual premium.

The balance to credit of profit and loss at 31st December, 1894, amounted to £250,822 10s. 9d., say $1,254,000, out of which sum it is carried to dividend account £160,000, leaving to be carried forward

£90,822 10s. 9d. The dividend account will then stand at £290,000, out of which the payment of a dividend for the year of £1 per share was recommended, being £110,000, and a bonus of 5s. per share (on shares with £6 7s. paid up), being £27,500, together £137,500, leaving at the credit of dividend account a balance of £152,500.

The magnitude of the business of the North British is indicated by the extent of its assets, which total £11,660,000. Of these £6,760,000 are held for the life branch; £1,650,000 for the annuities, and the remainder for the fire branch. The company is eighty-six years old and has been doing business in Canada for more than thirty years.

CANADIAN CUSTOMS COLLECTIONS.

The following is a statement of customs duties, etc., collected at the various ports and out-ports of Canada for the fiscal year ended with June, 1894. We give the amounts collected at principal cities and towns in the different provinces of the Dominion. The grand total is $19,030,723 :—

ONTARIO.

Port.	Customs Duties.	Excise, etc.	Total.
Belleville	$ 51,016	$ 91	$ 51,107

—The Eastern Townships' Bank shareholders will hold their annual meeting in Sherbrooke, on Wednesday, 5th June next.

MANUFACTURERS LIFE.

We learn that Mr. J. F Ellis has tendered his resignation of his position as managing director of the Manufacturers Life and the Manufacturers Accident Companies, that it has been accepted, and that from this week Mr. Ellis no longer occupies the positions we have indicated. Mr. Ellis is still a large shareholder in the Manufacturers, but he has large interests outside of the company —in the Barber & Ellis Company and elsewhere—and found it necessary to give his fuller attention to them. Our readers will have observed that we have already accorded Mr. Ellis deserved credit for faithful and intelligent work for the Manufacturers. He leaves it when it is in a decidedly stronger position than when he took hold of it, and when its prospects are looking very satisfactory. The new manager, Mr. J. F. Junkin, who comes from the Montreal district, of which he had charge, is spoken of as a man of good judgment as well as of considerable experience in life assurance. He began his insurance career about twelve years ago with the Sun Life as general agent for Eastern Ontario jointly with his brother. In a few years he was promoted to the Montreal general agency, with the result that the city business of the Sun was largely increased. Mr. Junkin's connection with the Manufacturers Life dates from November, 1892, when he was appointed provincial manager for Quebec, and later, in addition to that position, was appointed manager of the foreign department, in which he has been successful.

ACTUARIAL SOCIETY OF AMERICA.

The latest annual meeting of this society—we believe it was the seventh—was held in New York, at the rooms of the New York Board of Fire Underwriters. There was a good attendance, and the usual interesting discussions ensued. Papers were read on the following subjects: "Valuation Notes," by A. K. Blackadar; "Loans on Life Insurance Policies," by Bloomfield J. Miller; "Proper Charges for Annuities and Insurances to Provide for a Decreasing Rate of Interest," by D. P. Fackler; "Approximate Valuations," by C. N. Jones; "Rates of Death Loss among Total Abstainers and Others," by Emory McClintock; "Canada Life Assurance Co.'s Mortality Experience," by A. K. Blackadar, of Ottawa. Officers were elected for the ensuing year as under: President, Emory McClintock, of the Mutual Life Company of New York; first vice-president, Bloomfield J. Miller, of the Mutual Benefit Life; second vice-president, George W. Phillips, of the Equitable Life Society; secretary, Israel C. Pierson, of the Washington Life; and treasurer, Oscar B. Ireland, of the Massachusetts Mutual Life.

BOOKS RECEIVED.

SOUND CURRENCY.—Further pamphlets in the valuable series under this title have been issued. We have received Nos. 9, 10 and 11. No. 9, "Our Paper Currency; as it is and as it should be," by Mr W. Dodsworth, editor of the New York *Jonrnal of Commerce and Commercial Bulletin*. Mr. Dodsworth speaks with refreshing frankness of the "lamentable failure" of the great American people "to produce a sound and convenient circulating medium." He contends for prompt retirement of greenbacks and treasury notes, and the giving of easier conditions of circulation to National banks, but he would not have their notes legal tender. No. 10 is by L. Carroll Root (the author of a paper on Canadian Bank-Note Currency in the same series), and is entitled "States as Bankers." In it is given a *resume* of the experience of various States of the American Union in regard to banks. Wide use has been made herein of the writings of John J. Knox, Lyman J. Gage, and others. The latest of these three little *brochures* is a delightfully pointed and strong arraignment of "Coin's Financial School," a book apparently written and published and illustrated in the interest of the silver men of the United States. Mr. Horace White is the skilled dissector of the book just named, which appears to bristle with misstatements and misquotations. In his pamphlet, "Coin's Financial Fool," Mr White tears away the veil of illusion and untruth that has been thrown around the currency question in the book complained of.

UNITED STATES TREASURY COUNTERFEIT DETECTOR.—Interest is given to the successive monthly issues of Dickerman's Detector by *fac similes* of raised cheques or the like and by articles on current financial subjects, all in addition to the contents naturally to be expected in such a work. The April number contains a paper on "Canadian Banks and their Management." The May number has several condensed reports of Canadian banks.

GLIMPSES OF HOMEWOOD.—This is an illustrated circular mainly devoted to describing Homewood Retreat for insane patients, alcoholic or narcotic habituates, and praising the city of Guelph, where it is situated. Enclosed with it, however, is a pamphlet of some value on Treatment of the "Opium Neurosis," written by Dr. Lett, the medical

superintendent, a subject upon which he is entitled to speak with authority.

GOLFING.—This is the title of a New York magazine, beginning its existence with the present month, devoted exclusively to the royal sport of golf, and plentifully illustrated with pictures of golfing localities and celebrities in the States. It will have a series of papers on golf in Canada. The editor has made, on page 17, an apology for the fact that the young woman in flowing drapery on the title page is driving a *red* ball, when it is well known that golf balls are white. But as the sky is red, too, a little thing like that may be forgiven to the exigencies of what an artist calls the "balance of his drawing."

SKETCHES OF WONDERLAND.—A descriptive pamphlet, illustrated, of the wonders of the Yellowstone National Park and neighborhood, written by Olin D. Wheeler, and published by the Northern Pacific Railroad

TEXTILE JOTTINGS.

Of linen thread our purchases in 1894 were 261,285 pounds, valued at $155,944.

The Mississippi Woolen Mills at Appleton, in Lanark county, are again closed down.

Floor oil cloth, coated oil cloth, and oiled silk, $663,884, is an item in our last year's imports.

Artificial flowers, $167,441, and feathers, $145,653, were imported last year into the Dominion from European countries and the United States.

Cotton sewing thread or spools, $252,000, and sewing thread in hanks, $153,539, and other cotton thread $8,000, are items of our imports last year.

The Empire Carpet Factory at St. Catharines was offered for sale by auction the other day, and was withdrawn after the bidding had reached $1,200.

In the trade returns of 1894 are among imports $823,000 worth of silk piece-goods, $128,000 worth of silk handkerchiefs, and $532,000 worth of silk ribbons, $163,000 worth of velvets.

We buy embroideries from Switzerland, Great Britain, Germany, France, Austria and Turkey to a total of $199,949 in the last fiscal year. This is exclusive of laces, lace collars, nets and netting, $595,014.

As an indication of the firm feeling in cottons, a circular has just been sent out by the Montreal Cotton Co. advising its customers that the company does not bind itself to accept orders for future delivery at present prices.

Robert Forbes, who was largely identified with many business interests in Guelph, as well as being the head of the woolen manufacturing company that bears his name in Hespeler, died on Sunday. He was in his 81st year.

The letting out of umbrellas on hire has been added to the business operations of one of the large London boy-messenger companies. For a small deposit and sixpence you keep dry. The idea is not new, but its revival is interesting

We have a button-making industry in Canada. But still we import something like 100,000 gross of buttons from Austria, Germany, Britain, the United States and France, the total value being $200,000. The materials are vegetable ivory, horn, rubber, and so on.

When our Montreal correspondent tells us that quite a few commands are taken by travellers on the road for fall underwear, we are disposed to hope it is because of the frosty weather of which we had a taste this week, and not because houses are eager to give nine months' credit.

Our import of cotton fabrics, printed or dyed, not elsewhere specified, amounted in the fiscal year 1894 to 21,839,000 yards, valued at $1,562,104. Three-quarters of all this came from Great Britain, one-seventh from the United States, some from Switzerland, France and Germany.

Messrs. Hamlin & Ayers, of Lachute, have completed the repairs to their flumes, and work was resumed at the woolen mills recently. The flume which was swept away will be rebuilt this summer. This firm has recently purchased a duplex power force pump and 300 feet of hose to protect their property in case of fire.

Carpets, 182,660 yards, valued at $73,075, are among the dutiable goods imported into Canada last year. The bulk of these (95,875 yards, worth $44,800) came from Great Britain; 35,593 yards, worth $26,786, came from the States; the remainder from Turkey, Spain, Germany and France. But these are by no means all the carpets we import. There are, for instance, $387,000 worth of Brussels carpets, $491,000 worth of tapestry carpets, almost all from Great Britain, and about $64,000 worth of Venetian, Smyrna and other makes.

A despatch from Providence, Rhode Island, states that on Saturday last all the Olneyville mills were closed at noon for an indefinite period. The manufacturers say the mills will remain closed until the operatives give up agitation and the Atlantic Mills' strikers surrender. Ten thousand working people are idle. The striking weavers say that no compromise on 3 per cent. would be accepted. A secret conference was had of several leading strikers in the Atlantic Mills, and operatives in the mills represented in the Manufacturers' Club.

Here is an instance where the railways in the States did not favor the "Mercuries of Commerce," as some one called the Commercial Travellers. Passenger representatives of lines in the Central Traffic Association met the other day in Chicago, principally for the purpose of considering the issue of an interchangeable mileage ticket for which the travelling men have been working for some time. So many of the roads were opposed to issuing such a ticket, that the case of the traveling men was hopeless before the meeting began. After a short discussion, the proposition to issue interchangeable tickets was laid on the table, where it will, no doubt, be allowed to remain.

The following buyers have arrived:—Mr. J. M. Campbell (R. J Whitla & Co., Winnipeg); Mr. R. C. Struthers (R. C. Struthers & Co., London, Ont.); Mr. W. T. Minnes (Macnee & Minnes, Kingston, Ont.); Mr. John Boyd (Boyd, Bower & Co., Toronto); Mr Malcolm Macpherson (hats and furs, Montreal); Mr. H. M. Belcher, of Gault Brothers & Co., Montreal, who was in Manchester early in the week, may return home by the second week in May. Mr. Macartney was in Manchester this week, as were also Messrs. Molson and Garneau. Mr. R. N. Smyth, of W. L. Smith & Co., Montreal, is also operating together with Mr. Robertson, of Macabe, Robertson & Co., Toronto.—*Draper's Record*, May 4.

It is not often that one hears of a hardware man getting ahead of a dry goods traveller. The following instance, for which the *Ironmonger* is the authority, indicates that gentlemen in the drapery trade occasionally get left. The scene is laid in the dining-room of a Midland hotel, where a commercial in the hat and cap line was enlarging on his luck during the morning in booking orders for three dozen gross of caps. "Oh," rejoined a brother commercial, "that's nothing; just look at this." His manifold disclosed an order for a thousand gross of caps in a single line. The first gentleman hastily finished his dinner in silence. It was then revealed that the wily hardware traveller had concealed the fact that his order was for caps of a percussion type

FOR GROCERS AND PROVISION DEALERS.

About ten capitalists of Chicago and Milwaukee are arranging to visit Oregon for the purpose of investigating the adaptability of the soil there for the propagation of the sugar beet.

The proprietors of the beet sugar factory at Berthier, Que., are distributing sugar beet seed imported from Germany at several points in Ontario for experimental purposes this season.

Another consignment of butter, shipped under the auspices of the Canadian Department of Agriculture, has arrived at Liverpool. It brings higher prices there than Australian butter.

Sardines have made their appearance in the St. Lawrence this season much earlier than usual, and the factory of the Union Sardiniere du St. Laurent, at St. Andre, will commence operation a month earlier than last year.

According to the Prince Edward Island *Agriculturist*, cheese factories are in course of construction at Alberton, Lot 7, and at O'Leary. The directors of the Emerald Cheese Factory Company decided to begin building operations at once, and contracts for the boiler and other plant have been given.

The Butchers' Association of Montreal have elected the following office bearers: President, Joseph Denis; 1st vice-president, Isaac Daoust; 2nd vice-president, Godfrey Courville; secretary, Joseph Denis, jr.; assistant do., Zeven Delorme; treasurer, Arthur Pare; Assistant do., Laurence Selby.

The Windsor Salt Company, Ltd., applies for incorporation. The provisional directors are to be: Sir William C. Van Horne, Thomas H. McGraw, of Poughkeepsie; Thomas Craney, of Bay City, Mich.; Ernest G. Henderson, and Robert F. Sutherland, Windsor, Ontario, barrister-at-law. Capital stock, $200,000.

The St. Hyacinthe *Courier* understands that the projected canning factory, at Sherbrooke, will not be undertaken this year, the promoters of the enterprise having decided to wait till next year. They are advising the farmers of the neighborhood to try planting sweet corn this year as an experiment to see whether it will be practicable to grow it thereabout for canning purposes.

"Change is the beautiful lining of time." Change is not always beautiful, but the change that will come to the grocers' homes and

stores at this the glad spring time ought to be beautiful and beneficial to all concerned. It will be more difficult to keep the windows and sidewalks clean these hot dusty days, but then it's far more agreeable to use the hose now than in the frosty days.—*N. E. Grocer.*

Among the presents sent to Prince Bismark for his birthday were ons of smoked salmon, quantities of foie grass, of honey, apples, eggs; wines, old and new, and sweet and sour; cigars, long pipes, and innumerable packages of matches. One admirer sent a sausage two yards long; another a box of cheese, weighing 120 pounds; another 200 pounds of butter. Friedrichsruhe is converted into a vast provision storehouse.

The Delta Creamery Company, of B.C., is going forward energetically. Mr. King, butter-maker at the Ontario Agricultural College, has been engaged to superintend the business. The factory will be close to Ladner's Landing, and a complete butter-making plant has been ordered from the coast. Mr. H. D. Benson is president; E. Hutcherson, vice-president, and Mr. H. N. Rich, secretary of the company.

The London cheese market was formally opened last Saturday, and the attendance was large. Mr. Frank Norton was chosen honorary president in recognition of his services to the board and cheese interests generally. Mr. John S. Pearce was re-elected president, and Mr. J. A. Nelles secretary-treasurer. The old board was re-elected, with the exception of two, Messrs. Hunt and McMillan, of Westminster, being chosen to fill the vacancies.

If you haven't an awning, don't be debarred from purchasing one on account of the expense, says Mrs. Reading, of Chelsea, to the readers of the *Grocer*. It will quickly pay for itself in the added comfort it will afford both customers and clerks, as well as keeping the contents of your windows in far better condition. Don't hesitate to provide a few chairs in some convenient corner for the convenience of your lady customers; such courtesies are always appreciated.

The auction sale of the large cargo (over 65,000 boxes) of oranges and lemons from the steamship "Fremona," was begun last week in Montreal. Fruit men from all over Canada and the United States were present. The lemons brought large prices. Most of the large high-priced lots went to Chicago, New York, and Boston. Some of these brought as high as $3.50 per box. One lot of 700 boxes brought $3.20, while one lot was secured for $1.70. Last year fruit in a similar condition was purchased for $1.10. The fruit came from Messina, Palermo, and Catania.

At a meeting in the Athenæum, Reading, on May 1st, in connection with the local grocers' association, Mr. Councillor Flodden brought forward the question of "cutting," and he affirmed that in this connection it was the drapers who sold soaps and other toilet requisites who created the greatest "cutting" in and about Reading. In order to put a stop to this kind of competition the Grocers' Federation were discussing a scheme brought forward by Mr. Smith, the keynote of which was to induce manufacturers not to supply tradesmen who sold goods at "cutting" prices, and to induce at least two-thirds of the traders of a town or district to combine not to deal with manufacturers or wholesale firms who will not enter into such an undertaking.

A Calcutta paper reports that the Indian tea crop of 1894 has now been disposed of, excepting, perhaps, a few small parcels which may be in shippers' godowns awaiting shipment to the coast ports. The total shipments up to March 31 have been 1,426,647 packages containing 125,694,329 lbs., the declared value being Rs. 73,035,305, against 124,105,376 lbs. crop 1893, and 112,002,587 lbs. crop 1892, the declared values of which were Rs. 63,950,000 and Rs. 60,925,000 respectively. The tea of 1894 crop shipped by the line steamers represents a total of 116,597,519 lbs. The new season's tea will begin to arrive in small quantities during April. The season, however, is reported to be rather a late one in some districts, which may possibly benefit tea proprietors, as it will allow the stocks in this country to be reduced to a very low point before any large quantity of the new tea can arrive on the market.—*Grocers' Review.*

MUNICIPAL MEMORANDA.

Pembroke's assessment is $1,152,690, an increase of $51,690, and the population of the town 4,638, an increase of 174.

A by-law to borrow forty-five thousand dollars to build a waterworks system for fire and domestic use was carried at Orangeville, one day last week, by fifty-four majority.

A by-law authorizing the borrowing of $16,000 to construct works and supply the town of Leamington with natural gas was voted upon last Monday, and carried by a vote of 188 for and 3 against.

The population of Carleton Place increased slightly during the past year and is now 4,210. The assessment is $827,235, an increase of about $19,000.

Wallaceburg voted last week upon a by-law authorizing the municipality to take $15,000 stock in the glass works. The by-law was carried by a majority of 299

Glasgow, Plymouth and Huddersfield, in Great Britain, have just begun operating their own street railroads. Thirty-four other municipalities have preceded them in the experiment. The Glasgow tramways, put down in 1873, are still run by horses

The assessment in Fairville, N.B., will be higher this year than last. For highways the levy is greater, the account being about $1,500 overdrawn at the end of last year. The police service will require an increase of $100, and on fire district No. 1 there will be a levy of $500, being the first assessment for fire purposes.

After printing a letter from a Portage la Prairie man, offering to start an oatmeal mill in Rapid City, and asking if the inhabitants would grant him a bonus for his enterprise, and if so, how much, the *Spectator* of Rapid City replies thus: "Certainly; how much will you have, and how will you have it? Fives, tens or fifties? Rapid City is right in line to secure any industries that would tend to increase and develop the natural resources of the district and also improve the town. This town is all right. Its books are with McGinty in the bottom of the sea, and no one knows where they are at. But it's time some one tried to find out. Until things are straightened out there is nothing in view for this town but to sit on the fence and see the chances of improvement pass by."

There is a movement looking to the transfer of the County of Essex buildings from the picturesque, but sleepy village of Sandwich, to the live and progressive City of Windsor. Indeed, the authorities of both city and county have come to an agreement on the matter, and we do not suppose the feelings of Sandwich are being consulted. The agreement is, substantially, that the City of Windsor furnish the site; that the county will contribute $20,000 towards the cost of the building and the city the balance, not less than $30,000, to erect a suitable building, 100 feet by 140; the city to pay for the removal and rebuilding of the registry office and to pay one-sixth of the cost of remodelling of the gaol, and the city furnish water, and light, and fuel while the natural gas of the locality continues. This agreement is regarded by the *Record* as being largely in favor of the county. That journal urges that Windsor is badly in need of a new city hall.

INSURANCE MATTERS.

The annual meeting of the Hamilton Board of Fire Underwriters was held last week. The following officers were elected: Robt. Dunlop, president (re-elected); John Bell, vice-president; George A. Young, secretary.

The average ratio of fire loss to premiums on the Pacific coast for the last fifteen years is placed at 43·2 per cent. for California companies, 47 per cent. for companies of other states, and 47·7 per cent. for the foreign companies. The average for all American companies was 45·6, and for all companies, American and foreign, 46·6 per cent.

A meeting of the trustees of the New York Life Insurance Company, appointed under the Insurance Act of Canada, was held in Montreal some days ago. Mr. Booth, of the New York office, on behalf of the company, increased a deposit held by the trustees for the benefit of the Canadian policy-holders to the extent of $200,000. The deposit now amounts to $1,605,000. The trustees are Messrs. Richard White, of the *Gazette*, Strachan Bethune, Q.C., and David Burke.

Bicyclists will be glad to know that the Dominion Burglary Guarantee Company has resolved to insure bicycles against loss. It is the intention of this company to establish a register by which track will be kept of the different bicycles in the Dominion, and in case one is stolen, to spare no expense to recover it, and, if not recovered, to pay the owner its valne. The cost of securing this guarantee is a mere trifle, and in no case, we are told, exceeding a dollar and a-half.

Chief Benoit and some of the officers of the Montreal fire department went down to see a test of the Canadian Rubber Company's works fire appliances. An alarm was given, and in 1 minute 10 seconds all the 700 employees of that big concern were out of the building, and in 30 seconds more a stream was playing on the roof. Probably the unfortunate occurrences at the Macdonald Tobacco Works fire are making other factories particular as to fire appliances and the means of escape for their employees in case of fire.

The underwriters have made concessions to the Buffalo lumber dealers and the latter are jubilant. One point gained is that the insurance policy covers the market value of the cargo at destination, less freight. Another covers the cargo five days after arrival, instead of forty-eight hours, and another permits a vessel to deviate from her regular course for the purpose of picking up or dropping her consort. Under former rules a cargo was not insured when a steamer went out of her course for anything but stress of weather. Some of the com-

panies have also agreed to pay losses on deckloads injured in water-logging. The old rule was to allow nothing for damage to deckloads, but to pay only when they were lost overboard. Foreign competition is the cause of these concessions.—*Detroit Free Press.*

A NUMEROUS LIST

A meeting was held on May 10th, 1895, in Montreal. It was a meeting of creditors. All the creditors were not present, else there would have had to be an adjournment to another room, for they number one hundred and twenty-five. The debtors were C. & M. Mills, of Iroquois, Ont., general merchants for many years. From the statement submitted by John McD. Hains, of Montreal, trustee and receiver, the ordinary liabilities of the firm amounted to $80,980.65. Then there was a bank liability of $4,215; a sum partly secured by customers' notes, $1,500; and a sum of $942 privileged claims, consisting of salaries, etc., in all $33,422.65. The assets amounted to almost the same sum, viz., stock at Iroquois, $27,778.50; stock at Brimston's Corners, $2,000; book debts, $3,163, leaving a deficit of $481.15. The largest debt was to a Kingston house, $10,742, and there were only five other claims of over $1,000 in amount, two in Montreal, one each in Hamilton, Toronto, and Denver, Colorado. The other hundred and twenty were distributed over the country. Montreal has 56 creditors for $11,706; Toronto, 25 creditors for $10,017; Kingston, Morrisburg, Brockville, Quebec, London, Rock Island, Berlin, Galt, Prescott, St. Catharines, and dear knows what other places, about $12,000. No less than 82 of the claims, in places as far apart as Manchester, Eng., and Berlin, Ont., were for amounts under $100; sixty of them for sums under $50; twenty-seven of them for sums under $20. And as the insolvents kept a general store, the character of the merchandise owed for was as various as could well be imagined. From the long experience of the retail firm in question, one would have supposed it should know better than have open accounts of the number indicated above. The exhibit made is a depressing commentary upon the credit system of the day in Canada, and the easy going way in which sales are made by wholesale firms. We cannot believe that if it had been known that the Messrs. Mills, however good their reputation, owed one house $10,742 and *a hundred and twenty-four* other houses nearly $23,000 more, they could ever have made such an exhibit of liabilities as they do to day. Doubtless it was because the firm's credit was so good that everybody was willing to sell them on credit. But such a result as this is a condemnation of the system. The meeting of creditors agreed to accept a compromise of 50 cents in the dollar, cash, and gave Messrs. Mills a week in which to arrange for payment of the same.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, May 16th, compared with those of the previous week:

Clearings.	May 16.	May 9.
Montreal	$12,208,843	$12,060,006
Toronto	5,881,553	6,310,145
Halifax	1,063,193	1,366,972
Winnipeg	880,921	1,048,212
Hamilton	576,247	677,277
Total	$20,610,757	$21,462,612

Aggregate balances this week, $2,852,860; last week, $3,100,867.

—A city journal commented upon the fact of Judge Street leaving his seat on the bench, at the Hyams brothers life insurance trial, to inspect some part of the elevator machinery, as remarkable, not to say, unprecedented. It is not unprecedented, certainly, for when a few years ago witnesses had given evidence for days as to the condition of the Gooderham & Worts cattle byres, Chancellor Proudfoot dismissed the Court and went himself to examine the locality. A Boston judge, too, staggered the gentlemen of the long robe, on one occasion, when he had listened for a long time to contradictory testimony in regard to the width of a certain street. In the midst of the matter a recess was taken and the judge disappeared. When the Court re-opened, he took his seat and prepared to listen. More witnesses were called to testify as to feet and inches in the width of the thoroughfare, but the judge waved his hand, saying: "You needn't go on any longer about the width of that street; I have been out during recess and measured it myself."

—The twenty-second National Conference of Charities and Correction is to be held at New Haven, Conn., from May 24th to 30th. The president of the conference is Robert T. Paine, of Boston, and the secretary, H. H. Hart, the State Capitol, St. Paul—who, by the way, is to give a paper on "State Emigration." The local committee for the occasion consists of one hundred and twenty citizens, male and female, of the beautiful Elm City. Discussions will be held upon the "Tramp Problem;" "Training Schools for Nurses;" "Juvenile Reformation;" "Charity Organization;" "Child Saving Work." On the last-named of these Mr. J. J. Kelso, of Toronto, is to read a paper. Among the secretaries of this body are Mr. John W. Sifton, of Winnipeg, and Dr. Rosebrugh, of Toronto.

—The directors of the Exhibition Association at St John have succeeded in arranging with the managers of the P. E. Island exhibition so that the full exhibit of their fall fair will make its appearance at the New Brunswick show. Arrangements have been made by the St. John people for the erection of needed new buildings. Especial attention is being given, it appears, to improvements in connection with a machinery hall. A joint committee composed of the live stock, agricultural and dairy and other committees of the Exhibition Association met a delegation from the Farmers' and Dairymen's Association of New Brunswick on Saturday last, and conferred about details.

—At a special meeting of the Nanaimo Board of Trade last week the resolution adopted by the Victoria Board of Trade was discussed, and a resolution unanimously adopted: That the attention of the Dominion Government be called to the fact that the lands through which the extension of the Esquimalt & Nanaimo Railway is projected are owned for a width of about twenty miles by the E. & N. Co., and that before the grant of $3,200 per mile be given them they should agree to allow their lands to be opened to actual settlers at $1 per acre, the same as land now pre-empted by actual settlers from the British Columbia Government.

—The annual meeting of the Toronto Street Railway Company, adjourned from January 16th, was held on Wednesday last, when the following gentlemen directors were re-elected: William McKenzie, James Ross, George A. Cox, James Gunn, and H. A. Everett. The company was entitled by by-law to elect seven directors, but the choosing of the other two has been deferred. The statement of the earnings for last month is as under: Total income, April, 1895, $75,-199.54; total income, April, 1894, $67,990.60. The operating expenses in April, 1895, were $39,205.27, and in April, 1894, $44,110.16. The total net gain for April, 1895, was thus $12,116.77.

—The equipment of the Montreal Street Railway appears to be keeping pace with the traffic, and Mr. Cunningham says it is in splendid order. There are thirty open cars on the streets this summer, as against thirteen last season, and one hundred and thirty-five motors, as against ninety-eight in 1894. Among the improvements contemplated by that corporation during the summer of 1895 is the double tracking of Notre Dame Street and Chaboillez Square to Fulford Street, and other important extensions.

—Reports of a mutual understanding between manufacturers of paper whereby the output is to be regulated, if prices are not advanced, are still current, says the *Shipping List* of New York. The more recent rumor has grown out of the presence, in New York, of numbers of representative mill owners who, it is said, have been conferring together regarding ways and means for the betterment of business. It is stated that a consolidation which includes, with two exceptions, all the principal mills in New England, as well as in New York State, has been effected

—Referring to the paragraph in our last which noted the delay in receipt by Canadian importers of British invoices for goods until two days after the goods themselves had arrived, orders were given by the Postmaster-General that the outgoing mail for Britain should be sent by the "Labrador" of the Dominion line. The instruction came after the "Labrador" had sailed from Quebec, but the manager of the line wired the captain of the steamer at Father Point to proceed to Rimouski and await the arrival of the mails

—We are informed that Mr J. M Duff, manager of the Galt branch of the Canadian Bank of Commerce, has been appointed to the charge of the Guelph agency of that bank, succeeding the late Mr. B. Ross McConkey as manager. Mr. Duff has been for some years with the Bank of Commerce, has given satisfaction in charge of different branches in the west of Ontario, and has made himself esteemed as a good citizen in Galt

The Merchants' Bank of Canada intends opening a branch at Hespeler, Ontario, on 1st June. Mr. H. M. Wurtele is appointed interim manager.

Meetings.

CITY AND DISTRICT SAVINGS' BANK.

The annual meeting of the shareholders of the City and District Savings' Bank was held in Montreal on Tuesday, 7th May, the president, Hon. Edward Murphy, in the chair.

The president submitted the report of the directors, from which we give extracts :

The net profits for the past year were $114,430.51, which, added to the balance from last year, bring the profit and loss account to $227,099 08. From this two dividends have been paid, and the amount at credit of profit and loss is now $147,099 08.

The business of the year has been satisfactory; fair rates have been obtained for loans during the greater part of the time, and no losses have been incurred. The volume of business transacted during the year amounted to sixty-six million dollars. The average amount due to each depositor is $117.58, as against $177.93 in 1893. The number of open accounts on 31st December last was 48,145

The manager presented the statement of liabilities and assets, as under :—

LIABILITIES.

Amount due depositors	$ 8,549,531 25
Due Receiver-General	93,341 86
Due Charity Donation Fund	180,000 00
Due open accounts	62,845 05
Due profit and loss account	147,099 08
Due reserve fund	400,000 00
Due stock	600,000 00
	$10,032,817 24

ASSETS.

Canada Dominion Government stock and accrued interest	$ 1,530,000 00
City of Montreal and other municipal and Provincial Government debentures	2,077,021 52
Loans to Provincial Government and municipal corporations	355,905 50
Loans secured by collaterals	4,564,598 90
Bank premises, head office and its four branches	400,000 00
Charity Donation Fund, invested in municipal securities approved by the Dominion Government	180,000,00
Other assets	66,841 17
Cash on hand and in chartered banks	858,450 15
	$10,032,817 24
Number of accounts open	48,145

Average amount due each depositor, 31st December, 1894, $117.58.

The report of the auditors, Messrs. James Tasker and Mr. Nolan de Lisle, stated that they had examined the books, vouchers, accounts, etc., of the bank for the year, and had found them to be correct and kept in a very regular and systematic manner.

The reports and financial statement were adopted, on the motion of the president, seconded by Mr. R Bellemare.

A vote of thanks was accorded the president, directors, manager, and other officials for their services, which was briefly acknowledged by the president.

The election of directors was then proceeded with. Messrs. M. Burke and R. Miller were appointed scrutineers, and in due course reported that the old board had been re-elected, viz.: Hon. Edward Murphy, R Bellamere, Dr. Hingston, James O'Brien, Hon. J. A. Ouimet, E J. Barbeau, F. T. Judah, J. H. R. Molson, Hon. J. A. Chapleau, and Sir Joseph Hickson.

At a subsequent meeting of the directors, Hon. Edward Murphy was re-elected president, and Mr. R. Bellamere, vice-president.

STOCK TRANSACTIONS.

The following are the stock transactions on the Toronto Stock Exchange for the week. The first figure given is the number of shares; the second, the lowest price; the third, the highest price realized. Total for the week was 4,352 shares:

Sales of Ontario Bank, 6 at 85; Commerce, 185 at 140, 141; Imperial, 52 at 185½, 186½; Hamilton, 23 at 160, 161½. British America Assurance, 99 at 118; Western Assurance, 890 at 160, 160⅞. Consumers' Gas, 52 at 199, 199½; C.P.R. stock, 150 at 53½, 54; Commercial Cable, 1545 at 148, 150½; Bell Telephone, 98 at 156, 157; Montreal Passenger Railway, 50 at 197; Toronto St. Ry., 1025 at 75⅜, 76; Canada Landed and Nat. Invest. Loan Co., 29 at 123½; Huron and Erie Loan, 60 at 157 (20 per cent.); Imperial Loan, 5 at 115; London and Canadian Loan, 61 at 117, 120; Ontario Industrial Loan, 10 at 48; Union Loan, 12 at 130.

BRITISH GRAIN MARKETS.

L. Norman & Co.'s, Ltd., weekly grain report, dated London, May 6th, 1895, says: "Another active week with stronger markets has again characterized the grain trade since our last report of the 29th ult. The American markets have again taken the lead, and although this market has somewhat responded, Continental speculators have been more quick to follow. In the U. K. buyers generally have been cautious of the continued advance in the U. S. A., and to-day, with fine weather and liberal shipments, especially from Russia, coupled with the opening decline in America, have produced a quiet feeling in the market, and an indisposition to buy.

"*English Wheat*, owing to scarcity and to its excellent condition, has maintained its value, and in some cases more money has been paid.

"*Foreign Wheat* to-day in London has been very slow to sell, and transactions have taken place at last week's prices. Russians to-day are offering freely on rather lower terms, but the transactions recorded are practically those of re-sellers, who are anxious to secure their profit. First-hand business is still difficult, owing to the exorbitant prices asked by shippers. A deal of attention is still turned to Californian, La Plata and Indian wheats. For No. 1 Californian afloat 26s. 1½d. has been paid. South Australian afloat is offering from 25s. to 25s. 6d., but for shipping nothing is offering. River Plate sailers afloat are on sale from 23s. 9d. to 24s. At the latter price several cargoes have changed hands. For American red winter afloat 24s. 3d. taken. For No. 1 hard Manitoba on passage 26s. 6d. paid and 27s. asked for May-June shipment.

"*Barley*.—Grinding barley parcels are quiet and rather easier, buyers apparently having satisfied their requirements for the near future. For Azof, Black Sea, parcels for shipment 14s. 9d. asked, and Odessa Nicolaieff parcels 15s. 3d. wanted.

"*Maize*.—Steady. Odessa prompt is offering at 22s. 9d., but fails to find buyers. A deal of attention has been turned to mixed American, which has sold to-day at 21s. 6d. afloat, and at three-halfpence less for prompt shipment.

"*Oats*.—Steadily held, but poor demand.

"*Peas*.—Unchanged at last week's prices."

THE UNITED STATES' DEBT.

Mr. Edward Atkinson, the American statistician, has prepared a statement of the national debt of the United States. According to Mr. Atkinson, the bonded debt of that country on April 30th was $717,956,570. To this he adds the legal tender issues under the acts of 1861-2 of $346,681,016, making the total war debt yet outstanding, $1,064,637,586. There are outstanding silver certificates to the amount of $445,055,771; then there is a demand debt due for the redemption of bank notes, etc., of $29,050,608, and current liabilities on account of the Government of $39,935,795. The gross debt is $1,578,679,761. There are assets of various kinds allowed as an offset, which reduce the total to $1,428,733,478. Mr. Atkinson's purpose is to show how much of the national obligations are the result of the Government's venture into the field of banking, and he therefore excludes from his calculations of assets silver of various sorts held of a nominal value of $510,813,574, but of a real value of about half that sum.

COAL SUPPLY OF THE WORLD.

The sensational statement was made recently that a valuable seam of coal has been discovered near Dungannon, in the North of Ireland, and that the quality is "much superior to Scotch coal." But coal is no novelty in Ireland. It has been raised there for many years past—though only to the extent of 100,000 tons or so per annum—and principally at a place called Coal Island, near Dungannon, in County Tyrone. The seams are of fair thickness, and the coal is highly gaseous, but in all Ireland it was computed by the Coal Commission of 1879 that there are not more than about 180,000,000 tons, of which two-thirds are anthracite.

Another recent sensational statement was to the effect that a vessel had arrived in the Tyne with a cargo of 2,000 tons of coal from Australia. This is carrying coals to Newcastle with a vengeance, but it is explained that the cargo was imported for the purposes of gas-enrichnent, just as for years past it has been the custom to import cannel coal into the Tyne from Scotland. These two incidents, following upon the recent disturbances in the mining districts of Scotland, and in view of the agitation in progress in South Wales, suggest an inquiry into the whole subject of the coal supply of the world. . . .

To sum up, in conclusion, the following would appear to be about the present coal production of the world on a normal, not a strike, basis :—

		Tons.
British Empire.	United Kingdom	185,000,000
	Australia and New Zealand	5,000,000
	Canada	4,000,000
	British India	3,000,000
	Cape Colony and Natal	200,000
	Transvaal	400,000
	Germany	74,000,000
	France	25,250,000
	Belgium	19,500,000
	Austria-Hungary	10,250,000
	Russian Empire	6,500,000
	Rest of Europe (say)	2,000,000
	China (say)	1,000,000
	Japan	3,500,000
	Chili	2,500,00
	United States	170,000,000
		512,100,000
	Add Lignite as per previous table	41,600,000
	Grand total	553,700,000

This is a very much larger total than most people who have given any thought to the subject will be prepared for, but we are within rather than without the mark, as we have not included the unknown produce of French Further India, of Turkey, and of Eastern Siberia. But our total is approximate enough for all practical purposes, and it shows that the United Kingdom now only produces about one-third of the coal supply of the world.—*Iron and Steel Trades Journal.*

WHERE THE MONEY GOES.

According to the statement of the Finance Minister the estimated expenditure of Canada for the next fiscal year is $41,243,417. Here are a few of the items of this very considerable total.

The House of Commons requires to be provided with 588 pearl knives, 19 sample pocket knives and 48 buckhorn knives. The Auditor General asks for some explanation as to the object of purchasing this large number.

The World's Fair accounts amounted to $113,937. This was for representing Canada at Chicago, and it was money well expended.

The sum asked for superannuation is $273,000, a statutory increase of $13,000.

The vote for the mounted police is cut down from $655,000 to $500,000, the reductions being pay of force, $50,000; subsistence, etc., $52,000; clothing repairs and revenues, $30,000; scouts, guides, etc., $8,000; new building and repairs, $15,000.

The expenses of the high commissioner's office, in London, amounted to $28,887. This is divided into $10,000 salary for Sir Charles, $8,200 for his staff, and $10,687 for contingencies.

An order in council has been passed fixing the amount of expenses of judges holding weekly sittings of the High Court of Justice, at Ottawa and London, as follows: For each sitting in Ottawa, $25; for each sitting at London, $10.

The appropriation for Toronto post-office provides for 135 letter-carriers, a reduction of three as compared with last year.

The vote for Kingston penitentiary is cut down $27,000. Among the general reductions in all penitentiaries is the allowance for tobacco for convicts, which is cut down in every case.

—The Galt and Preston Street Railway Company expect to have the Hespeler extension opened and in running order by the first week in July. The contracts are now being let.

A GREAT LAKE PORT.

The growth and supremacy of Cleveland, Ohio, in fresh water ship-building and ship-owning—she owns 241,000 registered tons where ten years ago she had only 91,000—is matter of recent date. It is accounted for thus by Mr. Mulrooney, of the *Plaindealer*:

"Ten years ago the iron ore firms represented by the gentlemen here referred to [Col. James Pickands, H. G. Dalton, L. C. Hanna, Harvey H Brown, W. D Rees, W G Mather, J. H. Sheadle], with the exception of the house of Hanna & Co., owned practically no vessel property. But their interests in iron ore were kindred interests, and when a boom in the steel industry—a change from iron to steel for structural purposes of all kinds - was inaugurated, they became vessel owners and they have since systematized the business to a wonderful degree. Their interests and those of the corporations they represent in coal and iron mines, railways and docks, have been made to fit in with the ships until the whole involves a network of freight handling facilities that is unequalled elsewhere in the world."

After so unprofitable, though by no means inactive for vessel men, a season as that of 1894 on the lakes, it is encouraging to hear from the Cleveland gentleman named as follows. And he ought to know:

"There are seventeen new freight vessels of about 51,000 gross tons capacity to leave the shipyards shortly. Ten steamers of the modern 400-foot type will carry 1,000,000 tons of freight in a single season. What will be the effect of this new tonnage and what are the prospects for 1895? The answer as regards the older and small type of wooden vessels, not built within the past ten years, is plain. They are already outclassed and must drift to special trades in which profits at best must be moderate. The vessel interests are, however, pinning faith to the general revival in all branches of business and will not tie up extensively to low contracts for the coming season." The production of pig iron in 1895 is likely to be the greatest ever known.

MR. AMICUS MEETS A WIDOWER.

The cemetery at Hayville is a very restful place. Sometimes of a Sabbath afternoon myself and Mrs. A. wander through the grounds and read the epitaphs

We met an old gentleman in the cemetery whom I had insured in the Mutual Life thirty years ago. He had upon his arm three large green wreaths studded with bright-red everlasting flowers, and he was standing by the side of a lot in which there were three mounds, each marked by a neat yet chaste headstone

"Ah, Mr. Amicus," said he, "this is a sad duty I perform every year. I have come to give the girls their Christmas. You remember I lost my last wife in 1891."

"You were married three times?" inquired Mrs. Amicus.

"Yes, ma'm, and three very good women they were. And do you know that the policy for $20,000 that I took in the Mutual Life was an encouragement and a joy to all three of them. It made them all so hopeful. I had the policy assigned to each in turn. Mary Ann—my first wife—used to say that she didn't want the money and that if I died she would never touch it. Poor thing! Of course she never did. I gave $200 for that headstone.

"I took out the policy just before Christmas, and I used to say to her every year, 'Here's so many dollars for your Christmas, that I am going to deposit in the company for you'; so much better than a sealskin sacque or any foolishness of that sort

"When I married my second wife I assigned the policy to her, and she used to sit up at nights looking at it. But her lungs were weak, and she didn't hold out long. See that inscription

"'A flower, too sweet for earth,
Transplanted in the Garden of the Lord.'

"That's original. My last wife was always very snappy and irritable when we used to come out here to decorate these graves. I remember her saying that a more appropriate inscription on this stone would be,

"'Peace at Last.'

or something like that

"Charlotte was a lovely woman, but always had a funny objection to this cemetery. She used to say, 'If you bury me there with those others I will come and haunt you.' She fills out the lot there nicely, and I have never heard anything from her

"She was always interested in that policy, and the copy of the expectation tables pinned to it. Indeed, Mr. Amicus, you were the means of making all three happy."

The expression upon the countenance of Mrs. A was a study as she remarked, "We must be going," and turned away towards the entrance to the grounds. "I think it simply disgusting," she said. "I feel as though I had been to visit Mr. Bluebeard."

"Well," said I, "it is extraordinary what opportunities are afforded some men for enjoying Christmas."

AMICUS,
In the Weekly Statement.

—The residents of Pelee Island in Lake Erie have faith in their domain, which is exceptionally favored by nature. They believe, for instance, that there are limitless quantities of oil in the earth beneath the island. It is said the oil oozes out of the ground in so many localities that it is difficult to have a surface well with water fit for household use, it becomes so impregnated with oil. The Kingsville and Pelee Gas and Oil Co. have contracted for the drilling of several oil wells, work to commence in May. The company also expects to find natural gas, and if they do it will be tubed to Cleveland and Sandusky, Ohio, by means of marine tubes, to the point of consumption.

—In a case before a Paris court, in which a popular actress has had to appear as a witness, the judge seems to have shown considerable diffidence about asking the lady, as he was in duty bound to do, what was her age. Evidently he considered that such a question put to a witness would be a direct incitement to perjury, so he asked her age before she had been sworn. "How old are you, madam?" he said. After a little hesitation, the lady owned to being 29 years of age. "And now that you have told the court your age," continued the gallant judge, "you swear to tell the truth, the whole truth, and nothing but the truth."—*Cincinnati Times-Star.*

—A vessel to make a tour of the world, with a view to open up trade between Russia and Australia, is being fitted up as a floating exhibition by a syndicate of Russian merchants. The between decks will contain sample rooms, while the lower holds will be filled with stock representative of the samples shown, which will consist of lubricating oils, Russian tobacco, hops, silk goods, candles, kerosene, twine, rope, bristles, varnish, etc. The vessel is to leave Reval, on the Baltic Sea, this spring, and Melbourne is expected to be the first port of call, while, if the experiment is successful, other vessels will be put in commission.

—With respect to Canadian woods and the business doing in them, the *Timber Trades Journal*, of April 27th, says: "Both pine and spruce are quiet, most of the stocks of Lower Port stuff having been cleared for f. o. w. Pine has been moving off gradually, but there is still a large quantity to place before the opening of the Upper St. Lawrence. There is nothing in the freight rate to check business, 35s. being now the ruling figure from Quebec to U. K. at which ships have been fixed, and no difficulty is experienced in going on at this rate."

—The Pacific Coast Lumber Co., whose mill at Westminster has a capacity of about 150,000 shingles and 20,000 feet of cedar lumber per day, are shipping per C. P.R. from four to six carloads per week to Ontario and the Northwest, besides making occasional shipments to various parts of the United States.

"I tell ye, Tom," said Uncle Hayseed, "you went out into the world an' seen lots, but never saved nothin'. I stayed to home and I'm worth money. It's the rollin' stone idee all over again; rollin' stones don't gather no moss." "It's very true, Silas," replied Tom, "I'm polished smooth, but you are called the leading mossback of the town."—*Harper's Bazar.*

—Dominion Inspector Keeley has been instructed to have the break in the cable between Pelee Island and the main land repaired.

—Many a young fellow buys a bicycle built for two on an income built for one.—*Philadelphia Record.*

—In the city of Tokio, Japan, there are 400 dailies and 300 periodicals, which are sold at from 1 to 2 cents each. The circulation of these combined publications is nearly 8,500,000.

—However it may have been among the Delaware peach blossoms, there are no dead locks among the lilacs.—*Record.*

Over 13,000,000 Feet of Land for Sale

Situated in Hochelaga Ward, Beginning at Frontenac Street

This property is well located for factories: the Canadian Pacific runs through its centre, and sidings may be built to any part of it. Easy of access by electric cars.

Terms easy. Apply to

HENRY HOGAN, Proprietor
St. Lawrence Hall, Montreal

Our Advice

To those about to buy a Bicycle

For Satisfaction

Don't go over 21 lbs., or you will want to sell your wheel before the season is over, and can't give it away in '96.

For Safety

See that the frame is constructed so that breaks cannot occur at its joints.

For Easy Running

See that every cone and ball cup is ground accurately true after being hardened.

For Comfort

Insist on 1¾ inch road tires.

All this can be had in a

Gendron No. 19.

The National Tube Works, at McKeesport, which have voluntarily advanced wages 10 per cent., is called the largest concern of the kind in the world.

—"I don't see why they call these accommodation trains," puffed a fat woman at the Reading Terminal yesterday. "They don't wait for you any more than the express trains."

MONTREAL MARKETS.

MONTREAL, May 15th, 1895.

ASHES.—Values are stiffer at $4.10 to $4.15 for No. 1 pots, transactions having taken place at the latter figure, seconds $3.80; pearls, $5.50 and upwards. The present stock on hand is only about 80 pots and 10 pearls. Receipts were 201 brls. behind last year on the 1st inst., but this month so far is quite a little ahead of May last year.

BOOTS AND SHOES.—Letter orders for sorting lots of footwear have been quite numerous, and some of our factories have been kept quite busy in this way. A good many travellers are now out looking for fall business, and though some of them report fair encouragement, others say that it is hard to get buyers to accept the advanced prices. The evident improvement in prospects for business is, however, encouraging.

CEMENTS AND FIREBRICKS.—The Government contract for 25,000 brls. of cement, spoken of by us a fortnight ago, has been awarded at $1.99 delivered on the works at the Soulanges Canal. The specifications were particularly strict as to quality and test. A fair trade is doing here at about last week's figures, the tendency being to easier values if anything.

DAIRY PRODUCTS.—The situation is a discouraging one for cheese and butter. The cable quotation for white cheese has declined to 45s. 6d., and there is little or no trading in that article being done. Seven cents is an outside figure at the moment for goods now offering, but there is the hope that values are so low that improvement must soon set in. Butter also moves very sluggishly, and little trading is being done, except in creamery, at about 16c. per lb. Eggs are steady at 10 to 10½c. per dozen.

MONTREAL GRAIN STOCKS IN STORE.

Flour	22,699	20,560
Buckwheat	34,939	23,533

DRY GOODS.—A fair proportion of sorting business is being done, some houses reporting a good many letter orders, while travellers are also securing quite a few commands for certain lines of fall goods in the way of woolen underwear, tweeds, &c. It is pleasant to hear of further improvement in remittances. Raw

The HOUGHTON PATENT KEY-LOCK WRENCH

Is the strongest and most durable made. It has no equal for ease and rapidity of adjustment.

cotton continues to show much strength, and the Montreal Cotton Co. has just issued a trade circular announcing that they cannot bind themselves to accept orders for future delivery at present prices. The Dominion Cotton Co. has just declared its quarterly dividend of 1½ per cent.

GROCERIES. Orders are not heavy in this line, because country buyers seem loath to accept the strong advance in sugars, but a fair distribution may be reported. Just after last writing refiners announced an advance of an eighth of a cent, and on Monday of this week another eighth was put on, making the factory figure for granulated now 4¼c firm; lowest grade yellows are 3⅞c., but little of these are available at below 3½c. Refiners have made offers to the wholesale trade for yellows, at seven-eighths advance on what they sold the same goods at a couple of weeks ago. It is said that quite a few houses have pretty large contracts with the refiners at about 3¾c., made before lowest prices were reached, and which in some cases extend to July and August, so that sales in a jobbing way will likely be heard of for some time at figures rather below the present level. The Milling Company has done nothing as yet towards revising prices of rice. Teas are quiet on spot. A couple of fair lines of Japans were sold to Chicago on Tuesday. Last advices from Japan report a probable scarcity of 16 to 18c. goods. Some small lots of first pickings are afloat for this market. London reports say that market is pretty well cleaned out of blacks, and awaiting new crop. Dried fruits are quiet; some new supplies of California loose muscatel raisins are to hand, and 3-crown's are being sold at 5½c. There are very few Valencias here.

HIDES.—There is continued great scarcity of supplies in this market, and dealers are now paying as high as 8 to 8½c. per lb. for No. 1, another advance on last week. Tanners are asked 9 to 9½c. for cured, and in some cases 10c. per lb. Calfskins are quoted at 8c., lambskins 15c., sheepskins 75c. each.

LEATHER.—Sole leather is very stiff at last week's advance, there have been rumors of a further rise, but this lacks confirmation. Only moderate transactions are reported since last writing, and there is no export movement to England, where values are not nearly so strong as here. We quote:—Spanish sole B.A. No. 1, 22 to 23c.; do. No. 2 to B.A., 20 to 21c.; No. 1 ordinary Spanish, 20 to 21c.; No. 2, 19 to 20c.; No. 1 slaughter, 23 to 25c.; No. 2 do., 22 to 23c.; common, 19c.; American oak sole, 40 to 45c.; waxed upper, light and medium, 32 to 35c.; do. heavy, 27 to 31c.; grained, 32 to 35c.; Scotch grained, 32 to 35c.; western splits, 20 to 23c.; Quebec do., 17 to 20c.; juniors, 14 to 16c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 30c.; Canadian, 20 to 22c.; colored pebble cow, 13 to 14c.; russet sheepskin linings, 30 to 40c.; harness, 25 to 32c.; buffed cow, 12½ to 15c.; extra heavy buff, 16c.; pebbled cow, 12½ to 15c.; polished buff, 12 to 14c.; glove grain, 12½ to 14c.; rough, 22 to 25c.; russet and bridle, 40 to 50c.

OILS, PAINTS AND GLASS.—Business in these lines of merchandise is reported fairly good. No marked changes in values are to be noted since our report of a week ago. Turpentine is coming in pretty freely by rail, and is easier at 45 to 47c. per gal., as to lot. Linseed oil is unchanged. For fish oils there seems to be no enquiry. Window glass is rather easier in price, and some new supplies are close at hand. We quote:—Turpentine 47c. per gal. for single brls.; two to four barrels, 46c.; 5 brls. and over 45c. Linseed oil, raw, 55c. per gallon.; boiled, 58c.; 5-barrel lots, 1c. less: olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½c.; tins, 6½c.; Nfd. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c. per gal., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to $4; dry white lead, 4½ to 4¾c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, $1.75 in bulk, $1.90 in bladders, $2 in tins; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; Paris green, 12½ to 13c. in bulk, 13½ to 14c. in small packages; window glass, $1.15 per 50 feet for first break; $1.25 for second break; third break, $2.70.

METALS AND HARDWARE.—Leading houses report an improvement in the movement of heavy metals within the last week or ten days. No large lots are wanted, but the aggregate of general business is gratifying as compared to what it has been for so long. Sales of Summerlee pig iron are reported in car lots at $20 per ton; this is the only brand of Scotch iron wanted, others being quite neglected, and imports of pig so far are virtually *nil*. Domestic bars are freely sold at $1.55, even in small lots. Canada plates have been offered at $1.95 in blocks, but in an ordinary way $2 to 2.05 is asked. Coke tins have been offered in large lots for import at $2.60, but late letter advices report some little stiffening in Britain. Ingot tin has made a move upwards, and is now quoted at 17 cents. Copper is also rather firmer. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder, No. 3, none here; Summerlee, $20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, No. 2, $17.00; Carnbroe, $18.50; Shotts, none here; Middlesboro, No. 3, $17.00; Niagara, No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $15.75 to 16.25; Ferrona, No. 1, $15.75 to 16.25; machinery scrap, $14.00 to 15.00; common do., $12.00; bar iron, Canadian, $1.55 to 1.60; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2.00, 52 sheets to box, 60 sheets $2.10 to $2.15, 75 sheets $2.20 to $2.25; all polished Canadas, $2.50; Terne roofing plate, 20x28, $5.75 to 6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5 to 5.50; charcoal I.C., $3 to 3.25, according to finish; P.D. Crown, $3.75; do. I.X., $4.50; Coke I. C., $2.70 to 2.90; coke wasters, $2.50; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots. Morewood, 5½ to 5¾c.; tinned sheets, coke, No. 24, 5¾c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 7 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

TORONTO MARKETS.

TORONTO, May 16th, 1895.

A greatly improved feeling is manifest in a number of lines of business. This arises in part from the steady advance in values which has taken place in various commodities on both sides of the Atlantic, and in part from the increase of demand which shows that country storekeepers are bare of goods. Hides and leather are conspicuous instances of articles in which the advance of price has been strong. And while an increase of price in metals and hardware is not yet so pronounced, the revival in metal industries in the United States is so great that a general advance in iron and steel goods, as well as in tin, is almost a certainty in a very short time.

The grocery trade is extremely active. First among the items to take a leap upward, after falling steadily for fifteen months, is sugar, the market for which is strong and looking upward still. Prices are advanced this week for all kinds; syrups and molasses, too, are up. Teas are meanwhile unchanged. Canned goods are very firm, as well as active, holders of fruits being stiff in their views, pending further intelligence as to the effect of the recent frost upon the budding and flowering trees.

DRY GOODS.—Not many buyers in town, but a fair number of letter orders and travellers' orders. Generally speaking, the country retailer is buying carefully and in smalls. Money has come in fairly well. The prices of some are going up. Canadian cottons, for instance, cannot be laid down from the mills (in some lines) in future without an advance. And, although knitted goods in woolens are not at present higher, the general appreciation of wool must result in a firmness; the like may be said of blankets. All woolens are firm in Britain; worsteds and Italian cloths subject to advance by makers; the same may be said of creponnes and other dress goods. Fancy silks, too, are looking up very decidedly, but plain dress goods are quiet and steady.

DRUGS.—There is the ordinary amount of spring business doing in drugs and proprietary articles, and in fancy goods and druggists' sundries the demand is picking up. There are not many changes to be made in quotations, but they are for the most part upward. Cream tartar is firm and advancing; glycerine is also looking higher; camphor is on the rise, and we quote it 57 to 65c.

FLOUR AND MEAL.—The flour market is fairly active, and the tone very firm. Transactions are not large, but steady. In some grades, such as winter patents and straight roller, there is a strong advance, because Ontario winter wheat, being scarce, purchases have been made of American and the duty of 15c. per bushel paid, both in Toledo and Detroit, by Canadian millers to make these grades. We quote winter patent, $4 to 4.10; straight roller, $3.90 to 4.00; there is no extra in market, but it is nominally quoted at $3.60 to 3 80. Oatmeal is steady; bran getting lower in price, not much offering, and not many enquirers; $14 to 14.50 still represents the market.

GRAIN.—The feeling in wheat is firm, indeed it may be termed locally strong, for all kinds seem to be scarce in Ontario. We make no alteration in prices of wheat to-day. Dealers in Detroit and Toledo are making sales of red winter at 68c. to Ontario millers, who pay 15c. per bushel duty thereon and get low rates of freight on it by rail. But the American white winter is worth 4c. per bushel more across the lake and cannot compete with our Canadian white at 85c. for No. 1. Red winter has been brought to Toronto from Montreal within the week, an unusual proceeding. Manitoba hard is scarce and firm at 90 to 91c. for No. 1. The barley season is over, and quotations are nominal; oats are scarce and firm, with good demand both for local use and for shipment to Quebec and Nova Scotia: peas are quiet and steady at 58 to 59c.; rye, nothing doing; corn purely nominal.

GROCERIES.—Much activity is found in wholesale warehouses. Advices of Tuesday last from London show an advance of 6d. in sugar, whose primary markets are all firm; the general advance in yellows mentioned last week is maintained, the local market being strong and looking upward; syrups are up ⅛c. per lb. all round, molasses too is higher; canned goods are very active; one house has sold several thousand cases in the last few weeks, a good number being for the North-West; there is a decidedly stronger feeling in canned fruits, one cause being the probable injury to the growing crop by the frost of Sunday night. Trade in teas has been quiet for the week, with prices thus far unchanged. The Japan market opened higher than last year, and the latest advices announce that a heavy business has been done, with the market a trifle easier. It is too early to mention price for the new teas.

HARDWARE AND METALS.—Warehouses are busy with orders of a general character. This is the season, of course, for field implements, and a good many of them are wanted, but there is a steady request for general shelf goods as well. Orders from the country indicate that builders' supplies are wanted, and Toronto houses report much demand for fencing wire, cordage, rope and certain kinds of tools, poultry netting and lawn mowers. The feeling in Britain in all descriptions of metal goods is firm, and advices from the United States say that, owing to increased price of raw material and advancing wages, there is likely soon to be a general advance in prices. In iron pipe and sheeting there is already an advance in the States. Many American makers are extremely busy. The advance in price of United States pig iron is about 75c. per ton; we quote Bayview $19.50; there is no Summerlee in market. Ingot tin is higher, we advance quotations; lead and copper are meanwhile steady.

HIDES AND SKINS.—The situation in hides is extraordinary, and it is hard to say what may develop. There is no "let up" in Chicago as to the strength of prices, and quotations are advanced here in sympathy another half cent to 7c. for green, with 8 to 8½c. asked for cured and inspected, although there is no stock here. The supply of sheepskins is falling off; lambs and shearlings, on the other hand, are more plentiful. Tallow is weak; the recent advent of Australian tallow has affected this market.

PAINTS AND OILS.—There is an improved feeling, accompanied by a rather better demand. Leads are firm at $4.50 to 5.00 for pure white in oil, and $4 to 4.25 for red. Linseed oil is steady; the basis price is 53c. for raw and 56c. for boiled, net at 30 days, but smaller quantities sell at higher figures. Turpentine is in fair supply; the price is 45c. per gal. net 30

The "Monarch Economic" Boiler

No Brickwork,
Furnace Surrounded by Water.
NO HEAT WASTED.
No Cold Air Leaks into Furnace.
Water Circulates Rapidly.
Large Effective Heating Surface.
SAVES FUEL.

These prices are wholesale by the car-load.

days. Paris green is in active demand, with a very firm market and probabilities of short supply; we quote 13c. per lb. in drums, and 15c. for pound packages.

PROVISIONS.—There is not a great deal of activity in this branch Dairy products, for instance, are very slack; the butter market still continues depressed, only the best qualities are saleable; large rolls bring 10c. to 12c. per lb.; old butter is quite neglected, offered at 4c. per lb. and not taken. Cheese is weak; sales were made at Ingersoll market on Tuesday last at 6½c.; the local jobbing demand is supplied at 8 to 8½c. per lb., with lower prices believed to be at hand. In hog products there is no change; they are quiet and steady. Eggs are bringing 10 to 10½c. per doz. Nothing doing in either dried or evaporated apples.

WOOL.—The first bundle or two of the new clip has made its appearance on the farmers' market and 17c. per lb. was paid for it; still this cannot be taken as establishing a price, it is too early; another week will be required to determine. Meanwhile dealers say that data drawn from American and other markets will not admit of more than 17c. being paid here just now for fleece. There is no old domestic wool in market. Prices at the London wool sales showed a fall of 5 per cent.

BRITISH MARKETS.

Gillespie & Co.'s prices current, dated Liverpool, May 3rd, 1895, say: Sugar—Raw is firm, and prices favor sellers. Refined is about 6d. per cwt. dearer on the month. Rice shows signs of improvement at 7s. 3d. to 7s. 6d. per cwt. for usual good quality of Arracan and Rangoon. Chemicals, &c., are generally very idle, and any changes are mostly in a downward direction. Sixty per cent. white caustic soda offers at 6s. 6d., and bicarb. soda at 5s. 3d. per cwt., less 2½ per cent., f.o.b. Lump alum in barrels at 4s. 7½d. per cwt., is expected to advance. Cream tartar has advanced to 67s. 6d. to 69s. per cwt., less 2½ per cent., on spot here. Oils—Olive remains firm at £30 to £31 per tun for good ordinary in barrels. Palm rather easier at £20 5s. to £20 10s. per tun for Bonny and Lagos respectively. Castor oil improving at 2⅜d. to 2¼d. per lb., all less 2½ per cent. Freights, by steamers, are quoted as follows: Montreal, groceries, 7s. 6d.; chemicals, 8s. 6d. to 10s.; oils, 10s. to 17s. 6d. Toronto, groceries, 16s. to 17s. 6d.; chemicals, 17s. to 18s. 6d.; oils, 18s. 6d. to 22s. 6d. Halifax, N.S., all freights, 12s. 6d. to 15s.; St. John, N.B., all freights, 17s. 6d. to 20s.

S. W. Royse & Co.'s report, dated Manchester, April 27th, 1895, says:—

"CHEMICALS.—There has latterly been more business passing for export, as is usual at this time of the year, but in the home-trade little if any actual improvement is noticeable. A feeling, however, appears now to be gaining ground that the worst of the depression is past. The exports of bleaching materials and alkali show an increase for the three months ended March 30th last, as compared with 1894, in bleaching materials, in weight of 2,065 tons, and in value of £4,188, and in alkali an increase in weight of 4,868 tons, but a decrease in value of £45,691. Bleaching powder is now in good demand at steady prices. Caustic soda is moving better and is rather firmer. Ammonia soda is still dull, but unchanged in value. Chlorates of potash and soda are now steady. Soda crystals and bicarbonate of soda are quiet In the tar products branch there is at present a want of animation. Pitch maintains its value, but little business is being done in it. Solvent naphtha and benzoles are dull; creosote is cheaper, and still does not attract much attention. Crude carbolic has a firmer tone, there being more enquiry for crystals, but liquid is neglected, considering the time of year. Sulphate of ammonia has proved very disappointing, being again lower in sympathy with nitrate of soda, which has also fallen considerably in value, owing to heavy arrivals. Acetates of lime are now ruling steady, prices being very low but not much doing, as most buyers are well covered. Acetate of soda also is quiet, but firm in price. Acetates of lead are only moderate, scarcely affected by the recent advance in lead. Green copperas stocks are decreased, and higher prices are now paid. Sulphate of copper has a good demand, and has improved in value. Export prices for alum are slightly easier. Carbonate and caustic potash have a fair outlet at present. Yellow prussiate of potash is dull. Tartaric acid has advanced. Oxalic acid is firm.

"MINERALS.—There has been a little fresh business doing in iron ore, and prices are showing a tendency towards a lower level. The imports have again fallen away in March, and during the three months ended March 31st last, as compared with the corresponding period of 1894, there is a decrease in weight of 156,571 tons, and in value of £168,031. Chrome ore maintains its position well, notwithstanding the increased quantities coming to hand from different parts. Manganese ore also has a good outlet, and prices remain firm. Phosphates of lime are unchanged; there is a fair demand for sulphate of barytes."

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company that has from its inception given its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low-priced "PAY AS YOU GO" plan to the shortest single premium endowment.

WHO ARE THE STOCKHOLDERS?

By constant iteration, by the harangues of self-appointed agitators, and by the unending plaints of a press that appeals to unrestrained passion, the plutocrat and the corporation have been made almost synonymous. So closely have the two been associated in the public mind that the thought of a millionaire or of a multi-millionaire involuntarily brings up the thought of the grasping corporation, and reversely, the highly capitalized company is pervaded with the master spirit of the "bloated" capitalist But how different is the reality. Corporations are only the instruments employed by men of moderate capital to promote their business interests. At an earlier age these business men pursued their several enterprises individually, but when the undertakings became in time too vast for one man to accomplish, companies were organized and incorporated. The alternative was either cessation of progress or amalgamation of means, and with this alternative presented the only choice of an active and energetic race could be the formation of corporations. Many previous opportunities for investment were displaced by the corporations, and in the latter the thrifty often found almost the only, though a very uncertain, field for their savings.

Some interesting statistics on this point were recently furnished by Senator Quay of Pennsylvania, when the Urgent Deficiency bill was under consideration in the United States Senate. He opposed the application of the income tax to corporations, because while the corporations themselves were rich, the stockholders, upon whom the burdens fell, were, in a great majority of cases, poor. Of the 9,021 stockholders of the Lehigh Valley Railroad Company, only 22 held 1,600 shares or over ($50 par value), the dividend upon which at 5 per cent would amount to $4,000 per annum; 242 other stockholders each held 400 shares and over; 1,319 stockholders held from 100 to 400 shares each, while 7,438, or over 82 per cent., owned less than 100 shares each, and at least 6,000, it was estimated, or two-thirds of the whole, owned 50 shares or less each, their income from this source amounting to $125 or less per year.

The dividend books of the Pennsylvania Railroad Company show the same preponderance of small holdings. Its total number of stockholders, November 30, 1894, was 27,799, of whom 9,373 were foreign holders. The 18,426 American holders were divided as follows: holding 1,000 shares and over, 181; from 500 to 999 inclusive, 237; from 100 to 499 inclusive, 2,710; less than 100, 15,298, par value of stock being $50. Here, too, over 82 per cent. of the stockholders owned 100 shares or less, and their maximum income therefrom was but $250 per year. A large proportion of these small holders are widowed women or orphans.

The same prolificness of small holders exists in most other large corporations. The conclusion, therefore, seems unavoidable that the corporation, instead of representing the plutocrat, much more truly typifies the industrious and frugal element of society.—*Industrial World.*

THE BELL TELEPHONE COMPANY'S NEW BUILDING.

Montreal makes a fine showing of late in respect of new buildings. Another is being erected in that city, and it promises to be a landmark in the commercial metropolis, a splendid addition to the many fine structures lining Notre Dame and St. James streets. It is the modern and handsome structure designed for the Bell Telephone Company of Canada, six stories high, 108 feet on St. John street, 92 feet on Hospital street, 35 feet on Notre Dame street, to be completed by May, 1896, Edward Maxwell, architect. The cost will approach $250,000.

The material of the walls in the basement and ground floor is to be terra cotta ashlar, the superstructure of New Jersey brick of a light salmon color, with terra cotta trimmings and ornamentations. The main entrance, which is on Notre Dame street, will run directly through to Hospital street, making a corridor 10 feet wide and 18 feet high, being panelled on each side and richly decorated in marble, while the ceiling of the hall and vestibule will be vaulted and in marble mosaic.

The ground floor it is understood will be occupied by a bank, the main office 80 feet by 35, the entrance being from the corner of Notre Dame and St. John streets. All the remaining space but one large office will be occupied by the telephone company. Here will be found the sales and local departments, the long distance telephone booths and waiting room.

The whole of the second floor of the new building will contain the company's general offices, the eastern department office, the board room, president's and secretary-treasurer's apartments, stenographers' office, as well as those of the manager, the electrical engineer, the special agents, and large burglar-proof vaults.

On the third floor is found the battery room, as well as the chief operator's office and headquarters of the "trouble" clerks. The remaining space will be taken up by 14 offices, each 18 feet square, to be let to business men. The second and fifth floors are likewise intended for offices. Each office will have gas, electric light, steel vaults and wash basins.

On the fourth floor is the room for which the building is especially erected. This is 32 feet wide and 128 feet long, 18 feet high, with windows on four sides, as well as large skylights. Here will be located the switchboards and other apparatus connected with the telephone business Off from this room will be a recreation and lunch apartment for women operators, 32 feet by 18 feet, and Mr. Maxwell estimates that there will be accommodation for 125 operators.

The boilers, which also occupy a secure place in the basement, will be of the safety water tube pattern and of about 200 horsepower capacity. The elevator machinery will have two dynamos of 1,000 16 candle-power capacity, and special attention has been paid in perfecting the heating appliances of the entire building, fresh air being drawn from the outside, passed through steam coils and forced by large steam fans to every room in the edifice.

The structure will be as thoroughly fire-proof as it is possible to make it, and the windows of rooms containing the apparatus of the company will be protected by rolling steel shutters, so as to avoid danger by fire from the adjoining buildings. A fire-escape will lead to the roof from the operating room, and there will be fire-escapes from every storey leading to the basement, from whence a fireproof passage will lead to the street. To this is added a standpipe for fire purposes with a hose on each floor.

THE RANGE OF AN ACCIDENT.

The range of an accident is exceedingly wide where an insurance company is concerned. According to a recent case in the Supreme Court of Missouri, a man may enter an hotel as a guest, and notify another boarder that he will eject him for the use of profane language, and then proceed to put his threat into execution. But if his opponent objects, and uses a pistol to enforce his objection, the consequence, so far as the ejector is concerned, is an accident.

The logic of this remarkable conclusion is that the person undertaking the assault had no reason to suppose his antagonist was armed, or that being a much larger and stronger man, he would encounter any special difficulty in carrying out his threat. Therefore it was not the assumption of a voluntary danger, nor was it death from a natural cause, but an unexpected event; a casualty—therefore an accident.

It follows from this luminous adjudication that a man may instigate a quarrel and be the assailant in the fight which follows; he may be without a shadow of justification for his course; but so long as, by reason of personal skill or strength, or any other advantage, he may expect no serious difficulty in the execution of his plan, whatever results will be an accident. The burglar who is unexpectedly shot while plundering his intended victim, provided he thinks he hs been guarded enough not to arouse the latter, is the victim of an accident. Going a step further, the murderer who has good reason to believe he has covered his tracks, and is caught and hung, suffers from an involuntary accident when his neck is placed within the noose and the platform is suddenly dropped from under.

This, to our mind, is trifling with language, and the case is not materially helped in the present instance by the fact that the policy provided also for the payment of a specific amount in case of death from natural causes. Death voluntarily invited by violence is neither the one nor the other.—*Monitor.*

THE BRITISH TIMBER MARKET

Farnworth & Jardine's wood circular, dated Liverpool, 1st May, says that the arrivals from Canada during April have been 3 vessels, 2,107 tons, against 1 vessel, 770 tons, during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1893, 1894 and 1895 has been 41,874, 43,510 and 44,395 tons respectively. "The market continues in the same quiet condition reported in our recent circulars. The deliveries during the month have been very light, and stocks of all articles are ample; values generally rule low.

"CANADIAN WOODS. — For Waney and Square Pine the market is unchanged, and stocks sufficient. Red Pine has not been enquired for; prices rule low and the stock is moderate. *Oak.*—There is rather more enquiry, but no change in value, and the stock is ample. *Ash.*—The arrivals have been again from the United States, the bulk of which is going direct into consumption: the stock, however, is still too heavy. Elm has moved off more freely; prices are steady and the stock is moderate. Pine Deals have moved off slowly, buyers holding off until the new import. Prices are easier in sympathy with the decline in freights; the stock held over is much too heavy.

"NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—Of spruce the arrivals have consisted of three shipments from Halifax, which are going direct into consumption. The deliveries have been disappointing, and the stock is still much too heavy. Prices are easier.

"BIRCH.—Of logs there have been no arrivals. The deliveries during the month have been large, and the stock is now reduced to a more moderate compass. Prices are steady. Of planks the stock is still much too heavy, and prices continue exceedingly low.

"UNITED STATES OAK.—The arrivals have consisted of one parcel of Mobile wood; the stock is still too heavy, and prices rule low. Of oak planks the import has been too heavy for the present limited demand; stocks are increasing; values have declined throughout the month, and sales are now very difficult to effect.

"PITCH PINE.—The arrivals during the past month were 5 vessels, 5,945 tons, against 6 vessels, 5,150 tons, during the same time last year. Of hewn there has only been one large parcel; a fair quantity has gone into consumption; values practically unchanged; the stock is ample. Of sawn the arrivals have been chiefly from Pensacola; the consumption has again been small, prices continue very low, and the stock is excessive. Planks and boards have arrived very freely; there has been a moderate consumption; the stock on hand is far too heavy.

"SEQUOIA (CALIFORNIAN REDWOOD).—The arrivals have consisted of one large cargo, 109,000 feet, which is all going into the yard; prices are very low, and the stock is too heavy.

"BRITISH COLUMBIAN AND OREGON PINE — There has been rather more enquiry, but at declining prices, and the stock is still too heavy.

"UNITED STATES STAVES have again been imported on a large scale; stocks are heavy and demand limited.

"BALTIC AND EUROPEAN WOODS.—The arrivals during the past month have been 21 vessels, 11,428 tons, against 33 vessels, 17,840 tons, during the like time last year. Of fir timber there have been no arrivals; the deliveries have again been small, and the stock is too heavy. *Red and White Deals.*—The import has been very small, the deliveries also very moderate, and the present stock is much too heavy. *Flooring Boards.*—There has been a free import, and the deliveries have been fair; prices, however, have had a declining tendency, and the stock is too heavy. Masts and spars have not been imported."

—A large deficiency existing in the Chenango Valley Savings Bank of Binghampton, N.Y., was covered up to some extent by the same method pursued by Treasurer Dann of the National Savings Bank of Buffalo, which "flew up" so badly several years ago. Money paid in to satisfy mortgages, would be pocketed and the mortgages discharged, but carried as live assets on the books of the bank, interest being kept up by subsequent stealings. This form of pilfering is the most difficult to guard against in the absence of a most thorough and detailed examination.—*American Investments.*

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents or to

DECISIONS IN COMMERCIAL LAW.

TORONTO STREET RAILWAY CO. v. GOSNELL.—A decision of the Supreme Court of Canada led the Toronto Street Railway to expect that they might have the rule there laid down, that a person driving a team across a steam railway track is obliged to look both ways before he crosses a track to see if a car is coming, applied to persons driving across their tracks in Toronto. The Supreme Court, however, did not apply the same rule to cases of electric cars in cities, and where an action was brought for damages arising in consequence of injury by a trolley car colliding with the respondent's team, and the appellants contended that he did not look to see if the car was coming before he started across the track, and that his own negligence, therefore, led to the accident, the respondent was held entitled to retain the verdict against the company.

COFFEY v. SCANE.—Where a man having numerous creditors in Ontario, leaves the province openly to reside in the United States, after publicly announcing his intention so to do, without paying his creditors, and after his departure it is found that statements made by him as to property available to pay his debts are false, and that nothing is in fact available for that purpose, his arrest upon civil process, upon his return to Ontario for a temporary purpose, intending to return to the United States, is justifiable, according to the Court of Appeal.

HURDMAN v. CANADA ATLANTIC RAILWAY COMPANY.—Where a railway company sent an engine and crew to the yard of a lumber company, and under the direction of servants of the lumber company cars of lumber were shunted from place to place by this engine and crew, the railway company were held liable in damages for the death of a servant of the lumber company, caused by negligence in the management of the engine, and the Court of Appeal defined a finding by the jury that "the deceased voluntarily accepted the risks of shunting," to mean that he accepted the ordinary risks, and not risks arising from negligence.

KENNEDY v. AMEERICAN EXPRESS COMPANY.—Where dogs were delivered to an express company to be carried to a city for the purpose, made known to the company, of being exhibited at a dog show, and were not delivered at the address given until ten hours after their arrival in the city, and were thus too late to compete, their owner was held by the Court of Appeal entitled to damages against the company.

OLDRIGHT v. GRAND TRUNK RAILWAY COMPANY OF CANADA.—A railway company is bound to provide for passengers safe means of ingress to and egress from its stations, says the Court of Appeal; and where a passenger arriving at a station at night walked along a platform that was not intended to be used as a means of exit, but was not in any way guarded, and after leaving the platform fell into an excavation in the company's grounds and was injured, the company was held liable in damages.

TRUMAN v. RUDOLPH.—Where the workman is aware that the employer knows of the defect in machinery that ultimately causes the injury to an employee, he is not bound to give information thereof to the employer, and his failure to give information in other cases will not bar his right of action if a reasonable excuse is shown for the omission, this being a question of fact for the jury. Where both the employer and the workman know of the defect, and it is the workman's own duty to see that the defect is remedied, but orders given by him with that object are not carried out, the Court of Appeal decide he cannot recover.

IN *re* SOLICITORS.—Upon a summary application by a client for an order for payment over by three solicitors of moneys of hers alleged to be in their hands as a firm, and in default for an order striking them off the roll, the Court of Queen's Bench held that no professional misconduct being suggested against two of them, one of whom had left the firm before, and the other of whom was ignorant of the receipt of a large sum of money by the third, the summary order asked for could not be made against the two, although they might be liable in an action.

IN *re* MURPHY.—In extradition proceedings the Court of Common Pleas thinks it is sufficient if the evidence discloses that the offence under the Extradition Acts is one which, according to the laws of Canada, would justify the committal for trial of the offender, had the offence been committed therein, it not being essential to show that the offence was of the character charged according to the laws of the foreign country where it was alleged to have been committed; and it is doubtful whether evidence is admissable to show what the foreign law is

—The two oldest secret trade processes now in existence are considered to be the manufacture of Chinese red, or vermillion, and that method of inlaying the hardest steel with gold and silver, which seems to have been practiced at Damascus ages ago, and is known only to the Syrian smiths and their pupils even to this day.

9 Toronto St. Toronto, Ont.

Mercantile Summary.

"I WISH I could find out the day when my wife means to clean house," said the head bookkeeper, gloomily. "Why?" "Because then I could fix the date when the firm's business will make it imperative for me to leave town."

THE statement is circulated in London "that the Manchester Ship Canal Company is about to ask the Manchester city council to forego the interest on the £5,000,000 lent by the council to the company."

THE Credit Foncier of France, which asked for a loan of 250.000,000 francs, or £10,000,000, has received applications for nearly 8,000,000,000 francs, or £320,000,000, no less than 400,000 subscribers desiring to take part in the operation. The mass of applications goes "to prove how great is the volume of capital in France seeing investment."

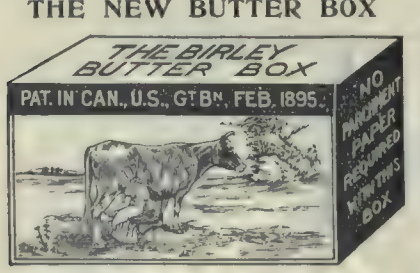
A MAY party in Chicago was interrupted by fire, and a number of persons were more or less injured by the rush for the stairway after "fire" had been cried. Those in front were forced down faster than their feet could carry them, and they piled up at the landing. There were some broken bones, and many were bruised badly, but no one was crushed to death. This kind of an accident, says *Black and White*, proves the necessity of always carrying some accident insurance.

HENRY BARBER & Co. sent out a dividend sheet of the Toronto Fringe and Tassel Co. to the forty-four creditors interested. These creditors are not numerous iu Toronto, but Montreal and half a dozen American cities furnish their quota. The total liabilities are $16,820, and the stock realized $4,632. Out of this last sum was paid in taxed costs and settlement of various suits no less than $1,600, while auctioneer's, inspectors' and trustees' fees, etc., ran away with $2,448, leaving for creditors "the small end of the horn," namely, $757, which suffices to pay 4½ cents in the dollar. So that the smallest creditor gets—or after May 27th will get, if nobody makes objection—9 cents for his $2 claim, while the largest creditor will get $273 instead of $6,065. Let us hope they are thankful.

IN the matter of Robert McLenaghen, of Minnedosa, Man., a circular has been sent out by the assignee, S. A. D. Bertrand, of Winnipeg, to the 55 creditors scattered from Quebec and Three Rivers to Windsor and Winnipeg, explaining why the sale of the estate a year ago has not been carried out. The purchaser, R. J. Spratt, who agreed to pay 37½ per cent. on the general liabilities, subject to the payment of $1.050 executions, in six, nine a twelve months, and give security, has not be able to do so because of slow collections reason of poor crops and poor prices theref Mr. Bertrand and the inspectors advise th Mr. Spratt be given the further time he ask viz., until next autumn, and this seems the be thing to be done.

A DISASTER that illustrates the risks dai and nightly run by the many and swift steame plying on the Great Lakes, took place la week in the Straits of Mackinaw. Two scre steamers, the "Cayuga," of the Lake Tran line, bound up, laden with merchandise, a the "J. L. Hurd," of Detroit, laden with lu ber, bound down, collided in a dense fo and both sank. The crew took to the boa and were picked up by a passing steamer wi one exception, the cook of the "Hurd," w could not be found. The steamer "Cayuga was built at Cleveland in 1889. She was 2 feet long, 40 feet 8 inches beam, and 13½ fe deep, registered 2,660 gross tons, rated A1, a was valued at $175,000. She was insure The "Hurd" was built in Detroit in 18 Her dimensions are: Length, 171 feet; bea 29 feet 2 inches; depth, 10¾ feet. She reg tered 759 gross and 592 net tons. She w rated A2 and valued by Lloyds at $15,000.

THE NEW BUTTER BOX



This is the latest style of putting up 1 lb. prints. The board is specially treated both inside and out, so as to make it both grease and water proof. By this means the waxed wrapping paper hitherto so generally used is entirely dispensed with, as also are those wooden butter dishes and other such like unsightly contrivances. This box is by far the best and most stylish package for butter that has ever been put on the market. It is also very cheap. If you are interested write for samples and prices to the manufacturers.
